

Limitations: The adverse event and product problem reports contained in this record are not necessarily causally related to (caused by) the reported product, nor do they mean the product was defective. Consumer complaints involving animal foods are received by FDA through voluntary reporting systems. Not all reports undergo follow up actions by FDA; however, each report received is important to FDA as part of our ongoing surveillance efforts related to pet food safety. Trends in reporting can provide an early warning of emerging safety issues of concern.

Other limitations:

- For any given report, there is no certainty that the reported pet food caused the adverse event. The adverse event(s) reported may be more related to an underlying disease, condition, or concomitantly administered medication.
- The report narratives are provided in the form in which we received them, the quality of the information provided about the adverse event/product problem is dependent on the quality of the information received from the veterinarian and/or pet owner.
- Adverse event report numbers should not be used to calculate incidence rates or measures of relative risk. It is not data from a controlled study, and there is no accurate way to know the true size of the population exposed to a product, nor the true population affected with an adverse event.
- Adverse event data should not be used to compare the safety of different products. Many factors can influence reporting, and products that are more widely distributed or sold in greater volume may have more reporting than those with limited distribution or sales. Products for which there has been recent publicity may experience more reporting for a period of time afterwards. Underreporting is also common with adverse event reporting systems.

EON-122408	4/30/2013 23:00	Nutro Lamb and Brown Rice Small Bites	<p>Been feeding the Nutro Lamb and Rice small bites for 9 years. Apparently the latest bag was a "new and improved" formula.</p> <p>Started giving new bag of food on Monday. Same day started acting strange.</p> <p>Tuesday was annual vet visit. Everything fine except elevated heart rate (attributed to anxiety). Full blood panel looked great. Stool sample checked out.</p> <p>Through the week continued to act more lethargic, ate less than normal, and stood with blank stares. Sunday (b)(6) came home to find dog laying on the floor, extremely fast hart rate, pale gums, and cold feet.</p> <p>Brought to emergency vet clinic. Symptoms of tachycardia and fluid wave in abdomen. Abdominocentesis positive for blood.</p> <p>Diagnosed as an intra abdominal hemorrhage. Opted for euthanization over surgery.</p> <p>Found out later several others have complained about the same food: http://www.consumeraffairs.com/pets/nutro.html</p>	11	Years	Other Canine/dog	Dog	38	Pound
EON-122394	4/30/2013 16:48	Nutro Natural Choice Adult Toy Breed	<p>We have been using Nutro for years to feed our Chinese Crested and he loved it. On 1/9/13 we need to buy more and the bag states new and improved. On the (b)(6) our 10 year old, who was previously health, was so sick we had to put him to sleep. At that time we were stunted because he had been fine. Just to note, his last vet appointment in November.</p> <p>On the 1/14/13 our 9 month old Chinese Crested started vomiting blood. We are blessed that after two day of treatment she is during better.</p> <p>The only change that we can think of was to the food, Nutro Natural Choice for Toy Breeds. I called Nutro and the rep said the only change to the formula was to add flavor. (Green Tea and Spearmint extracts) They are sending us a sample kit to test the food and we are having a copy of the veterinarian report faxed to them for both dogs. Unfortunately, from our conversation I got the feeling they are used to this kind of phone calls. There really was no compassion what so ever, just a lot of questions.</p>	9	Months	Chinese Crested Dog ı Hairless	Dog	7	Pound

EON-122379	4/30/2013 15:54	evo herring and salmon kitten and cat formula dry evo turkey and chicken kitten and cat formula dry	<p>aside from some cats having stomatitis the cats were healthy and thriving. prior to my 20 year olds death, a unobstructed mass was discovered in her intestines (I took her in for vomiting diarrhea. lethargy and not eating. she was also diagnosed with hyperthyroid, but the vets were surprised she died saying this was not the cause. Both (b) (6) and (b) (6) weighed 8-10 lbs prior to getting sick within a 2 month time period of eating the recalled EVO food. when they died they weighed 4-5 lbs had rapid weight toss, severe dehydration lethargy refusal to eat and non regenerative anemia (a side effect of salmonella. since 3 had died back to back, I had vet perform blood work on others and 12 came back with high protein non regenerative anemia. some still had diarrhea and I had 2 stool samples tested for salmonella which came back negative. However, by this time I had sopped feeding them the EVO, even though the company had stated it was perfectly OK to keep feeding it. I no longer have the bags but the companies I purchased from state the bags they mailed to me were part of the recall according to their records. the EVO company keeps saying they voluntarily recalled and no salmonella was actually found but I really think this food caused my cats to suddenly die and get the non regenerative anemia. I wanted to document this with you and make others aware that the company is possibly lying to them. I am very upset over the sudden deaths of my cats and find it odd the deaths occurred during the recall timeframe. this is for various cats but your drop downs only allow information on one</p>	7	Years	Mixed (Cat)	Cat	5	Pound

EON-122361	4/30/2013 14:33	California Naturals - Venison Formula	<p>We have been feeding our two Pembroke Welsh Corgis California Naturals - Venison formula for about 2-3 years. In late February/Early march we purchased a new bag from Pet Supply in (b) (6), (b) (6). After a few days both dogs became violently ill (vomiting & diarrhea) which lasted for several days. Our older dog is 11 1/2 yrs old, she suffered the worse symptoms including bloody diarrhea which lasted 5-6 days, weight loss, lethargy, loss of appetite and has not "bounced back" as well as our 4 yr old corgi. She has been on two different antibiotics and probiotics and lots of tests but is still very sick.</p> <p>We noticed the dog food recall notice and wondered if the original diagnosis of "food intolerance" could have been wrong. Can you tell us if you have had reports of other dogs in our area who have also become sick after being fed California Naturals? Also, how do we go about submitting a formal complaint regarding this situation? Over the last 4 weeks, we have spent over \$1000.00 in vet bills trying to get our dogs healthy. Last night, we had to take the older corgi to the emergency vet because she is still so sick.</p> <p>Please help us get our pups back to health!</p> <p>Sincerely, (b) (6)</p> <p>We estimated the date we purchased the food below but had the bag for about a week before opening and feeding our dogs.</p>						
EON-122224	4/30/2013 11:09	Innova Senior Plus Dog Food	<p>I just recently switched (b) (6) to Innova Senior Dog food. On April 4th he started having Diarrhea and over the next two days it became progressively worse and contained blood. On the morning of April 6th, I took him to the emergency vet who diagnosed him with hemorrhagic gastroenteritis. (b) (6) was admitted for dehydration as a result; he was put on a bland diet. On April 20th, I went to Petco to purchase more dog food and was told that all of the Innova products had been recalled due to Salmonella. Based on discussions with our vet technician and the vet technician at the emergency vet as well as additional research, I am concerned that the gastroenteritis is related to the Salmonell recall</p>	10	Years	Terrier - Cairn	Dog	16	Pound
EON-122087	4/29/2013 16:00	whiskas Temptations	<p>Two cats on separate occasions, approximately 6 months apart, were fed Temptations Cat Treats (by MARS Pet Care) purchased from different locations. The two cats lived in different households about 100 miles apart. After approximately an hour the cats had identical symptoms. These symptoms were extreme violent vomiting followed by a wailing sound and trying to vomit again. Each cat lay down and slowly passed away over a 5 minute period with labored slow breathing and relaxed tongue. Tail was non responsive if lifted. please see web site for other customer complaints: http://www.consumeraffairs.com/pets/whiskas-cat-food.html</p>	3	Years	Domestic (unspecified)	Cat	7	Pound

EON-122045	4/29/2013 14:15	Purina ProPlan Shredded Blend and Purina One Smartblend	I tried Purnia Proplan shredded blend (was using Performance) for a puppy a year ago...resulted in diarrhea. I recently tried to use the Proplan shredded again for my adult dogs because the Performance cost has risen too high. It resulted in loose stools, low energy, for all dogs, and skin/eye/allergy problems for one. I then tried the Purina One and when I opened the bag found that it too was now "shredded" and after trying it for a month and a half, it gave the dogs the same symptoms as all the other shredded types. I don't know what is wrong with the food, but MANY other hunters have experienced the same problems, especially the loose stool. Several state they have contacted Purina and was simply given a "form reply" message.	2	Years	Coonhound (unspecified)	Dog	50	Pound
EON-122028	4/29/2013 12:54	Innova Dog Food	Purchased Innova bag of food with Salmonella poisoning 2 weeks ago. (b) (6) did not want to eat the food but did so and thus I spent the weekend cleaning up after his diarrhea and vomit and bathed him multiple times. He is still extremely sick.	3	Years	Retriever - Golden	Dog	84	Pound
EON-122024	4/29/2013 12:09	Nutro Natural Choice Adult Wholesome Essentials Chicken Whole Brown Rice & Oatmeal Formula	(b) (6) is my almost 3 year old Miniature Schnauzer (couldn't put it in above) and service dog. He was on Castor & Pollux ORGANIX and I switched him in January to NUTRO NATURAL CHOICE Chicken grain free as it was bigger kibble. It came highly recommended by a NUTRO rep. Well we were ok on the new food until in March, my senior dog, (b) (6) passed away. We purchased a 33lb bag of food for both dogs. Shortly after her passing, (b) (6) started to vomit all over the place and start panting heavily and laying in the praying position. I thought it was nothing more than a stomachache and that he would be alright with just some 2nd generation baby food (chicken or turkey and gravy, and bananas) and a little bit of canned pumpkin. He seemed to tolerate that and we progressed to some boiled chicken and rice. He brought that up and again I backed off. He would seem to be ok and then back he'd go to vomiting, panting, and stretching himself out. I finally called my vet after he was worse the second weekend and brought him in on the Monday morning.	3	Years	Schnauzer - Miniature	Dog	18	Pound
EON-121916	4/28/2013 22:45	whiskas	acute kidney failure....she was the only cat out of 4 that ate that product.....i would like to mention that i have been feeding a group (9) crows whiskas for three years and they have recently disappeared. my cat is stable but very very ill. i don't remember my kitties weight she is large but very muscular....there is no date of recovery. she is very ill.	7	Days	Domestic Shorthair	Cat	14	Pound

EON-121890	4/27/2013 0:18	Friskies Indoor Delights	All 3 previously healthy cats developed lesions and sores on back, neck, and chin after eating the same food. All 3 with the same symptoms. None are outside cats. I first noticed blood on the back of one of the cats. (The youngest). Upon further inspection I noticed several already scabbed over and fresh sores on his back. I cleaned the wounds and watched closely. A few days later I noticed he was red and raw under his mouth. After that his lymph nodes on his neck were swollen at which point I took him to the vet. The vet stated she suspected an allergy. After returning home I checked the other 2 cats and found the same lesions, just not as severe. They are both 13 years old.	2	Years	Domestic (unspecified)	Cat	13	Pound

EON-121889	4/26/2013 23:21	wellness lamb & sweet potato	pomeranian dog stopped eating, throw up not active anymore had CBC done and came back as pancreatitis spent 2 days in the hospital with IV came home and had to eat special food then in 2 weeks had to have another CBC done and blood work came back fine it all started when I feed her that food which they have been eating all the time nothing else took them all off that food and they are fine the canes that I have always received had small black writing on bottom of can this one had large green writing on the bottom of can and the food was so much different very soft and looked like fat on top not the way it always has been the code on can was MWLP 22:21 (A) BEST BY 15 Oct 15 contacted wellness and explained to them about the cans of food they asked me all kinds of questions what happened how many days was she in the hospital did the other dogs get sick what was it told them and my Vet said this usually happens when the dog has very fatty foods and my dogs only eat wellness and nothing else they were quiet and have not heard nothing else from them and now they do not answer my email I also told them that their biscuits are different not the same it is the apples, yogurt and bananas Oct 2013 my other dog also started to throw up but is also ok not eating that food when taking off was fine alot of other people in the pet store is complaining about this food also it turns out it is made in their Utah plant	7	Hours	Other Canine/dog	Dog	10	Pound
EON-121888	4/26/2013 21:57	Hill's Science Diet Adult Indoor dry cat food	Our cats have been eating Science Diet Adult Indoor dry cat food for years without incident. Recently, Science Diet abruptly switched their formula. It's common knowledge that cats need to slowly transition into new foods or else they suffer digestive problems. This is what happened with our cats. We bought a new bag when we'd finished the old bag, but we didn't know that they'd changed their formula. We had no way to slowly transition them between foods. Within a day of eating the new food, one cat began to vomit at least once a day. Within a week, the other cat was also vomiting and won't eat any food we give him. We've confirmed with our vet that the underlying cause is likely the rapid switch to the new food. A quick online search revealed many other cat owners who are having the same problem.	8	Years	Unknown	Cat	12	Pound

EON-121887	4/26/2013 21:52	Kingdom Pets Chicken Jerky	<p>April 26, 2013</p> <p>I sent the following email to KingdomPets regarding their Chicken Jerky product:</p> <p>"I am a former Animal Health Technician (Vet Tech) and have recently discovered Kingdom Pets Chicken Jerky dog treats are making my three dogs ill. Although your testing may show they are safe, and it may even show there are no antibiotics, there is "something" in them that make my dogs either have runny stool and diarrhea or they vomit, and I have photos. There is no doubt from the photos exactly what is in the vomit.</p> <p>I have tested my dogs myself, giving them the jerky once each night only to discover their horrible looking stool a couple of days later, then I stopped giving them the treats while feeding them the exact same food for three days straight and their stool returned to normal. I then again began feeding all three dogs the Kingdom Pets Chicken Jerky and the nasty stool and diarrhea showed up again.</p> <p>Last night, April 22, 2013, one of my German Shepherds couldn't take it anymore and she's the one who threw up the chicken jerky all over the bed. Many people have warned you about this, even as far back as 2007 from what I just found in an online forum, so hopefully you'll soon begin to take this seriously.</p>	3	Years	Shepherd Dog - German	Dog	80	Pound
			<p>Maybe it isn't life-threatening, I don't know, but I do believe, given my medical background in Animal Health, that your chicken jerky could possibly kill a smaller breed dog than my own. I have large German Shepherd Dogs and an Australian Shepherd who can tolerate ingesting tainted food better than smaller dogs since the ratio of what I give them (one chicken treat per day) compared to their body weight is relatively large. If a smaller breed dog eats one of your chicken jerky pieces per day, that could possibly do him in.</p> <p>PLEASE stop ignoring this problem. I have alerted Amazon.com where I recently purchased your Chicken Jerky and they have refunded my purchase price so I'm not asking for any money back. I do still have one of the two bags left if you want to send a return prepaid label so you can test it, please let me know. I hope Amazon listens to what I and many others are telling you and they no longer sell Kingdom Pets Chicken Jerky. I know of several people who are going to contact their local media as well.</p> <p>Thank you for your time.</p>						
EON-121882	4/26/2013 19:18	OI Roy Large Breed 100% Complete & Balanced Nutrition	<p>both dogs got very sick with bloody diarrhea, incontinence, and refused to eat. One dog died and we were able to save the other one, so far with the help of our vet and a bland diet for the next few days and rx medications.</p>	11	Years	Retriever - Labrador	Dog	74	Pound

EON-121879	4/26/2013 16:36	Innova Large Breed Puppy dry dog food	<p>Our dog is a Bernese Mountain dog, but that was not listed in the pull down menu for breed above. We have been feeding him Innova large breed puppy food since he came to us at 10 weeks old. He had bouts of diarrhea and vomiting, decreased appetite, lethargy, and finally limping. Each of these symptoms appeared in that order over the course of several weeks. In addition, his eyes became very bloodshot. We brought him to the vet on 4/17/13, and she prescribed Rimadyl for the limping, which was not severe. She asked what we were feeding him, and although I reported Innova, she did not make me aware of any recall. That same evening, my husband went to both PETCO and PETSMAART and saw the food recall posted. We returned the food to PETSMAART, and switched the dog to Blue Buffalo. The lot number of the food was 3015A70002, with an expiration of 1/15/14. Imprinted next to that date was 20:56. It was a 30 pound bag of dry kibble large breed puppy food, and he had eaten about half the bag. Almost immediately, within a day or two, his appetite resumed and he became much brighter and more active. The limp resolved itself without the prescribed Rimadyl within 4 days of starting the new food. His stools became formed and regular in about a week, with improvement noticed each day. No vomiting since switching the food. I am quite sure this bag was contaminated with the salmonella, and it is posted on the additional extended list of lot numbers Natura posted.</p>	11	Months	Other Canine/dog	Dog	108	Pound

EON-121732	4/26/2013 0:03	Blue Buffalo Small Breed Adult Chicken & Rice Formula	<p>I ordered a new bag of Blue Buffalo Small Breed Adult Chicken & Rice Formula that arrived 3/29/13. The next morning after feeding my dog a serving from the new bag of food, which was approximately 9 hours later, she vomited up the food. This happened for every morning for a total of 3 days until I realized it was likely the new bag of food causing the vomiting.</p> <p>She has not vomited again since stopping feedings from the new bag of food.</p> <p>This is the same food I've been feeding my dog for 5 years, and I've been very happy with the food, but having seen plethora of reports that Blue Buffalo dog food is making dogs sick in the past 3 months, I am concerned that there has been a formula change that is making many dogs sick. http://www.consumeraffairs.com/pets/blue_buffalo.html</p>	5	Years	Chihuahua	Dog	10	Pound
EON-121731	4/25/2013 23:27	Innova Puppy Food	(b) (6) he is a German Shepherd/ Blue Heeler mix. He started to have diarrhea. Then it got so bad that he could not even control it enough to make it outside. It was pure liquid and he had to go outside every 30 minutes. I then took him to the vet and he was on antibiotics, and chicken and rice meal, and I was told to stop the food.	11	Months	Other Canine/dog	Dog	65	Pound
EON-121730	4/25/2013 22:06	Purina One Smartblend	Started feeding her Purina one smartblend and became ill. She was vomiting, had bloody diarrhea, lethargic, she passed away on (b) (6).	2	Years	Mixed (Dog)	Dog	9	Pound

EON-121692	4/24/2013 22:06	Innova Dog Prime Grain Free Chicken & Turkey Formula	<p>On March 29th, 2013, Natura Pet expanded a voluntary recall of California Natural, Innova, EVO, Karma and Healthwise formulas as a precautionary measure due to potential Salmonella contamination.</p> <p>On April 13th, 2013, PetSmart (b) (6) Store # (b) (6), (b) (6), had not pulled all Natura Pet recalled products from shelves and had no notices up, and sold me 1 25 lbs bag of INNOVA DOG PRIME GRAIN FREE CHICKEN & TURKEY FORMULA; SKU 7 51485 12724 8.</p> <p>On April 24th, 2013, PetSmart Marketing advised me by email of the recall.</p>						
EON-121688	4/24/2013 20:03	Innova Prime grain free chicken and turkey	Dog developed mucus filled diarrhea, and had a lack of appetite. Took him to the vet, they did a stool examination and then gave him antibiotics. The mucus went away but the loose stool continued off and on. Went back to the vet, switched him to prescribed dog. After about a week his stool was back to normal.	21	Months	Mixed (Dog)	Dog	25	Pound
EON-121684	4/24/2013 15:33	evo dry food chicken and turkey	<p>I started to give EVO dry cat food in 2/20/2013. all my cats became very sick . The product was recalled but I did not know. I put down one cat and the other two cats still taking antibiotic for Salmonella poisoning. The agriculture dept in state of (b) (6) started the investigation and took some cat food (dry EVO Chicken and Turkey) from my house. They found Salmonella in the food. The manufacture is powerful and do not listen . Can government do something to save the consumer and pets?</p> <p>thank you</p> <p>(b) (6)</p>			Domestic Mediumhair	Cat		
EON-121583	4/24/2013 9:36	EVO the ancestral diet turkey and chicken formula dry	began giving EVO ancestral diet turkey and chicken dry bag food to my cats and within 5 days (b) (6) began to show signs of intestinal distress ie vomiting and diarrhea so I took her off the food thinking it was just because of the change in hard food but within 24 hours she was getting worse and my other cat, (b) (6), began to show the same symptoms. They were both off the EVO but continued to deteriorate. I ultimately had to take them both in to the emergency vet where they were both diagnosed with salmonella poisoning. I investigated the EVO dry food on the internet and discovered it had been recalled because of salmonella contamination.		Years	Domestic Longhair	Cat	6	Pound
EON-121553	4/23/2013 21:03	Evo Turkey and Chicken formula	I had switched to EVO dry food and was feeding both animals dry food alone. We were about two thirds through the bag when the younger, smaller dog became ill. He had severe diarrhea, was lethargic and seemed to be in pain. He showed no interest in food. The second, older dog seemed lethargic and was also not interested in food. I stopped feeding both and got an appointment with the vet. I thought it might be constipation, but the vet performed an X-ray and said his stomach and intestine was totally empty. Blood work was done as well as stool sample (a few days later when there was something to sample). Both dogs were kept from food for 24 hours and then introduced using Scient Diet intestinal health wet food in small dozes to see how they would tolerate it. I was able to increase the feedings over the next few days. The younger dog was given antibiotic injection and put on medicine for a few days to fight what ever was making him sick. The vet said there was nothing in blood work that indicated anything other than he was a healthy dog.	4	Years	Mixed (Dog)	Dog	30	Pound

EON-121407	4/23/2013 2:18	Canine Carry-outs beef flavor	On Friday, April 12, 2013, our Golden Doodle (Golden Retriever/poodle mix) (b) (6) threw-up and then had diarrhea. She was very listless and refused to eat or drink. On Saturday April 13, we took her to the vet. He diagnosed her with gastroenteritis, and gave her several kinds of medication. That afternoon she was feeling much better and begged for a treat. I gave her one Canine Carry-outs beef flavored treat made by Del Monte. After about a half hour, she became much worse. I massaged her tummy and after awhile she went to sleep. When she woke up, she was again feeling much better. She did not receive any more treats. By the following Tuesday, April 16, she seemed to be completely recovered. She has been eating Canine Carry-outs beef flavored for years with no ill effects. I do not know if the treats caused her illness, but I do know she has not eaten anything else out of the ordinary. When she goes outside, she is always on a 20 foot wire leash and her area is checked daily for foreign objects. I have not seen any. It seems suspicious to me that she became more ill after eating one treat, but it is entirely possible that if she had eaten anything at that time, it would have made her sicker, because of the nature of her illness. If it was the treat, it would be good to know to warn other pet owners, and the manufacturer. I have the remaining pouch of treats and am reasonably certain, I can find the sales slip if needed.	5	Years	Poodle (unspecified)	Dog	60	Pound
EON-121406	4/23/2013 1:57	Whiskas Natural Temptations Yellow Fin	Purchased Temptations Naturals - Yellow Fin flavor. Fed 2 of my 5 indoor cats these treats at 2pm on 4/15/2013, approximately 6 each. None of my 3 other cats received them. At 9:30 pm (b) (6) had severe diarrhea and vomiting, my 2nd cat, that consumed the same treats, had vomiting and hid. Unable to afford a vet, I treated the symptoms by getting all food out of reach & leaving only water available for 24 hrs. The 2 cats partially recovered in 72 hours, water, rice & chicken being their sole diet. A 3rd cat of mine started having the same health problems within 48 hrs. of 1st onset cat. A 4th cat started having the same issues 96 hours after onset. Trying to figure this all out! Cleaned, sanitized and replaced the litter in all cat boxes & sanitized the surfaces that the cats use. My 5th cat only showed signs of stomach ache & did not socialize for 24 hrs by hiding also. Only dietary change was the treats. Cats are are stable and no humans were harmed as of yet. Gotta love gloves and Lysol! Samonella? I purchased several bags of the same product & still have then in my possession.	2	Years	Domestic Mediumhair	Cat	8	Pound
EON-121405	4/22/2013 22:03	Carry Outs Bacon Flavored Treats	Excessive thirst started 4 days after owners started using Del Monte Bacon Flavored Carry Outs Treats. Had glucosuria, mildly elevated blood glucose, mildly increased creatinine, and decreased appetite. She is slowly improving since stopping the treats.	8	Years	Dobermann	Dog	78.6	Pound
EON-121395	4/22/2013 19:33	INNOVA Senior Plus Dog Food	Severe tummy upset. She started to pass mucus and have very runny diarrhea that she could not hold. She was also listless for a few days. We fed her twice from this bag and then stopped when she started to be sick.	11	Years	Sheepdog - Old English	Dog	90	Pound
EON-121343	4/22/2013 14:51	Happy Hips Duck Breast	Cut open the bag of treats and it was filled with ants. Threw the bag in the sink and drowned the ants in hot water. Threw the treats away. Bought the bag the day before and it was unopened.						

EON-121329	4/22/2013 13:06	Dingo Chip Mix	We purchased a bag of Dingo Chip mix at Wal-Mart. It has rawhide chips and chunks of chicken from China in it. We gave her one and several hours later another (b) (6) went completely off her food. She started consuming large quantities of grass and throwing up. She became lethargic. We took her immediately to the vet who x-rayed her stomach to see if she had a blockage. She did not. He did a complete blood workup including a CBC, electrolyte panel, and vet chem 17. Everything came back normal. He gave up Cerenia tablets for nausea. (b) (6) didn't eat at all the next day, but the day after that, she started eating again. We were at a loss as to the cause of her stomach problems. I looked to see if her dog food, Buffalo Blue, might have been recalled. It was not. The only thing that was changed in her diet was the Dingo Chip Mix. I did read the recall and warning on chicken from China in pet food. I checked the package of the Dingo Chip mix and saw it was from China. I can only assume the chicken was the culprit. Get this: the package came with a warning which read, "Caution: Feed as a treat or reward once per day. For supervised consumption only. Select a chew slightly larger than your pets mouth. Discard chunks or fragments. Always provide plenty of fresh drinking water and visit your veterinarian regularly. Wash hands thoroughly after handling." Why would I have to wash my hands after handling unless it was tainted? I am very mad that you have let this problem go on since 2007. I had no idea that chicken from China could make my dog sick. If this was a human problem, it would have been banned as soon as possible. You are putting pets at risk of serious illness or death by letting this be imported from China.	2	Years	Retriever - Labrador	Dog	74	Pound
EON-121291	4/22/2013 11:27	Innova Small Bites	My dog has been having bloody diarrhea and vomiting. The vet had me start giving him chicken and rice to try to find the problem. I just started refeeding him Innova two days ago and he vomited. The vet does not believe my dog has come in contact with Salmonella (Innova has a current recall which I just found out about yesterday) because he says my dog would have died if he had. But, the symptoms seemingly started with the purchase of my last bag of Innova. I cannot determine if it would be included in the recall, because I put the dog food in an airtight container and threw the bag out, but I purchased it about two months ago, so the expiration date most likely falls into the timing for the recall. I did not follow up with the company because, as stated before, I do not have the packaging available.	1.5	Years	Shih Tzu	Dog	14	Pound

EON-121264	4/20/2013 13:57	EVO RED MEAT FORMULA DRY DOG FOOD	Purchase EVO Low Carb Red Meat Formula Dry Dog Food on APRIL 8th, 2013 and fed dog that product that evening and off an on for the next 2 weeks. Dog developed serious diarrhea immediately following first feeding, which we did not "connect" to the EVO food at that time. Took dog to vet but diarrhea did not respond to veterinarian medication given for 1 week. Saw a second veterinarian for "blood panel" test for \$225, plus new medication (\$88), but diarrhea persisted. Stopped feeding dog anything but chicken and rice for last few days, and condition is slightly improved. Have not fed EVO food for 4-5 days now. (April 20th).	12	Years	Brittany	Dog	56	Pound

EON-121263	4/20/2013 2:27	innova senior	<p>(b) (6) would eat and then he started vomited after almost every meal. His throw up would look like the cat food barely digested. We tried feeding home smaller meals to see if he was just eating too fast, but he would still vomit just not as much as when he was eating a lot all at one time. Our 2nd cat (b) (6) had minimal vomiting but stopped eating as much. She would only eat 10-15 kibbles of food at a time. Sometimes less. We went on vacation, and left a larger bowl of food out then normal. We had my father in law who lives with us watch over the cats while we were on vacation. He feed and watered them daily. One day he went in to check on the cats and noticed a lot of throw up all over the room. He cleaned it and feed them again. (b) (6) ate and then the next day my father in law couldn't find him. We got back from vacation the next day and (b) (6) was still missing. We lifted up the bed and there was our sweet (b) (6) passed away under the bed. This was extremely traumatizing we miss out boy so much to this minute. (b) (6) had no medical issues prior to this situation. He had been to the vet within the last 6 months for a check u and there were no problems. We switched the food today after finding out that the innova was on recall and we feed (b) (6). This was the first time she ate normally in weeks. She ate the whole bowl of food right away. It is like she knew something was wrong with the old food. (b) (6) is gone and we are extremely upset and sad. (b) (6) was depressed but is coming around now. Our boy was part of our family and we are deeply saddened from this event. Our boy had no problems prior to this situation.</p>	10	Years	Domestic Shorthair	Cat	17	Pound
EON-121262	4/20/2013 1:18	Innova Senior Plus	<p>Rapidly developed diarrhea in early March. A few days later our 11-year old Schnauzer also developed diarrhea (his was bloody). We figured that they must have picked up a "dog" virus during our mile walk earlier in the week, since they both had the same issue. We took them off their regular dog food (Innova for Senior Plus) and gave them bland Chicken and Rice for about 3 days. The diarrhea stopped and their stools looked much better. Then, we weaned them back to Innova. Once again, the diarrhea started. This dog seemed to be really tired and depressed, so I took her to the vet. She put her on FortiFlora, an antibiotic, and a bland diet. That afternoon, the diarrhea started again in the Schnauzer. So, we put them both on a bland diet. Once again, after a few days, we started weaning them back on Innova as the diarrhea subsided. After a few days, they both started having soft stools. I then started looking at the dog food. It had a strong seafood-like smell. However, there was no seafood ingredients on the label. We then decided it had to be the food. I then went out and bought Fromm Gold for senior dogs. Both dogs are now back to normal with good stools and good activity levels for "senior" dogs.</p>	12	Years	Mixed (Dog)	Dog	30	Pound

EON-121129	4/18/2013 15:36	Cadet Gourmet Duck Breast	After a minor leg injury at the beginning of March (b) (6) started losing her appetite and was very lethargic. Was on Rimadyl for injury, but we thought it was upsetting her stomach. Quit, and took Tramadol instead. Chalked up lethargy and loss of appetite to injury and inactivity. She then proceeded to drink large quantities of water, and urinated a lot. Continued to not eat. Had diarrhea and vomiting up mostly water. Animal hospital did not feel that the meds had anything to do with her illness, she had been off of them for a while before these symptoms all showed up. Injury on leg healed in meantime. Took her to Banfield, their test results indicated she had glucose in urine, but not blood. Liver and kidney values quite high. Liver function test normal. They couldn't see anything abnormal in ultra sound. Treated with antibiotic in case of infection. Urinary tract infection test negative (b) (6) stopped eating the duck breast when her appetite diminished, so hasn't eaten any for about 4 weeks, and have finally seen an improvement in her overall health starting April 14, 2013.	6	Years	Retriever - Labrador	Dog	75	Pound
EON-121033	4/17/2013 21:03	wAGON TRAIN CHICKEN JERKY TREATS cANYON CREEK JERKEY TREATS	I noticed growths coming under her fur . Also the dog started acting very strange , confused. I read about the chicken jerky treats that were recalled from China which I was giving her. Her condition has worsened she now has a mass in her stomach and possible mass in her brain. My dog had no previous problems except hip Dysplasia which she was born with. There is blood behind her retinas and the dr. said that there is nothing they can do for her	10	Years	Hound (unspecified)	Dog	86	Pound
EON-120935	4/17/2013 14:18	True Chews Chicken Jerky Fillets 100% Natural	On April 6, 2013, I purchased a bag of True Chews Chicken Jerky Fillets for my dog that claim they are made in America on the bag. At the time I gave her one treat on April 7, she was healthy and not ill at all. The following day, April 8, 2013, she began vomiting, had diarrhea with BLOOD and would not eat. She had a BRIGHT RED BLOOD on her rectum after defecating which I wiped off with tissues. She was sick and listless for two days. She refused all food for almost two days and only ate her dog food the night of the second day. I am aware of the issue with the chicken jerky made in China. My dog had similar reaction as I stated above after eating the Wagon Train and Milo Brands jerky. I was told by my Vet not to feed her anything from China. So I specifically avoided them and looked for American made jerky. I have given her other American made brands with no sickness. Then I found the True Chews Brand and decided to try it. Apparently, there is a problem with this American made product as my dog had a similar illness but with more intense reactions that she had when she ate the Chinese manufactured brands. This American made product needs to be looked at as they are an health risk for dogs and are being touted by the company as "100% natural and made in America" giving the dog owners a false sense of security that their dog will not become sick because they are not made in China. They are also charging a significantly higher price for their "natural" product which also gives the consumer a false sense that you are getting a better, safe product. I paid \$11.99 for a 12 ounce bag. This bag was purchased at the Petsupermarket store located on (b) (6) (b) (6). The stamped number on the bag is 0523IND0703, Best by 07/2014. UPC code is 031400038126. Thank you	9	Years	Poodle - Medium size	Dog	24	Pound

EON-120912	4/17/2013 12:33	Nestle Beneful Playful Life	I bought (b) (6) from a private seller 3 weeks prior to her death. She was active, loving, and already potty trained. The seller was giving her lams dog food before I adopted (b) (6). I slowly switched her food to Playful Life by Beneful because it was recommended to me by a close friend and I trusted that (b) (6) would thrive. The last day on the lams I gave half lams half Beneful. That same evening (b) (6) lost her appetite and was being lethargic. I didn't think anything of it other than she was just full and sleepy. The next day I woke up to diarrhea all over my apartment. I knew then she was truly sick. I didn't have money to even do a well puppy check at the vet and did research online to keep her hydrated and stop her nausea. At this time she completely stopped eating and I had to force fluids down her. She began vomiting and having loose bowels. This continued for 5 days and eventually led to her death. She was up to date on all shots and previously was healthy. I believe that the Beneful Playful Life was the cause of her death.	15	Weeks	Chihuahua	Dog	4	Pound
EON-120804	4/16/2013 23:03	Blue Wilderness Trail Treats natural baked grain-free salmon biscuits	Pet was given Blue Buffalo Wilderness Trail Treats Grain Free Salmon Biscuits beginning 4/12 for two nights. Each night between 12 Midnight and 3:00AM the dog suffered multiple seizures. Each of the two seizures per night were in duration of about a minute wherein (b) (6) foamed at the mouth, wet himself and had muscular spasms in the legs and torso. About a year ago, (b) (6) had developed an allergy to Blue Buffalo dry dog food with grain causing incessant itching and restlessness. Or this is what the veterinarian suggested. I observed multiples of complaints of allergic reactions causing itching and similar loss of hair online resulting from the ground up grain mites in Blue Buffalo dry dog food made with grain. This most recent episode involving grain free biscuits is most concerning. (b) (6) has completely ceased having seizures upon cessation of feeding him the grain free salmon biscuits. I purchased this product from Tractor Supply in (b) (6) on April 11, 2013 for \$6.99 plus tax.	5	Years	Schnauzer - Miniature	Dog	20	Pound

EON-120803	4/16/2013 22:36	Nutro Max Natural chicken meal and rice senior	<p>Pat the end of January my beloved dog had his annual check up and got a clean bill of health. Shortly after I bought him a bag of Nutro for Seniors as I was told at My local pet store that he should begin to eat senior foods at 8. About a few days after beginning to eat the food my dog began to have diarrhea in a large dose. Soiling the house before getting home from work which NEVER happens. After several episodes we called the vet he said it was probably the change in dog food and to give him boiled chicken and rice. After severally of this he appeared to be getting better. Thereafter we began to give him the Nutro again. Same results. Called Vet and he said to give him half and half of the Nutro and rice and chick mix and that it may take a while to settle. After several weeks of back and forth, meds, other foods to tried to calm the vile diarrhea but to NO avail. Finally we go back to the pet store and a lady at the pet store told his to check google lots of problems the Nutro food. After going online I was devastated to read what I was reading...complaint after complaint. We immediately threw the bag away. Started using another recommended grain free pet food. But at this point it's too late. A few days later my dog just stopped eating all together. Occasionally I could get him to eat some chicken but as soon as he ate anything or not he had to dash to the door to empty his stomach. At the point my INSIDE dog won't even come in the house because he's constantly emptying him stomach. He went from 130 to 83 pounds at his DEATH. We finally get a docs appointment thinking he could be saved. But once the X-rays were revealed, he had masses of masses inside his stomach and his spleen was moved into another area of his stomach. Needless to say, we had to put him to sleep as NOTHING could be done to help or save him. After 2 months of chronic diarrhea and I literally drove him from work everyday to attempt to get him well and to eat. This was a horrible thing to take a family and DOG through. A once healthy 130 lbs strapping male Rottie reduced to bones and pain.</p>	8	Years	Rottweiler	Dog	130	Pound
EON-120802	4/16/2013 22:27	Diamond Lite Lamb and Rice	<p>Fed her regular food, Diamond Lite lamb and Rice, ate a little bit and refused to eat more. Got sick next day with vomiting and diarrhea. Put on bland diet to see if she got better. Took to Vet where I was informed about Diamond recall. This was in april of 2012. EON-120521	4/16/2013 9:51	Nutro Natural Choice Grain Free Natural Lamb & Potato Formula (Limited Ingredient Formula)	Starting the dog on new dog food 4/14//13. Fed her Nutro Natural Choice (Grain Free) Lamb & Potato formula mixed with her previously fed food Science Diet Adult Light/Liver. She was fed approximately 6:30 pm. Around 8:00 pm she began vomiting. She vomited all through the night (at least 7-8 times until she had nothing left to throw up) Would drink small amounts of water and then vomited that up. Obviously in distress and still vomiting she was taken to our vet 4/15/13 for appointment at 12:45 pm. Was examined, blood work done, she was given IV fluids for dehydration and an antibiotic for precautions. She was sent home with Antibiotic to be given every 12 hours and to observe for any more GI related symptoms and if she would eat anything. **Of special note - my other dog was fed the same time but was not given the Nurto Food and he had no problems**	8	Years	Chihuahua	Dog	6.4	Pound

EON-120436	4/15/2013 10:06	Nutro Senior Dog Food	<p>I've had my dog (b) (6) on Nutro Senior for over a year with no problem until mid March, 2013 when I opened a new bag of Nutro Senior food. The next day he became deathly ill, throwing up blood, diarrhea with blood, dehydration,. Hospitalized, IV fluids, many medications. My vet put him on prescription food and after 7-10 days said I could begin transitioning him back to his regular food (Nutro Senior) 3 days later, he was hit AGAIN with this horrible sickness, throwing up blood, diarrhea with blood, UTI, dehydration, again he was hospitalized, IV fluids and immediately taken off Nutro food. Again, since being off Nutro Senior food he's stable and recovering. Yesterday I searched on line to see if there were any recalls or reports of dogs getting sick. Sure enough, I found the Consumer Affairs.com site over 1,300 complaints about Nutro food, dogs ill and dying from this food. Please Help!</p>	10	Years	Retriever (unspecified)	Dog	60	Pound
EON-120426	4/14/2013 18:21	Innova for Adult Dogs with Herring and Salmon	<p>After I ran out of the dog food that was given to me by the local group that I adopted her from, I bought some Innova dog food at the (b) (6) Petsmart. (b) (6) began vomiting once a day after changing to the Innova dog food. I contacted my Vet and stopped giving the INNOVA. I changed to Science diet for Sensitive Stomachs and Carmel stopped vomitting. When the small bag of Science Diet ran out, I went to Petsmart in (b) (6) to buy a larger bag for sensitive stomachs by Science Diet. While at Petsmart I saw that Innova had removed all their dry dog food from the store because of a dog food recall.</p> <p>Yesterday and today, (b) (6) has produced loose stools with blood in them. I believe that this was also caused by the Innova dog food.</p> <p>I tried to contact the website, this was on Saturday, that I was referred to by the sign at the store and was unable to send an email to communicate the problems that I was experiencing. I will call the phone number I got from the store on Monday.</p>	8	Years	Retriever - Golden	Dog	62	Pound

EON-120425	4/14/2013 18:06	Purina Beniful brand dog food Original, Purina Beniful Original	Our dog started sleeping more and became slightly lethargic and she seemed ok, just tired. On the 11 th of April 2013 she was laying in her bed and stepped out of it and took a few steps and dropped to the floor. My husband yelled for me and we wrapped her in a blanket and ran her to the vet. Her breathing was shallow and she was very rigged. The vet was closing when we got they got there and she gave (b) (6) a shot to stop the throwing up. My husband was told none would be there tonight so it was best if we took her home. When he brought her home she seemed to be in shock. We held onto her and her breathing got very shallow and my husband and I kept talking to her and petting her. About 3:30 in the morning she began to breathe normal again. She is a Sheba and I could not find her breed on your web site. (b) (6) has had Beniful most of her life. The only thing different this time was the fact that we bought the 30 pound bag of Beniful and she was not acting the same. She was sleeping all the time and could not get enough to drink. I thought she was tired. She began to start panting a day before this happened. She made it through the night. They took blood at the vet and said it only looked like she was low on protien. Please let us know if we can help because this should not be happening.	4	Years	Akita	Dog	25	Pound
EON-120423	4/14/2013 14:06	Canidae Pure Sea	After eating from the affected bag, she got lethargic and had diarrhea. On the third day she had bloody stools. I switched to another bag and the symptoms stopped. I tried one more feeding and she was ill again.	4	Years	Pointing Dog - German Short-haired	Dog	54	Pound
EON-120422	4/14/2013 3:27	Beneful Dog food	I began feeding (b) (6) Beneful dog food in December. Prior to that she was very healthy as the vet had run full lab testings prior to a dental cleaning just a few months prior. After eating the Beneful for one month she became acutely ill. I took her to the vet who ran blood testings. (b) (6) calcium level was very elevated and the vet thought it was vitamin D toxicity. All other tests were in normal limits. (b) (6) did not improve despite all treatments the vet prescribed. She lost 25lbs, would not eat, and was so very ill. She craved water and had frequent urination. On (b) (6) we chose to end (b) (6) suffering. Nothing else was different in her life except the change in diet to Beneful. She was always on a leash so she could not have gotten into poison. It had to be the dog food. We do not have rat poison or take vitamin d supplements.	7	Years	Bullmastiff	Dog	140	Pound

EON-120420	4/13/2013 8:36	Purina Beneful Dog Food	<p>My name is (b) (6). My golden retriever (b) (6) was in excellent health as of 12/25/12. I use this date because I have videos of him on Christmas day. The first week of January 2013, he was beginning to get sick. We fed him Beneful dog food from Purina. After his being sick for a week or so we took him to our veterinarian. They took xrays, and we sent them to an expert to read. The results came back as either bone cancer or a fungal infection. We live in (b) (6). Since we really have no fungal infections in this state, plus with the fact that the entire landscape of (b) (6) was covered with three feet of snow in January, my vet ruled out a fungal infection and diagnosed cancer. So we brought (b) (6) home, I discontinued the Beneful and put him on an anti-cancer diet of baked chicken, turkey and roast beef. He ate this diet for a time but progressively worsened. He became anorexic, lost 40 pounds, wouldn't eat anything, wouldn't drink anything, diarrhea, vomiting, I force fed ice chips into him, he gulped snow outside to stay alive, he was lethargic, couldn't lift his head, couldn't stand up, couldn't walk. Finally, after many trips to the vet during February and March, with my vet completely perplexed and stumped by what was happening to my (b) (6), we sent a urine sample to a human laboratory out of state for a diagnosis. It came back as Aspergillosis - a fungal infection. Aspergillosis, it's my understanding, is a fungus that affects corn and other grains. I truly believe this ground up corn is in the Beneful dog food and that is what killed my dog. I have been researching this on the internet. While your organization claims to only have a handful of reported complaints about Beneful killing dogs across the country, if you simply would do five minutes of investigation, as I did, you will find that the number is in the hundreds - the exact same symptoms. Go to Google and type in "Is Beneful Killing Dogs" and the number of dead dogs after eating Beneful is over 400. The FDA needs to do something about this. Perhaps if you had done so when this first started, my (b) (6) would still be here. A response from you would be appreciated.</p>	10	Years	Retriever - Golden	Dog	120	Pound

EON-120355	4/12/2013 5:51	Pork Chomps	Gave dog this product in the evening, at 5 am she had a seizure,tremor that lasted about one hour. Took her to the vet and they did complete testing and could not find any medical problem. I never thought about it being a result of the treat as I give various treats frequently UNTIL I recently purchased another package of the same treat from the same store location and when I opened the package noticed a spot of a white film like substance, upon further inspection I found green mold throughout all the products in the package.	6	Years	Boxer (German Boxer)	Dog	52	Pound	

EON-120323	4/11/2013 16:36	Beneful	My 10 year old dog, (b) (6) has eaten Beneful her entire life and has recently been diagnosed with Addison's disease, which is a condition related to the kidneys. The vet said she is extremely old to have been a candidate of this disease, and the vet clinic has personally never seen it in a dog of this age, but all tests revealed that this in fact was the case. (b) (6) went into severe crisis and almost died. Her heart was only beating a fraction of what it should have been, she was weak and lethargic. We rushed her to an emergency clinic and they miraculously saved her life, apparently with only moments to spare. She is now on a life long and very costly regimen of two different medicines, and is under the watchful eye of her vet, returning every 25 days for a very expensive shot (which is life saving). The vet is extremely cautious and has expressed that this is a very serious illness, if not treated properly. After personal research I have found that many other consumers have experienced similar events after feeding their pets Beneful dog food, and in most cases have not had such an outcome such as (b) (6)'s-their pets have DIED! She will never be cured, but is at least still with us here today. PLEASE look into this so no other family or dog needlessly suffers, and so other pets may live. This is a disgrace, and I intend to further continue my endeavor to resolve this issue by voicing my concerns. Thank you for your time. (b) (6)	10	Years	Terrier - Rat	Dog	16	Pound

EON-120230	4/11/2013 12:18	Diamond Pet Foods made for Costco re-branded Kirkland Healthy Weight Dog Food	<p>On November 11, 2012 we bought a bag of Kirkland Healthy Weight dog food made by Diamond Pet Foods. On the evening of November 12th, our adult son, who was staying with us while he was in transition, opened the bag of Healthy Weight to feed his French bulldog (b) (6). The next morning, (b) (6) was very sick; she was throwing up and had diarrhea. Our son did not tell us (b) (6) was sick at the time; he thought the illness occurred because of the switch from her regular food. This is the only night he fed his dog from our food as he bought her regular brand the following day..</p> <p>Our dogs were not fed from the bag of Kirkland Healthy Weight dog food until the evening of November 13th;. The next morning (November 14th), all of the dogs were vomiting and had diarrhea]. By this time, our oldest dog, Percival also had exaggerated joint pain and stiffness. We assumed the illness may have been caused by switching from the Kirkland Mature dog food to the new Healthy Weight bag. We fed once more the following evening from the Kirkland Healthy Weight bag of dog food. On the morning of the 15th, our dogs were still very sick and refused to eat their breakfast so my husband went back to Costco on his way home from work and picked up our regular Kirkland Mature Dog food.</p> <p>By November 16th, we learned about (b) (6)'s illness and became convinced that the Healthy Weight dog food was making them ill. We took the bag of Kirkland Healthy Weight back to our local Costco warehouse. Customer Service took the bag and refunded our money. Our sons dog and two of our dogs seemed to be improving; however, our third dog (b) (6), was not improving and, in fact, seemed to be getting worse. She was a nursing mother with 4 week old pups. Because she was still feeling sick, we did not allow her to nurse her pups that evening and decided that I would take her to the Vet the next morning.</p> <p>The morning of November 17th, (b) (6) was still very sick and weak. Her head was swollen and she had dropped weight so we took her to the veterinarian, who informed us that her kidneys were failing (b) (6) was immediately admitted to the veterinarian hospital where she stayed until November 21st. Upon her release, we were told that (b) (6) would not live more than two months; she died on (b) (6) (approximately one month after eating the contaminated dog food).</p> <p>November 25th, we filed a ;Report of Incident; with Costco and told their managers what had</p>	6	Hours	Bulldog - American	Dog	95	Pound
----------------------------	-----------------	---	--	---	-------	--------------------	-----	----	-------

happened with our dogs. Our claim was opened on December 4, 2012; we spoke with Costco representatives and I released (b) (6)'s veterinarian records for the Costco representatives to review.

We were offered a Costco Gift Card for \$100 if we would close the case at that time. We were also told that there have been no recalls on any of the "Diamond Pet Foods", made for Costco since 2008; however, after conducting our own research, we found numerous complaints and recalls involving dog food sold at Costco and other retailers who use "Diamond Pet Foods" to make their brand dog food between 2008 and 2012. And all 2010 through 2012 claims had the same indications and symptoms displayed by our dogs.

On the day before he left for Christmas vacation, Costco representative contacted us and asked for the veterinarian records that we had already previously submitted. He also asked us to dig up (b) (6)'s body for an autopsy. We immediately called our Veterinarian's office to determine if the records had been released. We were told the records were faxed a couple of weeks ago and agreed to fax them over again.

Later that morning, Costco representative called and told us that he had spoken our Vet, and claimed that our Vet had stated that it could not have been the dog food that caused our dog's illness. Because of this allegation he was closing our case but, since we had been such good Costco customers, we were again offered a Costco Gift Card.

We immediately called our Vet and he denied telling Costco representative that the dog food did not cause our dog's death. Our Vet stated that he informed the Costco rep of the fact that (b) (6)'s kidneys were destroyed from a toxin that was introduced to her, but there was no way to prove where the toxin came from because Costco took the bag of dog food and there was no sample to be tested. Also, it had been too long to diagnose the other dogs. Our Vet did state that, since all four of our dogs got sick after eating the food, and all stayed sick for several days after eating it, he was "highly suspicious" that it was the dog food that caused their illness.

Our Vet also stated the only thing an autopsy would prove was that (b) (6)'s death occurred because her kidneys were destroyed but the toxin would have already worked its way out of her

			<p>because her kidneys were destroyed, but the toxin would have already worked its way out of her system. Our family had already suffered through the trauma of losing our dog, and the idea of digging her up for an autopsy that would not prove anything, was unacceptable. However, if it would help our case and Costco wants to exhume the body and pay for the autopsy, they may do so as long as they agree to return and re-inter the body. However, the Costco representative told us that if we want to proceed with this claim, it will be necessary for us to do so through Diamond Pet Food Corporation's Attorney.</p>						
EON-120035	4/10/2013 10:27	Dentley's Wrapped Rawhide Sticks with Real Chicken	<p>(b) (6) was chewing rawhide bones wrapped with Chicken Jerkey made in China and distributed in USA by both Dentleys and Smokehouse. (b) (6) started to become very lethargic and then started skipping meals. Within 2 weeks she stopped eating all together. She will consume no food at all and just sleeps all day. I took her to the vet and they ran tests on her. They found sugar in her urine but she does not have diabetes. She was hospitalized for 2 days and then released to my care. She is on 8 pills per day and has suffered severe kidney damage. She is still not eating but 3 or 4 bites of food per day and still sleeps all the time. She was a housetrained dog prior to giving her these bones but now she cannot hold her urine and will urinate wherever she is in the house with no warning. She is extremely sick at this time and it has cost me over 1400.00 so far with more bills to come.</p>	2	Years	Maltese	Dog	18	Pound

EON-120008	4/9/2013 22:48	BENEFUL by PURINA	Our Maltese was a fun loving active dog. About three months ago we started giving him Beneful by Purina which was purchased at our local Walmart in (b) (6). He first started throwing up...then loose stools...with blood in the stools at times. We just thought he had a viral infection...never imagined his food might be poisoning him because we tend to TRUST companies such as PURINA! As the days worn on his eyes had become glazed over, he became VERY lethargic...just laying around. Two months ago he could barely walk...then stated having major grand mal seizures very bad...almost died from the last one! The vet could not come up with a specific problem for the seizures that came from no where. About 2 weeks ago he quit eating the dog food on his own and quit havng the seizures BUT is still very lethargic, eyes glazed over and very depressed...sitting around with his little head down. At this point we are not sure if he is going to make it. I had not heard of the Beneful issues till two nights ago...I had seen on the news where MANY people had complained and I saw ALL the same symptoms my dog was having...POISONING by their dog food! The news stated that many people have turned in reports about Beneful dog food but the FDA WOULD NOT pull it! WHY???? The story of the FDA letting dogs continue to die is ALL over the news, newspapers and computer including Facebook!! How many dogs blood will you have to have on your hands BEFORE you pull it from the shelves???? These little dogs are like members of our families! I have also seen reports this happened back in 2006 with this same product and it has happened AGAIN in 2013!!! REALLY???? WHY IS IT STILL ON THE SHELF???? My contact number is (b) (6) if you have any questions I will be more than glad to answer them!	11	Years	Maltese	Dog	11	Pound
EON-120002	4/9/2013 20:12	Beneful Playful Life	Over the weekend, I began switching my boxer puppy to Beneful Playful Life dog food from Beneful puppy food. He is normally very active and playful. He began to act very lethargic, was drinking lots of water, and even stopped eating once I switched him to the dog food. I truly believe this food was making him sick and he knew it and would not consume it. I also have a miniature dachshund who also began eating the Beneful Playful Life. He had diarrhea after consuming the food for 48 hours. He also had excessive thirst. I had to fill both of the dogs' water bowls more than 3 times on Saturday. They have stopped eating the Beneful dog food and have been switched to lams.	10	Months	Boxer (German Boxer)	Dog	65	Pound
EON-119904	4/9/2013 12:57	Waggin Train Wholesome Chicken Jerky Tenders	Opened a 40oz bag of Waggin Train wholesome chicken jerky tenders and feed two jerky treats to the dog at 7pm, by 9 pm the dog was throwing up and by 10 pm was very weak and would not get up. He would not take food or water or get up for nearly two days. When he did finely get up to go out side he appeared very weak. This occurred on a Friday nite and by Monday morning he was up and moving around albeit slowly, his appetite did not return until the following day (Tuesday). The vet was out of town. I live in a rural area.	12	Years	Retriever - Labrador	Dog	84	Pound
EON-119879	4/9/2013 11:12	Royal Canin Veterinary Diet Gastro Intestinal Low FAT	My pomeranian is on a restricted diet due to health problems and I opened a can of Royal Canin Low Fat Gastrointestinal Dog Food and went to put in his bowl. When looking in the bowl I noticed something that was brightly colored blue/purple. I pulled it out with a spoon and noticed that it was some sort of foreign object or material that was wrapped within the dog food. I have kept the item and took photos. I contacted Royal Canin last week and have not received a return reply. I have also kept the can.						

EON-119757	4/8/2013 19:48	Purina Beneful Healthy Weight	Within the last 2 months my dog started having incontinence. She is very tired, too. I took her to the vet, who could not determine an issue. This started again this past weekend. I noted today the FDA letter on (b) (6)'s Fox TV station, and remembered she had eaten a large amount of dog food Saturday. I had placed her on Beneful Healthy Weight after the vet said she needed to lose a few pounds this last summer. I had not connected her recently health issues to the food until tonight.	9	Years	Schnauzer - Miniature	Dog	25	Pound
EON-119755	4/8/2013 19:42	Nutro Natural Choice Chicken Whole Btown Rice & Oatmeal formula.	Dogs began vomiting yellow bile foam ~5 days after putting them on Nutro Natural Choice, problem has gotten progressively worse with both dogs. This morning the older dog could not move, was vomiting and had labored breathing. We immediately pulled the food after reading on http://www.consumeraffairs.com/pets/nutro.html site that other dogs had similar reactions to this brand of food. We will be contacting Nutro directly however wanted to report this to the FDA as this seems to be a serious issue with this dog food. We had trust in the dog foods you can purchase at major pet stores (PetCo, PetsMart) however this has made us question the quality of any dog food. Please look into this company, we have tons of leftover from this bag if you need a sample.	9	Years	Pinscher - Miniature	Dog	13	Pound
EON-119747	4/8/2013 17:33	Purina beneful original with beef dry food	After purchasing a bag of beef flavored beneful dry dog food two weeks ago, within three days of purchasing the food, both of my dogs started to show symptoms of diarrhea and vomiting after meals. It progressively got worse and my dogs were vomiting within two hours of meal time every day. Beneful has been their main diet for their whole lives. I had not given them any other food or treats for the duration of their illness. 2 days ago, I switched their food to a grain free brand. I have been monitoring them after mealtimes and they have not vomitted since. Their stools are still loose and they are still eating grass/ showing signs of nausea, but Thier conditions have overall improved since the switching of their food.	3	Years	Mixed (Dog)	Dog	70	Pound
EON-119501	4/8/2013 2:48	Canyon creek sweet potatoes	vomiting,runny bloody mucussy stools, constant drinking and urinating all over the house, dehydrated (had to have IV's), very weak, didn't eat, bloodwork showed elevated red blood count so did xrays and ultrasounds thinking she had cancer (shaved her fur), thought she had diabetes cause of bloodwork showings,symptoms of fanconi disease. We spent almost \$4,000.00 on her right before Christmas 2012. Now shows some signs of allergies with itching and licking constantly.	4	Years	Terrier - Yorkshire	Dog	10	Pound

EON-119498	4/7/2013 0:12	Purina Beneful Healthy Weight	<p>We are writing you out of (b) (6) to inquire about the proper actions to take regarding contaminated dog food. My family owns four puppies, varying in age and relatively young (three yorkshire terriers and a terrier mix) that recently took ill after being fed 'Purina Beneful Healthy Weight', resulting in one of our dogs death and another in critical condition. We had been feeding them solely that food for two months with seemingly no problems, so we thought. They had been experiencing some issues such as bladder control and gastric-intestinal issues but we simply dismissed them as seasonal issues. However, after opening a new bag purchased at the local (b) (6) location Walmart, the dogs took violently ill almost immediately after consumption. They were continuously vomiting for a long span of twelve hours which finally resulted in a vet visit to the (b) (6) (see CC'd address above) the morning of April 2, 2013. One of the puppies was administered an IV fluid and the others prescribed a medication to control the excessive vomiting. Two days later on (b) (6) we went to work as normal and made a special trip home at lunch to check on the still lethargic puppies. Still seeming somewhat disoriented and spitting up a small amount, the puppies seemed to be on the upswing. Two hours later when we arrived home from work, we were shocked and absolutely devastated to find the smallest of the dogs unmoving and unresponsive laying near a spot of vile and blood and another of the dogs, (b) (6), violently throwing up with his head and snout three times the size of normal, his eyes so swollen that they had managed to come out of his skull and protrude far past his eye lids. Rushing them again to the (b) (6), we were told it was too late for the smallest dog and the future of (b) (6) was still unknown. Using shots to control the facial swelling and many fluids, medications, and IVs, the doctors there were able to get (b) (6)'s condition stable. After they ran blood work on the surviving puppy, we were directed to take the deceased and the puppy food they had been eating to the (b) (6) for a necropsy and toxicology testing because the veterinarian was sure that it had been toxins that found in the food that resulted in the fatality of one puppy and critical condition of two others. The dogs had all eaten it and within hours become deathly ill, were of different ages so age could not have been a factor, and the food itself was kept in a sealed, waterproof container. We were instructed after the first visit to the hospital to contact Purina and inform them of the situation and see about a possible food recall that we may have missed. There was no such recall present, and they simply told us that they could send us a 50 pound dog food bag of Beneful for our troubles. After losing our dog, we contacted them again, only to be told that there was still no recall, they "were sorry for our loss" and that they would "forward the information on."</p>	1	Years	Terrier (unspecified)	Dog	19	Pound

EON-119486	4/6/2013 15:22	Hill's Prescription Science Diet i/d Canine Gastrointestinal Health	(b) (6) has been on Hill's Prescription Science Diet i/d going on 15 months now for his Colitis. On February 13, 2013 he started vomiting. I called (b) (6), my Veterinarian. Since I gave (b) (6) y his Heartworm medicine that day I thought maybe it could be from that. (b) (6) did not believe it was from his Heartworm medicine. I was advised to give (b) (6) a Prilosec. (b) (6) was fine until February 20, 2013. On that day he vomited 3 times in a row. I made a appointment to take (b) (6) in, also he was due for his Bordetella vaccine. (b) (6) vomited March 6, 2013 and vomited 2 times on March 7, 2013. His appointment with the Veterinarian was on March 6, 2013. His vomiting and heaving became every day. His appetite has declined and he wants nothing to with his dry food. (Hill's Prescription Science Diet i/d) This is not like (b) (6), because he loves this dry food just until the last month. (b) (6) put (b) (6) on Prednisolone 5mg tablets. Give one tablet orally once a day for 4 days, then give one tablet orally every other day. I was given 30 tablets. (b) (6) just started this on April 4, 2013. Please look in to this. There could be other pet owners that are experiencing the same thing but they just dont know how to report this or afford to take take their animal to their Veterinarian. What's going on with (b) (6) is like trying to put a puzzle together but not having all the pieces. I did tell my Veterinarian that I was going to report the dry dog food to the FDA in hopes that you will look in to this. In Hill's email response to me they said they have never had a dry dog food recall. Well, never say never. There is always a first. (b) (6) is my emotional support. He is all I have. He is the reason I get out of bed every morning. Please check in to this to make sure this food is not cotaminated. Or at least have them pull just this lot of food that was made and to notify the public. Thank you for your time.	30	Months	Mixed (Dog)	Dog	65	Pound

EON-119255	4/4/2013 18:15	Canyon Creek Apple Wrapped with Duck, Canyon Creek Ranch Duck Tenderrs	On 1/6/2013 (b) (6) suddenly got very ill...lethargic...couldn't walk etc... And was taken to the (b) (6) where he was admitted with a fever of 105 and low white blood cell count. He stayed for two nights and was given antibiotics and fluids. They could not figure out what could have caused his symptoms. We were worried he might not make it. Just recently while in a PetCo store looking for Duck Tenders (which (b) (6) has been given approx 1 to 2 a day as a favorite treat since he was a pup) I was told about the recall on certain brands. I pulled out the receipt and realized the ones I had purchased and given to (b) (6) were purchased on 12/5 - the day before he was admitted to the hospital. I had purchased two kinds of Canyon Creek duck tender treats. In addition after (b) (6) recovered I recalled that I had to go buy another brand of duck breast treats because (b) (6) would not touch the ones that I had purchased before he was hospitalized. It just doesn't seem like a coincidence after reading the reports etcand finding out that the brand in question had been recalled.	7	Years	Shih Tzu	Dog	16	Pound
EON-119228	4/4/2013 16:42	Pet Pride salmon supreme dinner cat food 5.5oz	<p>Pet ride canned food 'salmon supreme dinner' at times has a dark brown film over the meat in the can. I didn't think much about it until I made a connection that every time my cat eats a can of the meat with that dark brown film in it, she throws up and feels bad for the rest of the day.</p> <p>The meat inside the can is usually light brown and uniformly colored as this is pate. The dark brown film when it is in it, and this happens frequently!, is in patches.</p> <p>I am suspecting that some type of microculture is growing in the cans and is spoiling the product!</p> <p>Please follow up on this! Sanitary inspection of your facilities where the food is produced might be needed!!</p>						

EON-119197	4/3/2013 23:00	Dingo Twist Sticks Chicken in the Middle!	(b) (6) was given a Dingo Twists Stick (chicken in the middle) on Friday evening (3/29/2013). On Saturday the 30th, she became lethargic and then began vomiting. She continued to be lethargic, not eating, barely drinking water on Sunday and Monday. Tuesday, she was so sick my son took her to the veterinary hospital, where she had to be put to sleep as she was in renal failure.	16	Months	Chihuahua	Dog	8	Pound

EON-119170	4/3/2013 11:27	Purina Beneful Original	November 2012 my dog vomited large amounts of blood we took him to urgent care animal hospital and they treated him for poisoning at the cost of 300 + dollars. After 30 days of treatment he got better on a chicken and rice diet. We slowly started him back on his original beneful diet. March 8 2013 he then on March 9th started again with vomiting blood took him off the beneful put him back on the rice and chicken diet started to get better took him to the vet for bloody stool he was treated for colitis with an antibiotic. We slowly started him back on the original beneful Monday March 18 and he vomited again early Tuesday March 19th back to the chicken and rice diet did well over the weekend slowly started beneful on Sunday March 24 started vomiting Monday morning the 25th now we have altogether stopped feeding him beneful by the direction of our vet, has not had an incident since	12	Years	Dachshund - Standard Long-haired	Dog	21	Pound
EON-119108	4/2/2013 22:06	Beneful dog food	She was having problems digesting food. She would either throw up or have diarrhea and sometimes both. Her diarrhea became bloody and foul smelling at times. She lost about 12 lbs. she looked like a walking skeleton. She was weak and lethargic. Her eyes were empty looking. She was miserable. We took her to the vet several times. Due to her age, we chose not to have endoscopy done. Vets were certain she had a type of cancer.	15	Years	Mixed (Dog)	Dog	26	Pound
EON-119071	4/2/2013 18:00	Royal Canin Weight Control"	Royal Canin can of "Weight Control" lot CUMSC2 05:40RCWT and also lot CUMSC2 05:41RCWT has a film, appears as grey-blue plastic on bottom which sticks to the food contents. It appears that it is the film which is meant to coat the inside of the can. I just noticed this today but it may have been in earlier lots. My vet's office also reported it to the manufacturer and they were told that they were aware of the problem, that it has happened before and that the material is not toxic.						

EON-118914	4/2/2013 10:12	PURINA Friskies	<p>One of my two cats died last week after eating a can of soft food I bought in the same day, next day in the morning the cat was having abdominal cramps for the whole day refusing to eat anything he died in the night with a lot of pain that he was not able to make any sound.</p> <p>I did not pay attention that the food might be the problem thinking that both cats eat the same food but this week I gave the second cat a can of food in the morning he refused to eat it, left it outside the fridge the whole day tried to feed the cat from the same can but he always refused and run away, I noticed there was dark red color areas forming so I left it till the morning found the red is spreading as if it's a fast chemical reaction, I still have that left over in the can and few more cans did not open.</p> <p>I am willing to bring all cans for testing, please let me know Exp date feb 2015</p>	14	Years	American Shorthair	Cat	10.8	Pound
EON-118899	4/2/2013 0:51	Innova Puppy Food	<p>Noticed diarrhea on 3/23/13. Diarrhea continued for 6 days. On 3/27/13 I took the dog to the vet for examination as the dog had also begun vomiting on 3/27/13. The dog eats Innova dog food. The particular bag was a bag of innova puppy food in beef flavor. I grabbed the bag of puppy food accidentally - she usually gets Innova Prime Grain Free Beef and Lamb dry dog food. I opened the bag of puppy food and put it in her large food container before realizing I'd accidentally gotten puppy food this time. I kept the food and fed it to her since I'd already cut the bag open and poured the food into another container.</p> <p>My elderly cat also sampled a "snack" out of the dog bowl and had runny stool on 3/24 and 3/25.</p>	2	Years	Spaniel - Springer English	Dog	30	Pound
EON-118866	4/1/2013 20:12	Purina Beneful Healthy Fiesta Moist Chewy Bites (Chicken & Rice flavored)	<p>Dog started vomiting, followed by EXTREME (skunk like) gas and diarrhea for over a week. So extreme it was unbarable. Took him off the food and his gas stopped after a day and a half. Vet recommended bloodwork and antibiotics.</p>	3	Years	American Pit Bull Terrier	Dog	62	Pound
EON-118862	4/1/2013 18:06	Wellness	<p>after two weeks of feeding Wellness stools are always runny and diahereeah. After taking off for a few days and switching to Royal Canin runny stools stopped normal stool now. Its definitely the Wellness after reading a lot of post where pets were getting really sick from Wellness Dog food I saw that this should be reported. This product needs to be looked into I would hate for a pet to lose their life from bad dog food.</p>			Terrier - Yorkshire	Dog		

EON-118836	4/1/2013 16:15	EVO Dog Chicken and Turkey Formula Large Bite	My 10 month old puppy came down with bad diarrhea, I put her on a bland diet of boiled chicken and rice and every time I reintroduced the Evo food which she had been on since October, she would get sick again. We tested her for worms and parasites and it came back negative. Doctor advised me to put her back on the bland diet. This went on for 6 weeks. I took her in one last time before spring break and the doctor put her on ID vet food because she had lost weight. The next day I found out about the recall when I went to the pet shop. I bought a big bag of same food and I brought in the food I had left over from the most recent bag. I didn't have the batch number so they refunded me for the new one. I found out today that the bag I recently bought which they thought would be safe, is now on the recall list as well. This time I wrote down the batch number just in case. She is on EVO Chicken and Turkey and Rice, Big Bite 28 lb bag. I would like to know if the company would pay my vet bills.						
EON-118819	4/1/2013 15:30	Beneful Prepared Meals Beef and Chicken Medley	I opened a Beneful Meal Medley Beef and Chicken. There was black mold growing on top of the meal. I am concerned that there are other meals that might be contaminated and would make someone's pet ill. I have photos and the opened meal still.						
EON-118747	4/1/2013 12:21	Waggin Train Wholesome Chicken Jerky Tenders	I had been giving (b) (6) Waggin Train chicken jerky tenders for a long time. She became lethargic and didn't seem herself in January. I took her to the vet who did a blood test. It found her creatinine level was highly elevated and she had kidney damage. I found out that these chicken jerky treats had been recalled and I immediately discontinued them. Over the last month since discontinuing the treats, she is feeling better and is more of her bouncy self. However, she will have to be on special food the rest of her life.	11	Years	Schnauzer - Miniature	Dog	27	Pound
EON-118711	3/31/2013 21:51	Evo turkey and chicken formula	This has happened 2x - first time was 4-6 months ago (would have to check vet records) and then most recently over the last 2 weeks. My dog (b) (6) gets a really noisy stomach and vomits continuously throughout the day (8-12 times) along with lethargy, loss of appetite and horrible gas. Vomiting lasted 4-5 days first time and this time it was longer 5-7 days. My dog is a lymphoma survivor so everytime this started happening, i thought she was going into relapse and ending up spending about \$700 at the vet overall.	12	Years	Mixed (Dog)	Dog	68	Pound

EON-118710	3/31/2013 21:42	Beneful Healthy Radiance	I have been concerned for the last 9 months about my dog vomiting on a regular basis. She had never had this problem. I had switched her from Purina dog food to Beneful thinking it would be healthier for her. I wondered if that switch could be the cause of the vomiting but never really believed it could be. I ran across an article just now regarding beneful and sick dogs. I am removing the Beneful dog food from my house tonight and getting a different product.	12	Years	Ridgeback - Rhodesian	Dog	75	Pound
EON-118673	3/31/2013 11:57	California Naturals Lamb & Rice Small Bites	From 1/31-2/2, our dog was slow to eat but did eat all his food. On 2/3 our dog refused food, which is extremely unusual. He was lethargic and his gums were pale. I took him to the emergency vet, where an x-ray also indicated an enlarged spleen. More tests confirmed abnormal CBC results. He was treated with antibiotics, Tagamet, and anti-emetics. He returned to the vet after refusing food again. We stopped feeding him the California Naturals Lamb & Rice, and switched to another brand of pet food. His symptoms improved within 5 days.	12	Years	Mixed (Dog)	Dog	40	Pound

EON-118670	3/30/2013 19:06	California Natural Grain Free Chicken Meal Formul	After starting with a new bag of California Natural Grain Free Chicken Meal Formula Mako started having multiple bouts of both diarrhea and vomiting. It was expected that he had eaten something, perhaps in the yard since the weather has started everything growing. After a few days I decided to check online to see if anyone else in the area was having problems. That is how I came across the information regarding a recall on a whole list of Natura products with a recall. Although the dog food that I have isn't on the list, which apparently has been expanded, it probably should be.	3	Years	Dobermann	Dog	85	Pound
EON-118666	3/30/2013 15:15	Innova Adult Dry Dog Food - Large Bites	Bought Innova regular dog food beginning of January, 2013. (b)(6) has been on this same food her entire life and has NO problems at all. Shortly after using this particular bag, (b)(6) started to have mild gastro distress. Stools became soft. During the month of Jan and Feb she didn't want to eat like she normally had been. Never finished her daily food allotment. 2 weeks ago, she got worse, Had diarrhea for 2 days, would not eat, stomach distress. Took her to the vet on the 3 day. She went on antibiotics, bland human food. Took her 7 days to get back to normal. I believe I had a bag of the Innova food that was recalled. My dog got really sick and lost a pound and a half. I have had now vet bills and medicine bills just because of this. I do have some of the dog food left that was in the bag that I purchased and offered it to Innova so they could run tests on it, but they refused.	11	Years	Maltese	Dog	5.5	Kilogram

EON-118658	3/29/2013 21:33	California Natural Kangaroo and red lentil	<p>(b) (6) slowly began not eating all his food (California Natural Kangaroo and Red Lentil - dry kibble) until Friday, March 8, 2013, when he stopped eating at all. This is extremely unusual for him. He began vomiting on Saturday and had bouts of diarrhea. He began having several episodes of disorientation and trembling. He lost his ability to walk and also had several episodes of collapsing. We rushed (b) (6) to the (b) (6). Thorough investigations were performed, including complete CBC, aspirates and ultrasound, revealing that he had increased WBC with a white blood cell type distribution compatible with ongoing infectious or inflammatory disease. He was also hypoglycemic. His liver was also found to be diffusely abnormal. A liver aspirate revealed a pyogranulomatous type reaction. He was diagnosed with sepsis from cholangiohepatitis. Repeated bloodwork, the day following his admission, confirmed that he was becoming more inflammatory. The veterinarian explained that Cholangitis occurs most commonly when infection from the intestines spreads up through the bile duct and into the gall bladder. His liver was also well involved. He was then treated with IV fluids, IV Clavomox and IV Ciprofloxacin. He is currently receiving these meds in oral form, along with succralfate, and Cerenia. His prognosis was deemed poor. He continued to not eat, realizing an 8 pound deficit and euthanasia was suggested by our regular vet. Repeated CBC was ordered and did reveal a reduction of some of the liver enzymes and WBC, however other values remained unchanged. At that time, Prednisone and Denamarin was added. He has responded slowly and his prognosis remains very gaured. We contacted the (b) (6) and alerted them of the recall. They advised that if they had the recall been made earlier, they would have tested him for samonella toxicity because he is immune compromised and the infectious disease they saw could suggest an advance stage of infection. We do still have food left over. We would very much like to rule in or rule out if Samonella could have caused his infection and would like to know where we could have his food tested by a third party. We also have the UPC code which matches the recall lot on the Natura recall website.</p>	12	Years	Retriever - Golden	Dog	72	Pound

EON-118418	3/27/2013 20:48	Beneful Healthy Weight	<p>(b) (6) had just turned 11 prior to his death and had been on Beneful for about 4 years, After researching the beneful complaints, I realized he also had allergy/skin condions during this time as well as elevated liver count which appeared back in 2010 prior to a surgery to remove fatty tissues. However, he NEVER had diarhea in his entire time until October, 2012. In October we noticed two small growths on (b) (6) which we were to remove as the report came back they were benign. Approximately October 30th he began to have excessive diarhea and the surgery was postponed. This was the first time he had ever had an accident in the house as he could not control the diareha. They medicated him for this, and looking back, he was drinking excessively compared to his normal pattern. At times after he ate I would notice him breathing heavier. The following week we went to do the surgery again and his liver count was up again. I decided to take him to a specialist to have the liver evaluated. The liver was functioning which was good, but they found something in the spleen. During this time his routine Vet had put him back on the pills to control the direaha and an antibiotic, so the specialist continued with this for two weeks for if it were an infection and he tried to biopsy it, (b) (6) would be in danger. It was very noticable he was drinking and urinating much more than ever and in the 14 days after his meds were completed we realized he wasnt getting any better. During the last week prior to surgery, he was eating his beneful drinking so much more and had like a wheez sound at times. Then all of a sudden 4 days before surgery he would no longer eat the beneful...He was hungry and would circle his bowl, but would not eat it. I gave him processed foods, yoguarts etc. and kept him going till Friday his surgery date of (b) (6). That morning he again had excessive diareha in the parking lot there. After I left him, his breathin became more rapid and they went ahead w/surgery as the spleen can sometimes cause this. He had the surgery and the following day, his heart rate was rapid again and we lost him that day. They biopsied the spleen and the liver and it came back fine. No Cancer. The specialist was very optomistic for (b) (6) recouperation and they do not know what and why he passed. They feel something else was going on. He was fine up till October and was gone in December and had all the symptoms that I have read on the Consumer Reports. I myself called Beneful and gave them all the information and although they said they were sorry, there wasnt anythin more after that.</p>	11	Weeks	Retriever - Labrador	Dog	140	Pound

EON-118362	3/27/2013 11:33	Hill's Science Diet	Cat has become lethargic, sleeping all the time, eating very little and refusing to eat a particular kind of dry cat food. Also some frequent vomiting.	8	Years	Persian	Cat		
EON-118334	3/27/2013 9:24	Purina Beneful Healthy Weight	I bought a new bag of Purina Brand Beneful Dog Food Healthy Weight 31.1lbs at Petsmart in (b) (6) My dog has been eating Beneful for most of her life. She ate the dog food and threw up shortly after. This repeated for several days until she refuse to eat the dog food. She had no other symptoms. I changed her dog food and she resumed normal eating behaviors without any vomiting or other adverse symptoms.	8	Years	Shepherd Dog - Australian	Dog	42	Pound
EON-118235	3/26/2013 1:24	Nutro Max Cat Indoor Adult Salmon Flavor	Both cats consumed the cat food, within about 15 minutes later they begin to vomit the food up. About a half hour to 45 minutes later they would have to use the litter box multiple times for loose stool. Lethargy. Stop feeding food within the third day after ruling everything else out, gave them pedalyte and have been feeding different cat food, they have started to recover now.	3	Years	Domestic Shorthair	Cat	15	Pound
EON-118234	3/25/2013 23:48	Nutro Ultra Small Breed Adult	The dog has never been sick and I have fed her Nutro products for her whole life (Nutro Ultra small breed for the last 3 years). She eats 1/4 cup twice a day. In late December, I purchased a new batch of food that had a somewhat different branding strategy. I have now read that this is a new formulation. I purchased this food at (b) (6) but unfortunately did not save the package. I store the food in a sealed tupperware in a cool location. Since we switched to this new bag of food, my dog has developed an extreme progressive illness. The symptoms include: vomiting bile and partially digested food, extreme weight loss and muscle wasting, diarrhea, loss of appetite, aggression. The signs were first extremely obvious about 2 weeks after starting the product. I have since transferred her off the product and she is healing. She spends zero time outside unsupervised (leash only in winter) and I live in a simple household where she does not have access to poisons. The laboratory results indicate low serum albumin and normal urine and fecal. I store the food in a sealed tupperware. I have a second dog who is unaffected so I suspect that there is some new ingredient that is toxic to some dogs and not others. I suspect the food due to the timing and the fact that the vomiting has subsided a bit after switching her off the food.	8	Years	Dachshund - Miniature	Dog	7.8	Pound

EON-118233	3/25/2013 22:00	Blue Buffalo Weight Control	<p>(b) (6) became very ill upon eating Blue Buffalo Weight Control adult cat food (with an expiration date of 2/2/14). She had been on that brand of food for about a year and never had a reaction until I opened a new bag of food for her on the morning of 3/19/13. That night she became very ill, vomiting and diarrhea. This continued through the next day until we became suspicious of the new food and took it away. Instead, we gave her wet food and shortly after she stopped getting sick. We also took her to the vet, who recommended we switch her to another brand. Luckily she seems to be better, but I hate to imagine what could've happened. She does not have a sensitive stomach and has never been ill like this before. Needless to say, we will never give her Blue Buffalo again!</p>	3	Years	Domestic Shorthair	Cat	14	Pound
EON-118229	3/25/2013 19:54	California Natural Pure & Simple Lamb Meal & Rice Formula Adult Dog Food	<p>(b) (6) has been on the California Natural Pure & Simple Lamb Meal & Rice formula adult dog food for at least 3 years. I purchased a new bag the week of 3/11/13 and she had eaten about 4 meals from the bag since it had been opened. On Monday, 3/18 my husband fed her dinner from that bag in her crate. When he went to let her out, she had pooped just a little in her crate (abnormal for her). He let her out of the crate and noticed she was walking funny down the hall. He let her out to go; she took 2 steps and pooped again (she never goes that close to the door). She then went and laid down in the grass. He called her name and she did not recognize that she was being called. He went outside to get her and she was dazed; he had to help her into the house. She was in a total daze and described her demeanor as if she had a seizure (not the thrashing kind, but stiff). I came home from work and she was at the top of the stairs hacking, eyes watering. She did throw up 3 puddles of water. We took her to the vet that same night and they did blood work. When I gave her the same food the next morning, she experienced the same reaction to the food as the night before. My husband got her different food and she had no adverse reaction whatsoever. He tried to give her the California Natural about 1.5 days later and she wouldn't even touch it. We've since changed her food to a different brand and she's acting like herself; no adverse reactions whatsoever.</p> <p>The bloodwork showed a slightly elevated liver enzyme count and low blood glucose level. She tested negative for thyroid.</p>	7	Years	Shepherd Dog - German	Dog	84	Pound

EON-118195	3/25/2013 14:48	VetGuard flea	Applied vetguard flea product as instructed on the back of the pet. after a few hours my pet had a bad reaction from the product. the right side of her shoulder began very red, started cracking and then started to bleed. She started to shake and her body began convulsing. Called the number on the box got a case number and then I contacted the company and they said they wont take responsibility for what happen and that buying the product is the risk the customer has to take. They also stated that they would not reimburse me. I believe that they should not sell a product in which will cause my pet to suffer and not take responsibility to what happened to my pet. I put my faith in that this product was safe to use on my dog.	3	Years	Maltese	Dog

I switched them to a boiled chicken and rice diet to mend their stomachs.	1	Years	Great Dane	Dog	120	Pound

EON-118128	3/24/2013 22:00	Nutro Natural Choice Adult Limited Ingredient Diet Lamb Meal and Rice Formula	<p>We have been feeding our 5-year-old English Bulldog Nutro Lamb and Rice formula for most of his life. He always had symptoms of allergies (licking his paws, etc.), but we always thought it was because he was a bulldog. This December 2012 he was rushed in for surgery because of stones in his urethra. His symptoms up to the surgery were mainly lethargy, loss of appetite and trouble urinating. After his surgery, he seemed more content than ever! He was on a special diet for a few weeks after and we were really happy with his recovery (we now believe that he was better because he was not eating Nutro). In January 2013, we put him back on the Nutro diet and noticed that he had loose stool. We really thought that this was just something from the surgery and did not think too much of it. He did lose weight and so we thought we would increase his feeding to an additional cup a day.</p> <p>He just started to seem sad and did not have a lot of energy. His stool was still loose and we would just have to clean him every time he came in from doing his duty. He would vomit occasionally and started to drool more. This weekend his stool turned runny (dark brown with what looked like tinges of blood), he started to vomit often (foamy) and had a very thick drool and his hind legs were also giving out on him. We took him to our local vet Monday morning where he ran an upper GI x-rays to make sure that he did not eat anything. The tests at the end of the day were negative. The doctor put him on an IV for a few hours and we took him home that night.</p> <p>The next day we took him back for more fluids and to discuss other directions. The doctor gave him Flagyl and a shot to help with the vomiting and ran him on an IV again, then sent him home for the night. I found a website with consumer reviews on the food he had been eating (Nutro) and his symptoms were the same!</p> <p>I woke up at 3AM to check on him and he had passed somewhere in between that time. I feel very confident that Nutro is the cause of (b) (6)'s death.</p>	6	Years	Bulldog	Dog	41	Pound

EON-118127	3/24/2013 21:18	NUTRO Max Chicken and Rice Recipe. (dry food fed both adult and puppy versions of this food so I'm not sure which one or both are making dogs sick)	We bought a new puppy who was on Nutro Max puppy food. My older dog seemed to love it so we decided to buy the adult version of the Nutro Max Chicken and Rice dry dog food. Within days BOTH my dogs (the puppy was eating some of the adult dog food too) were sick. Vomiting, lethargy, high white blood cell count, crystals in urine, frequent urination, just overall very ill with several vet visits. After visiting Nutro's Facebook page I could see that there are TONS of similiar complaints. Also, a simple search online shows literally over 1,300 complaints (many of them very recent) reporting the same type of problem. I have reported the issue directly to the company but they do seem to want to do the right thing. I have switched their food and they are on the mend.	6	Years	Mixed (Dog)	Dog	49	Pound
EON-118126	3/24/2013 21:18	Purina Beneful Healthy Weight	I switched (b) (6) food to Purina Beneful Healthy Weight formula by combining it with some left over Kibbles and bits that he used to eat. Withing a few days of the new food, (b) (6) had bad diarrhea and drank 3 times the water he used to. He was lethargic and wouldn't eat for several days. I read about complaints from beneful and took him of it. I bought blue buffalo and he seems to be starting to recover...well, at leasty he's eating again.	3.5	Years	Dachshund - Standard Smooth-haired	Dog	20	Pound

EON-118125	3/24/2013 14:33	EVO Turkey and Chicken Formula Cat and Kitten Food Natura Pet	We purchased a bag of EVO Natura Chicken and Turkey Formula Cat and Kitten Food in the 15.4 pound bag at Pet Supplies Plus on (b) (6) in (b) (6) on February 5th, 2013 for \$48.04, with expiration date of July 18, 2013. On March 8, 2013, I noticed my 6 year old cat not using his litter box and squatting on the carpet trying to urinate, we brought one of the 3 litter boxes upstairs and the very next day we found blood in his urine, we immediately started him on crushed vitamin c as we concluded he had an urinary infection. At this point I would like to advise that this cat is an indoor cat having never gone outside ever, and has been healthy all his life. He has only seen the vet on one other occasion on May 21, 2012 with an ear infection, also at that time he was drooling, had an extremely high temp, and was dehydrated. His vet gave him Fluid Therapy 0-150 mls, Metacam injection, Covenia injection, took ear swab, prescribed Animax Ointment 7.5 ml and did an xray, and we changed his food to EVO from IAMS. He was fine after that. Getting back to recent event, he fought to urinate March 8th thru the 12th and on March 15th I proceeded to take him to his vet (b) (6), they concluded urinary infection as suspected, and again gave him Covenia injection, Dexamethasone injection, and Fluid Therapy SC 150-450 mls under his skin, they also did ultrasound to see if he had a blockage and concluded no none. He is back to being healthy and acting normal as of today.	6	Years	Domestic Shorthair	Cat	16	Pound
EON-118124	3/24/2013 13:15	Exer-hides beef hide mini bones.	My husband bought this product two days prior to our puppies death. The puppy needed a chew toy/food product for teething. Two days later the puppy started having seizures, foaming at the mouth. We took him to the veterinarian. The vet said poisoning. This is the only product that our other dogs did not have that the puppy did. The vet bill was \$160. The puppy died at the vets office.	8	Weeks	Chihuahua	Dog	1	Pound

EON-118123	3/24/2013 11:52	Before Grain 96% Tuna, Before Grain 96% Salmon	<p>I have been buying Merrick Before Grain canned cat food for a year. The last two cases I bought were not the normal quality of the product. I normally buy salmon and tuna flavors. I bought one case of each of these flavors and the whole case of each flavor thus far looks to be abnormal. Compared to normal, both flavors are a much darker color, are chunky (there are normally no chunks), a very loose consistency, and smell rotten. I did not note any of the cans to have been damaged before I opened them, so I don't believe this is a canning issue. For the salmon case I have opened 6 out of 24 cans, all of which appear as stated above. These have an expiration date of 11/29/14 and lot number of 12334 CL2 20472 1145. For the tuna case I have opened 4 out of 24 cans, all of which appear as stated above. These have an expiration date of 12/13/14 and lot number of 12348 CL2 20470 1622. I do not feel this apparently rotten food should be fed to pets. Also, consumers should not have to waste their money on this expensive food when they can not even use it. I have 18 cans of salmon flavor and 20 cans of tuna flavor if they are needed for observation/testing.</p>						
EON-118120	3/23/2013 18:00	Feline Greenies Dental Treat Savory Salmon Flavor	<p>2 of my cats have had diarrhea on and off for almost 2 months. During that time, I have fed them with many diff brands of cat food and treats. So, it's hard to pinpoint what causes it. I stop many of the the food and treat and try to narrow down what they consume each day. My original focuses are on certain canned foods.</p> <p>I'm finally able to pinpoint that it's Greenies Dental Treats. The poor little (b) (6) had severe diarrhea with blood in her stool. She also vomited a few time. It was a longest night waiting to get her to the vet. :(She's now on medication and hopefully on her way to recovery.</p> <p>That Greenies is an old formula, I'm sure. It's because that Salmon Flavor Dental Treats is in 6 oz bag which has slightly different in ingredient list than the 5.5 oz bag of the same flavor. I also have many other Greenies Dental Treat in 5.5 oz bags, but not going to give these treats to my cats anymore. I just wrote to Greenies asking them to investigate this incident. Hopefully, other cats won't suffer like my cats do. Let's see what they say.</p>	7	Months	Domestic Longhair	Cat	7	Pound

EON-118119	3/23/2013 15:03	Producer's Pride All-Stock 12% Sweet Feed	<p>On 3/14/2013 I purchased 2 bags (50 lb.) Producer's Pride All-Stock 12% Sweet Feed and one bag of compressed High Fiber Chopped Hay. Beginning on 3/15/2013 and continuing through 3/19/2013, the horse had symptoms consisting of: Muscle Spasms, Ataxia (loss of coordination), Recumbence (lying down), Reduction and refusal of food intake, Loss of weight, Lethargy (sluggish acting), Abdominal Pain, Urination was dark yellow with red tint, and Blood in nostril. During the time frame of 3/15/2013 through 3/19/2013, consultation and assistance with care of the horse consisted of: a farrier, two other knowledgeable horse owners, the (b) (6) (b) (6) and (b) (6) (rendering services). On 3/19/2013 the Producer's Pride All-Stock 12% Sweet Feed was discontinued and one feeding of another type of feed was introduced. The horse did eat ¾ of its normal intake, but it was too late at this point to rectify the medical symptoms which had resulted while feeding the Producer's Pride All-Stock 12% Sweet Feed. Daily contemporaneous notes and pictures reflecting the horse's medical status have been maintained, plus blood and stool samples have been retained. The manufacturing company denies the same product was listed in the Recall Week of July 5, 2012 by recall firm Cargill, Inc. The feed representative for Tractor Supply Company states that Producer's Pride All-Stock 12% Sweet Feed is not a product of Cargill, Inc. The product tag does not list Cargill, Inc. as the manufacturer but the phone number on the tag is to the Purina Mills Company. Additionally, a friend of mine, (b) (6) (b) (6) (Phone: (b) (6)), informed me that of her 28 year old female horse died on (b) (6) while using Wrangler 10% sweet feed purchased at different retailer. The Wrangler 10% Sweet Feed is another one of the products that were listed in the Recall Week of July 5, 2013 by the same recalling firm, Cargill, Inc.</p>	30	Years		Other	800	Pound

EON-117967	3/22/2013 9:00	Beneful Original	After feeding my 7 year old German Shepard Beneful, she became increasingly ill. She had significant weight loss, trouble controlling her bowls and urine, vomiting, excessive water drinking, lethargy and a significant fever. She was taken to the veterinarian, who ran several tests, but could find nothing. The veterinarian prescribed antibiotics, anti-inflammatory and specific food. She seemed to recover. We again started her on the Beneful we had and she became ill again. Requiring another round of antibiotics. Finally, we decided to change food, because she seemed to stop eating the Beneful while on the second round of antibiotics. After \$1,700 in veterinary bills, she has recovered and is in perfect health. She has regained weight and is active. She is no longer on antibiotics and has done well on a different brand of food. I have no doubts that this dog food caused her illness. I still have the bag of dog food.	7	Years	Shepherd Dog - German	Dog	95	Pound
EON-117956	3/22/2013 1:48	Canyon Creek Ranch Duck Tenders	Not sure if tied to jerky treats, but a few weeks ago (b) (6) became ill- vomiting with diarrhea. Within 24 hours she had hemorrhagic gasenteritis and her diarrhea was nearly purely blood. She died at the vet's office after passing a huge amount of blood. This all happened within a little over 24 hours. We had been feeding all of our dogs Canyon Creek jerky treats (chicken and duck) almost daily since Christmas (we received a few large bags as gifts). My other three dachshunds became ill (a few weeks earlier) as well with same symptoms only much milder. They survived. I just happened to notice the recall today and wonder now if they had built up a toxic level of something from the jerky??? The date I listed for when the problem started refers to (b) (6) only. The other dogs were ill prior to this.	9	Years	Dachshund - Miniature	Dog	17	Pound
EON-117952	3/21/2013 19:33	Doctors Foster and Smith All Natural Chicken Fillets Dog Treats	She started having diarrhea that lasted a couple of days, I did not feed her for 24 hours, then started on a boiled ground beef and rice diet for 24 hours then gradually reintroduced her regular kibble. Her diarrhea slightly improved, then got worse to the extent of going in the house and/or not making it outside. I took her to the vet, who asked about the details and questioned me about anything new added to her diet. The only thing I fed her aside from her regular meals was some Drs. Foster and Smith Chicken Fillet Dog Treats (item # 9N-37721). The doctor then told me to stop feeding the treats immediately and check the manufacturing information immediately to see if the treats were manufactured in China. I checked the treats and acknowledged the fact that they were made in china. I proceeded to throw them into the trash.	5	Years	Terrier - Bull - Staffordshire	Dog	62	Pound
EON-117776	3/20/2013 20:54	Adult 1+ years Lite Weight Loss Diet. Lamb Meal and Rice Formula	I have been getting Natural Choice Adult Lamb and Rice Diet for my dogs for a few months now. When I purchased this last bag, both of my dogs wouldn't touch it and they will eat all dog food. My oldest border collie treated his bowl of food as if it had a rat or bugs in it. He wouldn't go near it. He has never acted like this around food before. How do I go about getting it tested?						
EON-117765	3/20/2013 17:33	evo the ancestral diet turkey and chicken small bites	the night of 3/14/13 vommitted once. Then 3 times on 3/15/13. Food was withheld after that. Dog did not seek out food. vommitted on 3/16/13 in morning. Diarrhea throughout the day. Appeared less ill on 3/17/13 gave 1/2 of normal dosage of food. diarrhea that night. no food on 3/18/13 continued to vommit and diarrhea. brought to vet that afternoon. dog had fever of 103.5 given an anti-nausea shot and antibiotics and Hills prescription ID canned food. fever continued through night. given 1/2 aspirin. next day weak and lethargic. could not stand without help and was having difficulty walking. brought back to vet and blood was drawn.temp was 102.9 later thatt day became weaker and walking was worse brought to emerg vet temp 103.9 and was given fluid to rehydrate and sent home.	5	Years	Terrier - Bull - Staffordshire	Dog	38	Pound

EON-117760	3/20/2013 16:33	Hills Prescription Diet d/d canine food	<p>My dog is only allowed to eat duck diet - and I've been giving her Hills Prescription Diet d/d Canine canned dog food for approximately 2 years. It can only be purchased with a prescription and from a veterinarian and it isn't available in stores. Because of my dog's food restrictions I always purchase cases in advance and was dismayed when I opened a newly purchased case that it smelled peculiar, and the word that best describes it is "rancid".</p> <p>I called Hills and reported it and was advised to return it to the vet and exchange it with another case which I did: however the replacement case also had the same bad odor.</p> <p>I called Hills again, and was advised that the "best buy" date indicated a batch that was made during a certain time: and since the April 2014 was stamped on both cases, they most probably both came from the same batch.</p>							
EON-117748	3/20/2013 14:18	bil-jac americas vet dogs dog treats, waggin train big blast chicken wrapped pork skins	severe diaharreah, vomitting, no appetite, lathargic		6	Years	Retriever - Labrador	Dog	88	Pound
EON-117705	3/20/2013 10:33	Innova Weight Management Adult Dog Food	I purchased a new bag of Innova Low fat food on 2/12/2013. (b) (6) went to the vet for her normal 3 week visit on 2/15/2013 and she seemed fine given her condition. (b) (6) and (b) (6) were also seen at this time for nail trimmings, etc. On 2/16, I called the vet because (b) (6) was throwing up profusely and could not even keep water down and she was extremely lethargic. My vet advised me to take her to the emergency vet since dehydration could be a significant problem with the Addison's. At the emergency vet, they admitted her saying it was severe pancreatitis. On 2/17 around 6pm she went into cardiac arrest and by the time I arrived 30 minutes later- she had arrested twice more, she was on a ventilator and I had to have her euthanized. The following week my other 2 dogs started vomiting and having diarrhea also. It became fairly severe for (b) (6), so I brought her to the vet on 2/26 and she was put on a 3 week course of antibiotics. Becoming convinced the food was the culprit, I also switched out the dog food to a different brand and both dogs ceased having any diarrhea and vomiting within a day and both are currently fine.		10	Years	Chinese Crested Dog & Hairless	Dog	14	Pound

EON-117700	3/20/2013 8:54	Adult Fish and Sweet Potatoe Receipe	The problem triggered on or about March 8th when he could not keep his food down. Prior to that he had a licking sound at night that i associated with being thirsty. Brought him immediately into the vet on March 10th because my lab would not eat and was throwing up his food. The vet told me he was very ill! Kept him at the hospital to do some testing on toxins and to administer medication. (b) (6) showed liver problems and his blood showed kidney issues. On the following Thursday my vet told me that his blood work showed that his kidneys were failing. I took him out of the vet and immediately took him to (b) (6) for a kidney specialist to examine him. I lost my healthy lab in a week and the cause was his kidney failure. (b) (6) and my other dog have been on Buffalo Blue for two years. Believing in the advertising that it is one of the best natural foods to feed your animal I did not improvise. (b) (6) was drinking a lot of water and the licking noise is the only signs I could see that may have been a sign of this problem happening and I did not know this at the time. Both vets were puzzled to what the toxin was because after all the testing, none showed up for Lepto, antifreeze, etc. The vet at (b) (6) did say that she believed after her tests that (b) (6)'s kidneys had been failing. This falls into the poisoning of the food. My husband and I searched the house for any toxin that could have affected my dog and found nothing. Puzzled to how a healthy dog dies in a week, we researched the symtons and discovered the reports on this food. The symtons that are reported with the info on Blue is exactly what my dog had. I am dam made that they can put this food on the shelves to sell. This needs to be stopped soon before others loose their animals also.	4	Years	Retriever - Labrador	Dog	72	Pound
EON-117699	3/20/2013 2:33	Blue Buffalo Indoor Formula	For the last 4-6 weeks (b) (6) 1 yr old has been vomiting up his dry food. About 10 days ago ago, the other two cats, (b) (6) age 8 and (b) (6), age 5, have begun vomiting also. They only eat dry food, no treats, no wet food, all indoor cats. I got suspicious about their blue buffalo Indoor dry food and now I am convinced they are reacting from the food. I have slowly weaned them off of the Blue Buffalo, onto Royal Canin Indoor. Today they are solely on Royal Canin so I will monitor closely for any additional vomiting or symptoms.	185	Years	Siamese	Cat	7	Pound
EON-117679	3/19/2013 17:18	Purina Beneful	My dog was vomiting, had diarrhea, hair loss, no energy and started within a few days of this new bag of Beneful dog food to limp on both front legs. This was all within a few days. He was a spunky puppy, and I was feeding him Beneful. It didn't occur to me to stop feeding him the food until my dad suggested it. I was actually trying to get him to eat MORE of it, because he was losing weight fast. Two days later, on pork chops and steak, he is fine. I have the bag of Beneful still, in case anyone wants it for testing or anything. My neighbor today (across the street) just told me her 2 year old dog died maybe two weeks ago, and she was feeding him Beneful too. She had taken him to the vet and he tested positive for a bacterial infection. I also had a dog die two years ago, and he was also fed Beneful. His vet treated him for lyme, but it was only a matter of days that he passed away (on 2/21/11). He was 12, previously healthy, and he was like my son. I am reporting this because I am so thankful my new dog is recovering and I don't want any other dogs to fall ill. Please look into this seriously.	22	Months	Catahoula Leopard Dog	Dog	30	Pound
EON-117613	3/19/2013 12:45	Diamond Pet Foods Senior 8+ chicken egg & oatmeal dog formula	On first night added 1/2 oz to his usual food- no problem. 2nd nigh added 1 & 1/2 oz to his usual food at 7pm. Dog got me up to go out at 3am at which time he had diahhrea and vomited. There was some undigested kibble seen in vomit. Came back in and he had to go back out and vomit again a short time later (10 minutes maybe.) He was sluggish and lethargic afterwards. At 9am he is "better" in that he isn't vomiting but I wouldn't say fully recovered. He's still lethargic.	12	Years	Cattle Dog - Stumpy Tail	Dog	53	Pound

EON-117591	3/19/2013 10:54	Blue Buffalo Small Breed Chicken & Brown Rice Dog Food	(b) (6) had severe vomiting and diarrhea and was rushed to (b) (6). They did xrays, bloodwork, stool testing and were unable to find a blockage, parasite, etc. They believe she got ill from her Blue Buffalo food as they have had other dogs in their facility showing same issues. We were lucky that we changed her food immediately so she wasn't being given the toxic food anymore. I also changed the food for our other female Shih Tzu and both are now fine. I have been hearing more and more owners having issues with their Blue food and clearly testing the food for issues.	2	Years	Shih Tzu	Dog	16	Pound

EON-117559	3/18/2013 18:30	Dogswell Vitality Chicken Breast with Flaxseed and Vitamins	<p>Animal was a 11 year-old terrier mix, named (b) (6). We first noticed that the dog had some sort of issue when she lost interest in eating, and appeared lethargic, sometime in early- to mid-February, 2013. First saw vet Friday, 2/22/2013. At that time, our vet suggested that her diet be changed in an attempt to correct the problem. We next saw our vet on Tuesday, 2/26/2013, when a complete exam including blood chemistry and urine tests were performed. Blood chemistry (partial results) revealed a BUN of 136, and a CREA value of 8.9. Urine test (partial results) showed diluted urine. X-rays and ultrasound performed, but offered little help. After results came in the next morning (2/27/2013), the dog was admitted to their vet clinic and placed on IV fluids, with what was felt was a poor to guarded prognosis. Also, at that time, first noticed that the dog's blood pressure was significantly elevated. Vet suspected chronic renal failure. Also discussed was whether dog's condition COULD have been made worse by consumption (sometime in January) of Dogswell Brand Vitality Chicken Breasts with Flaxseed and Vitamins. However, vet felt treatment would not differ significantly between treating for chronic and / or acute kidney failure, or a combination of both.) After vet detected a heart murmur when fluids were being given, we agreed to have dog transferred to 24/7 vet hospital Friday, 3/1/2013, so as to be able to consult with a doggie cardiologist, and to continue with IV fluids with vet oversight during the weekend. Good news: Blood pressure was reduced using drug therapy, but, bad news -- dog continued not to eat. Discharged to owner Monday, 3/4/2013, after referral to doggie internal medicine. Dog continued to go downhill during week, not eating, and blood taken (b) (6), showed "all parameters worsening and renal failure progressing." Euthanasia performed (b) (6), due to "edema, anorexia, and renal failure."</p> <p>As FYI, vet records reflect a history of having eaten at least one Chinese-processed chicken treat that owners believe may have had added an acute stressor on already compromised kidneys.</p> <p>NOTE #1: The purpose of this filing is to provide FDA with a detailed case history and to offer FDA one (opened) treat package and one (unopened) treat package from the same lot, for laboratory testing, so as to possibly detect / confirm any toxins or other chemicals that may have contributed to our dog's kidney failure. Our assessment is that without a lab analysis of the subject dog treats, it is impossible to directly or indirectly link their consumption to what happened to our dog, other to say that they may have added an acute stress component to an already compromised kidney function.</p> <p>NOTE #2: After completing this web-based form, it's unclear whether we are giving (or not giving permission) for FDA to review all applicable / pertinent vet records. Our intent to assist FDA by full</p>	11	Years	Terrier (unspecified)	Dog	40	Pound
----------------------------	-----------------	---	--	----	-------	-----------------------	-----	----	-------

disclosure, so feel free to contact all vets listed. However, the web-based listing we provided allows us to list only three vets, and is incomplete, as we also saw three other vets at (b) (6), (b) (6), including (b) (6), (b) (6), and (b) (6), and also a (b) (6). (b) (6) at (b) (6), the latter as a referral on 3/4/2013.

NOTE #3: The exact date that the adverse problem started is hard to pin-point with certainty, along with the date that the subject treats were given / consumed. The vet records for July, 2012, include a blood test panel that was normal. Perhaps kidney failure started subsequent to that date, but unbeknown to us, did not manifest symptoms until February, 2013. Also, we can not state with any confidence the precise number of treats consumed by our dog, but it was at least one treat, and perhaps more. (No more than two.) Also, the precise date consumed also can not be established except to say that it was sometime after Christmas, most likely during early- to mid-January, 2013.

EON-117557	3/18/2013 18:00	Purina Beneful Original	I have been feeding my dog Healthy Beneful for several years now (a mistake I have now fixed) We opened a new bag of food and within a week or so of that she began with diarrhea. The next day she was vomiting and had bloody stools. I took her to my vet and they took x-rays and tests. Couldn't find anything wrong with her. They gave me meds and we put her on a bland diet of rice and chicken. She got better rather quickly and I kept her on the bland diet for about a week and half to rest her bowels. I started to slowly put Beneful back into her diet. She got tired and lethargic again and began having soft stools. Mind you, I was adding the dry food in slowly. 1/4 cup dry kibble mixed with 1 1/4 cups bland diet. It took me about a week to get her back to her full diet of just kibble. All the while she was getting more and more tired. She was on the full kibble diet for only 2 days (no bland rice/chicken) when she was so bad I had to take her off of it. I now have had her off Beneful all together. I put her on the bland diet and began adding Merrick Dog food instead of Beneful. We have had no problems. She now has more energy than she has had in a long time. I have researched what goes in dog food and I am disgusted. I have her now on one of the best foods I can afford. I think it will take her body a while to heal completely for the crap they put in Healthy Beneful. Thank-you.	5	Years	Other Canine/dog	Dog	55	Pound
EON-117556	3/18/2013 17:39	Veggie Life Happy Hips Sweet Potato Chews Dog Treats By Dogswell	Frequent urination, 3 or 4 times at least a night. Lack of control of bladder. Several accidents in the house that were very upsetting to her. Breathing heavy and panting all the time. Drinking more water. We also during this time period purchases some poor quality products (3 bags) from the Pet Warehouse and contacted Dogswell by email regarding them. See attachment.	14	Years	Retriever - Chesapeake Bay	Dog	65	Pound
EON-117502	3/18/2013 13:48	Revolution (selamectin)	For 3 years I have been using Revolution 11-20#s for heart worms Last years veterinary clinic report said no heart worms, now 3/15/2013 report said she had heart worms My Veterinary (b) (6) of (b) (6) remarked that he has had problems with this product before! Now to treat this problem it will cost \$800 to \$1,000 Now I know the old crusade I did not use the product correct!!! With my two dogs I spend \$200.00 every six months (6) why would I not use it and have been for 3 years! My dogs mean a lot to me and the family. I would like to know what and how to stop this problem from happening to someone else!!! (b) (6)	39	Months	Pug	Dog	17	Pound

EON-117501	3/18/2013 13:48	BLUE BUFFALO WILDERNESS DUCK	<p>July 24, 2012 I purchased a new bag of Wilderness Duck dry dog food - when I opened the bag I noticed the color of the food was different thinking the recipe was changed; I have used the Wilderness Duck dry along with several other Blue Buffalo varieties of dry and wet over the past 2 years without incident; (b) (6) ate in the evening and the next morning had severe diarrhea that was literally exploding from his behind with mucus and blood never thinking it was the food I fed him again that evening and for another day while the explosive diarrhea with blood & mucus continued; I changed his diet to soft and he improved for the next several days; when I began to slowly mix the Wilderness Duck into the food after a few days of soft the explosive diarrhea with blood & mucus returned then he just stopped eating except for his treats (I didn't realize he didn't want to eat the Blue Buffalo) it had been a week and I took him to the vet. He had high white blood count & elevated liver enzyme was tested for EVERYTHING put on antibiotic, steroids, and worm medication (stool sample was negative but treated him anyhow); he improved a little refused to eat the Blue Buffalo only would eat treats and soft food - he lost 5# - took him back for blood work 2 weeks later WBC and liver enzymes were lower but the diarrhea with blood & mucus continued - he stayed on the steroid and antibiotics; at this point I realized he would not eat the Blue Buffalo again (still never thinking it was the food) and gave it to my other 2 dogs (1- Lab/Mastiff 7 yrs & 1- Cocker Spanies 12 yrs -who also have been fed Blue Buffalo Wilderness Duck along with other varieties of Blue Buffalo dry food over the past 2 years but on this occasion the Wilderness Duck had been intended as a special treat for (b) (6) because he loved it so much) The next morning BOTH dogs had explosive diarrhea with blood and mucus in and out of the house and I wondered if it could be the food; when I googled it I found the Consumer Affairs website and at that time 125 other dogs had the close to exact same issues as (b) (6) and now my other 2 dogs; However, I only fed it to my other 2 dogs once and they recovered after a few days. (b) (6) never recovered and I had him put to sleep (b) (6) exactly 3 months after he first ate the food; I returned the food to Petco and was told I was the 2nd person that day with the exact same issues; I contacted Blue Buffalo and opened a claim - I was to return the 2 cups of food I kept to the company for analysis but chose to hold on to it because I didn't feel they would be truthful about the results and felt at some point an independent lab would analyze this food and I maybe I will finally know the truth about the contaminate; When I contacted Blue Buffalo they first said it is not the right food for every dog but after hearing I had been using it and other variations for 2 years changed that tune & said they were not aware of any issues regarding the food; I told them about the Consumer Affairs website and they told me they were not aware of any complaints; I told a girl that worked at Petco about the issue & she brought it up to the Blue Buffalo rep - I believe the girl working at Petco has since been let go; I also talked to the Blue</p>	13	Years	Retriever - Labrador	Dog	78	Pound
----------------------------	-----------------	---------------------------------	--	----	-------	----------------------	-----	----	-------

Buffalo rep who said I must have heard it from the girl (no longer working there) & when I informed her I was the person who told the Petco employee the rep became very rude and said she believes in the company, it's not the right food for every dog (again), there were no reported issues and it could not have been the food. I adopted (b) (6) when he was 3 months old, the only time in his 13 years he was ever sick was Lyme Disease at 2 years; he was a house dog, exercised daily and always fed what I believed to be the best food available; He was kept current on his shots, given heartguard monthly, Lyme vaccine booster yearly and in excellent health until I fed him the food July 24th; I know his time was going to come to an end due to his age but to know he died because I gave him a food I am now convinced was toxic is unbearable. Please look into the Blue Buffalo and these complaints. Thank you. (b) (6)

EON-117497	3/18/2013 13:03	Meow Mix	I religiously purchased Meow Mix for both my cats because my older cat is a picky eater and she will only eat that brand. My male cat started experience problems on Friday and was bleeding from his penis. It was caused by build up of calcium and phosphates in the cat food and it created glass crystals that blocked his urine flow (his bladder was the size of an orange, not to mention the pain he must of experienced). We either had to put him down then or pay \$400 to try and save him by inserting a catheter. He had to be flushed out 5 times for it to finally run clear and free of the crystals, but may have long term problems as a result. I am aware of all the dog food issues so I do buy expensive dog food and we are upset with ourselves that we weren't more diligent in researching our cat food as well. It seems to be fairly common knowledge although the bag does say veterinarian recommended. I contacted meow Mix on Friday through their website and we also discussed it with the local walmart and hyvee we purchased the product from, but ultimately they said it was not their responsibility to notify the public. I did also share this information on facebook so my friends would be more conscious of the food they are purchasing for their pets.	4	Years	Domestic Shorthair	Cat		
EON-117471	3/18/2013 12:24	Nutro Natural Choice Senior 7+ chicken whole brown rice & oatmeal formula 15 lbs	I gradually switched 3 of my dogs to Nutro Natural Choice. I bought 2 bags; First was a 15 lbs bag of Nutro Natural Choice Senior 7+ Chicken, Whole brown rice, & Oatmeal formula (for my 9 yr old Australian Shepherd mix) and the second was Nutro Natural Choice Young Adult Chicken, Whole brown rice, & Oatmeal formula (for our 11 month old cocker spaniel and 17 month old Siberian Husky). I did a gradual mix and about a week after staring the new food my dogs started vomitting yellow bile looking liquid substance. At first a different dog would vomit every couple days. then After 2 weeks there was a different dog throwing up every day between 1:00 -4:00. By this time their food was over half the new food but still had quite a bit of their old food (which was IAMS). I tried feeding 3 times a day but they all 3 still kept vomitting the same yellow consistency but with chewed up dog food in it. So I got online and looked under consumer reviews and found tons of similar cases where peoples dogs started vomitting on this brand dog food. I immediately changed back to IAMS adult food on March 15 and no one has thrown up since. I contacted the Consumer Care department of Nutro at 1-800-833-5330 and spoke with (b) (6) who told me those reviews on line were not accurate and there has been no complaints on this food. I believe 100% that the Nutro food was making my dogs very sick and hope that someone looks into this.	11	Months	Spaniel - Cocker American	Dog	28	Pound
EON-117422	3/18/2013 9:45	Blue Buffalo Lamb and Rice dry dog food	Purchased Blue Buffalo Lab and Rice 30lb canine kibble. Opened bag and detected a foul odor of dead road kill in the hot sun. Called Blue Buffalo March 5, 2013. All they said was take it back to the store for an exchange. I offered to FedEx it to them for analysis, they said no. They do not have a process for issues like this. There was a great deal of confusion as to what to do. I asked them to log my complaint in their system and give me a ticket number and with great reluctance and indifference finally created and gave me a ticket number. I took sample and half of bag package to store. Called back March 11, they changed thier message on their phone that a Facebook recall on their products was false (I do not have a Facebook account). They still did not make arrangements with the store for pickup. They said it would take several weeks to get the sample from the store. Again great confusion and indifference about this. Called. March 15. Still no plan to get the food and bag package from the store. And, they did not pull the lot number and test it in Quality dept. Best By March 18 2014 Lot number P2124 2 2M18. They have no interest in pursuing this issue.						

EON-117409	3/17/2013 21:45	EVO 95% Chicken & Turkey wet cat food	<p>After feeding my cat EVO 95% Chicken & Turkey 13.2 oz canned wet cat food, she became extremely ill and was seen by her local vet (b) (6) from (b) (6) (b) (6) on Wednesday night 3/6/13. She was sent home with pain meds and an antibiotic with a diagnosis of Colitis. Upon the vets recommendation she was brought back to the (b) (6) (b) (6) the next morning (3/7/13) since her condition appeared worse. She was seen by her primary vet (b) (6) After lab work revealed her critical status, she had to be transferred and admitted to (b) (6) in (b) (6) (b) (6) (seen by ER vet (b) (6) and ultrasound ER vet (b) (6)) She had gastrointestinal issues, swollen lymphnodes, pancreas and colon, along with continuous mucous diarrhea and acute renal failure. Her temperature, BP, and respirations dropped and she had to be intubated since she stopped breathing on her own. Fortunately, she was resuscitated, but spent 5 nights at this Veterinary ER and was not given even a 50/50 chance of survival. Fortunately, she made it, but the whole event has really taken a toll on her overall health. The EVO catfood (including specific lot #'s) that she had been eating has recently been under review in Massachusetts for salmonella. (b) (6) symptoms are consistent with salmonella toxicity. I purchased several cases from Pet Food Direct and also Wag.com. One of the best buy dates is 12/18/14, and the lot #15ECM212 1842. UPC 5148541452. This specific lot is being investigated for salmonella including many others. I have 4 remaining cases that I am saving so that can be tested.</p>	5	Years	Abyssinian cat	Cat	10	Pound

EON-117408	3/17/2013 15:33	Purina Beneful Healthy Weight Dry Dog Food	<p>Last Saturday (3/9/13), we opened a new bag of Beneful Healthy Weight dog food. It smelled different than usual, but we attributed it to just our having colds that week. (b) (6) gets fed 2 cups of this food twice a day. She was fed in the morning and then began having diarrhea later that day. After feeding her 2 cups in the evening, she had more diarrhea. With each day, she was getting weaker, uncontrollable diarrhea, accidents in the house, disorientation, lethargic, and just acting different. On Tuesday, March 12, she did not finish her breakfast....this is a dog who NEVER leaves a crumb of food in her bowl. Later that morning, she did finish the food. We took her to her regular doctor that day because she was not getting any better and we were worried about dehydration from the diarrhea. The vet ran several tests. She was also examined and the doctor noticed a mass on her pancreas and an enlarged pancreas. She also said (b) (6) stomach was distended. We were given antibiotics in hopes that any underlying infection would be cleared up. She was also given a probiotic to help with her diarrhea. That evening (b) (6) was fed at her usual time and given her antibiotic. About 20 minutes later, we took her outside to pee and she collapsed on the ground. She still had diarrhea, but had to lay down as she went because she had no energy. Once my husband got her back up, he brought her back to the house. She vomited on our deck before she got inside. All the food she had eaten was undigested and came back up. He brought her in the house and she immediately began drinking a lot of water. I thought it could be something with her food, so I began researching online. I found over 400 complaints about Beneful with all of the symptoms described matching (b) (6) symptoms. We stopped feeding the Beneful and started her on chicken and rice. She has gotten more energy since being off the Beneful, but she now has an eye infection and an enlarged liver.</p>	12.5	Years	Mixed (Dog)	Dog	65	Pound
EON-117407	3/17/2013 1:15	Kingdom Pets Chicken Jerky	<p>unaware of the recall, I purchased Kingdom Pets Jerky treats from CostCo in (b) (6) in the fall of 2012. I did not give the dogs any until November of 2012. after feeding them the treats, my miniature poodle became ill with vomiting, excessive thirst, frequent urination, loss of appetite, and lay very still. His condition grew progressively worse and in 3 weeks, he died. I had him to vet several times during that period. He treated y dog as best he could. When I asked him what the problem was, he told me that my dog had eaten something that shut the digestive system down.</p>	5.5	Years	Poodle - Miniature	Dog	15	Pound
EON-117406	3/16/2013 21:30	Evo 95% Chicken & Turkey Canned Cat Food	<p>I had one cat, (b) (6), who had been dealing with chronic diarrhea so the vet recommend Evo Venison Canned food. Since (b) (6) was doing better I decided to pick up the other "flavors" of Evo for my other cats. The Evo Chicken & Turkey, Turkey & Chicken, and Beef was fed intermittently to the other 5 cats over the past 3 weeks. Noticed had intermitton diarrhea but nothing major. This past week (March 11-16) I fed Evo canned to them more consistantly and now they all have some form of vomiting and/or diarrhea. One cat, (b) (6), was very lethargic and was given SQ fluids to help her. As of today, March 16th, they still have vomiting and/or diarrhea and are stable</p>	13	Years	Domestic Shorthair	Cat	10	Pound

EON-117405	3/16/2013 16:24	Beneful	Owner was at the bottom of the bag of Beneful and dog broke out in large hives (came into the office 3/11/13). Owner had applied Frontline on Saturday (3/9 I believe). Had normal stool. Decreased appetite but did eat some ham after the hives. Doesn't eat table food but ate a crayon 2 weeks ago. Had a small piece of pork chop at some point per owner. Owner is using the same shampoo and has used Frontline before without a problem. Didn't break out on Sunday but broke out in hives 3/11 and had hives Saturday night (3/9). At the end of the week prior to 3/11, the dog began not eating. Occult Hw -, lyme -, Ehrlichia -, Anaplasma -. Thrombocytopenia seen on 4 cbc's in the office. 71000 platelets seen but some clumping on sample submitted to (b) (6) laboratory. 3/13 cbc didn't register platelets on my machine but (b) (6) lab has platelets at 137000 with 1+ clumping. Not certain if signs are related to Beneful but people keep coming in with sick animals being fed Beneful recently	1.5	Years	Pit Bull	Dog	86.2	Pound
EON-117404	3/16/2013 14:54	Smokehouse Duck and Sweet Potato Combo	Vomiting all day about 2-3 hours after eating.	1.5	Years	Retriever - Golden	Dog	24.6	Kilogram
EON-117400	3/15/2013 22:39	Beneful	Had started my pets on Beneful in the spring of 2012 to change to a cheaper dog food..since then I have noticed the health of my older dog declining. He was panting all the time after eating, which I contributed to him getting older or eating too fast..He had been vomiting on and off which I just thought may be his age or eating fast..noticed that his abdomen started to bloat...Last month we took him to the vet because all the symptoms are worsening-excessive thirst, excessive urination,weight loss, cataracts in his eyes,lethargy and weakness in back legs to the point that we had to sling him to get up and down a short flight of stairs or he would fall. During our visit he had labs drawn which showed excessive amounts of glucose in his blood and his urine..he was diagnosed with uncontrolled diabetes.His liver enzymes were elevated as were his levels to test kidney function-His organs were being damaged!! We stopped feeding him beneful just a few days before the vet visit thinking we will feed him home cooked thinking he may have cancer. The vet started him on insulin.While trying to regulate him on insulin, we noticed that his blood sugar was getting really low at times and when testing him prior to eating the home cooked feed he was not requiring insulin because his blood sugar was within the normal range. A week ago I discussed my dog's blood sugar results with the vet and his diet..she thought that we should stick with his dry food due to it may be much harder for us to always be consistent with home cooking for the dog and with diabetes he need consistence with his feedings. We started to introduce a cup of dry Beneful with the rest of his home cooked foods and returned to his insulin regimen. Well, since he had been back on the Beneful the 15u of insulin is not decreasing his blood sugar to a safe level .His glucoses were very high even with his insulin. He is started to pant and appear lethargic again.. Once he returned to the home cooked diet,chicken, brown rice and vegetables, his blood sugar is close to normal. He stopped panting and had increased energy-he is now able to walk up the steps but still requires help to climb down. I have not seen this energy in my dog in over 6 months.There is such a difference in my dog when he does not eat the Beneful.And as for my other pet-I have spot checked her glucose a few times and hers happens to be above the limit of normal when eating that food-it would only be a matter of time for her also..and other dogs!	11	Years	Retriever - Labrador	Dog	87	Pound

EON-117399	3/15/2013 21:48	Purina Beneful Original 100% Complete and Balanced Nutrition	<p>My complaint concerns two episodes of finding moldy dog food in 3.5 lb. bags of Beneful Original by Purina, one of which I still have. Of course, I am not feeding that to my dog and haven't for some time, as soon as I read about the problems and heard about them on television.</p> <p>First of all, although through the grace of God (b) (6) (my dachshund) did not die from eating Beneful dog food from Purina but he did have two episodes of repeated urinary incontinence and one episode of hematuria, which I took to represent UTIs. (b) (6) is an "inside dog." This was before I had read online and seen on TV that Beneful was having a problem with moldy dog food. He was lethargic, he slept all the time, and he was obviously ill at those times. We didn't get a urinalysis done but he was spilling 1+ protein from his urine by a test strip (he watered the vet's wall).</p> <p>I actually had a golf ball sized lump of moldy Beneful, but this was before I knew it was harmful, so I just tossed the whole bag out. I can't give you a DATE OF RECOVERY below because I have not had the vet check his renal functions or hepatic functions just yet. He could very well still have problems in the future. I quit feeding him the Beneful in the fall or winter of 2012, when I became aware of this information. Then I found another partially used bag in my pantry, realized quickly that it was moldy when I had an allergy attack and it felt sticky and smelled like mold. I saved this dog food.</p> <p>He also had an episode as described above prior to this, but I can't guarantee that the vet visit on 05/04/2011 was for urinary incontinence/hematuria. My vet hasn't send me copies of his medical records, as of yet. Maybe you can get these, you have my authorization to do so.</p> <p>I realize that I am lucky that my dog didn't die, but I wanted to bring this to your attention to possibly help other pet owners. And, of course, it is still also possible that (b) (6) may have problems with his kidneys or his liver (dogs that die usually bleed out from every orifice) in the future. I would like to have the moldy dog food tested and analyzed by someone in your lab. (b) (6) at the state Dept. of Agriculture Lab in (b) (6) kindly referred me to your website.</p> <p>To the best of my abilities, the batch and/or serial number on this bag of moldy Beneful that I have, along with most of the bag for samples, is 10491087 1744L01. I purchased this bag at (b) (6) (b) (6) in (b) (6), but I do not save my grocery store receipts. The last part of that number was hard for me to discern and I may have it wrong.</p>	9	Years	Dachshund - Standard Wire-haired	Dog	18	Pound
EON-117393	3/15/2013 18:39	Purina Beneful Original	<p>My husband decided to try a new food with my dog, so my husband bought the Original Beneful. After my dog eating the food for the first time, he began vomiting and became lethargic, his gums whitened and we could tell that he became very sick. My dog is ALWAYS hyper, wagging his tail, full of energy but this particular day of his life, he vomited about 4-5 times, it was orange and not all the food had been digested. I immediately became worried because while I understand that dogs vomit a lot, this was different. He had never vomited food before in his life. I have never seen him look so ill, look so lethargic and sad. I know my dogs normal demeanor and behavior and something clearly wasn't right. The only thing that changed in his life, was the food.</p>	3	Years	Mixed (Dog)	Dog	80	Pound

EON-117380	3/15/2013 16:48	Blue Buffalo Wildnerness Chicken Adult Dry Dog Food	<p>Our dog was very uncomfortable one evening and had a lot of noise coming from her digestive tract. It sounded like gas, but she wasn't actually passing gas at that point. She had multiple episodes of diarrhea that evening and then threw up multiple times the next day. She was lethargic the next couple of days, and then one morning she just would not eat her food (very unlike her, she typically eats in about 45 seconds flat). She was very uncomfortable and again had a lot of noise coming from her digestive tract. At this point, we brought her into the vet. The vet did blood work and took a stool sample and nothing showed irregular in either of those. Our dog was diagnosed with a "stomach bug" and was given prescription soft dog food and antibiotics. Within about 12 hours she was back to her old self. When we were finished with the prescription dog food and went back to her typical dog food (Blue Buffalo Wildnerness Adult Chicken formula) (and and at this point it was a new bag, different lot from what she had originally gotten sick on), she started having problems with diarrhea again, has been drinking a lot more water than is typical for her, and her energy levels are decreased from what they normally are. This has been going on for about 3 weeks now. We will be changing her dog food to a different brand this evening hoping it will make a difference and she feels better. We have had our dog on this dog food for about 2.5 years and have previously loved it. It's just the last two bags we've had her on (since about the beginning of January) that we've started experiencing problems. The main/worst episode started on 2/26, but we have noticed some changes in her behavior since the beginning of the year.</p>	3	Years	Weimaraner	Dog	55	Pound
----------------------------	-----------------	--	---	---	-------	------------	-----	----	-------

EON-117366	3/15/2013 15:24	Hill's Science Diet Advanced Fitness Adult Original	<p>I switched both my terrier and border collie to Science Diet Advanced Fitness food from Simply Nourish Chicken/Rice over a period of 7 days, gradually becoming more and more science diet. I started noticing my dogs becoming lethargic and had diarrhea a few days into the transition. I thought it was just normal transitional upset, so I continued the transition. When they where fully on the new food (Science Diet) they became lethargic, severe diarrhea, dehydrated, and my terrier began vomiting any food given.</p> <p>I took the dogs off Science diet and put them on boiled chicken breasts (skinless/boneless) and a little white rice. After aproximately 2-3 days their poops began returning to normal and they began becoming more active and normal. I didn't realize it was the food at this point, I thought they had eaten something that upset them outside, so I began them on science diet again and within 2 days we had severe diarrhea, lethargy, and refusal to eat anything. Again the terrier began vomiting everything, the border collie also began vomiting. Again, they where taken off science diet and put on just boiled chicken, everything returned to normal within 2 days or so.</p> <p>I put only a few pieces of kibble mixed in with pieces of the boiled chicken and they began having diarrhea again, though not as severe. They were a bit lethargic, but not as bad as before.</p> <p>During the entire process they did not recieve any other treats other than milkbones. They recieve two milkbones a day, original formal, medium. They recieved milkbones on the same schedule for the entire time, including when they where sick and when they recovered, which makes me believe they are not the cause. The only difference was the food.</p> <p>I returned the food to the store, told them it caused both of my dogs to become very ill, and replaced the bag with Blue Buffalo Wilderness Chicken formula. No transition on this food, both dogs have normal poop, and normal activity. The bag, when returned to petsmart was a little under 3/4 full.</p> <p>The store I bought and returned it to was Petsmart, address: (b) (6), (b) (6); (b) (6). I returned the bag on 03/13/2013 at aproximately 3:30-4pm. This was the largest size they sell (I believe 35lbs or 30lb) bag. Bag was not torn or opened when purchased, no noticable discoloration or odor as far as I could tell. It is stored at room temperature. Kept in bag in a dry closet. Used scoop food to bowls for feedings. My terrier has been on Science Diet in the past and he did not have any reaction. Neither dog has had a reaction to any other food.</p>	4	Years	Terrier (unspecified)	Dog	14	Ounce
EON-117365	3/15/2013 15:09	Nutro Natural Choice (New & Improved) Adult Small Bites Lamb Meal & Rice Formula.	<p>January 2013 After purchasing a bag of new & improved Nutro Small Bites Lamb & Rice dog food, one of our dogs began to vomit daily like clock work. Frothy bile. This went on for 4 weeks and we tried antacid at night etc. then our other poodle began doing the same thing regularly and almost daily. I finally called the store where we purchased the food and have been for the past 4 years. The Asst. Mananger googled the food and found 1,340 complaints on the consumer affairs for pets web page, desribing my same issues with the food. The store manager said she was very concerned and that she wouyld not sell it anymore and would warn consumers. Finally I switched food overnight recently. They have not vomited since!</p>	5.5	Years	Poodle - Toy	Dog	13	Kilogram

EON-117355	3/15/2013 14:15	Waggin' Train Duck Jerky (Nestle-Purina)	All of the pets in the household have become ill one after the other recently. (b) (6) started vomiting and feeling nauseous about 3 -4 days prior to presentation. The day prior to presentation they noticed PU/PD type symptoms and thta he was shaking. Throughout the veterinary treatment we discovered that he became acidotic, had glucose and ketones in his urine. All pets also had some degree of shaking during their illness. Symptoms were suspicious for Fanconi's syndrome for all three affected pets in the household. The only food in common for all of the affected pets were the Duck Jerky treats.	6	Years	Chihuahua	Dog	6	Pound
EON-117352	3/15/2013 13:54	Waggin Tails Duck Jerky (Nestle-Purina)	Pet became polyuric, polydipsic recently and started vomiting not long after. This pet started clinical signs similar to two other dogs in the household who both became very sick (b) (6) also started having diarrhea today and is not interested in eating. All of the dogs also had various degrees of shaking during their illness. After multiple days and visits the dogs were diagnosed with Fanconi's Syndrome and had acid/base imbalances and glucosuria with a normal blood glucose and hematuria with a secondary bacterial infection.			Chihuahua	Dog		
EON-117342	3/15/2013 13:33	Milo's Kitchen Chicken Grillers	I had been feeding Lucy Milo's kitchen chicken grillers for 6 months prior to her death. She had consumed almost 2 full large bags before she got sick. In the beginning of October she began vomiting more frequently. I also noticed she had been urinating more frequently. On October 17th, in the evening (b) (6) squatted to pee and nothing came out. She then began squatting over and over again and nothing came out. I took her to the vet first thing in the morning. The vet diagnosed her with a UTI and put her on an antibiotic (b) (6). By the evening friday, (b) (6) was very lethargic, she would not eat/drink anything, and she was clearly uncomfortable. Saturday morning I woke up at 7am and she was hiding under my bed shaking and her breathing was labored. I rushed her to the vet. The vet took blood and informed me that she was in renal failure and the toxins were building up in her body and that the kindest thing for me to do at that point was to put her to sleep because she was reaching a level of toxicity that would begin seizures and brain damage. I had to put her to sleep that morning, (b) (6).	4	Years	Papillon - Spaniel - Continental Toy (with erect ears or with dropped ears (Phaléne))	Dog	6.9	Pound

EON-117315	3/14/2013 20:00	Canyon Creek Ranch Natural Chicken Tenders	<p>9/8/12 Dog had vomiting and diarrhea, was lethargic. Treated with Metronidazole, FortiFlora, Purina K9EN. Recovered and returned to normal diet of cooked chicken and rice, lam's Premium Protection dry food, and Canyon Creek Chicken Tenders. 10/9/12: Dog developed terrible itching problem and tore his fur out. Treated with Betagen topical spray. Dog continued to have chronic and intermittent diarrhea over the next several months which I treated with Immodium. I kept him on his normal diet. 1/17/13 Dog had continuous diarrhea for 5 days previous, was eating grass, and reached a point where his bowel movements were mucous and grass. Treated with Metronidazole, Panacur Oral Suspension and Purina K-9EN for approximately 25 days. Dog has now been transitioned to Science Diet Canned Food, continues with lam's product and Pupperoni for treats. Both of my dogs the one reported in this case, and a mixed breed, 7 year old, 29 pound dog suffered the same gastrointestinal events during the time periods and were treated similarly. On this last adverse event, the older dog recovered when treated with Immodium, but was also switched to the identical diet on 1/17/13. I contacted Purina and was told to destroy the product, even after I requested that they allow me to send it back for further testing. I retained the product until their 3rd party claims administrator from Sedgwick CMS also told me that no testing would be done. I discarded 18 bags of the product on 2/13/2013. I was told today by Sedgwick that (b)(6) medical records have been provided to the FDA for review and that they reported chronic, intermittent diarrhea. I am submitting this report to ensure that you have accurate information.</p>	3	Years	Mixed (Dog)	Dog	16	Pound

EON-117310	3/14/2013 18:00	Innova Evo 95% Chicken and Turkey, Innova EVO 95% Duck Cat Food, Soulistic Good Karma	<p>I purchased two new cases of Evo canned cat food, 95% Chicken/Turkey and 95% Duck on Saturday, January 26, 2013. After using the few cans from the last cases, I started to feed the cans from the new cases. Wednesday, January 30, 2013 my cats were off their food. Thursday, they were lethargic. Friday morning, February 1, 2013, two of my cats (b) (6) and (b) (6) would not even eat their morning treats of Whole Life Freeze Dried Chicken. I took them to the vet. They received fluids and I was given a prescription for an appetite stimulant. By Saturday, my older cat, (b) (6) stopped eating, too. Now, all three had watery/stinky diarrhea and were vomiting bile. Sunday at 4am we went to the ER vet due to vomiting and diarrhea, lethargy and inappetence. Monday, (b) (6) was constantly vomiting bile and drooling. We took him back to our regular vet. He was given fluids, Flagyl, pepsid and an anti-nausea shot. All three have been on Flagyl since Monday, February 4, 2013 and the diarrhea, vomiting stopped within two days or so. All the cats had normal temperatures throughout. The complete blood count on (b) (6) was normal, as was the PCR. The vet advised us to throw out the EVO cat food. They were all feeling much better by 2/7.</p> <p>I had also been feeding Soulistic Good Karma canned cat food when this illness first occurred and on 2/13 I purchased a new case. I use 4-5 teaspoons of the juice from the canned food to give (b) (6) his Cosequin sprinkles. (b) (6) and (b) (6) eat a bit of the food mixed into the Evo. After a day or two of giving (b) (6) the Soulistic juice, he started vomiting again. We took him to the (b) (6) on 2/16/2013.</p> <p>It turned out that the new case of Soulistic had the same lot numbers as the old cans. (b) (6) also ate more of the food than my other cats. Therefore, I'm not sure whether it was the Evo or Soulistic canned food that made my cats so sick.</p> <p>Since, I stopped feeding the Evo and Soulistic, and got them great veterinarian care all three of my cats have recovered. I could not upload the information about the Soulistic because it was after the date that I started this form. The UPC: 1377801229, the best by date: 6-8/2015 and lot# NX1416. Purchased at Unleashed on (b) (6).</p>	4.75	Years	Siamese	Cat	9	Pound
EON-117203	3/14/2013 0:54	Innova Red Meat Small Bite Dry Dog Food	Initiated food transition from Wellness Core to Innova purchased from Petsmart in (b) (6) by slowly adding small amounts of new food to old food. I noticed severely watery stools in both dogs. I slowed the transition until I stopped the transition then began the food transition once again. This time one of my dogs, (b) (6) had bloody stools.	5	Years	Chihuahua	Dog	10	Pound
EON-117202	3/13/2013 23:45	Nature's Variety Instinct Salmo Meal Formula, Nature's Variety Instinct raw Frozen Rabbit	After 2 days on new bag of food, our dog was first lethargic then had violent vomiting that lasted throughout the night. He was brought to the vet who has taken blood tests, x-rays, given fluids and anti vomiting medication. We are awaiting blood test results back. He has been sick for three days and will not eat any food.			Retriever - Golden	Dog		

EON-117167	3/13/2013 13:00	Nestle Purina Beneful Dog Food	My friend decided to switch to Purina Beneful dog food. Within 8 hours after ingesting the beneful dog food, the dog was found to have watery stool with high amount of blood in it. The dog was incontinent within its crate for the first time and appeared to be depressed. After 24 hours, my friend switched the food to another brand and the symptoms resolved nearly immediately.	5	Months	Terrier - Bull - American Pit	Dog	35	Pound
EON-117132	3/13/2013 2:24	Wellness Healthy Weight Cat Food	I submitted a separate report for my dog that is very ill - FDA ICSR ID (b) (6). My cat also ate this food and within hours vomited it up. She refused to eat any more of this food and kept meowing for something to eat even though this was available.	9	Years	Domestic Longhair	Cat	16	Pound
EON-117131	3/13/2013 2:15	Wellness Healthy Weight Dry Cat Food	Dog ate 1-2 cups of the dry cat food and got very ill within a few hours. She vomited repeatedly, had diarrhea repeatedly, starting passing a lot of blood and stopped eating completely. We took her to the vet who did blood work, gave her fluids and medications, etc. She seemed to get slightly better for 3 days but would not eat much, then started vomiting every bit she did try to eat. We took her back to the vet, then to the emergency vet and then upon their recommendation, then to (b) (6) (b) (6). She has been admitted to the critical care unit for 4 days so far with an acute kidney injury where her kidneys went from fully functioning within 24 hours of eating the food to total renal failure. She had no kidney issues prior to eating this food, which I have blood work to show that. They have been treating her with various medications and her kidney function is slowly returning. She is still very ill and still in the critical care unit. The dog had no other food that day and did not have access to any other toxin that could have been ingested. I will also file a separate report because my cat also ate this food and vomited it up and then refused to eat any more of it to the point of eating no food for several days because that was what was available.	9	Years	Collie - Rough-haired	Dog	75	Pound
EON-117130	3/12/2013 23:30	Evangers Classic Recipes Goin Fishin Dinner For Cats	I purchased a case of cat food from (b) (6) in (b) (6). In one can I opened, I found a hard black rock of some sort. I notified the company via email and phone regarding the foreign object and they have not responded about it although they have responded regarding calorie content of their dog food.						
EON-117029	3/12/2013 15:45	picture of label attached (Pedigree Combo Chopped Chicken Beef Liver	Opened a can of Pedigree Chopped Combo Chicken Beef Liver (BB122714 21 2) 252 FKKCD 1346 CM) little smuged may say: last 4 numbers and letters: 1946 CM) stamped on can had shard of plastic in it. Found it because I was feeding a little dog by hand and using my fingers to get him to eat and found the plastic. Slightly yellowed thin piece of plastic over 1 inch long and 1/2 inch wide. Pictures attached.						

EON-117001	3/12/2013 15:09	Beneful Healthy Weight	<p>A bag of Beneful Healthy weight recieved has maggots, pinworms, moths and other parasitic infestation, also moldy. Also I noticed a pinworm in my nostril prior to the discovery of them in the bag, they settled down in and I used the food 2 days before seeing the infestation, bag bottom burst, as I put it in a tub to bring to the vet. Have called my physisian, and vet. Dogs will go tommorrow. I will go to doc as soon as I hear from him. because this is a health issue to humans as well, I was horrified to see the many complaints on the facebook page for Beneful dog food, and the deaths of pets and vet bills. I however also have been infected by this. I picked up what I though was string from the bag in the floor and it trashed back and forth trying to latch on, and I later realized it was similar to what was in my nose, and believe it to be a pinworm. I have found a few more, but am leary of sifting through the bag. Beneful Reps tell different tales. Cannot get a supervisor.</p>						
EON-116998	3/12/2013 15:03	<p>Hill's Science Diet Mature Adult Indoor, Purina Friskies Indoor Classic Pate Chicken Dinner with Garden Greens Indoor</p>	<p>This email is a report of a pet death possibly related to the feeding of Hills Science Diet, in conjunction with Friskies Indoor Classic Pate Chicken Dinner.</p> <p>On March 2, 2013, we purchased some Hill's Science Diet Mature Adult Indoor dry cat food as a fill in for a prescription diet we had run out of. This was to be fed as the primary food, along with a 1/4 can of wet food (Friskies) 2x per day. The important feature of the food was the high fiber content, as our cat had his large colon surgically removed back in roughly 2005. (b) (6) was fed the Friskies for several months at least without incident, inconjunction with another prescription diet.</p> <p>(b) (6) ate the food, and was fine for a couple of days, but then began to eat less and less, and by Wednesday had stopped eating all together, and we made a Vet appt for the next day. He was mostly unconscious and weak by ther next morning so we rushed him in before his appointment. Initial tests by (b) (6) of the (b) (6) indicated he was in liver failure, and his blood count was down to ten. She was unable to palpate a tumor, and she stated the blood tests indicated toxicity as a cause of his illness. She was unable to treat him further and transferred him to (b) (6) in (b) (6). The attempted a blood transfusion, but (b) (6) passed away before the could get the transfusion done. The vet there was in agreement that it was a tumor or toxicity, but again, there were missing signs of cancer.</p> <p>As the timing and itiology of (b) (6) illness coincide precisely with the introduction of this food to him, we are afraid that something in the food may have caused his death, and thus are reporting it.</p>	12	Years	American Shorthair	Cat	12	Pound

EON-116883	3/11/2013 21:30	Beneful Playful Life	We started our shepherd on Blue dog food. He was a purebred from a reputable breeder with no known problems. When he turned 4 or so, we switched to Beneful dog food for both dogs....slowly incorporating it into their other food (Blue). After a few months, our shepherd starting drinking CONSTANTLY and almost not peeing at all. Then he'd run outside all the time, crouch as if to defacate, but nothing happened. Yet, he was losing a bunch of weight, over thirty pounds in a few months. Two vets and thousands later (they found no cancer, no worms, no bacteria, nothing that could explain the weight loss, crying when defacating, lethargy and water intake) I woke up one day to find him laying on the floor, five years old, couldn't move and died in my arms.	5	Years	Shepherd Dog - German	Dog	120	Pound
EON-116882	3/11/2013 20:54	purina beneful healthy weight formula	(b) (6) became very lethargic, could barely walk up steps, and moaned when doing so. I took him to vet, they thought it was a digestive tract problem. Gave him metronidazole, and fed him hills prescription diet for 5 days. he recovered nicely, was nearly back to normal. 6th day i returned to feeding him Beneful Healthy Weight dry dog food. By noon he was sick, lethargic, and could barely get up the steps once again! Fed him another food that evening, which brings me to the time I am writing this. I decided to research beneful online. I was floored by what I found! Many other dog owners with similar stories. I truly believe that beneful dog food is what caused this illness. I just hope my dog recovers a second time.	10	Years	Dachshund - Standard Smooth-haired	Dog	23	Pound
EON-116881	3/11/2013 20:54	Beneful Healthy Weight	two weeks into feeding my dog beneful, she started throwing up directly after eating and becoming dehydrated. After a couple days of this I called my vet and told them everything. They told me there had been results of beneful harming dogs. I stopped feeding both dogs beneful. Fed them boiled chicken for a few days and then bought them different healthier dog food. thus far my dog is doing beatifully on the new food.	2	Years	Beagle	Dog	20	Pound
EON-116880	3/11/2013 20:54	Ol' Roy	I gave my 4 dogs, well 2 dogs and 2 puppies Walmart's own cheap dog food (Ol' Roy) and every single one of my dogs were either puking or having the runs, which looks like the food wasn't being digested properly because of the colour matching the colour of the dog food, or both.			Unknown	Dog		

EON-116879	3/11/2013 20:39	Friskies Indoor Delights	<p>My mother (b) (6) moved to (b) (6) four weeks ago. I had not seen her cats in years. When I saw (b) (6) I was horrified. Her entire mouth (lips) was swollen. At first I thought maybe this was a bug bite. But her mouth (lips) remained swollen for several weeks before we took her to the vet.</p> <p>We took her to (b) (6) in (b) (6). (b) (6) saw (b) (6). When she opened up her mouth, (b) (6) had several tumors growing on the upper palate inside her mouth. (b) (6) made the comment that she thought this might be cancer. We had (b) (6) put under anesthesia to have a biopsy made to find out if this was cancer.</p> <p>One week later (after the biopsy surgery), (b) (6) called us and said the good news is that (b) (6) does not have cancer. But she has some kind of an allergy, and I suspect it is from the food.</p> <p>She asked us what my mom (b) (6) is feeding the cats. I told her, "Friskies Indoor Delights."</p> <p>(b) (6) suggested that we change the food and that we bring (b) (6) back in for a steroid injection.</p> <p>We brought (b) (6) back in (before we had changed the food/brand), and (b) (6) had developed a new tumor on her tongue (within one week).</p> <p>(b) (6) told us she had never seen anything like this, tumors growing inside a cat's mouth from a food allergy.</p> <p>We have now switched foods, upgraded to a Holistic Premium cat food, and (b) (6) needs to return to the vet again for a second steroid injection.</p> <p>Time will tell if these tumors will resolve from the switch in food from Friskies Indoor Delights to a Premium Holistic cat food.</p>	14	Years	Unknown	Cat	12	Pound
EON-116878	3/11/2013 18:18	Purina Beneful	<p>(b) (6) started having seizures in Novemer 2013. He had no prior healty issues. His vet could not determine the cause of the seizures. After his first bout of seizures, we discontinued his regular brand dog food, Purina Beneful for 2 weeks, he did not have anymore until we began giving him the Beneful again in December. On (b) (6) he had severe seizures, his vet could not get them under control, he had to be put down. Prior to him having seizures, he would sometimes vomit after eating the Beneful.</p>	8	Years	Mixed (Dog)	Dog	84	Pound

EON-116870	3/11/2013 16:09	Beneful	I noticed numerous reports of adverse events reported to an online outlet called Consumer Affairs - specifically about Beneful, Nutro and Blue Buffalo pet foods, yet the FDA/CVM has only a few reports regarding Blue Buffalo at this point. Can someone at the FDA or CVM look into these complaints? I realize it is not a government website, however I would urge the FDA to remind consumers where to report adverse events. Perhaps a public awareness campaign, such as a poster or flyer in a PDF format could be distributed to veterinary offices, veterinary associations, pet stores, feed stores and any other retail outlet, both offline and off, that could benefit from some basic guidance, advice and instructions on how and where to report information about adverse events related to pet food and animal feed. Just a thought.						
EON-116863	3/11/2013 14:18	Purina Beneful Original dog food	On (b) (6) we noticed that (b) (6) was a little lethargic, but other than being sluggish she had no other symptoms, the next morning the kennel had been vomitted in, but all 3 dogs stay in the same kennel so we weren't sure it was from her. She went out to the restroom with the other dogs and seemed tired, but nothing other than that. We had plans to be gone most of the day. We left around 8:30 in the morning and returned around 8:00 that evening. When we came home the other dogs jumped from the kennel and (b) (6) was unable to get up and breathing hard. My husband rushed her to the vet. The vet thought her symptoms were consistent with a stroke and she was getting weaker by the minute and he felt there was nothing that could be done. She was put to sleep and cremated. I had heard absolutely nothing about a possible problem with Beneful dog food until I ran across an article today.	8	Years	Terrier (unspecified)	Dog	20	Pound
EON-116831	3/11/2013 9:30	Premium Edge Finicky Adult Cat Formula	I found this recall notice online and have not found it listed with the FDA? http://petfoodinformationcenter.com/wp-content/uploads/2013/03/PE-DN-4health-Thiamine-Recall-Release-3.10.13.pdf						

EON-116830	3/11/2013 6:54	Beneful Fiest	<p>This is a report involving more than one animal over a period of about a year. 1) In June, 2011, my 85 lb. 10 year old hound-Lab mix, (b) (6), began eating Beneful Healthy Weight dog food, purchased at WalMart on (b) (6) in (b) (6). By May, 2012, (b) (6) was dead from an unknown illness that had made him progressively worse over time. We thought he was a little young to be exhibiting signs of old age, as in failing organs, but he was, after all, 10, and a large dog. So we didn't connect it to the food. 2) My daughter's 8 year old 45 lb. English Sheepdog mix, (b) (6) had to be euthanized in about Aug.-Sept., 2012, due to an unidentifiable digestive illness. He was sick over about a 4 month period, with several trips to the vet. An exact cause was never determined, but he became progressively worse, to where he couldn't keep any food down at all. He had eaten Beneful Playful Life, off and on, purchased at various stores in (b) (6), for 2 to 3 years. 3) My 4 year old cat, (b) (6) like to eat dog food, as well as cat food, and any other food he could get. Of course I fed him cat food, not dog food, but he would eat from the dog's dish whenever he could. Last month I had to have (b) (6) euthanized for an undisclosed type of anemia that made him so sick, so quickly that I didn't know he was ill until 3 days before he died. It wasn't like he ate a lot of Beneful, maybe a few morsels about 3 times a week, over a period of about 3 months. Of note, perhaps, is that the cat food my cats regularly ate was Purina One, purchased at WalMart on (b) (6) in (b) (6) 4) My 15 lb 1-1/2 year old terrier mix, (b) (6) began exhibiting signs of illness in the form of lethargy and skin problems. She has patches of thick lumpy hide that itch, on her back, rump, and chest/throat. She has been eating Beneful Healthy Fiesta purchased at WalMart on (b) (6) in The (b) (6) The last time I purchased Beneful, about 2 weeks ago, my son's girlfriend told me about news reports of Beneful killing dogs or making them ill. She said her own 2 Welsh Corgis had been eating Beneful for a few years, but when she heard the reports, she discontinued feeding it to them. She said her female Corgi had suffered from chronic skin rashes up until the time she quit eating Beneful. The male had had no apparent problems. I couldn't say for sure any or all these animals were negatively affected by eating Beneful brand dog foods. However, it does seem suspicious enough to me to be cause for concern. I will never purchase Purina pet foods for my pets again. We also have parrots, my husband's pets, and were feeding them parrot food purchased at our same local WalMart, until we heard reports, about a year and a half ago, that WalMart parrot food was unhealthy and was allegedly related to several parrot deaths across the country.</p>	10	Years	Hound (unspecified)	Dog	85	Pound
EON-116829	3/11/2013 5:33	Waggin Train Ducky Jerky Filets	<p>(b) (6) was a very healthy Small Chihuahua. Vaccinations up to date. Only fed fresh boiled chicken breast cooked daily & these Jerky Treats. Over one year ago she had a GI Bleed of unknown origin. She received IV Fluids & medications for one day due to dehydration. This was her first non well adverse event.</p>	5	Years	Chihuahua	Dog	3	Pound

EON-116828	3/10/2013 21:48	Nutro Natural Choice Toy Breed	<p>On the first Wed night in Jan after church I raced to Petsmart to buy a new bag of Nutro (toy breed natural choice) in the pink bag like I had been for years for my dog (b)(6) and our new addition, (b)(6) ~8mos old. Both (b)(6) and (b)(6) are hairless Chinese Crested breed and we spoil them rotten. I fed them once I got home and noticed (b)(6) was not into the hard food but she scarfed down the Nutro Natural soft food I always put in their bowls (soft dentition so I always blended). (b)(6) was a pig as usual and ate (b)(6) remaining hard food, she ate a bit but not much. Thursday and Friday night, same thing- (b)(6) ate very little hard food and (b)(6) being a pig finished hers up. Friday night my hubby and I remarked that (b)(6) was behaving like such a young guy, playing and just happy in general- granted he was 10 so that was a bit unusual for him. We attributed that to him being happy (b)(6) was home from being spayed just week before and he was happy to see her. Friday night was a normal night otherwise, we tucked them in (b)(6) in his special bed in our bedroom and (b)(6) in our actual bed with us). The next am (b)(6) woke me around 7:20am to potty and I went to get (b)(6) up. He was not moving and actually fell out of his bed. He had vomited and it was stuck to his face (had happened overnight) and he was very cold to the touch. He had the largest look of panic in his eyes and I lost it. I thought to myself, No I am not ready to lose him. We cleaned him up and wrapped him in his favorite warm blanket, and raced him to the vet. He finally lost his panicked look and was warming up in our arms with the heat blasting in the car and seemed to know we were very worried as we were all crying (my hubby, daughter and I). The vet arrived and took one look and I knew. We asked to draw blood. Our thought at that time was "what if (b)(6) had caught something at the vet getting spayed and gave it to (b)(6) and he got sick first being so old?" We had to protect here. The bloodwork came back and all but 3 of the 15 or so items were either low or high and the vet said he pottied pure blood while on the table. We also observed him started to swell and turn purple from internal bleeding that was rapid onset and the vet told us the kindest thing to do was to let him go. (b)(6) only flinched once after being poked 3-4 times before they finally found a vein to administer his last meds. I kissed his head good bye and left. The vet later said his pancreas and liver did not seem to be functioning at the end. We thought it was cancer or his old age and though we were heartbroken, we had him cremated and tried to move on. Then Monday am, (b)(6) began vomiting bright red blood and I raced her to the vet. That is when we questioned what the 2 dogs had in common and it had been the food...just the food. (b)(6) had ulcers and had to take IV fluids for 2 days and eat special science diet prescribed by the vet. Ever since I have been on a crusade to prevent this from happening to someone else. No one should have to suffer this way. No ONE.</p>	10	Years	Chinese Crested Dog 2 Hairless	Dog	13	Pound

EON-116827	3/10/2013 18:45	Nutro Natural Choice Lamb & Rice Small Bites	My dog has eaten Nutro Lamb & Rice Small Bites his entire life (5 years), but got very sick after eating their "new & improved" formula. He started vomiting, having diarrhea, seemed disinterested in his food, and became very lethargic. His diarrhea actually got so bad it turned into pure blood, and we were having to take him outside every hour. We immediately took him to the vet, but they could not figure out what was wrong. They didn't know what to treat him for, so they gave him an antibiotic and and I switched him to a bland diet. Once I took him off Nutro, he started getting better. I randomly came across all of the complaints on the consumer affairs website, which dogs having the exact same symptoms, so I immediately switched his food. He has completely recovered, and actually is more active and happier on his new food. I just don't want any other dogs suffering like he did.	5	Years	Corgi - Welsh Pembroke	Dog	24	Pound
EON-116826	3/9/2013 17:45	Nutro Max Natural Chicken Meal & Rice Large Breed Adult	my four year old dog, (b) (6) suddenly passed away monday night (b) (6) she started vomiting some blood in the morning and was very lethargic and thirsty. within a matter of hours she wouldnt even walk. her bloodwork suggested pancreatitis, but the vets were still baffled as her gums were light pink like she had been poisoned. she was with me 24/7 while i was home and kenneled when i was gone. i searched my house for any kind of possible poisonous items and came up with nothing. then i researched her food and found all the complaints regarding her food that led to illness and death. they are doing a tox screen of her liver and will received the results soon. also, the vet performed an autopsy. she passed away four days after feeding her the new formula of nutro maxx.						
EON-116825	3/9/2013 13:39	NutroMax large breed adult natural chicken meal and rice recipe	(b) (6) presented for acute onset of an inability to walk. He was laterally recumbant and unable to stand or walk without assistance. Urinalysis demonstrated a large amount of melamine crystals in his urine. The crystals were identified by (b) (6).	6	Years	Greyhound	Dog	95	Pound
EON-116824	3/9/2013 0:54	Blue buffalo cat food	I have used Blue buffalo cat food for several years and never had problems. The past few months my cats have started to become ill after eating the food. It started with one cat and than slowly moved on to another. We had 4 cats at the time and when I moved out I took the oldest cat with me. My mom told me now all 3 cats refused to eat the food (very odd for all of them) and than I started to see the same thing with my cat at home. A cat that had to be put on a diet because of how overweight she was suddenly refused to eat. I decided to take them off the food and as soon as I did all of them started eating and have not had issues since, I talked with co workers at work since I work for a petstore about what had happened. Today a customer asked me about the blue buffalo food and if it had been sold to a new company. There were reports of other animals getting sick. I got two different types of blue cat food at the same time less than a month ago and both houses cats reacted the same, refusing to eat.						
EON-116823	3/8/2013 22:15	Kibbles n bits original	Opened the new bag of dof food 2days prior. The following day, dog started having diarrhea. 2nd day after feeding him the dog food, he had acute onset of a seizure. Took dog to vet hospital. Was given multiple doses of I've Valium. Seizure activity never stopped with medication. Had to have our pet put to sleep. Sad day!!!!	3	Years	Retriever - Labrador	Dog	99	Pound

EON-116822	3/8/2013 22:15	Purina Little Bites	<p>We were feeding our dogs Purina Little Bites and have done so for years. In January, all 3 of them (1 other female mini smooth dachshund age 12 and 1 5 year-old dachshund mix neutered male) all began getting sick. They were vomiting, had no appetite and had diarrhea which quickly became bloody. We took them off the food and put them on a diet of rice, yogurt and pumpkin and they began to recover. We thought it was a virus and after a few days returned to the Little Bites. They started getting sick again as soon as they were eating the food - same symptoms. We again took them off and went back to the bland rice/yogurt/pumpkin diet. We then got a different food and they had no problems. When the new food started running low we mixed it with some of the Little Bites and they started showing the same symptoms again. At that point we got rid of the Little Bites completely and we have had no more problems. I think we are lucky that our dogs don't seem to have suffered long term effects but it was quite scary as they were sick for several days each time. Please investigate the Little Bites product - I reported it to Purina but have not heard anything from them.</p>	13	Years	Dachshund - Standard Smooth-haired	Dog	22	Pound
EON-116776	3/8/2013 13:24	before BG grain 96% Salmon 2 Complete & balanced nutrition for cats	<p>Dear Sir or Ms.,</p> <p>A few months back I switched my cats to Merrick BC (before Grain) cat food as it was advertise as healthy with 96% meat. A few months later I was in the vets office with my oldest cat. He was vomiting at least 3 times per night, losing weight, lethargic and just not himself. He had a battery of tests and xrays. Nothing was found except his stomach looked bloated. He was given anti-nausia medication and sent home with a special diet food.</p> <p>Upon returning home I opened a can of Merrick BC canned Salmon food for my other cats. The spoon I used hit something hard in the can. I poked around and found it was a hard bone shard that was about 1/4 of an inch long. I scooped out about 1/4 of the cat food from the can and picked around in it. I picked out about 20 bone fragments ranging in size and shape. Some were small others were about an inch long. Imagine being the size of a house cat trying to choke down an inch long bone. I called my vets office right away. I was told to stop feeding my cats that food right then and there and to buy another brand. I was told that pet food companies put in bone powder for added minerals but never bone shards as they can get lodged in throats, stomachs and intestines. This was most likely the cause of my cats illness. I was very shocked that this "healthy" food for my pets could very well have made him even more sick or worse. I hate to think that other peoples pets could be eating the same sharp bone shards right now. I am very concerned. I don't know if this was just a very bad batch but someone let this slip by while making their food.</p> <p>I have taken photos of the bone fragments, I have the shards themselves. I also have other unopened cans of the food left over that can be examined.</p>	14	Years	Mixed (Cat)	Cat	9	Pound

EON-116768	3/8/2013 12:39	Purina Beneful	I adopted (b) (6) on a Thursday and his first order of business was a physical- he got a clean bill of health sans a minor worm condition & ear infection. Until the worm treatment was complete, I had him on a wet diet. After he completed his worm treatment, I began transitioning him to Beneful slowly, increasing the beneful-wet ratio each day. On the first day that he was 100% beneful, he threw up on our way outside after breakfast (i thought he ate too fast) and was really lethargic all day. When we got home at 7, ate beneful, threw up again but I didn't realize it for a few hours- this time it was a big yellow pile. He went into bed and wouldn't move- even when I was cooking dinner he never came out (this is a beagle we are talking about). The next morning brought him to work and my boss (who used to work for a vet) said there is something seriously wrong with that dog- I had a meeting in my office, 4 people came in and he wouldn't even look at them- normally this dog goes out of his way to greet people or at least sniff them. hH had a complete physical less than a week earlier, and aside from the worms & ear infections which were now remedied (he was asymptomatic) had a clean bill of health- since he is always with me in my office or in the crate at home, there was no chance he consumed anything other than Beneful. I wondered if it was possible to be allergic to Beneful so I googled it and found all of these horror stories. I immediately went to Walmart to get Variety wet food and no more throwing up, no more lethargy. I firmly believe the Beneful was slowly poisoning him.	3	Years	Beagle	Dog	28	Pound
EON-116750	3/8/2013 10:33	KAYTEE Fiesta Healthy Toppings (papaya) Treats for small animals	We purchased this product from local Petco at (b) (6) in (b) (6), (b) (6) on Tuesday, March 5, 2013. My daughter gave him some of the treats which was the only new item in his diet. Thursday morning March 7th our rabbit (b) (6) was showing signs of distress. Wobbly walking, panting, difficulty breathing, lethargic, not eating or drinking. I called our vet (b) (6) immediately. I took (b) (6) in and he was near death. She did an xray and did not note any swelling of the abdomen. I thought the treats may have caused a blockage of some sort. He died within ten minutes of his arrival. She did an autopsy and noted alot of blood in the small intestine. She said he was poisoned by an anticoagulant like rat poison. We do not have any rat poison or blood thinning medication in our home. He was an indoor rabbit who stayed in my daughter's room. He is dead from eating these treats. There was a recall on related bird treats called Fiesta Papaya and fruit...but they failed to pull the same treat for small animals. I have saved the product and my vet is doing a report on her findings. This is disgusting and could've been prevented if they had pulled all the product. Our rabbit is dead and suffered horribly thanks to KAYTEE Fiesta treats. I filed a report with Petco's general manager (b) (6)	11	Months		Rabbit	4	Pound
EON-116728	3/7/2013 21:03	Merrick Before Grain 96% Meat Grain-Free Canned Cat Food (Quail)	After eating Merrick canned cat food (b) (6) started to throw up and had severe diarrhea for 4 days in which she was not able to eat. EON-116693	3/7/2013 14:09	Jerkey made from Chicken from China	<p style="text-align: center;">Urge the FDA to Ban Dog Treats Imports Until They are Safe to Consume!</p> <p style="text-align: center;">-----</p> <p style="text-align: center;">Tell the FDA to block all imports of dog treats from China until the companies find the source of the toxins or enact a recall.</p> <p style="text-align: center;">01/30/13: Hartz Mountain Corporation announced a voluntary recall of dog treats made in China after tests detected trace amounts of an unapproved antibiotic. The recall comes in the wake of recent concerns linking Chinese-made pet treats to illness and death in thousands of pets. The FDA continues to investigate but has been unable to determine the exact cause. Continue calling for a ban until we can guarantee these treats are safe for our pets!</p> <p style="text-align: center;">Goal: 80,000 ¿ Progress: 70,427</p> <p style="text-align: center;">Sponsored by: The Animal Rescue Site</p> <p style="text-align: center;">Losing a pet is like losing a family member. When our pet is suffering, we suffer too. These situations are real-life for thousands of dog owners whose dogs consumed certain jerky treats made in China. Thousands of dogs have fallen ill or died from these contaminated chicken jerky treats.</p> <p style="text-align: center;">In response the FDA sent investigators to the plants in China where the treats are manufactured; but due to China's stringent laws and other barriers, the FDA can't find the source of the toxin. There can be no mandated recall.</p> <p style="text-align: center;">Many have requested the companies involved voluntarily recall the products in question, but as we often see in these cases, profit trumps protection.</p> <p style="text-align: center;">China's obfuscation and companies' unwillingness to recall dangerous products have left us no choice but to ban all imports of dog treats from China. Call on the FDA to ban all dog treat imports from China until the proper steps are taken to address this problem.</p>			Unknown	Dog		

EON-116648	3/7/2013 11:18	Kirkland Super Premium Adult Dog Chicken Rice & Vegetable Formula	(b) (6) has eaten Kirkland Super Premium Adult Dog Chicken, Rice, and Vegetable Formula for over 2 years. She is not a picky eater and always finishes her food. With the most recent purchase of a new bag of Kirkland dry dog food, she refused to eat. When she did not eat, she would vomit yellow bile. When she got hungry enough and did eat, she would have continuous diarrhea. Her lack of appetite, gastrointestinal distress, and subsequent weight loss was cause to seek veterinary help. She is under care of a veterinarian and is stable. I have discontinued the Kirkland dry dog food, switched her to a home cooked diet, and returned the food to the Costco retailer noting the problem.	10	Years	Sheepdog - Shetland	Dog	22	Pound
EON-116616	3/7/2013 5:30	Purina Beneful Healthy Weight formula	I bought a bag of Beneful Healthy weight formula at the end of December 2012, and (b) (6) got sick with vomiting, loose and watering stools, did not want to eat or drink. took him to the vet on Jan 3rd, they put him on antioibotics he had white blood cells in his stools. stopped feeding him the beneful and he got a little better, vet said to try feeding him his normal food. gave him some beneful and he got sick again. sam got better with the meds again, gave him beneful again and he got sick again. It is now march 6th, and he was back at the vet's again today. after he got sick the third time, I went online and found all the complaints again beneful. (b) (6) has had blood work , xrays, xrays with dye. 5 different antioibotics. we have try 4 different prescription dog foods. He is still sick, still losing weight. still has to have pain meds daily , have to take him in to get fluid put under his skin. The vet is stumped and has no idea what has caused him to be this ill. We have now sent his blood in to get it check for toxicins. I call beneful (purina) and they have referred me to the company that handles their claims.	5	Years	Chihuahua	Dog	11	Pound

EON-116589	3/6/2013 14:03	Origen Regional Red	My dog (b) (6) got sick over the course of two weeks after eating this product. He quickly got very week and would not eat or drink. He had diarhrea and vomiting and quickly became listless. The food we gave him was purchased from Wag. com in October and stored in a dry pantry unopened until mid January. The food smelled very strong and different. I thought they might have changed the ingredients but something else must have been wrong. I reported to the manufacturer and Wag.com when he got sick. The manufacturer told me to throw out the food so I have no sample. They sent me a coupon but never got back to me after they said they would check their manufacturing logs. Of course they said they couldn't do anything without the lot number which I did not have.	10	Years	Mixed (Dog)	Dog	71	Pound

EON-116588	3/6/2013 13:30	Beneful healthy radiance	in january of 2013 we bought a bag of beneful healthy radiance the dog finished her bowl within 5 mineuts she started to drink a massive amount of water. a couple of days later she stopped eating food so we took her to the vets. they took blood because i thought she turned diabetic drinking a lot and urinating frequently. They said after the blood test she had a massive amount of afaltoxins and her blood platlets were extreamly low and red cells were not reproducing. They prescribe some meds. within a week she stopped drinking altogether and stopped eating. on sunday night (b) (6) at 2330 hrs she could not stand up and started drooling white saliva out of her mouth. she died 30 mineuts later	9	Years	Alaskan Malamute	Dog	125	Pound
EON-116567	3/5/2013 17:39	Kaytee forti-Diet Pro Health mouse rat and hamster food	We purchased 2 new hamsters for Christmas gifts for our children, along with the Kaytee Forti-diet Pro health mouse rat and hamster food. Both were kept in separate cages in separate rooms. Hamster #1 died after 19 days and hamster #2 died 1 day later, 20 days from purchase. Both had begun urinating excessively for approximately 2 days before dying. Both were eating the same foods. After going back to Petco, where they were purchased, we decided to try 1 more hamster. Staff there couldn't see a reason the 2 we had died. For hamster #3 we changed to a different brand of bedding and treats, and also switched to bottled water so the only common factor for the 3 hamsters was the food. Hamster #3 died 19 days after purchase. I called Kaytee at that point to check if there were any other complaints and was told no, but based on what we experienced they would test the food and packaging. I was told they would send me a postage paid package to mail it back. I waited 2 weeks and never received my package, so called again and was told it would ship to me within 24 hours. That was 13 days ago and I still have not recieved anything from Kaytee. We also had our home tested for carbon monoxide to rule that out after the 3rd hamster died, results of which were normal.						
EON-116519	3/5/2013 13:48	Purrina Beneful	My dog slowly developed a bad liver and/or kidneys and began to suffer seizures which caused irreparable damage and ultimately led to him having to be put down to end suffering.	12	Years	Unknown	Dog	65	Pound

EON-116360	3/4/2013 17:18	Purina Beneful Playful Life	The last couple of days she had been very lethargic. On Sunday she began vomiting and then started falling down. She got to the point where she could no longer stand. She became glassy eyed, had shallow breathing. When I picked her up she urinated all over. The urine was dark and very odorous. I took her to the vet first thing on 3/4/2013 and they stated she was in shock and later determined that she may have been poisoned and was suffering from acute kidney failure. Her condition is currently guarded after being treated with steroids and antibiotics.	3	Years	Spaniel - Cocker American	Dog	22	Pound
EON-116329	3/4/2013 16:15	Beneful Healthy Radiance	My healthy pet of 5 years was acting perfectly fine until she starting eating Beneful dog food by Purina. She starting acting very lethargic only a few days later she died. When I first started noticing the weird behavior I took her to the vet. They did blood work but still after that they said they couldn't find anything wrong. So we took her to an ER for dogs. Thousands of dollars later and after doing many tests we still had no answers. They only thing the vet said was she thought the dog was poisoned but all the tests came back negative. After a few days of spending the night at the vet she was getting better (She was also not eating Beneful anymore) she was getting better. Once we took her back home she was fine for a day then the next day (after feeding her Beneful) when I went to let her out I found her dead. I was devastated. After her death I started doing research and saw that there were hundreds of complaints against this company for the same issues that were happening with the other dogs, which was causing sickness and death. After doing more digging I found out that out of all the dogs they only had one thing in common. And that was the type of dog food they were eating, Purina.	5	Years	Shepherd Dog - German	Dog	61	Pound
EON-116227	3/3/2013 15:09	Beneful	2/23/13 dog came in with history of being lethargic for 2 days. Palpable splenic enlargement and referred dog to (b) (6) vets for abdominal ultrasound by (b) (6). No tumors were found. Chemistry revealed Albumin of 2.2 (n 2.5-4.4), Alk Phos of 151 (n 20-150), Total Bilirubin of 2.2 (n 0.1-0.6), Globulin of 5.2 at higher end of normal. Renal and hepatic and other parameters were wnl. CBC revealed WBC of 28,930, RBC of 4.31 x 10 to the 12th, HGB of 10, HCT of 30.76 and platelet count of 173000. Presumptive diagnosis of IMHA was made based on bloodwork and no tumor in spleen. Started dog on lower end of prednisone 2/23/13 but 2/27 dog was not doing well per owner and anemia had worsened to RBC 1.63 x 10 to the 12th, HGB 4.3 and HCT of 12.14. Prednisone dosage put up to higher end and added vitamin k. On 3/1/13 RBC was 1.92 x 10 to the 12th, HGB 5.0, and HCT 15.28. Platelets were 179000. Owner has financial concerns so we are trying to keep cost down. Very mild improvement so not really stable	4	Years	Mixed (Dog)	Dog	14.4	Pound

EON-116226	3/3/2013 14:54	Beneful	<p>Dog began vomiting and diarrhea 2/1/2013 but progressed very rapidly to collapse. He is leash walked only and owner was feeding Beneful. There is another dog in the household that did not become ill. Hemorrhagic gastroenteritis. Parvo negative. Up to date on vaccinations. Very picky eater so does not eat things abnormal per owner. Dog arrived at my clinic on 2/2/13 moribund and iv fluids were administered with solu cortef prior to transfer to (b) (6) for weekend intensive care. Chemistry on 2/2/13 revealed Albumin of 2.1 (n 2.5-4.4), Bun of 37 (n7-25), Phos of 10.1 (n 2.9-6.6), Creat of 2.0 (n0.3-1.4), other parameters were normal. On recheck 2/23/13 blood chemistry was normal except for Total Bilirubin of 0.9 (n0.1-0.6) with normal RBC numbers but HCT of 33.3 and HGB of 11.9. Worried about hemolytic anemia so started Comet on 5mg Prednisone once daily. Recheck cbc 3/2/13 and RBC numbers still normal and HCT improving to 33.95 and HGB 12.5 (normal now). Will recheck cbc in 1 week. Reason for my concern about toxic event is due to another dog eating Beneful with hemolytic anemia. not certain if it is primary or possibly from the diet.. am submitting report about that one also. EON-116224	3/3/2013 10:09	Taste of the Wild Southwest Canyon Canine Stew for Dogs A Grain Free Diet	<p>I bought 2 cases of the canned Taste of the Wild High Prairie & Southwest Canyon which I'd been giving my dog every day since the beginning of Feb. My dog had been having stomach issues before this and I switched his food from Merrick to Taste of the Wild. I noticed a few days before 2/23 -- some black in the food and thought it was part of the ingredients. My dog was sick on 2/23/2013 morning (vomiting and uncomfortable) and wouldn't eat his food (Southwest Canyon - canned UPC: 0 74198 61145 4). I threw it away and opened another can about 3 hours later and spooned out just a small amount to give to him. This time there was a black hard rubbery cylinder shape object in the food --- it was a little more than a half inch long! (Best by Nov 05 2014)</p> <p>I reported this to the people at Diamond Pet (report from their site) on 2/23. I received an email on 2/26 from Cordell Schroeder, quality Manager, asking for pictures, can upc & info. He asked if I'd like one of their Vets contact me about me concerns for the dogs health. I replied (2/27) with the requested info (pictures and can info): bottom of can: P2DSPKN0522A BESTBYNOV052014 15:52 The UPC on the can is: 0 74198 61145 4</p> <p>and said yes, that I would like their vet to call. I received a call that day from (b) (6) (vet) and she acknowledged that she saw a picture of the object (indicating that it was plastic and I corrected her saying that I thought it was rubber) and she said that it would be okay for the dog--- that the object (if he consumed any) should just pass through him. I told her that I wasn't convinced and she replied abruptly saying that I should then bring it to my own vet.</p> <p>I have not heard any more from the quality manager.</p> <p>I have 7 cans left from the 'tainted' case (TOTW Southwest Canyon Canine) and 9 cans from the other case. I will not feed my dog any of that brand again.</p> <p>Can you please look into this matter? I would hate for other dogs to get sick or worse. My dog seems okay, but I will keep a close eye on him. Thank you.</p>	2	Years	Mixed (Dog)	Dog	33	Pound

We had to let her go later that day.	4	Years	Crossbred Canine/dog	Dog	12	Pound

EON-116211	3/1/2013 18:48	Kirkland Maintenance Cat Rice and Chicken Formula	<p>I noticed around Feb 1/13, that my cat was going into the litter box every 15-20 minutes to urinate, and only urinating a little bit each time. A few days later I saw a drop of blood-tinged urine on her fur on her bottom. A few days later it was the same, so after doing some research online, I thought that it might be UTI (urinary tract infection). So I took her to the vet. From my description of her symptoms to the vet, he said it most likely is UTI. He prescribed 125mg of Clavamox every 12 hours for 2 weeks. This is an antibiotic. I didn't notice any more blood in her urine for a day or two, then it returned. She finished the medication last Friday, and there is still blood. I didn't take her back to the vet yet. I'm having a wait and see attitude, since vets are so costly. The food we have been feeding our 3 cats is Kirkland Maintenance Cat Rice and Chicken formula sold at Costco Canada. The vet said that urinary problems can be caused by E-coli contaminated pet food. But I also found out from my online research that she could have kidney or bladder stones, which would cause bleeding. This could be caused from melamine that could have been added to the pet food. A few years ago in China, melamine was added to not only baby formula, but also pet foods, in which deaths occurred. Last year, Costco recalled this cat food (Kirkland) due to possible salmonella contamination http://consciouscat.net/2012/05/04/diamond-pet-food-recall-expanded-to-include-costcos-kirkland-signature-cat-food/</p> <p>So I would like you to do a check on the bag of food I purchased from Costco Canada (Toronto) about 2 weeks before my cat's symptoms began. Here is the production code: KFC0107B124MS UPC: 096619112852 Best Before date: 23/Jan/2014</p> <p>If you can can check this out for me, that would be really appreciated, and please get back to me on your findings. If this food is contaminated, other pet owners should know about it. Thanks so much for your help.</p>	7	Years	Mixed (Cat)	Cat	15.6	Pound
EON-116202	3/1/2013 16:57	Purina Friskies Ocean Whitefish & Tuna Dinner	<p>(b) (6) our cat, was given the cat food and seemed to be having trouble eating it. We checked the food and found very visible teeth/bone fragments in it. We initially thought the fragments were from (b) (6) and brought her in for a vet visit. We were told by the vet that (b) (6) teeth were fine, apart from one small missing tooth. He said the teeth in the food, which we showed to the vet, looked like fish teeth(the can of cat food was Ocean Whitefish & Tuna Dinner). (b) (6) also had fragments of teeth/bone stuck in her mouth, which the vet had to pull out.</p>	10	Months	Unknown	Cat	6	Pound
EON-116149	3/1/2013 15:09	Purina Pro Plan Small Biscuits	<p>2 hours after receiving treats dog became ill. Vomiting and very lethargic.</p>	1	Years	Shepherd Dog - German	Dog	20	Kilogram

EON-116093	3/1/2013 13:42	Beneful Healthy Radiance	<p>She became very lathargic and unreactionary to the family. We took her to the vet and were told all blood work came back fine and they were unable to see any problems. The dog began to drink large amounts of water and began vomiting. All white and red cell counts came back normal as well as liver function. The dog began to have seizures and had to have several trips to the emergency vet. The emergency vet did a full exam including blood work and was unable to find anything unusual with her. She was put down after we were told she would never recover. We have spoke with the vet again and it is their belief as well as ours that the food is the cause of this problem. The vet explained that unless they had been looking for specific toxins it was very possible for all of the blood work to come back normal. Please have this food pulled nationwide immediately and issue an inspection. Beneful states they have done an inspection and nothing is wrong. They need to test all of the ingredients together to make sure they are not combining to create a terrible toxic situation.</p>	6	Years	Mixed (Dog)	Dog	50	Pound
EON-116081	3/1/2013 13:09	Purina Cat Chow Indoor	<p>Found a metal oject in Purina Cat Chow. It appears to be a piece of 1/4" copper tubing about 1/8" long.</p>						

EON-116021	3/1/2013 5:12	Natural Balance Sweet Potato and Venison L.I.D. Grain Free	<p>After switching my pet to NB LID Sweet Potato and Venison gradually (with directions from both vet and store retailer) by only sprinkling the new food on top of the old food for the first few days, my dog became extremely ill. She had severe uncontrollable diarrhea and bloody stools covered in mucous after only 2 days of the transition. I stopped giving her the food on the second day and called my vet the next day. They suggested watching her through the weekend and just giving her plain rice and boiled chicken. After that I called again on Tuesday to let them know she was still havinf the bloody diarrhea. I couldnt get an appointment until 12/14/12. After doing several tests (10 chemistries with CBC test,heartworm antigen test,ova and parasite with giardia) she was negative for any worms,parvo, giardia. She suffered dehydration from the diarrhea and required fluid therapy. My vet gave her Flagyl and Metronidazole and put her on Science Diet GI health i/d and she had to eat that for a couple months to get back to regular with probiotics as well. My vet believed the food caused a reaction since we narrowed out everything else and it was the ONLY different thing in her diet that day. She recommended that i contact the distributor and retailer, which i did. I just recently got her back on her old food 100% after slowly transitioning her off i/d. I returned to the food (in the bag) to PETCO (b) (6) in (b) (6) on 12/11/12 with a strong complaint, but sadly not very much concern from the people at PETCO. I wrote down the UPC, lot #, exp date etc and kept a small sample in case it needed to be tested. It took me this long to get her back to her normal eating habits, I feel that since the incident her stomach has been very sensitive. I don't feel she is 100% to this day. My vet has the test results and bloodwork, I only have the invoice. You can contact them if necessary. My regular vet is (b) (6) DVM at (b) (6), but (b) (6) was filling in for him on the day she was examined.</p>	4	Years	Pug	Dog	23	Pound
EON-116019	2/28/2013 22:27	Beneful healthy weight	<p>She stopped eating and had a kidney problem, then a liver reaction but the vet saved here with intervinus meds and other. We were lucky. A few others we found out werent so lucky, they lost there pets. Someone needs to investigate these complaints before more pets die or get sick. (b) (6) is not the same pet and may not live the long life we hoped.</p>	8	Years	Terrier - Boston	Dog	23	Pound

EON-116000	2/28/2013 13:03	Mueller's Angel Hair	We are US Citizens living on (b) (6). We purchased many of Mueller's pasta products over the past 50 years. And, for years here on (b) (6) we are getting many insects in their pasta boxes and especially the last purchase of Angel Hair which was loaded with bugs. I e-mailed Mueller's two times and telephoned them once (got a message machine), and suggested each time that they put the internationally shipped pasta in a bag similar to cereal boxes. We get no insects in the cereal boxes from the USA, but they have not acknowledged any of my comments. Even if we received it is too expensive from them, it would be an answer! Before consuming our meal we have to skim out the bugs out of the boiled water that we missed in the box. We never encountered this problem with Mueller's while living in the USA. This bug problem has been going on for more then 10 years, but I will put the date in (below) that I first contacted them. Thank you for your assistance.							
EON-115940	2/28/2013 10:09	All Natural Turkey Chips contains Omega 3 Krill Oil	(b) (6) (and our male dog (b) (6) who is mixed breed and 45 lbs) were given Health Partner Pet Snacks for three days, approximately 4 per day. Both dogs experience extreme diarrhea. Within 24 hours of stopping the treats, stools returned to normal.	11	Years	Mixed (Dog)	Dog	65	Pound	
EON-115917	2/27/2013 19:42	Nutro Natural Choice Chicken Rice & Oatmeal	This is my second dog who became sick after eating Nutro Natural Choice Chicken, Oatmeal, & Rice. This dog was fed the product in a bag labeled new and improved formula for about a month before getting sick. At first she began to vomit every few days then her stool became softer and very mucousy. I started feeding her boiled chicken and rice. She got better I put her back on the dry dog food and she had bad diahorea and threw up that night. I did not feed her this food again. Since she is much younger than my other dog after a few days of being off the food she started getting better pretty quickly.	7	Years	Spaniel - King Charles Cavalier	Dog	15	Pound	
EON-115914	2/27/2013 17:54	Dogswell Veggie Life Happy Hips with Chicken & Sweet Potato, Dogswell Veggie Life Vitality with Chicken and Apple	My dog consumed a Dogswell Veggie Life Vitality treat with chicken and apple at approx. 7:45pm on 2-18-2013. At approx. 9pm my dog vomited up this treat and went into shock losing all bodily functions just minutes later. She was treated barely concious with only a faint pulse by an Emergency animal clinic at 9:30 pm the same day. (b) (6) started internally bleeding and was given plasma early the next morning to rescue her from bleeding to death. She spent the next two days at an animal hospital and returned home on 2-20-2013 in the afternoon recovering and doing much better.	2	Years	Chihuahua	Dog	10.5	Pound	
EON-115896	2/27/2013 16:27	Nutro Natural Choice small breed weight management control	After my last purchase 1/31/13 of Nuto Natural Choice small breed weight management control "new formula". Both of my Shih Tzu's became ill, vomiting bile, increased thirst, lethargy, and refusal to eat the same food they as from puppies.. I didn't know that the company had changed it's formula on all varieties until a friend sent me a link to the consumers affair. I also have a posted there 2 days ago...I want to help save other dogs from getting sick or dying. I do not have the bag it came in as I store my food in pet food container. I turned in the unused food to where it was purchased. I did receive a call on Monday, 2/25/13 from Nuto, I was told since I don't have the bag nor product that there was nothing that they could do. Besides there is "no problems" with their food .How many more sick or dead dogs does it take for them to admit a problem and pull this off the shelves?	5	Days		Other	11	Pound	

EON-115895	2/27/2013 16:24	Full Moon Chicken Jerky	<p>Purchased Full Moon Chicken Jerky at a Walmart in (b) (6) on (b) (6). When I opened the package on 2/27/2013 I noticed that there seemed to be a film on the jerky. After taking jerky out of package it was very apparent that there was green fuzzy mould growing on the jerky. The date on the package was best by 07/2015. I did return the product to the store for a refund.</p>

EON-115869	2/27/2013 14:42	BENEFUL	<p>(b) (6) first started loosing weight. I had always fed him beneful dog food as I was trying to do what I thought to be healthy for him. Suddenly became lethargic began drinking lots of water for about a week. Taken to the vet on 2/9/13 and found to be anemic. stool sample negative. Red cells 3.94 white cells 51.72. Lymphocytes 42.6. Platelets 98. Treated with IV fluids and antibiotic. (b) (6) became more lethargic, vomiting, diahrea and non responsive. Taken back to emergency care on 2-16-13 and white cells and lymphocytes were unreadable. Vet had never seen this before - samples were ran to check machine and equipment was fine. Blood smear evaluation showed immature white cells predominately lymphocytes. Red Cells had fallen to 2.8; platelets 45 despite aggressive antibiotic treatment. capillaries in eyes had ruptured. X-Rays didn't reveal any internal bleeding or tumor. Lymph nodes swollen. Overnight fluids, broad spectrum antibiotics with no response to treatment. (b) (6) was euthanized on (b) (6). Vet believed it to be some type of leukemia but said it was very, very rare that a young health dog of his age would get it but that anything was possible. After reading all the reports with other customers on consumer reports 428 currently of dogs doing the SAME THING!!!! Why are you allowing this product to be sold?!?! Our beloved pet died!!! He just turned a year old!!! My son lost his best friend over what ever is in this dog food</p>	17	Months	Hound - Afghan	Dog	55	Pound

EON-115800	2/27/2013 8:03	Beneful Original Dry	(b) (6) was showing signs of usual old age, but was active, eating well also. He was constipated for a few days, then he had bowel movement all at once, alot. He was trying to throw up, but couldnt. A few hours before his death, he was walking around then he had a dripping foamy mouth and rapid beathing. Then he died.	14	Years	Siberian Husky	Dog	65	Pound
EON-115789	2/26/2013 16:57	Petco Natura Pig Ears for dogs	Monday, February 18, 2013, I bought a pack of pig ears at Petco in (b) (6) It was the 25 count of natural pig ears by Petco. On Tuesday morning I gave (b) (6) one when I went to work. I may have given her one when I was on my lunch break. I returned to work about 1:00. From 1 until 5:30, (b) (6) was alone. When I arrived home, all of the couch cushions were covered in a bloody diarrhea. The ruq was covered in vomit. I called my vet, who recommended to bring the dog to the (b) (6) (b) (6). My vet was considered there might be some blockage in her system. On the way to (b) (6), (b) (6) vomited in my car. Once we arrived, they took x-rays, gave her fluids, and medicine to stop the vomitting. They gave her medicine to take for the following 5 days to stop the diarrhea. For the vet appointment, it cost \$486.86. I restricted her diet to bland foot. On Sunday, February 24th, she seemed to be getting back to her usual poop schedule. At this point, she has fully recovered.	20	Months	Coonhound - Treeing Walker	Dog	62	Pound
EON-115782	2/26/2013 16:33	Boots and Barkley beef rawhide beef jerky strips	My dog had recently went in for a check up with the vet. He was in perfect health. A coupel weeks later, he got sick. Diahrea, vomiting, and eventually just mucusyblood coming out of his rear, and slight fever. He is finally eating normal food, and off medications.	3	Years	Dachshund - Miniature	Dog		
EON-115750	2/26/2013 14:42	Waggin' Train Chicken Jerky Tenders	Opened a new bag of Waggin' Train Chicken Jerky on Jan. 13, 2013. Gave 2 treats/day. On 1/15 she stopped eating. On 1/16 she had diarrhea & vomiting. Took her to our vet on 1/17. Told me the treats made in China have been reported to kill hundreds of dogs, and make others very ill. Gave her fluids, blood work, an injection to help settle her stomach and asked that we bring her back on 1/19 for further treatment. Blood work came back that her kidney function levels were at an extremely high level (27). On 1/18, (b) (6) could not eat, drink or walk. I am oxygen dependent, it was late in the afternoon, and I am unable to carry our greyhound from the house to the car. I did call our vet to report this problem. Luckily..by late that evening, she was able to walk a little. She received 300ml of fluids at the vet on 1/19. I reported the problem & filed a claim. I believe that Purina should be responsible for paying the vet bill of \$228.00. If not for those treats, she would not have gotten so violently ill.	9	Years	Greyhound	Dog	73	Pound

EON-115747	2/26/2013 14:12	Pedigree+ Healthy Weight	Emailed and called dog food manufacturer (Mars Petcare) about foreign objects found in food. Disposed of open cans and discussed with store where purchased. Mars declined comment on the objects even after we sent pictures and descriptions of the objects only offering us a coupon to discount future purchases. We contacted them many times as well as AAFCO but only received one excuse after another. Either they had to discuss with their quality dept. or we were requested to send more pictures as they had misplaced them. We complied with all requests but got nowhere.

EON-115660	2/26/2013 7:33	Beneful Playful Life	I purchased a new bag of Beneful on Wednesday, February 20th at the Acme in (b) (6) by Thursday morning, (b) (6) had bad diarrhea and was vomiting. She was extremely lethargic. I called Beneful and reported to get their standard answer of if she is still sick in 3 days take her to the vet. On Friday, Feb.22 I took (b) (6) to (b) (6) and she had a complete work up only to find her liver enzymes were elevated. They gave her an IV of fluids because she was dehydrated, changed the food and some Flagyl. Almost \$500 later, I was on my way home. By Sunday, she was much better. She only ate three meals from the Bag, but we don't give her any other treats. I googled the problems with Beneful and found countless other pet owners with the same issues and symptoms.	7	Years	Pointer - English Pointer	Dog	156	Pound
EON-115658	2/26/2013 7:27	Nutro Natural Choice Adult Lamb & Rice Formula	My dogs have eaten Nutro Natural Choice Lamb and Rice for most of their adult lives. We were with her all day and she was healthy and perky. Today we opened a new bag of Nutro. My 7 year old, healthy Golden Retriever, ate her dinner at about 6:15. At about 7:20, we offered her a dog treat and she refused to eat it. She had never, ever refused food before. We were very concerned. She was lethargic and in pain but her nose was wet and her gums were pink and dark. At 8:45, she vomited a huge pile of dog food covered in a thick, mucus filled bile. She fell down and would not get up. I thought vomiting would bring her relief. She was quiet. We moved her onto her bed, covered with towels. At 9:35, she began to howl in pain. We had never heard this noise. I called my vet to consult about taking her to the emergency room at 9:40. We decided to take her. I called the ER at 9:45, to tell them we were coming. She had a major seizure and lost consciousness. We rushed her to the Animal HOspital and arrived at 9:59, hoping they could help her. But they told us she was dead.						

EON-115657	2/25/2013 23:09	Cadet Gourmet Duck Brest	(b) (6) had the Cadet Duck Jerky Treats we had recently purchased from Costco on Thursday, and one more on Friday. Saturday morning, she immediately had diarrhea, and it had continued through the day. Through the night it got worse, and (b) (6) had then started to vomit frequently as well. Sunday and Monday this both continued, with tar-ish like stool with blood present, as well as persistent vomiting. We have a vet appointment for her tomorrow, but (b) (6) has never had an issue with food or anything ever, so to watch this is completely heartbreaking. Our Rhodesian Ridgeback mix (80 lbs Male Neutered 5 years old) also had diarrhea Friday night, and loose stools Saturday Morning, which no table food or alternate food was given to either one of them. (b) (6) has still not recovered and is very ill.	3	Years	Chihuahua	Dog	6	Pound
EON-115656	2/25/2013 22:09	Nature's Deli Chicken Jerky Treats	I purchased 2 bags of the Nature's Deli Chicken Jerky Dog Treats from your Sams Club approx 1-11-21. My 2 Siberian Husky rescues became sick within days with severe diarrhea and vomiting. I took the bag of jerky treats to my vet along with my 2 dogs on 1-25-13 as my dogs still had diarrhea and this was the only thing different food or treat wise my dogs had. After paying for tests, medicine and vet bills, I went to my Sams Club and returned the one bag I did not give my dogs and filed a written complaint. I was supposed to be contacted with a follow up call. I have not received that phone call but again while at the Sams Club 2-24-13 I noticed this product that made my 2 beautiful dogs so ill was still on the shelves. I informed several customers myself of what my experience had been. I recieved a letter today dated 2-19-13 from Frank Yiannas Vice President of Sams Club Food Safety that the product had been recalled 2-19-13 but yet I still recieved no call after registering my complaint and the products were still on the shelf 2-25-13 at the (b) (6) location in (b) (6). My number is (b) (6) home or cel (b) (6) (b) (6)	2	Years	Siberian Husky	Dog	66	Pound
EON-115650	2/25/2013 17:24	Wagon Train	I bought Wagon Train Treats at PETCO. I started noticing that my pet started throwing up and having diarrhea. She would not eat and was sad and moping around. So I took her to the vet and they asked me an arsenal of questions. Then it got to the part of the treats. The vet asked me what kind I was giving her and I told her Wagon Train. She said some them treats had a recall (b) (6).	13	Years	Terrier - Rat	Dog	19	Pound

EON-115409	2/24/2013 14:39	Merrick Grain Free Smothered Comfort Classic Recipe with real chicken thighs carrots sweet potatoes red delicious apples. All Life Stages/All Breeds	I opened a can of Merrick Smothered Comfort Classic Recipe dog food which has "Real Chicken Thighs" in it. When mixing it in the can with a spoon I hit something hard. When I scooped it out it was a 3" thigh bone (that was thick) and a second 2" thin bone.						
EON-115408	2/24/2013 14:27	Purina Cat Chow Naturals Plus Vitamins & Minerals	I opened a newly purchased bag of Purina Cat Chow, Naturals and offered it to the cat for an evening meal. The cat smelled the food and ran away. Later that evening, the cat went back to the food dish and I observed him pawing at the food dish until he had it turned over, then attempted to bury the food under a scatter rug in the kitchen. The next morning, I offered him a fresh bowl from the same bag: again, he wouldn't eat the food. I left the food in the dish while I went to work. When I returned, some of the food was gone. Unfortunately, the cat had also developed diarrhea and was showing signs of distress. The next day, I purchased a different brand of cat food and offered it to him: he ate immediately. Three to four days later, I again gave him the Purina Cat Chow: again he refused to eat. I purchased a new bag of the Purina Cat Chow and, as a test, put the fresh Cat Chow in one bowl and the substitute cat food in another bowl: this time he ate the Cat Chow. When I placed a bowl of the tainted Cat Chow next to the substitute food, he again tried to bury the cat chow. This happened two weeks ago. I would have ignored the situation if I hadn't mentioned it to my sister, who lives in a different state. She had the exact same problem with Purina Cat Chow that she purchased for her cat at approximately the same time. Her cat also developed diarrhea and tried to bury the food. After that conversation, I mentioned it to one other person here and again, was given the exact same details. We strongly believe the food is tainted.	3	Years	Russian	Cat	12	Pound
EON-115407	2/24/2013 11:03	Nutro Natural Choice Adult Chicken Whole Brown Rice & Oatmeal	After buying a bag of Nutro labeled New & Improved in late December the dog's stool began to be very loose and more frequent. Vomiting in the beginning would be very sparatic, maybe two nights a week. Vomiting would vary from bile to a mixture of bile/undigested food. This continued for most of January as I assumed that she was having some type of problem related to her age. Around February 6th, diahhrea began and vomitting started occuring once or twice a day. I switched her to a diet of boiled chicken and rice for a few days. She would begin to get a little better so I would start to add Nutro dry back into the mix of chicken and rice. One night I fed her almost a normal serving of her dry instead of rice and vomitting and diahhrea was bad that night. She went to the vet two days later. Fecal test was negative a senior panel of blood work showed overall good levels but very low protein count which the vet assumed was due to the diahhrea. She was put on perscription food and metronidozol. She is very slowly recovering.	12	Years	Spaniel - King Charles	Dog	12.5	Pound

EON-115405	2/23/2013 15:12	Waggin Train Chicken Jerky Tenders	<p>We started giving our dogs (which are like kids to us) Waggin Train Chicken Jerky as treats in October 2009. In October 2011, we traveled with (b) (6) as which time she got sick and vomitted in the vehicle. I dismissed it as car sickness (which she never had car sickness before) but...as the weekend went on she became very unattentive, sleep alot, drank alot and was still vomitting. As we got ready to leave, (b) (6) fell down the step of the porch and was very lethargic, getting sick again on the way home. I took her to the vet the next morning where she was admitted to the doggy hospital, placed on IVs for 4 days. The vet diagnosed her with diabetes. We started her on insulin shots 2 times a day and a very strict diet but we still gave her the chicken jerky treats as a reward for doing good at taking her shots. Unaware of the recall, we purchased our last package in September 2011, which (b) (6) continued to receive on a daily basis, sometimes 2 a day. We had trouble getting her sugar level regulated and decided to stop all treats as of January 2012 that were processed & I started cooking all of (b) (6) food to include treats. At which time her sugar level seemed to be leveling out, then in November 2012, she became worse, wouldn't eat, drank lots, sleep lots, very loose stool, and seizures started. Everytime she would vomit or go potty she would have a mini-seizure then while at the vets office she had a very bad seizure, I didn't think she was going to pull out of this bad one but she did. The vet checked her kidney function and other levels and told us "she is a very sick girl, that her kidneys were shutting down which was causing the seizures and that the most humane thing we could do for her was to put her to sleep" . This was the hardest decision I have ever had to make. It broke my heart. I believe that (b) (6) may have been diagnosed with diabetes when in fact it was Fanconi Syndrome cause by the chicken jerkey treats. I miss sweet (b) (6) everyday.</p>	12	Years	Dachshund - Standard Smooth-haired	Dog	18	Pound
EON-115404	2/23/2013 10:39	Purina Beneful Original	<p>Long time user of Purina Beneful Dog food. 3 days after opening a new bag of Beneful on 1/27/13, my usually healthy dog exhibited lethargy, fever and then symptoms of a urinary tract infection. After researching the product I found a few hundred other complaints of similar symptoms and immediately stopped feeding her the Beneful. After that, vet bills totalling \$124.50 and a 2 week course of antibiotics, and she now seems fine. Have discontinued use of the product.</p>	6	Years	Mixed (Dog)	Dog	64	Pound

EON-115403	2/22/2013 21:48	Beneful health life	We had been feeding our 4 dogs beneful since 2008. no issues until may of 2012. i was called by our pet sitter while on vacation in las vegas and she had indicated that (b) (6) our black lab was throwing up. i did not connect the dog food at the time. and came home and our four dogs seemed like they were okay. from time to time our lhaso apso, (b) (6) would throw up but i figure he was over eating and we would pull the dog food from the floor. and , (b) (6) our chihuahua would do the same thing. but, it was random from may 2012 until august 2012. on (b) (6) i had noticed that our wolfhound , (b) (6) seemed a bit lethargic and had thrown up. we gave her fluids and yogurt and that seemed to settle her stomach. she was still going outside to the bathroom and we were spoon feeding her and she was going out to the bathroom. we woke up the next day, to find her jaundiced and having seizures. we took her to the vet who indicated to us that we could not save her as she was beyond help. we had to euthanize charlie that day.	7	Years	Irish Wolfhound	Dog	80	Pound
EON-115372	2/22/2013 17:18	Boots and Barkley Colorado Naturals Nature's Deli milos kitchen waggin train naturals variety honest kitchen mwelness dog food dogs well	The pet store in my town of (b) (6) (address: Hometown Pet Supplies - (b) (6) (b) (6)) continues to sell several chicken jerky teats and dog/cat foods, that have been recalled by the FDA, at a discounted price. I have even brought this up to the employees and nothing has changed. I want the products removed and disposed of properly so no more pets are harmed! Please help sooner than later, this is a very urgent matter. Thank you.

EON-115213	2/20/2013 20:30	Canyon Creek	I do not want to place blame on her current health issue, but I wanted to report it just in case it could be pertinent to the investigation. Because (b) (6) battled an anemia problem, I made sure to get her the healthiest food and treats possible. Thus, I thought chicken or duck treats in sweet potatoes would be perfect. Now it turns out that these treats are linked to kidney failure. In late November of 2012, she was diagnosed with advanced kidney failure. Again, she had many other health issues, but I wanted to report the possible correlation between her eating the treats (usually from Canyon Creek, which is now on a recall list) and her kidney failure.	7	Years	Spaniel - Cocker English	Dog	28	Pound
EON-115206	2/20/2013 19:51	Royal Canin Vet Diet Urinary SO Feline	I bought a new bag of Royal Canin Urinary SO for my cat (b) (6). This is a perscription food . After feeding from this new bag, he seemed to have some digestive issues. Three days later, he started vomiting and quit eating and drinking. I was out of town. The pet sitter checked on him as this happened overnight. We decided to wait a few hours before taking him to the vet because he was still alert and moving. Within 4-5 hours he was dead. His body was sent to (b) (6) for a necrosy. Nothing pointed to toxins in his system, but the voilent vomiting and dehydration that occured may have caused him to have heart irregularities which then may be the cause of death.	7	Years	Unknown	Cat	13	Pound
EON-115205	2/20/2013 19:36	Smokehouse Brand Pet Products - Chix Mix	The only new food we introduced to our dogs diet in the week leading up to the illness was 'Smokehouse Brand Pet Products Chix Mix." He was not fed more than one treat per day over the course of maybe three days. This morning he had diarrhea. After the diarrhea episode he had blood around his bottom and down his legs. Shortly after he through up a bloody mixture of stomach acid and blood. This happened twice before we took him to the vet. While at the vet through up blood in front of the vet and she was VERY concerned. After a day spent at the vet and \$500 we have him home recovering.	4	Years	Terrier - West Highland White	Dog	17	Pound

EON-115046	2/20/2013 12:30	Dingo® Dental Bones For Total Care	My dog began vomiting at around 7:00pm on Monday, (b) (6). He continued to vomit throughout the night, at least once per hour. He became very lethargic and would cry out in pain if touched. I took him to the vet the next morning when he had not improved. He was on IV fluids all day and put out < 2cc of urine, and that urine was mostly blood. The blood tests revealed that he was in complete renal failure. The veterinarian told me that he would die within 24 hours due to his complete loss of kidney function, and that my best option was to have him euthanized because he was in pain and would continue to get worse as death grew closer. Prior to this, he was a happy and healthy indoor dog. He was playful and loving, and I took care of him as if he were my child. He was on a diet of Blue Buffalo Brown Rice and Lamb formula, and he was not allowed any table scraps or other foods. I recently began feeding him "Dingo Dental Bones For Total Care Minis" at a rate of about one bone per day or every other day. This is the only product out of the ordinary that he came into contact with.	9	Years	Terrier - Rat	Dog	12	Pound

EON-115006	2/19/2013 17:45	Evo 95% Chicken & Turkey canned cat food	Last of 4 cats with acute GI symptoms, (b) (6) was the only one fed exclusively Evo 95% Chicken & Turkey canned food. On 13 January 2013 she stopped eating, and by the next day had severe diarrhea and was taken to her primary vet, who suspected IBD. Her symptoms were treated with pepcid, mirtazapine, cerenia, and psyllium and slippery elm bark powders, with an effort to switch her to another canned food. However, Evo was the only canned food she would eat, and was not suspected as contributing to her problems at that time, so she continued eating it. She also continued to have intermittent diarrhea and vomiting, which worsened over the next couple of weeks. On 28 January she stopped eating, and by the 30th she was vomiting digested blood and was referred to internal medicine specialist (b) (6). (b) (6) was given xrays, an abdominal ultrasound, and endoscopy with biopsies, and was diagnosed with GI hemorrhage and gastric erosion.	13	Years	Domestic Shorthair	Cat	8.6	Pound
EON-115004	2/19/2013 17:39	Evo 95% Chicken & Turkey canned cat food	The 3rd of 4 cats to develop acute GI problems, (b) (6) began showing symptoms in early January, when her vomiting became more frequent and contained blood. On 9 January 2013, she was taken to her regular vet, and was referred to internal medicine specialist (b) (6) at (b) (6) (b) (6) for an abdominal ultrasound and exam, performed 11 Jan 2013. Diagnosis was possible IBD. By 12 January, she also had developed serious diarrhea, which did not completely resolve until Evo had been completely removed from her diet.	15	Years	Domestic Shorthair	Cat	7.4	Pound
EON-115003	2/19/2013 17:39	Evo 95% Chicken & Turkey canned cat food	The 2d of 4 cats to develop acute GI symptoms between December 2012 and January 2013, (b) (6) had diarrhea, vomiting, inappetence, weight loss, lethargy, anemia, pain and fever, and was admitted to the (b) (6) on 4 January 2013. He was treated overnight, given an abdominal ultrasound, and referred to internal medicine specialist (b) (6) (b) (6). Initial diagnosis was urinary tract infection with suspected kidney infection and underlying pancreatitis, as well as grade 1 heart murmur and slight thickening around stomach. He was syringe fed Evo for at least a week after discharge, and the diarrhea cleared up only after he was completely switched to other foods.	15	Years	Domestic Mediumhair	Cat	9.6	Pound

EON-115002	2/19/2013 17:39	EVO 95% Chicken & Turkey canned cat food	(b) (6) was 1st of 4 cats to develop acute GI symptoms during December 2012 and January 2013. His symptoms were diarrhea, inappetence and weight loss, resulting in hospitalization, abdominal ultrasound, endoscopy with biopsies, and treatment. He was diagnosed with IBD and prescribed budesonide, pepcid, appetite stimulants, and supplements of psyllium and slippery elm to control symptoms and treat inflammation. Diarrhea did not completely resolve until after he stopped eating Evo canned food in January. (b) (6) long-time diet had been Evo canned 95% Chicken and Turkey, supplemented with dry California Natural Chicken and Brown Rice, as well as dry Hill's kd and id once the kidney disease had been identified. He never ate treats, and has always been separated from the other 3 cats, so did not share litter, water or food with them. The only item in his diet that was common to the other 3 who also got sick was the Evo. Diet was only suspected after all 4 got acute symptoms during the same time period.	15	Years	Domestic Mediumhair	Cat	9.2	Pound
EON-114834	2/19/2013 9:51	Beneful Dog Food	My vet thought the (b) (6) had an infection from eating. We tried different anitbotics and steriods with no luck. Her symptoms only got worse and after two weeks we decided to put her to rest.	11	Years	Other Canine/dog	Dog	98	Pound
EON-114735	2/18/2013 22:09	Canyon Creek Ranch Homestyle Ham, Canyon Creek Ranch Brand Wrap overs	(b) (6) was only given treats that had no or limited ingredients. After trial and error over the past two years, we found the Canyon Creek Ranch treats were tolerated with the exception of natural treats prepared at home. I normally purchased my treats the first week of the month as it was a drive to petsmart in Henrietta, NY. My pet, (b) (6) was given several treats through out the day as reward for good behavior. She never had a problem tolerating this practice. The last purchase, my daughter and I noticed (b) (6) vomited. We withheld food for the remainder of the day, the resumed her diet including the treats the following day. Through out the weekend the vomiting persisted followed by diarrhea. Her stomach had high pitched bowel sounds audible enough that I recorded it for my Vet. I put her on pedal yet and pepto bismol for the duration of the weekend along with some broth. She was seen by the Vet and put on Reglan, Pro-Pectalin, and an oral electrolyte. She had lab tests and a fecal sample. Nothing was found to cause her illness and we proceeded to treat. By Saturday she became worse so she was seen at (b) (6). They repeated some tests and included some radiologic films. They also were unable to find the cause. She was given an injection and sent home. She improved within a few days and we resumed her diet including the treats. Within a day, she began vomiting and diarrhea but to such a severity that the vet was unable to determine cause and we lost our pet. She had suffered for 3 weeks.	14	Years	Mixed (Dog)	Dog	42	Pound

			<p>I've included a portion of the last e-mail received from the manufacturer seeming to indicate an awareness of the problem:</p> <p>We have been working on resolving the leaking packs. There are several contributing factors we are working on and it seems that the leaking may be particular batches rather than an across the board issue, though of course packages in any lot could be damaged in shipping.</p> <p>Please let us know if we can help you with anything else.</p> <p>Best Wishes,</p> <p>(b) (6)</p> <p>Darwin's Natural Pet Products 206.324.7387 1.877.PET.MEALS (877.738.6325) www.darwinpet.com</p> <p>Although this response is encouraging our most recent order still lacks improvement and defective product packaging continues to be shipped despite their acknowledgement. Please note the company has two distribution centers. I've received product from both having the same issues.</p> <p>Thank you for looking into this matter.</p> <p>(b) (6)</p>						
EON-114718	2/17/2013 12:21	Purina Fit and Trim Dog Food	<p>I opened a new 8 kg bag on Purina Fit and Trim dog food. There was an overwhelming "chemical" smell ... I poured the food into my dog food bin. Even still, 24 hours later, the food smells like chemical ... and the 1/4 cup that I put in the dog dish ... smells like chemicals. I threw out the entire contents and won't feed it to my pugs ... I did save the UPC code from the bag and some kernels of kibble. I've never had a bag of dog food smell like chemicals ...</p>						

EON-114717	2/16/2013 17:51	Fancy Feast® Elegant Medleys® Yellowfin Tuna & Shrimp Recipe With Wild Rice In Gravy and Fancy Feast® Elegant Medleys® White Meat Chicken & Tuna Recipe With Wild Rice & Spinach In Broth	I started feeding Fancy Feast Medleys in addition to regular diet. Three of my cats regularly eat the Fancy Feast classic and grilled varieties of canned food. Approximately five or six weeks ago I introduced several of the Fancy Feast Medley flavors (i.e. chicken, turkey Tuscany and Primavera). They really enjoyed the flavor additions and there were no apparent adverse symptoms or dietary issues noted during the several weeks that followed. Three days ago (02.14.13) I bought 2 new flavors of the Fancy Feast Elegant Medleys (White Meat Chicken & Tuna Recipe With Wild Rice & Spinach In Broth and Yellow fin Tuna & Shrimp Recipe With Wild Rice In Gravy). Yesterday all three cats vomited 2 or 3 times. Initially within ~ 1 hour of ingesting the food, and at various times throughout the evening and also this morning. Additionally they have all had liquid stools and have been noticeably lethargic as well. I have withheld food since the onset of these symptoms although they have not showed interest in eating anyway. I have a total of 7 cats who are all male neutered indoor cats. The other cats eat different brands of canned cat food and have had no problems throughout this ordeal. There has been no additional vomiting since this morning. This cat in particular has gagged/yacked several times throughout the day but has not vomited. They have water available and have been drinking regularly. If they continue to exhibit symptoms, I will take them to the vet. For what it's worth, I was employed as a veterinary technician for 18 years. I quit working so that I could go back to school 2 years ago. This is the first time any of my cats has ever exhibited gastrointestinal symptoms as severe as these have been. There have been no other environmental or dietary changes with regard to their daily lives. This is why I feel that based on the events leading up to this "episode" seem to indicate a problem relating to the recent Fancy Feast Medley ingestion. I know that it is not unusual for animals to exhibit some gastrointestinal symptoms as a result of changes in regular diet. In my experience I have never personally witnessed this to the extreme that these have occurred. I will also notify the manufacturer of these events.	1.5	Years	Domestic Shorthair	Cat		9 Pound

EON-114715	2/16/2013 11:54	Ever Pet Cat Food	My cat wasn't eating. We thought he had a tooth problem and couldn't eat hard cat food. Well the reason he wasn't eating is because he had swallowed one of my hairs (about 2 feet long) and it was stuck in his throat. Before we knew why he couldn't eat I ran to the local Dollar General store and purchased a box of Ever Pet canned cat food. He only drank the gravy. Once my husband seen the hair in his throat he pulled it and he immediately started eating the hard cat food. We had taken him to the vet and the doctor had told me it was his liver. I continued to feed him this food because he was starting to act very weak and fragile. Plus, the doctor had given me medicine to give him and we used that food for him to take the pills. 2 days ago my co worker handed me a list of brands that have been making pets sick and the one i've been feeding him is on the list. I immediately ran to the store and bought a different brand and he's starting to really eat that one instead of just drinking the gravy. My cat's health still isn't good. I just wanted to advise someone just incase they need to pull it off the shelves. We may have to put my cat down :(11	Years	Mixed (Cat)	Cat	8	Pound
EON-114714	2/16/2013 11:36	Waggin' Train Chicken Jerky	At presentation, the dog had a several week history of inappetance, lethargy, and some vomiting. He had been taken to another vet clinic approximately 2 weeks prior; some elevated blood values were found and a toxin suspected. The dog was given medication and improved briefly. The owner was unsure of further details of this visit and the clinic was closed at the time, so we were unable to access those records. At presentation to us, (b) (6) was overall weak and uncomfortable during examination, obese with a BCS of 4.5/5.0, and had severe dental disease. The remainder of physical exam was WNL. CBC results indicated dehydration, and chemistry panel revealed advanced kidney failure (BUN >130, Cr >12.5, Phos >16.1), as well as elevated Amylase (1821) and Lipase (1890). (b) (6) was treated on an outpatient basis with SQ fluids and Cerenia that day at the owner's request; the owner returned the next morning and requested inpatient care. (b) (6) was given IV LRS and treated with Cerenia then Famotidine throughout the next two days. (b) (6) remained inappetent and lethargic. On the first day, a urinalysis revealed protein and RBCs, and on the second day trace glucose was noted in the urine. On the third day BUN was still >130 and Cr >13.6. The owners were advised of a poor prognosis, but elected to take (b) (6) home. We were notified that (b) (6) passed away one week later. During treatment the owner advised us that (b) (6) had been eating Waggin' Train Chicken Jerky treats, starting about the time the symptoms began.	9	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	62	Pound

EON-114713	2/16/2013 10:21	Vitalife chicken treats	My Dog 1st started eating Vitalife Chicken Jerky Treats in september 2011 in mid December 2011, she started becoming less active, started to not eat her food, drinking excessive amounts of water.... On Jan 8th 2012 we went for a walk and she was really active, when we arrived she peed in the back yard and her pee was a caramel color, I thought it was a urinary tract infection, our vet was only back from vacation on January 10th, he did blood work and x-rays, and told us that her liver enzymes were VERY high, and the Bilirubin in her Urine was at the maximum level, her platelets were way below normal!! We were shocked!!! By Friday she was in ICU at the (b) (6) (b) (6) the best in (b) (6)!!! we did liver biopsies, more blood work, Ultrasounds, we did everything to try and save her.... She developped Chronic Active Hepatitis, her vets were convinced in was something she ingested!!!! EON-114706	2/15/2013 19:36	Waggin' Train Chicken Jerky	We fed (b) (6) one or two Waggin Train chicken jerky treats on a daily basis for years. In April 2012, he had a normal examination at his Vet. Then he began to lose his appetite and lose weight. We watched him until it became obvious he was continuing to be sick. In early June 2012 I brought him to the vet and he was found to be in renal failure with a BUN that was very high. He was hospitalized for three days receiving intravenous fluids. Subsequently he has continued to have proteinuria and hematuria and low weight. His BUN and phosphorous have been elevated since June 2012. He is emaciated.	7	Years	Terrier - Manchester	Dog	10	Pound
EON-114686	2/15/2013 16:54	Beneful Healthy weight	both of my dogs have been fed beneful and the last bag afterthey started eating this they began to vomit after they ate. they also started urinating in the house and drinking massive amts of water . prior to this my dogs could hold their urine for up to 12 hrs and were completely housetrained. my one dog was found to have a urinary infection and elevated liver enzymes.. i stopped feeding them beneful and am hoping the symptoms will subside. I have read of many instances of pets having these symptoms after eating beneful and wanted to make it aware so you could investigate this food to see if it is containedated or something.. i know of 2 dog deaths related to eating this and my own vet said she has told all her pts to stop using beneful..	9	Years	Dachshund - Miniature	Dog	19	Pound
EON-114669	2/15/2013 16:00	Beggin Strips, Canyon Creek Chicken Jerky and Duck Jerky	I was giving her Beggin Strips and chicken and duck jerky strips, 3-4 per day. She got severe bloody diarrhea. I took her to the vet, who put her on antibiotics. I threw out the treats. I recently started giving her some chicken and duck jerky treats again, and she has been throwing up every few days. Yesterday she threw up twice so I just threw the new jerky treats out too. I was reading the recall information and noticed that I had the ones that were recalled, but that they really weren't bad for them to eat. Well, antibiotic residue or whatever, my dog gets sick from them. She loves to eat them though. I am now going to make some chiken jerky treats for her on my own. How can you continue to say these are ok for our dogs?????	4	Years	Shih Tzu	Dog	12	Pound

EON-114539	2/14/2013 7:39	Waggin Train Wholesome Chicken Jerky Tenders	(b) (6) got sick with vomiting and diarrhea from eating Waggin Train chicken jerky treats	10	Years	Chihuahua	Dog	10	Pound
EON-114524	2/13/2013 18:36	Natural Balance L.I.D. Limited Ingredient Diets Sweet Potato and Chicken Small Breed Bites Formula for Dogs 12-1/2-Pound Bag	On the morning of Feb 1, 2013, I was feeding my dog when I noticed a piece of blue plastic sticking out of a kibble. This plastic was embedded into the food.						
EON-114508	2/13/2013 16:39	Waggin Train Chicken Jerky Treats	On April 11, 2012, my dog (b) (6) was taken to my vet on a Monday morning and was in complete renal failure with a BUN of 400. She was immediately put on dialysis but unfortunately died a few weeks later when it was discovered upon removing her from dialysis that her kidneys had completely shut down. I have another Yorkshire Terrier, the sister of (b) (6), that had elevated BUN of 67 and another one that had abnormal pancreas enzymes on her bloodwork while being fed these products. I have since completely stopped feeding my pets commercial foods and treats. What happened was a living nightmare for (b) (6) and almost cost the lives of my other two dogs. I am completely convinced the antibiotic adulterations are what cost my dog her life and I am so angry that these companies have been allowed to use chickens and hogs that have been fed these antibiotics which are not even legal in this country and am also extremely upset that three of these companies that are manufacturing foods and treats are in violation of the bioterrorism laws instituted to protect our country. I am not sure whether or not I filed a complaint when this first started with my dog, but am filing now, just in case I didn't. You will certainly have to understand that when (b) (6) first got sick, filing a complaint was not my priority. We spent 24/7 for nearly a month trying to keep her alive and there are vets that were involved with (b) (6) care, (b) (6) for one, that feel that there is a definite link between the antibiotic residues and the death and sickening of my pets and to find out that the FDA has allowed these companies to import these products to the USA is just infuriating to me. None of us are safe if you cannot do your job. I have kept the remaining treats in frozen storage since the death of (b) (6) for further studies and also have a blood and plasma samples frozen for future studies.	14	Months	Terrier - Yorkshire	Dog	2.5	Pound

EON-114503	2/13/2013 15:30	Taste of the Wild High Prairie Dog Food	<p>(b) (6) was switched to Diamond brand "Taste of the Wild" Bison in the spring of 2012 after his diagnosis of EPI and had a marked improvement in his health after omitting grain. We purchased a bag of taste of the wild the second week of December 2012 at (b) (6) in (b) (6). We fed the food to both of our dogs. A week before Christmas, (b) (6) started having issues with Diarrhea, vomiting and weight loss. Just before Christmas, after several days of vomiting and diarrhea, we took him to our vet. The vet did a stool "swab" and reported that (b) (6) had a large amount of campylobacter in his stool. He put (b) (6) on Doxycyline, gave him a B12 shot and a steroid shot. He reported we should see a rapid turn around in his health. He also warned us that campylobacter is extremely contagious and that there was a 50% chance our other dog would get it and a strong chance we could get it too and recommended hand washing and that we not allow anyone to pet him for a few days. He also told us we needed to clean all the carpeted floors.</p> <p>For the following days, we cooked (b) (6) food for him and quit feeding his taste of the wild. During the same time, we also fed our 3 year old Cairn Terrier the same home cooked food that had some can food added to it. Once (b) (6) started showing signs of improvement, we attempted to put his dry food back in, mixing it in. He would walk up to the bowl and refuse to eat the food with the taste of the wild mixed back in. We never imagined the food was potentially the problem, so we put other things in to make it taste good enough that he and our other dog would eat it. They did....and both got sick. (b) (6) got much sicker than (b) (6). We would backtrack....put him back on the homecooked and can food diet....he would get better.....we would put the taste of the wild back in....they would refuse to eat it....we would mix it with other foods....they would eat it....and get sick again. This went on for 3 weeks until we were forced to euthanize (b) (6) when he continued to lose weight. We never questioned the chance the food could have been the cause. Then, after (b) (6) died, we kept attempting to feed (b) (6), our Cairn Terrier the remained of the Taste of the Wild. (b) (6) refused to eat it. She would go to the bowl, smell it, and refuse to eat. We did the same thing....mixed a little can food into it, thinking she simply preferred the can food. For 3 days, we watched (b) (6) get sick each time she ate. Within a couple of hours of eating it, her stomach would start rumbling so loudly you could hear it across the room. She was lethargic and refused to get up, began vomiting and experiencing diarrhea. By now, we became highly suspicious that something was wrong with the food. We took her off it immediately and put her on a different brand of dry food and she has never had another incident. (b) (6) was at high risk for complications due to his EPI.</p> <p>We immediately began researching the food when it occurred to us there might be a problem and</p>	9	Years	Shepherd Dog - German	Dog	78	Pound
----------------------------	-----------------	---	--	---	-------	-----------------------	-----	----	-------

--	--	--

found that there had been recalls last year. We checked the recall lot numbers against ours and they did not match. We then contacted the manufacturer and explained the situation to them. Their staff veterinarian got on the phone and did not deny a problem and advised that if we would send them back the label from the food, they would give us a full refund.

At that point, the 2nd week of January, we contacted the National FDA number and got a message machine where we left a message. Several days later, I got a call and was told that I needed to call our regional FDA office. I did so, again getting an answering machine, and left a message. After going 2 weeks with no call back, I contacted the Manager (b) (6) at (b) (6) and told him what happened. He was very upset and asked us to bring him a sample of the food and he would contact the local FDA officer that inspects their store and request they come get the sample and test it. On Feb. 11, 2013, I contacted (b) (6) and he advised that he had left a message for the FDA, but had gotten no response yet and would try again.

At this point, I decided to call the US Department of Agriculture Office in (b) (6) and see if they had any recommendations. We had never been told to contact them, but thought they could help do something. This was yesterday and a report was filed and they sent an investigator to our home to get all of the information and photograph the bag of food. They advised they would contact the FDA and begin searching for an unopened bag of food from the same lot and have it tested.

This morning, I was contacted by (b) (6) from the local Dept. of Agriculture office and she has apparently been in touch with the FDA who requested I file this complaint, sending me the link.

We would be very appreciative if all actions were taken, particularly in a situation with a dog food manufacturer that has had a recent recall, to determine if our dogs food was contaminated with a toxin that led to his death.

Thank you.

After one week of extensive treatment with vet, dog died.			Sheepdog - Shetland	Dog		
EON-114493	2/13/2013 14:24	Waggin Train Jerky Treats	We started to give our dog these treats after reading the ingrediants on the package that contained Chicken, vegetable Glycerin and Duck vegetable Glycerin listed as the only two ingrediants. We were looking for a healthy treat without all of the additives. This was the only change to our little murphy's diet as we are very specific as to what he receives. He was 1st ill in November with diarria and vomiting. At that time we did not associate the treats as we thought this could be a virus? He was taken to the vet and treated with medication, fluids and sent home with a diagnosis of pancreatitis. The vet alerted us at that time it was important that we caught it so early. We watched him closely and eased him back in to the normal routine. Again giving him the treats and within 1-2 weeks he was so sick again, same symptoms but this time the diagnosis was worse and hit him much harder. He was hospitalized and was touch and go for a while. He did recover, but the vet said that was due to him being in such good health prior the exposure. As soon as I took the treats in and showed them to our vet, she knew it was the cause of the issue. She said she saw the med recall on those the day(s) before.	4	Years	Shih Tzu	Dog	12.5	Pound

EON-114477	2/13/2013 13:24	beneful healthy weight with moist chewy chunks ups 1780013460	First feeding of this bag she up-chucked, next feeding she up-chucked. EON-114467	2/13/2013 12:48	Beneful Healthy Weight Dry Dog Food	<p>Our dog was found lying deceased outside of unknown causes. We had fed both of our dogs (b) (6) and (b) (6) -- (b) (6) was euthanized on (b) (6) after becoming extremely ill -- also I believe from being fed Beneful) Beneful Healthy Weight forever. When they were younger, we fed them different versions of Beneful.</p> <p>Over the years, (b) (6) would periodically have vomiting spurts. We would switch both dogs to venison and rice for a week, and (b) (6) would be fine. In the month prior to her death, she was drinking excessive amounts of water and seemed very tired. I let her out to go potty on the evening of her death, and she didn't come back in when I called her. I found her laying outside dead of unknown causes. There was no injury to her.</p>	10	Years	Beagle	Dog	35	Pound

EON-114451	2/13/2013 12:03	Beneful Healthy Weight Dry Dog Food	<p>Both of our dogs (b) (6) & (b) (6) had been fed Beneful their whole lives. After (b) (6) died in November of 2012 (as will be described under a separate sheet) we bought a different brand from Beneful when the bag we had was finished (late December of 2012). (b) (6) started becoming very inactive and lethargic the first part of January, and we figured it was depression due to the loss of her companion, (b) (6), in November. However, it seemed odd that she was having a delayed reaction.</p> <p>Then, (b) (6) started having constant accidents in the house (peeing and pooping) which she had NEVER done since she was a puppy. She was drinking a ton and did not want to eat her food (we had switched to Gravy Train by then). I then started feeding her venison and rice, and she would only eat about half of it. Totally unlike her. She started just laying around crying and whimpering all the time and had a blank stare in her eyes. At this point, I started doing research and realized that it was not likely depression but some sort of pain due to the other symptoms she was displaying. She wouldn't drink any water and would barely eat.</p> <p>I took her to our veterinarian, and she put (b) (6) on steroids and antibiotics in case she had some sort of intestinal parasite. She said that the steroid (prednisone) would increase her appetite and thirst, and she should bounce right back. She didn't. They took blood work at the vet's office, which showed that both her red and white blood counts were low. This was on Tuesday, (b) (6). (b) (6) did not get better. She got worse. I spent the last two nights of her life sleeping with her on the couch and crying right along with her. IT WAS HORRIBLE. I made the decision to have her put down on Friday the (b) (6). We we got home to take her in for euthanization, she could barely move. I regret keeping her around for selfishness and because I did not want to lose her. She was in pain. I believe that Beneful dog food killed both of my dogs. As for the date the problem started that I am listing below, I can only list when I noticed that she was in pain.</p>	8	Years	Shepher Dog (unspecified)	Dog	75	Pound

EON-114429	2/12/2013 19:24	Beneful Playful Life made by Purina	<p>I lost a great puppy and believe that Beneful made by Purina is the ones that are at fault for feeding her this food. I got her (b) (6) from a breeder that had her on Beneful healthy growth for puppies. Then When she got older switched her to Beneful Playful Life. Here is what happened</p> <p style="text-align: center;">Saturday February 9, 2013</p> <p>(b) (6) was as active as ever playing with my girl (her sister) and having a great day with them. She didn't seem that anything was wrong. We put her to bed and she was doing great just laid down after her long day of playing.</p> <p style="text-align: center;">(b) (6)</p> <p>I woke up at 9 am and was getting (b) (6) her food and water and then take her outside. When I had went to the bathroom real quick I heard my daughter yell mom there is a big thump in (b) (6) kennel. I went out to let her outside to find her flopping and foaming and drooling at the mouth. I ran right over to my neighbors to get him for help. I was so scared. He came over and during the time that he was there she had about 3 seizures not lasting long but they felt like they were lasting forever. She would just catch her breath and than it would she would start foaming and drooling at the mouth and flopping on her side. I called the vet hospital to make sure that they were open and they were and I advised her that I would be bringing her right up. We loaded (b) (6) into the truck in her kennel because she was not willing to move and just wanted to lie down. We got her in the back of the truck and I drove to the vet we arrived at the vet at 10 am I ran in and got a tech and she came out and (b) (6) was having a grand mal seizure so she hurried to get her out of her kennel and then ran with her to the back. They gave her 10mg of diazepam iv and the seizing stopped immediately in the hospital. They drew blood for pre-op in house, And also sent some out to the lab to test for Valley Fever and Tic Fever. In house blood results came back and there was a slightly elevated creatine and no other abnormalities. (b) (6) was sedated at the time and not fully aware of her surroundings. At 12:15pm (b) (6) began to have another seizure At that time they gave her 152mg of Phenobarbital iv at 12:15pm. Seizure activity stopped and she became sedated again. Her temp at this time was 103.8. I had got the call from the Vet hospital that she had another seizure and that I need to transport her to an overnight vet hospital so I went and picked (b) (6) up at 1:30pm got her into the car and she started to foam at the mouth again and twitching. The Dr came out from the vet hospital and told us that she be having muscles twitches but she was moving her face very weird. The vet dr gave her another 65mg of Phenobarbital in her IV. Off we drove to get her to the vet hospital. This was the most stressful and scary drive I was in the back with her just hoping and praying that she would make it.</p>	1	Years	Boxer (German Boxer)	Dog	60	Pound
----------------------------	-----------------	-------------------------------------	--	---	-------	----------------------	-----	----	-------

During the ride she would get up out of nowhere and start twitching her head and then after about 2 mins she would lay back down. She did this the whole ride to the 24/7 Vet Hospital. Once we got there my friend that was driving went in and got the nurses they came out and got (b) (6) and placed her on a table. Again she was taken to the back to be checked out. We got to the 24.7 vet hospital around 2:45pm. She was on loading dose of Phenobarbital which was finished. I left the vet hospital about 4:30pm and At about 4:30 pm is standing in her kennel and starting to circle, she is also hyper salivating, foaming and occasional head press, was given 65 Phenobarbital. 5pm (b) (6) is more active, circling the kennel faster, foaming at the mouth and throwing her at the kennel door, she is experiencing focal seizures, then fly biting and then a running seizure, gave 109mg Phenobarbital. At 6pm (b) (6) seizures activity had not stopped and they attempt Propfol to anesthetize in her IV, Temp at 6pm was 107.9 after infusing a total of 65mls of propofol (b) (6) temperature began to decrease and heart rate decreased. I was informed of all the over at 5:40pm and was discussed at that time and that she would like to give her some propofol to help sedate her and then allow (b) (6) to wake up. At about 8pm (b) (6) was sedated in her kennel. Made a phone call to them about 8:30pm and they let me know that (b) (6) responded well to the propofol and is currently sedated and this is when I was made aware that (b) (6) temp reach dangerously high levels. They had also discussed with me the possibly that (b) (6) may need to go and see (b) (6) for a scan. They had asked me over and over if she got into toxics and I advised them that she hadn't gotten into anything. I had searched the whole back yard and there was nothing out of the blue. Also the week before this happened it was raining her in (b) (6) so she was inside most of the time except to go to the bathroom. She spent most of her time inside unless we were all outside playing in the back yard and the girls were on the trampoline. They have asked me the question about twice and then talked with me about inflammatory cause, possible epilepsy, or other infectious causes. I asked for a call back if anything changed. At 2:20am they did a DVM on (b) (6) and she started to show signs of seizure holding her head down, fly biting and foaming at the mouth. She seemed disoriented administer Midazolam dose and (b) (6) started to relax. At 2:50am lilt started to get restless and circling her kennel, heart rate started increasing from 140bpm to 190 bpm. Was also hyper salivating and vocalizing, administered 5mls of Propofol to assist to relax her. I was notified again of all the above information and talked with staff and asked that they give me a call if anything else happened. Received a call at 5am (b) (6) had started having a seizure, circling in kennel, hyper salivating, foaming at the mouth and fly biting. Her heart rate was 210 bpm and temp was 102.2. They gave her more medications and she was sedated at 6am. Received a call at 6:30am they discussed sending (b) (6) home (although shes more than likely to have more seizures) or keeping her here (although her seizures are brought on

by stress/noise and would certainly have them there and need propofol CRI) They also discussed euthanasia because (b) (6) is not getting better and I let her know that I couldn't keep (b) (6) in long term hospital care. I had consented with nurse at this time that I couldn't put (b) (6) through this anymore and her high temps and seizures are very alarming to me and they are not able to stop unless she is sedated. I advised the nurse that I wanted to be present for the euthanasia. Advised them that I would be there about 8 am. I arrived at the vet hospital about 8:15am and (b) (6) was euthanased. I chose to be there with (b) (6) when they put her down. I was informed at the time that I got there that (b) (6) had more seizure like behavior was starting so they gave her 3ml of propofol.

This is what I went through in a 24 hour span with my precious baby girl that I had to make the decision to put her down. Once I got home I searched my back yard again because they kept thinking that she was poisoned. There was nothing. My neighbor had asked about her pet treats. I advised him that I just bought a new box of Delmonte milk bones a 10lbs box. I did research and contacted the company and they stated that the recall was for salmonella and it cause GI problem not something that would cause Seizures. I started to look up recalls on Baneful and I have never found so much stuff online on what this food has been doing to dogs. There were 352 consumer affair reports when I looked on 2/4/13 and now there are 392. There are people numerous people that have lost their pet or their pet became very ill. The more I read the more I was ashamed that I even fed my dog this and to know that she showed signs sooner but I had never thought that it was from the food. She did have diarrhea here and there sometimes but I just thought that she may have got something in the back yard. Also she would vomit out of nowhere and it was yellow bile now I know why she had both of these symptoms it was her FOOD. I am so upset I lost my first dog to some food that I had no idea was that bad and causing that many problems. I did get (b) (6)'s blood work back from the vet on 2/6/13 and the Dr let me know that it was negative for Valley Fever or Tick fever, there was a elevation in her creatine level others wise everything looked great. I knew at that moment that it was her food. I made the call to Baneful and they took all my information and I let them know what happened and the lady stated we will have our claims department give you a call. I advised her I wanted all my vet bills paid for and her response was I have filed this with the claims department and they will also reimburse you for the bag of food. Then the representative advised me that I would be hearing from the claims department within 2-3 business days. On Friday 2/8/13 I received a call from (b) (6) at the Segwick claims department; he took down my story as well. (b) (6) had advised me that this story hits close to home for him as he has 2 boxers his self and also helps out at the boxer rescue. I took it upon myself to ask what type of food he feeds his boxers and his

at the boxer rescue I took it upon myself to ask what type of food he feeds his boxers and his response was Kirkland. (b) (6) had asked that I fax him all the information (records and vet bills) and then his higher up will review it and then he would be calling back. It is now 2/12/13 and I haven't heard anything back from them.

I wanted to file a report because I know in my heart that this food has killed my dog. I would of got a necropsy on (b) (6) but when I had called the vet back to get that done she was already sent off for cremation.

I still have what was left in the bag of food that I was feeding (b) (6) and I have an unopened bag as well because I always bought 2 bags at the same time. I would love for you to look further into this and see if there is some type of toxins in this dog food that has reportedly killed numerous dogs.

EON-114269	2/12/2013 11:00	Beneful Original brand dog food	I have fed her Beneful for several months buying the " Healthy Fiesta" type. I have also bought the original type, incredibites, and the playful life. The last time I purchased food it was the original type. About 4 days after, that I had started feeding her the new bag of Original beneful dog food, I noticed her acting lethargic. She would NO longer jump up on furniture, our bed, and wanted to sleep all the time. She also started having loose stools in the house, which she NEVER did before. She yelped out a few times after being on my lap and trying to jump off the furniture. I became very worried. I immediately called the vet, they told me to stop feeding her the beneful and see what happens. I switched her to the HILLS science diet, and a week later, I have my healthy, normal dog back.....She is playful, not sleeping all the time, and wanting affection just like before.....I returned the beneful to the store, and I also called their consumer line. They ignored my complaint, and told me it wasn't their dog food.	5	Years	Terrier - Silky	Dog	12	Pound
EON-114215	2/12/2013 0:24	BenefulPedegree	Since the birth of my dog he was given BenefulPedegree , he always seem sad and depressed, he would vomit, and last year grew a cyst on his back leg. This being the first dog I have ever owned I thought it was normal, I didn't know any better. Until recently about a month or two ago I read an article about this food and realized that this food was the cause of all this. Schnauzer's are suppose to be dogs full of energy and I just thought I happen to get a really lazy sad one, but the whole time it was his food! Since I switched his food (to blue buffalo) I have seen a completely different dog, I can't get him to stop running around! He is happy and alert and not to mention the cyst on his leg has become smaller, I'm hoping that eventually it will go away on its on. I just want to let you guys know about this because, obviously I'm not the only one with this problem. That food should not be sold! I am one of the lucky ones that found out in time to save my dogs life! Hopefully this food didn't cause any future unknown damage to our dog!	3	Years	Schnauzer - Miniature	Dog	24	Pound

EON-113950	2/8/2013 18:00	Milo's Kitchen Chicken Grillers	<p>My dog has become gravely ill--he originally weighed 55 lbs, has lost 15 lbs. in a month --he has chronic diarrhea, no appetite, intestinal cramping, dehydration. We have spent a month and \$4000 trying to diagnose and treat, and then I realized he had been eating the Waggin Trails Chicken Jerky and Milo's Kitchen Chicken Grillers as his regular treat prior to getting sick.</p> <p>There is no place on the package where it indicates the chicken came from China or I would not have purchased it. I have not received a recall notice from either Costco or Kroger regarding this, and only became aware of the problem when seeing a pet owner with similar problems interviewed on local news.</p> <p>I hope with all my heart that my dog survives --it is breaking my heart to look at the poor guy. I hope these companies will be held responsible for what they have done to these animals and the suffering they have inflicted on the dogs and their owners.</p>	6	Years	Poodle - Standard	Dog	39	Pound

EON-113949	2/8/2013 17:54	PURINA BENEFUL ORIGINAL	<p>I am filing this report on behalf of my next-door neighbors, with whom we are very close. They are quite distraught about the sudden death of their companion, so I offered to file for them. Our dogs spent a lot of time together too.</p> <p>(b) (6) most recent Well-Visit at the Vet, was last week November 2012, at that time he was deemed in great health (including standard blood work, which showed NO problems). The dog owner (b) (6) purchased a new 40lb. bag of Purina Beneful at BJ's Wholesale Club (b) (6), (b) (6) location) on Dec 26th, 2012. As the old bag ran out, he began using the new bag around Dec 28/29th. Daily feeding: approx. 1.75 cups in the AM, and another 1.75 cups at dinner.</p> <p>On Monday (b) (6), (b) (6) was acting normal (ate breakfast, played fetch outdoors with our dog as usual). Overnight, there was one episode of vomiting. During Tuesday, (b) (6) he would not eat breakfast. He was extremely thirsty all day, lethargic, and vomited some yellow phlegm 2 or 3 more times. He was able to walk outside when needed, but no interest in play, just licked up lots of snow. Overnight Tuesday - Wed, he became too weak to get up and walk, more vomiting yellow phlegm. His owners called the VET the minute they opened, and were instructed to bring him in ASAP. I had to help them lift the dog, as he was unable to stand, and was very limp and heavy (barely alive). The vet found him to be severely dehydrated, so much so that is was difficult to draw blood for testing. The blood work indicated acute liver failure. They were questioned about potential poison/toxins that the dog may have had access to. The dog is NEVER left unattended, he was either retrieving a tennis ball or was in the house with (b) (6). All human medications are not accessible, no items available in the garage for him to get in.</p> <p>The VET tried to rehydrate him while waiting for blood work and accessing his condition. He suffered a seizure during the day WED, and passed away late WED night. My dear neighbors were in such shock, they declined to have a necropsy performed, so the whole thing was a mystery. They gave us the remainder of the bag of food, thinking we could use it. Thankfully, I did not feed it to my dog, b/c research on consumer complaint websites indicates 382 comments (as of 2/8/2013), many of those people reporting similar problems with a recent purchase of this food.</p> <p>I still have the bag of food in my possession, and hope for it to be tested, just not sure who/where to send it.</p> <p>The bag info: BEST BY OCT 2013 lot# 22976001 0758L08 40lb bag BJ's Wholesale, (b) (6) Dec 26, 2012</p>	8	Years	Retriever - Labrador	Dog	85	Pound

EON-113860	2/8/2013 11:39	Healthy Promise Hip & Joint with Glucosamine HCl & Chondroitin Waggin Train Dog Treats	Patient presented for acute vomiting and diarrhea following administration of chicken jerky treats by owner. Patient was treated symptomatically treated with anti emetics, antibiotic and antacids. Further diagnostics were performed when the patient's symptoms continued to wax and wane. Blood work revealed severe azotemia. Bloodwork from 8 months prior had WNL BUN and creatinine. A free catch urine sample was submitted for culture and sensitivity. The patient was referred to an internal medicine specialist for more rigorous treatment. The kidney failure was managed for the next year until it was decided to euthanize due to poor quality of life.	12	Years	Terrier - Cairn	Dog	18.4	Pound
EON-113849	2/8/2013 9:33	NUTRO ULTRA NATURE'S VERY BEST INGREDIENTS WEIGHT MANAGEMENT HEALTHY JOINTS HEALTHY HEART	Violent, near-death experience: my 6.5lb. healthy Chihuahua became markedly, gravely ill hours after eating about 1/8th cup of Nutro Ultra bag states #244C2LEB0419:58.25-22693-01 is printed on the bottom, UPC 79105 10373 Best by October 2013. My pet has vomited 2x in her 2yr. 7 month life and never had diarrhea.This is a bag of "Weight Management" claiming chicken as the #1 ingredient in the food, "powerful antioxidants and whole grains". and I fed it to my pet fresh from the bag (it was not sitting out). My pet did not have any other food, water, or treats, or medication just this food. She vomited for a course of 3&1/2 hours as much as a human would vomit. Severe vomiting,dry heaving and diarrhea. The pet was near death and had to be treated. She was weak, lethargic and had to receive forced fluids. I've subsequently seen that NUTRO Franklin, TN 37067-1769 USA had issues in the past and was being watched by the FDA. Please investigate this company. With great sorrow from a pet owner. This was a close call losing my dear animal and this is my 1st report to the FDA on anything in my life. I want to make sure no other pet or pet owner is affected by this horrific experience with this food that caused such a reaction. I am 100% positive it was this food as I gave my pet nothing but this food in that 24 hour timeframe.	2.5	Years	Chihuahua	Dog	6	Pound
EON-113841	2/7/2013 20:03	Beneful	Started feeding her Beneful. Before that she was active, skinny, energetic, happy. Ever since we started feeding her she has bloated (doubled in size), wheezes when she breathers, whines when you touch her stomach, loses control of her bladder, she sneezes and itches herself constantly. She refused water and will seldom drink. She mopes around the house and looks to be depressed. Doesn't enjoy walks or anything like she used to. She was NEVER like this and I believe it is due to eating this horrible food. I have since switched to blue buffalo and seeing some improvements just hoping its not too late to get my dog to be healthy and happy again.	3	Years	Terrier - Jack Russell	Dog	20	Pound
EON-113837	2/7/2013 18:54	Beneful Healthy Weight	Dog has been on Beneful dog food (varying types) for 4+ years. Summer 2012 started putting on weight, started scratching and licking constantly and became lethargic. Vet did not see anything wrong with her. Changed food on February 4, 2013 and already seeing symptoms getting better. Date below is approximate.	5	Years	Beagle	Dog	30	Pound

EON-113836	2/7/2013 18:24	Purina Beneful Healthy Weight	<p>My dog, (b) (6), is a 5 year old rottweiler/pit bull mix. He has always been a happy, fun-loving dog ever since we got his as a small puppy. We switched him to Beneful brand dog food, first Original and then to Healthy weight about 8 months ago. He has always been a pretty good sized dog. You could never see his ribs through his skin until he started eating Beneful. About 4 months after he started eating it, we noticed that he started eating much more than normal and drinking tons of water. He never gained any weight and actually started losing quite a bit. He's hungry all the time now and he seems very sad and tired. We then noticed at about six months that he was chewing and licking himself to the point that his back, tail, and legs were raw and bloody. Our vet wasn't sure what was wrong and we treated the raw spots with medicine and chew spray. None of the products have worked. For the past month he has been throwing up a thick yellow bile and has started urinating in the house again, which he hasn't done since he was a puppy. He seems very unusual lately. I just recently bought a large brand new bag of Beneful. I was then told by my vet and family member to not use Beneful at all because many other dogs are experiencing the same symptoms from eating this brand from Purina. Everyone I know has stopped feeding it and their animals have since improved their overall health condition and are much happier as well as active again. I will be switching my dog to another brand as well as soon as possible. My grandmother's dog ate Beneful for years and recently died. The vet never found any signs of him being diabetic until the last few months before he died. He had the same symptoms as my dog, (b) (6). I refuse to let my dog suffer the same result from a bad dog food.</p>	5	Years	Mixed (Dog)	Dog	50	Pound

EON-113788	2/7/2013 8:45	Purina Beneful Original with Chicken	<p>Our dog first became sick the week before Christmas. One night after feeding her from a new bag of Beneful she started vomiting, had diarrhea and was lethargic. She was very weak and could barely walk. There was another time that she had become sick months earlier and we figured she had eaten something that didn't agree with her stomach so again figured the same thing had happened this time. We watched her the following day, she seemed to be getting better and decided not to take her to the vet. A couple weeks later (b) (6) was out running in the snow and injured her leg. We took her to the vet as she was limping. He put her on a pain killer for one week and advised us to contact them if it didn't heal. At the time of the visit, her weight was taken, she was 60lbs and an overall check was done. We were told that she was perfect weight and seemed to be in excellent shape otherwise. Her leg injury healed. We continued feeding her beneful and started noticing that she was vomiting a yellow bile on a regular basis. Her bowel movements were back and forth from runny to "normal". We started watching her a little more closely and were trying to determine if there was a problem. Over the next two weeks we started to notice she was losing weight and seemed more lethargic than usual. We began looking up symptoms and were trying to determine if she was sick or feeling down as we had been experiencing bad weather and had not been taking her for her usual walks. We started taking her out as often as possible and noticed that she wasn't her usual self, would walk next to us and only run in small spurts, she was usually full of energy. She had just turned 3 at the end of November so figured she was starting to settle down a bit. She started refusing to eat her Beneful, so we began introducing other foods. She would only eat small amounts. Sometimes she would vomit and we would watch her and try to determine if she needs to see the vet, but then she would seem ok the next, however still wasn't eating her normal amounts, we began cooking her meals. Rice and Chicken and veg (green beans). She seemed to want to eat, if we gave her a milk bone she would gobble it up, but over the last two weeks her weight began to continue falling and on Feb. 1st we took her to the vet as she was looking very thin and seemed weak. The vet told us that she had a very high temperature, low blood pressure and had lost 9 lbs since her last visit a month earlier. Her gums were white and they took bloodwork and xrays. Bloodwork showed she had a very high white blood cell count. She was anemic. They thought that she may have pyometra and scheduled an emergency spaying for the am. Xrays showed something around her spleen that they were concerned about and they could see that something was pressing on her stomach. They put her on iv fluids overnight and told us she should be fine after she was spayed, but that they would do some investigation as to what was pressing on her stomach. Surgery started and within half an hour we recieved a phone call that they had found tumours on her liver and spleen. They told us that they were too large to remove and that we would have to decide whether</p>	3	Years	Retriever - Golden	Dog	51	Pound
------------	---------------	--------------------------------------	--	---	-------	--------------------	-----	----	-------

			<p>she should be put down. The vet couldn't believe that such a young dog would be so sick. We decided to have her euthanized after the vet told us that she would suffer and be in pain if we took her home and that she would only live a couple more weeks at the most. After she was euthanized, the vet asked us if we would be ok with him doing an autopsy free of charge as he wanted some answers as to why her condition was so bad. He called us later to tell us that her liver was 4 times its normal size, had tumours on every node, same with spleen, tumors and oversized. As well, her gallbladder had tumors as well. We never mentioned to the vet what food she was eating, he never asked. After our initial grief we began looking for answers and came upon the Beneful issues that people are reporting. (b) (6) had most of the same symptoms as these other dogs. Her illness seems to have started in December and she died about a month later as we are seeing with the other dogs. We felt that we needed to report her death to you as we are certain that the Beneful caused these problems. It is starting to look like some batches of the product were tainted and that is why some dogs are becoming ill and dying, while some have not been effected. We have her last bag of Beneful, half full, but aren't certain this was the problem bag. She had also eaten some of the Beneful moist food during the Christmas holidays.</p>

EON-113785	2/6/2013 22:09	Purina Beneful Healthy Radiance	<p>This animal has eaten Purina's Beneful for several years with no issues. On Monday, January 28, 2013 I purchased a bag of Beneful Healthy Radiance at Wal-Mart on (b) (6), (b) (6). Beginning Tuesday morning, my dog had diarrhea, by Friday, going 2 or 3 times in the house overnight. This dog never has accidents in house. The following Saturday morning, I began to suspect her food and did some internet searches for "Beneful" and was horrified to see how many stories are on the internet about dogs becoming sick or dying after eating Beneful. There seems to be a spike in the last several months. Beneful denies there are any problems, yet they will not investigate these claims. I fasted my dog on Saturday and began feeding her food I prepared myself that afternoon. From that point on, she had no diarrhea. Clearly there is a link between her stomach issues and this particular batch of Beneful. If Purina won't voluntarily test its product, they should be forced to.</p>	5	Years	Mixed (Dog)	Dog	50	Pound
EON-113780	2/6/2013 20:54	Milo's Kitchen home-style dog treats Chicken Jerky	<p>Because of (b) (6) special diet I had to be very careful with treats that we gave her. I purchased Milos Kitchen Chicken Jerky because they had very limited ingredients and was basically just a dried chicken breast. They were given to her very sparingly. However in December she started getting lethargic, having accidents when anxious, drank water non stop, peed more often and wouldn't eat her normal food. I had to trick or coax her to eat and gave her more treats and soft dog food because it was all she would eat. We took her to the vet and they put her on an antibiotic thinking she may have a bladder infection. The antibiotics didnt help and her symptoms became worse. She would no longer eat anything and I had to force feed her but she continued to drink alot of water. She was getting weaker and weaker and more lethargic. We took her back to the vet for blood work and they didn't see anything they felt should make her feel that poorly and gave her pain pills. When that didn't help either and she only got weaker yet and lost so much weight we had to Euthanize her.</p>	3	Years	Lhasa Apso	Dog	13	Pound

EON-113779	2/6/2013 20:54	<p>Unsure of package name as the bag was thrown out because we put the food in container spouse beleives he bought Purina Beneful for older dogs.</p>	<p>My dog was in excellent healht in the month of december 2012. We bought our last bag around mid december. We gave it to her and we noticed that her hair was coming out in clumps, more then her usual shedding. Then we noticed one day that her eyes were swollen almost shut and red. It went away within a couple days. (b) (6) and gave me her dog food, specialty from the vet (I could ask her the brand). We fed that to our dog and she was healthy as always. Without realy thinking about it I switched again to the other brand up until the day she passed, never switched her food since. After returning to this dog food(cheaper brand), I noticed she was drinking a lot more water, excessivly and seemed lethargic. On January 31st, 2013 I noticed she was puking yellow bill. She kept puking yellow in our home until saturday but kept eating and drinking her water. By Saturday night she had no energy and by Sunday, Febuary 3rd, 2013 she did not want to move from her bed, not even to go outside and pee, her eyes were bloodshot. We could only go to the veterianian on (b) (6), Monday morning. The vet thought it might be food poisoning or ovarian cancer. So we got an x ray on her, she showed to have no cancer. The then did some lab tests, and the toxins were so high in our dog that the vet said she had never seen those levels in a dog that was living. She asked if we had fed her some antifreeze and explained the dog would be drunk if she had drank this. We answered no. Her kidneys had compleatly failed and we had to put her down.</p>	8	Years	Mixed (Dog)	Dog	25	Kilogram

EON-113778	2/6/2013 19:30	Beneful and mighty dog	<p>A few weeks after I switced to Beneful dog food, my Whippet started urinating a lot. She also had blood in her urine. She also started going in her sleep. The Vet put her on medication which she will take for the rest of her life and the peeing in her sleep stopped. I noticed that she was laying around more. I also noticed that she was still peeing a lot and it continued to get worse. a few weeks ago I noticed that her skin on her belly was very wrinkled and she was losing weight. I figured she was dehydrated. She has been drinking a lot since I put her on this food. She needs drinks in the middle of the night in the bedroom and will cry to get out if she doesn't have water. She immediately would run to the toilet for a drink too, like she just couldn't wait. At the same time, my little Italian Greyhound started to get very restless at night. He was waking up and pacing the floors. He would lie on the floor and shake. He never would be on the floor before. Then he started throwing up nightly and gagging a lot. He couldn't jump up on the bed. His eyes also started to water constantly. I was suspecting something wrong with my Whippets kidneys because of the peeing, dehydration, drinking and light colored urine. The weight loss of three pounds since October was also concerning considering I was feeding her Beneful and Mighty dog (another purina product). She had a big appetite and was eating but losing weight. I happened to be at a Superbowl Party when someone told me of the Beneful scare. When I saw the symptoms, my Whippet had almost every one and my Italian Greyhound had some. I immediatly made an appt with the vet, knowing that kidney failure could be delayed if caught early. As I thought, her creatine was a little high and her sugar. Both symptoms. She was dehydrated and given IV. She was put on a perscription low protein dog food. I have taken both dogs off Beneful and mighty dog. Since then, every person I asked or told about beneful had dogs or young puppies exhibiting some or all of these symptoms. Every one! Something needs to be done. I switched their food around Sept or Oct of last year. At first I saw more energy, but things quickly declined. It is too early to tell if I caught the kidney problems early enough. Only went to the vet on Monday.</p>	12	Months	Hairless Dog - Mexican	Dog	26	Pound

EON-113777	2/6/2013 19:18	Beneful Incredibites	<p>In November of 2012, we started feeding our 8 year old chihuahua beneful incredibites following an oral surgery (he had a couple of teeth removed). He had blood work done to make sure everything was ok, and the results showed that he was very health, He began to defecate a lot more than usual but we attributed it to the pain medications he was on. After two weeks, he was still defecating a lot more than usual, so we reduced the amount of beneful we were giving him. This seemed to help, and since the bowel movements were not loose, we did not think it was the beneful itself causing any problems. In January 2013, we purchased another bag of Beneful Incredibites (INFO HERE!!!). We started feeding him the contents of the bag at the end of January (probably around the 29th) and this past weekend (the first) he began to defecate profusely. On Tuesday, February 5th, he had diarrhea and was vomiting. He had a fever and was shaking all morning from the chills. We took him to the vet that same afternoon and he had a fever of 104. He was put on an IV so that he could remain hydrated. Today, we took him to the vet again and he had to stay to receive antibiotics through an IV. The blood work showed a very high amount of white blood cells; neutrophils, to be specific. He is currently still hospitalized. We believe that the food has caused these health problems, as he was healthy indoor dog (he is never outside unsupervised) before we began to feed him the Beneful. We have read and heard stories about very similar symptoms from the Beneful food. We urge that the food be investigated. We have the bag with most of the food still in it (he only had a few cups over the span of a few days).</p>	8	Years	Chihuahua	Dog	11	Pound
EON-113776	2/6/2013 18:18	Beneful Dry Dog Food	<p>Purchased Beneful dog food (Purina) and fed to both of my male collies for about 8 months. Both developed drier than normal skin, but (b) (6) developed red hot spots all over his back and legs. I made several calls/visits to vets to help the issues. Nothing worked. I stopped the dog food after all else failed and after a month, he is now getting back to normal.</p>	4	Years	Collie - Rough-haired	Dog	84	Pound

EON-113774	2/6/2013 16:15	Beneful Dog Food	On (b) (6) I woke to find my 2 year old Pit Bull dead. He had died in his sleep at some time during the night. My family and I were dumfounded by what could have happened. It wasn't until about a week later that we started finding reports (ie.. consumeraffairs.com) that hundreds of other pet owners were losing their pets or they were sick and were on Beneful. That's when we finally figured out what had happened. Our pit bull was also on beneful. He had displayed many of the symptoms, vomiting, excessive water drinking, mild lethargia. We never realized it was the food. We thought he was drinking excessively because he had just vomited or vomited because he had drank too much water. It's not a coincidence that hundreds off animals are dying and the one link between them all is BENEFUL. Please investigate and get this poison off the shelves before more families loose a beloved memeber.	2	Years	Pit Bull	Dog	90	Pound

Changed his food, stool better, put him back on Nutro stool bad again, changed food t days ago.	7	Years	Retriever - Golden	Dog	81.5	Pound
EON-113703	2/6/2013 10:39	Milo's Kitchen home-style dog treats	Within 45 minutes of first ingestion Chicken Jerky, she went outside ate grass vomitted violently. (b) (6) was lethargic and anorexic the rest of the evening. Vomitted one subsequent time, which consisted of bile. During the evening she started licking at her forelimbs and rubbing eyes excessively. The owner was awakened by (b) (6) restlessness in the middle of the night and noticed that her lips and the skin on her muzzle was swollen.	5.5	Years	Crossbred Canine/dog	Dog	41	Pound

EON-113662	2/5/2013 21:54	Waggin' Train Wholesome Chicken Jerky Tenders	<p>Dog became noticeably lethargic, inactive, drank water excessively, and did not eat dog food normally approximately three days before hospitalization. The dog has always been in excellent health, fed a strict and proper diet, and walked/exercised every day - daily walks are at a minimum of 2 miles/day. Exercise limitation is the owner, not the dog!</p> <p>The night before hospitalization, the dog uncontrollably vomited bile (no solids) and slept peacefully on her dog bed the entire night inside the house (atypical behavior because this was over Labor Day weekend and because of the summer heat, the dog is mostly nocturnally active).</p> <p>Early in the morning the dog was found, slumped on the porch stairs (has doggie door access to inside/outside home) completely non-responsive, eyes open, tongue hanging out, and breathing so shallow I initially thought she was dead. The dog was immediately brought to a veterinarian clinic where the prognosis was not good. The dog was stabilized and transported to an animal hospital. The dog was touch and go (wouldn't take food, diagnosed with complete kidney failure, and a kidney/urinary tract infection) for three days - exploratory surgery was a discussed option. The dog started to recover and was released in "guarded" condition after 5 days of hospitalization. The dog has recovered since this episode.</p> <p>Only identified problem dog ever had is a gluten allergy. This is the reason why she has a specific diet and the only treats ever given was chicken jerky or other non-filler meat treats. I am posting this scenario because I only recently found out about the Chicken Jerky recall and the associated reports issues dating as far back as 2007. My dog has been given these treats since before 2007 - it would have been nice if the FDA was more vocal about reporting any of the food related concerns for pets. I also believe the 2200 reports and 360 deaths associated to this product is probably way under reported so add my dog to the list! Properly informing the public would have saved me from a lot of family anxiety and concern over a beloved family member and a lot of expensive treatment costs.</p>	12	Years	Siberian Husky	Dog	35	Pound

EON-113639	2/5/2013 16:00	Beneful Healthy Weight	<p>(b) (6) was a 12 and half year old Mixed breed. He had Lyme disease years ago and would occasionally bother him every few years, but not on a regular basis. He became lethargic on November 21 and by the 23rd he wasn't eating, vomiting, diarrhea and had trouble standing. On Friday 23, I took him to the Vet. The doctor found he had a fever, and thought it might be a virus - so he gave him a shot and gave him medicine for his legs thinking he might be in pain from arthritis. A few days later he began getting nose bleeds and again, took him to the vet and he gave him another medication. After a day and a half the nose bleeds stopped but he never got his appetite back, he continued to deteriorate and stopped eating, and couldn't stand without help - on (b) (6) we woke up and he wouldn't let us touch him, he wouldn't eat and was having trouble breathing, his eyes were oozing. We decided not to let him suffer anymore and brought him to the vet to have him put to sleep. The doctor felt he was old - probably had cancer (because of the nose bleeds) and was suffering. My sisters dog had gotten sick the week before mine and a few weeks later - she has a one year wheaten terrier - was hospitalized for dehydration. A few weeks later she found out that the treats she was giving her dog were recalled. She will also be sending you a report. Today I found out that there has been reports about Beneful Products - I feed my (b) (6) dry Beneful with table scraps every day. I also had bought treats to help hide his pills in, but I don't remember what they were, as I donated them to the animal shelter the day we put him to sleep,. My sister also feed her dog the small containers of Beneful. I can't say that is what did this, but it would make sense that both dogs got sick around the same week, but mine was to old to recover.</p>	12.7	Years	Other Canine/dog	Dog	52	Pound
EON-113614	2/5/2013 14:30	Nutro Natural Choice Adult Toy Breed	<p>We have been using Nutro for years to feed our Chinese Crested and he loved it. On 1/9/13 we need to buy more and the bag states new and improved. On the 12th our 10 year old, who was previously health, was so sick we had to put him to sleep. At that time we were stunted because he had been fine. Just to note, his last vet appointment in November.</p> <p>On the 1/14/13 our 9 month old Chinese Crested started vomiting blood. We are blessed that after two day of treatment she is during better.</p> <p>The only change that we can think of was to the food, Nutro Natural Choice for Toy Breeds. I called Nutro and the rep said the only change to the formula was to add flavor. (Green Tea and Spearmint extracts) They are sending us a sample kit to test the food and we are having a copy of the veterinarian report faxed to them for both dogs. Unfortunately, from our conversation I got the feeling they are used to this kind of phone calls. There really was no compassion what so ever, just a lot of questions.</p>	9	Months	Chinese Crested Dog ¿ Hairless	Dog	7	Pound

EON-113553	2/5/2013 8:33	Beneful	the dog started throwing up his food and became ill. Vet indicated that all symptoms matched what has been reported connected to feeding Beneful dog food. this dog has had no other food than beneful. Initial Blood work indicated a BUN of 112, Creatinin 7.1 and Phosphorous of 14. Test and symptoms inicate renal failure. the acuteness of the conditions, and all symptoms are consistant with wath has been reported by numerous consumers all have the common thread of the dogs were eating Beneful. My dog's condition is worsening with a prognosis as grim.	4	Years	Retriever - Golden	Dog	80	Pound

EON-113521	2/4/2013 22:45	Waggin Train Big Blast Pork Skin Twist with Chicken Liver	(b) (6) had this product from a newly opened bag on Jaunaary 17 and January 18, 2013. On the morning of January 19, she threw up birght yellow foam with solid pieces in it. In the following days, she developed mucusy reddish orange stool and by January 21 had diarrhea which became very bloody on January 22. In the early evening on January 22, she began to also vomit and began to have blood in her vomit that evening. She had both bloody vomit and bloody diarrhea until about 1 am on January 23. She finally fell asleep and did not have diarrhea again unitil about 8 am that morning. This diarrhea had so much blood that it looked like slightly runny ketchup (I took a photo). I took a sample of this diarrhea to my vet that same morning. (b) (6) did not vomit again and had two more bloody diarrheas that day. On the morning of January 24, the stool sample came back to the vet negative for all parasites and they commented that there was so much blood that she should come in if she was still vomiting as well. She has not had diarrhea or vomit since then, but she does seem to be drinking more water now. Although, I did take in her stool sample to be checked, I did not take her to the vet for an appointment since she stopped having the vomiting and diarrhea under my care.	4	Years	Retriever - Labrador	Dog	64	Pound
EON-113520	2/4/2013 22:45	Nutro Natural Choice Senior Large Breed	Dog had been on Nutro Senior for Large Dogs for many years. Nutro recently changed their packaging and formula. I slowly incorporated the new food into her diet. Shortly after, she started having terrible gas and had several accidents in the house. She also started waking us up in the middle of the night to let her out. You could tell she didn't feel good. She would go hide in her kennel in the basement for no reason. We had also started her on Rimadyl about the same time, so I assumed that was the problem. I took her off the Rimadyl, but the problems did not go away. A few days ago I decided to put her on a bland diet of rice and hamburger. She seemed to feel better. Her gas lessened, and she did not get us up to go outside at night. This morning my husband fed her the Nutro again, and the awful smelly gas came back terribly. So I am now putting her back on the bland diet and will start her on a new food. I can't be certain, but it seems pretty clear to me that it is the new formula for Nutro that is causing the problems. Also, I have had her to the vet. They did blood work, checked her urine and stool and found no problems.	10	Years	Retriever - Labrador	Dog	65	Pound
EON-113517	2/4/2013 21:30	Purina Beneful	My dog (b) (6) a beagle was being fed Purina Beneful dry food in a bag for a few years. He suddenly became very sick over Christmas 2012, and got worse. Vet diagnosed him with kidney failure, he had dialysis. After changing his food to natural food (people food), he started to get better and then a week later got bad overnight and died in my dad's arms. His disease was too far advanced. I noticed an article on the Beneful dog food causing pets to get sick and die, mostly from kidney disease. I started talking to others online who had gone through the same thing. Their dogs either got sick on Beneful or died form kidney failure. They all had the same symptoms.	11	Years	Beagle	Dog	45	Pound

EON-113516	2/4/2013 19:48	Waggin' Train Wholesome Chicken Jerky Tenders	Vomited for 24 hours, eventually vomited what appeared to be brownish bloody substance. No appetite, extreme thirst, lethargy, and fixed gaze. I expected my dog would pass away at any point during this time. After 12 hours of vomiting, went to his Vet, she administered a shot to stop the vomiting. Introduced water by 1/4 cup, threw up for another 12 hours. Eventually started keeping the water down, slowly ate chicken & rice over the next 3 days. 5 days out from initial illness dog is feeling a bit better, but still not back to normal.	6	Years	Retriever - Golden	Dog	84	Pound
EON-113512	2/4/2013 18:09	Purina Beneful Healthy Growth for Puppies	(b) (6) has been fed Purina Beneful for puppies all her life. Upon opening a new bag in January, she periodically vomited. After purchasing a fresh bag, the vomiting ceased.	1	Years	Retriever - Labrador	Dog	65	Pound
EON-113504	2/4/2013 16:03	Beneful 100% Complete and Balanced Nutrition Healthy Radiance	On the 14th of January my husband noticed a large wet spot on (b) (6) bed, when she went to move. After I checked out (by smelling the spot) it had a light odor of pee. I then noticed (b) (6) has a soaked right outer thigh. This is out of character for her she had a whopping 2 potty accidents since I got her at 4 months of age. The only complaint I have ever had is she shedded. I let her outside, and when she came back inside she drank a lot of water. She went and lay down on my living room floor, and within minutes she urinated on herself again. Being concerned I put up her kennel and made her sleep there to avoid an accident over night. On the morning on January 15th, I awoke to a soaked dog and kennel. I let her out to the bathroom and fed her, as I usually do and called the vet to set an appointment. While waiting for her appointment time, I did as much searching the internet for any reason this might happen, this is the first time I ran on to several complaints of other pet owners whose stories were just like mine. That afternoon we went to our vet. I discussed her urinating everywhere, and the article I had read, I even pulled it up on their computer on their request. The vet said she would take a blood draw and urine, but her bladder was empty, and they kept her there until they eventually had to cath her for the sample. Picked (b) (6) up from the vet that evening,, still urinating and drinking. We ran to the store to get another dog food, I didn't want to take any chances, and switched her to taste of the wild, water fowl no grain formula. The next morning the vet called me and her tests came back. Kidneys had no crystals, liver was okay, but her thyroid was .5. or maybe it could be incontinence. I DO NOT believe this, I have a spotless home and small children I would have noticed leaking and this happened soo fast. So we start her on a thyroid medication. Still urinating! I am not talking sqwatting...it came out while she was laying down like a large water balloon let loose. I have a pic to show the amount and how soaked she was. We watched and we waited. The morning of the (b) (6), (b) (6) began pantting and she couldn't even sit without peeing. Her pee had a pink tinge to it. With the option of treating it like incontinence, we looked into it, and the possible side effects of aggression, we chose to not chance that due to our littlest child. We called another vet that would put (b) (6) down for cheaper than my vet and my vet is closed after noon on Wednesdays. We had just paid bills and a vet bill, I had to borrow money to have her put down. I just couldnt risk my kiddos or property with the amount of urine I had to keep up with. I kept what food I had left, and I just want at this point to make sure that nobody else loses a pet. I believe it was the food. When looking at her report from the vet...please note her weight jumped from 59 to 77. We measured her food from the day we got her, and had only used Beneful Healthy Radiance since the start of January.	5	Years	Unknown	Dog	77	Pound

EON-113502	2/4/2013 16:03	Natural Balance Dog Treats	Our dog died unexpectedly in mid Dec 2012. During Thanksgiving weekend she had experienced an event where she was breathing heavier than normal with appetite loss. That lasted about an hour. The night of (b) (6) she was happy and running around like normal but passed away in her sleep during the night. My son told me he thought she had been breathing heavier again after I went to bed so he sat with her for awhile. We thought she passed away from an old age related issue but I've always wondered if there was any pet food poisoning we were not aware of. I've always tried to purchase food I thought would be more trustworthy but had a close call last year when Solid Gold Wolf food was recalled. I had been purchasing a different type of Solid Gold (green bag) but because of that recall I started feeding her Science Diet. Because the cause of her death was still bothering me, today I was checking for dogfood recalls on your website. I found a recall for Dick Van Patton's Natural Balance dogfood that occurred in December. Recalls were for different meat blends in various size bags. We had been giving our dog this company's dogfood treats in many of these blends for the past 6 months or so, but they came from 8 and 16 oz bags of dog treats. I still have some of the dog treats left over, as well as my receipts for the purchases at PETCO, incase there is any need to verify them.	12	Years	Retriever - Labrador	Dog	70	Pound
EON-113501	2/4/2013 16:03	Canyon Creek Duck Tenders	Canyon Creek Duck Tenders made my dog sick on several occasions. At first she was fine with them but then began to throw up almost immediately after ingesting them. She would stay slightly listless for a while after eating as well. I have, of coarse, stopped giving the treats to her and have had no future problems.						

EON-113500	2/4/2013 16:03	Beneful Original adult dog food	<p>We purchased a new 31 lb bag of Beneful Original dry dog food from Pet Smart and just opened it a week ago. It was poured into a large sealed container we keep in our pantry. We started noticing (b) (6) stool was getting softer and didn't think much of it but kept an eye on it. He was normal otherwise. On the 30th he started wanting to go outside a lot. He tried pooping but nothing would come out. Early this morning he vomited and had diarrhea all over our home. He won't eat and his stomach is making horrible noises. We are taking him to the vet in the morning. We have 3 other GoldenDoodles dogs and they haven't shown symptoms. Bailey is sensitive to food and was sick like this the last time when our new bag of Beneful contained grain mites. Please recall this food until this is investigated!!!!</p>	4	Years	Poodle (unspecified)	Dog	54	Pound
EON-113499	2/4/2013 16:02	Diamond Naturals Active Cat Chicken & Rice Formula , Taste of the Wild Rocky Mountain Feline Formula	<p>We have a cat rescue with 32 cats total. All eat from common food bin & bowls. Opened 2 new bags of food. Diamond Active Cat Prod# DAC1102 A21MS1938 KWG and Taste of the Wild Prod# TCR1103 C31MS0653 TPB. Food was mixed 50/50 and distributed to all cats. The cats seemed reluctant to eat...some did not. (b) (6) and 9 others began to vomit. Ultimately they were vomiting blood and mucous mixture. The 4 sickest cats were taken to the vet who immediately suspected rat poison due to symptoms. I called my wife who IMMEDIATELY removed all food & water bowls. Leaving the vet I bagged and retained the food and immediately washed and sanitized all containers and bowls. The vet ran blood, urine, fecal and xrays. No underlying medical conditions explained the symptoms. However, upon reintroducing a NEW bag of Diamond Active Cat (not mixed 50/50) the cats began improving. No medications, including antibiotics were administered. Removing the suspect food all cats have become markedly improved in 48 hours. Consulting a 2nd vet she concluded an adverse reaction to either pesticide or microtoxin.</p>	12	Years	Domestic Mediumhair	Cat	16	Pound
EON-113498	2/4/2013 16:02	Beneful Healthy Weight	<p>The dog became bloated after eating a bowl of the beneful healthy weight dog food. we tried to comfort her and walk her around as to help her try and expel some gas. As the evening went on we noticed she became even more swollen and started to whimper and cry. We immediately took her to the Emergency Vet Clinic. The dog was still in excruciating pain when we arrived, The immediately took her back and attempted surgery, upon opening her up it was discovered that she had become so bloated that her stomach had twisted and ruptured. The stomach had already begun to die and there was so much food and stomach acid that surgery would not have saved her. At that time we had to have her put down so she would no longer suffer. Upon thinking back about everything I came to realize that this was not the first time it had happened. Once before she had become very bloated and uncomfortable but after a night of sleep she was fine the next day and in good spirits.</p>	7	Years	Coonhound - Redtick	Dog	80	Pound

EON-113495	2/4/2013 16:01	Beneful	We changed from purina pro plan chicken and rice to Beneful fish and rice at the recommendation of our vet to reduce the cholesterol intake of the dog. We bought a small bag over the Christmas holiday to make sure he liked the food and had no adverse reactions. After getting through the small bag with, we recently bought a larger bag in the last two weeks. Since we have changed him over, he has vomited 3 times in the middle of the night and overall been a very needy dog. After a friend posted potential harmful effects of Beneful dog food, we have since ceased use of the remaining dog food and for the time being switched back to purina pro plan. There have been no further incidents since the switch.	5	Years	Boxer (German Boxer)	Dog	70	Pound
EON-113494	2/4/2013 16:01	Benful Radiance	My female miniature schnauzer started vomiting every time she drank water or tried to eat anything. She continued to throw up until she was lethargic. I took her to my vet and she ran a blood test and found out that her liver and kidneys were in bad shape. The vet kept her for 4 days and gave her intravenous feedings every 3 hours and some medication to help her liver and kidneys. She asked if my dog could have licked up antifreeze or got into something toxic. I knew she had not because she is in our house most of the time and we walk her on a leash when we go outside. The vet asked what she had eaten the days before. I told her I had gotten a new brand of Beneful dog food called Radiance. She ate it twice and started getting sick. The vet did not think that a dog food would make her sick and that she must have gotten something on her feet when we walked her. She had to have intravenous feedings once a day for about a week, even after we brought her home. She almost died. I never knew what had caused it.	1	Years	Schnauzer - Miniature	Dog	10	Pound
EON-113493	2/4/2013 16:01	Beneful Original & Healthy Weight	Throwing up, loss of appetite, runny bloody stools, not being able to focus on anything around him	12	Years	Poodle - Miniature	Dog	13	Pound
EON-113492	2/4/2013 16:01	Waggin Tails Chicken Jerky	Back in May 2012 my dog started drinking and urinating excessively. I took him to the vet, thinking diabetes. She did tests and said no it looked like possibly Cushings disease. She needed to do more tests. After doing the test she couldn't say conclusively it was Cushings but they were still leaning towards that. She redid the test and still it was not conclusive. After consulting with another vet, they recommended that we start on medication for Cushings. After 3 pills Rufus went from an active dog to barely being able to lift his head off the pillow. It was at this point that I made the decision to put him down. Still feeding my lab the jerky treats he loved, we could no longer find them in the stores. I assumed they were sold out and went online to try and get some. That is where I read about the recall. The one site I looked at said that symptoms resemble fanconi (?)disease which is sometimes mistaken for cushings disease. My heart sank. To think that a treat we were feeding them (and paying good money for) might possibly have made him sick.	10	Years	Terrier - Yorkshire	Dog	9	Pound

EON-113491	2/4/2013 16:01	Beneful Original Recipe Adult Dog Food	<p>I had fed both of my dogs ((b) (6), Lab-3 years old) and ((b) (6) beagle mix 3 years old) Beneful food for about 2 years without a problem.</p> <p>This past week, both of them started with diarrhea and vomiting. I took them both to the Vet. They ran tests to see if anything was wrong and there was nothing in their stool samples that the Vet tested.</p> <p>I switched their food to another, non purina food, and their symptoms stopped almost immediately and they ate hungrily from their bowls. They had acted like they weren't that interested in the beneful. The food would sometimes sit in the dish without them eating it all. This new food, they eat it up immediately like they are starving.</p>	3	Years	Retriever - Labrador	Dog	59	Pound
EON-113490	2/4/2013 16:01	Purina Beneful Healthy Radiance	<p>We opened a new bag of Purina Beneful Healthy Radiance fed it to my dog 2 days later my dog began vomiting and diarrhea, stopped eating. began drinking excess amounts of water. had a stuffy nose. Would not eat, had fever and shivers, began having difficulty breathing, bloody stools vomiting white mucus and then vomiting blood. totally black sludge like bowel movements. and eventually died all with in a matter of about 2 and half weeks of opening new bag.</p>	9	Years	Boxer (German Boxer)	Dog	60	Pound

EON-113488	2/4/2013 15:15	Milo's Kitchen Chicken treats (various types)	<p>We understand Milo's dog treats made in China are under recall. Early in 2012 our dog got very sick we believe from eating this product. Our dog had the following symptoms: Lethargic Extreme diarrhea Bloody stools Vomiting No appetite. He was drinking water.</p> <p>He was so ill we took him to the vet on several occasions and spent several hundred dollars on x-ray and blood work. The doctor was not able to find a cause for his illness. We took him to the Vet with the same symptoms on:</p> <p>4-2-2012 8-6-2012 11-5-2012</p> <p>We stopped all treats after the illness of 11-5-2012 and purchased all new dog food.</p> <p>We still have a small amount of the latest package of Millo's treats we purchased. If you are interested in analyzing this package, let us know and we would be happy to send it to you.</p> <p>If this product is the underlying reason for our dog's illness, it should be determined what is in the product causing the symptoms. Is it possible it could cause health issues for humans?</p> <p>Thank you for your time.</p> <p>(b) (6)</p>	12	Years	Unknown	Dog	27	Pound
EON-113482	2/4/2013 14:03	Jerkey Treats	<p>Our dog began to have severe thirst followed by a bloating stomach. This happened very quickly. The vet had scheduled a series of tests to be done but before this could happen she began getting lethargic and would not eat, only drink a lot of water and urinate constantly. Her stomach was bloated and her breath became rancid. She died on (b) (6)</p>	9	Years	Terrier - Jack Russell	Dog	10	Pound

EON-113472	2/4/2013 13:24	Beneful Original	<p>My dog has eaten Beneful for about 6 months with no big problems. The latest bag was purchased from Kroger on January 22, 2013. After eating it for a couple of days she started having diarrhea. The digestive symptoms continued for several days. I stopped giving her Beneful and fed her another dog food to see if it was something else causing her symptoms. The symptoms stopped so I thought maybe she had had a virus. I began feeding her Beneful again and the digestive symptoms have returned along with respiratory symptoms- wheezing, sneezing and difficulty breathing. I am convinced that it is the Beneful so I dumped her food out today.</p>	5	Years	Shepherd Dog - Australian	Dog	150	Pound
EON-113443	2/4/2013 11:39	Purina Beneful Original	<p>Our dog developed properly during his first year as a puppy and had no health concerns. He takes a once-a-month heartworm preventative (Advantage) and we use a once-a-month "topspot" for flea and tick prevention (Vectra). No other medicine has been given to our dog.</p> <p>We switched from feeding our dog a puppy food (Puppy Chow) to Purina Beneful - Original in November 2012. On November 14th, 2012 our dog experienced 2 seizures about an hour apart. Our dog has been seen by our local emergency veterinary clinic and has been followed up at least twice by our primary vet since the first seizures on 11/14/2012. Since the initial event, our dog has experienced seizures on 6 other occasions, the most recent on occurring on January 7, 2013. We took him back to the vet on Wednesday, January 9th. The vet drew blood for more tests, not having any reason or easy explanation for the seizures, and also scheduled a day-long adrenal test series for the following Friday, 01/11/13. During the next week, the vet followed up to say that the adrenal tests all came back withing normal levels and there seemed to be nothing "wrong" with the dog's bloodwork, either. He said the seizure activity may never be explained, and advised on proper treatment for seizure control and prevention.</p> <p>We purchased a new bag of Purina Beneful - Original during the second week of January 2013. On January 16th, the dog began vomitting soon after eating this dog food (fed twice a day). He continued to vomit like this for 36 hours (approx). He did not have loose stools and voided about the same as he usually does. I stopped feeding him the Beneful and instead gave him fresh chicken & rice. Within a day he seemed to have a regulated GI system again. I reverted back to his Beneful diet, but the dog did not show much interest in the food, and would only eat it if I poured some chicken broth on top of it. he was lethargic and slept much more than he had been sleeping. I attributed it to the very cold weather and the fact that our entire family stayed inside for many days. But his activity level was reduced enough for both my husband and I to note it as odd.</p> <p>During the 4th week of January, (maybe the 23rd or 24th) a co-worker whose dog had died a week prior shared an article with me about Purina Beneful and numerous complaints from owners about illness, including vomitting, seaizures and death. This co-worker's dog was older - about 9 years old, but had been eating Purina Beneful for about 2-3 years, during which time he developed two significant health complications which eventually led to kidney failure and his death.</p> <p>Once reading this article, I stopped feeding the dog Purina Beneful - Original and he has not had</p>	15	Months	Spaniel - Springer (unspecified)	Dog	20	Pound

			any continuing complications. Likewise, his activity level and interest in play has returned to a normal level.						
EON-113378	2/1/2013 15:57	OI Roy kibbles and chunks and chews	<p>This report is connected to a report I filed about (b) (6) .. (b) (6) seemed fine the evening of (b) (6), but of course we were looking for her dog brother (b) (6) that evening also because he had just disappeared. The next morning (b) (6) acted a little different but in my mind I thought she was missing (b) (6) which had still not been found yet. At 3:00 on (b) (6) A family member returned home and could not find (b) (6) so was looking around found her lying at the back of the yard. She hollared at her but there was no response from (b) (6) like she would normally do. She went down there and she was alive but didn't want to move. She picked her up and carried her close to the house. At that time she put her down and (b) (6) tried to walk but was dragging her front feet. She picked her back up and immediately rushed her to the vet. Blood work was done and (b) (6) was in Kidney failure at this time. She went down hill so fast that she started having seizures shortly after we got to the vets office. She was euthanized to keep her from suffering any more.</p> <p>I purchased this bag of dog food on Friday and both of my dogs were dead by Thursday. I have to know if this food was the cause. The vet has tried three different meds and we have switched her to science diet and she continues to have diarrhea. I have been notified of the problems with Beneful and that was the food she had been eating prior to the symptoms.</p>	9	Years	Sheepdog - Shetland	Dog	42	Pound

EON-113358	2/1/2013 14:00	Ol'Roy Kibbles Chunks and Chews	<p>(b) (6) became missing on Jan. 30th afternoon. A family member seen him around 12:00 that afternoon and he was acting fine. When a family member returned at 3:00 he was nowhere to be found. We searched for him all night and the next day. He was finally found in the neighbors yard dead. (b) (6) was our beagle and on the (b) (6) she was found very sick. Her story adds to (b) (6) story. This is why this issue with the dog food has come up.</p> <p>I am also filing a report for (b) (6)</p>	7	Years	Retriever - Labrador	Dog	90	Pound
EON-113354	2/1/2013 12:36	Beneful Original	<p>We began feeding our dogs beneful in late October 2012. About a month later (b) (6) began having urinary problems, specifically increased thirst and having accidents in the middle of the night. We took him to the vet and couldn't really find anything wrong other than his thyroid was slightly low, so they started him on levothyroxine. The urinary problem continued. He lost his appetite and began vomiting and losing weight. His hair also began to fall out. We took him back to the vet. Again, they could find nothing wrong. After about 6 weeks, (b) (6) began refusing food completely. At this point he had lost 25 pounds. Our vet did xrays and ultrasounds of his liver and decided to biopsy it. When he did the biopsy, he found the liver to be dangerously small- about 30% of the size it should have been. Unfortunately, (b) (6) liver was so damaged that it was unable to process the anesthesia from the biopsy procedure and he never woke up. He passed away the evening of (b) (6). The pathology report showed that the liver had converted to scar tissue as a result to repeated long term exposure to a toxin.</p> <p>Our other great dane began acting lethargic and uninterested in food after the death of (b) (6). At first, we attributed his lethargy to the death of his friend. When he began vomiting and needing to urinate in the middle of the night, we took him to the vet for labs, a liver ultrasound, and series of xrays. The vet found (b) (6) to have similar findings to (b) (6) and began treatment. Hopefully we are catching it early enough to save him.</p>	3	Years	Great Dane	Dog	151	Pound

EON-113345	1/31/2013 22:42	Waggon Train Chicken Jerky Treats	After feeding my dog Wagon Train Chicken Jerky Treats, he experienced very bad diarrhea, and wasn't eating or drinking. He has been off of them for 2 weeks, and is back to normal, but I dont want to see any other pet owners subject their pet to this pain. Please don't allow these to be sold anymore!						
EON-113344	1/31/2013 22:15	Kirkland Signature Super Premium Adult Small Dog Chicken Rice and Vegetable Formula	<p>About 4-5 days after I began feeding (b) (6) and (b) (6) a newly opened bag of Kirkland Signature Chicken small dog food, (b) (6) began refusing to eat anything at all. As the days progressed, she grew more and more lethargic and ill. After not eating for 4 days, I took her to her vet who noted (b) (6) gums were white, her spleen was enlarged, she had a very rapid heartbeat and rapid respirations. A blood test showed an extremely low hematacrit level and other blood issues. He indicated we needed to take her to a pet hospital 30 miles north in (b) (6) immediately for a blood transfusion or she would die within 1-2 days. We took her up and they immediately admitted her and drew more blood and aspirated her spleen to send away for further lab testing. They did an abdominal ultrasound and ruled out any masses that could be cancerous, but noted an enlarged liver and spleen. Lab testing showed she had nearly no red blood cells in her blood but no known cause. They gave her a blood transfusion and did a bone marrow extraction. The resultis of her bone marrow testing showed it was no longer producing blood cells and that the spleen had taken over this function, albeit inefficiently. It ruled out any forms of cancer and strongly pointed to unknown toxins as the cause. Further testing is continuing.</p> <p>Our 5 1/2 month-old puppy, (b) (6), also started refusing to eat (extremly abnormal for her - not finicky at all) a day or so after (b) (6) fell ill. At this point, I suspected the new bag of dog food and immediatlely stopped feeding it to her. I took (b) (6) to the hospital where (b) (6) was at and they took her blood today to test it. We do not yet have results. The vet asked me to bring him the bag of dog food so he could submit it to the FDA for testing, which I also did today.</p> <p>(b) (6) prognosis is uncertain at this time and they don't know if her bone marrow will resume making red blood cells on its own.</p>	7	Years	Chihuahua	Dog	8	Pound

He had one treat on January 17 and rejected the treat on January 18. On January 19 he had a large volune of diarrhea with blood through out the day. He continued to have diarrhea through January 22. He did not have any more of this product after the diarrhea began on January 19. He is still drinking a lot of water to this day	9	Years	Retriever - Labrador	Dog	95	Pound

EON-113335	1/31/2013 18:21	Beneful Healthy Radiance	<p>I adopted (b) (6) at 12-14 weeks old and right away started him on the Beneful Puppy formula. All throughout his puppy-hood he had cysts that had to be removed from his legs, he would bite at his paws (which I was told could be an allergy or anxiety) and constant ear infections. Once off of the puppy formula, I changed him to the healthy weight. He started to develop dandruff and dry skin so I switched me to the Healthy Radiance brand of Beneful about a year prior to his passing. In September of 2011, he started fly-biting at things that were not there. I was told to watch him as it could be a sign of seizures. He never experienced a full seizure but when fly-biting would act strange. I took him in but everything seemed ok. He was still playing and stuff but had not been eating as much. Come end of October 2011, he started hiding in the closet and acting strange. End of November, he developed pro-longed diarrhea that lasted until February 2012. I took him to the vet a handful of times for tests, etc. Took him off Beneful and started him on a Prescription food. We were too late. He never got better. By the time I rushed him to the emergency vet on (b) (6), he had lost movement in his legs, had developed a lump in his stomach and his kidneys were not functioning right and it looked as though he had a large mass in his tummy. They pulled pus out of his bladder and an ulcer ruptured. He had to be euthanized that day. The vet asked me if he had digested anti-freeze. Said they saw no sign of a foreign object and maybe it had to do with his food. Now, I see a lot of complaints with dogs who have the EXACT same symptoms as my (b) (6) and also have died because of this food. (b) (6) was only 5 years old. Please, please do something about this.</p>	5	Years	Corgi - Welsh Pembroke	Dog	40	Pound
EON-113286	1/31/2013 11:42	Milo's chicken jerky	<p>I had bought Milo's chicken jerky treats for my sons dog. Us being home and her being extremely good I fed her 5 pieces of jerky over a 3 day period. On the third day after giving her the 5th treat, she only ate half of the treat and went to her bed unable to move like she was sick or had poisoned, Knowing what this looks like, because Ive had dogs poisoned before.</p> <p>I informed my son he needed to take her to the vet and see whats wrong with her. The vet advised her kidneys were failing and she probably would not make it. 5 days later she passed away. I was informed through a friend that the dog treats made in china were responsible for multiple dog deaths, and the FDA had a warning on the treats. I informed the vet, he did investigate, and said this was probably the problem. The vet put out a Youtube video. I contacted Delmonte foods to file a complaint. The company has looked at all the evidence, and said they need further review. If you wish to see the video I will email you the link. There is no doubt that these treats killed our (b) (6) (The week before my son brought the dog to get her heart worm pills, and had her checked out at vet, vet said she was extremely health.)</p>	7	Years	Corgi (unspecified)	Dog	35	Pound

EON-113285	1/31/2013 11:21	Beneful Original with Chicken	<p>My dog was very sick, vomiting and had diarrhea. My other dog got sick as well. I had not fed them anything but Beneful. Although I have fed my dogs Beneful for several years, I knew that they were getting sick from this food. I returned the food immediately to the grocery store. I was given a refund. I got a new bag of Beneful with a different batch code and my dogs were still VERY sick eating it. The first batch was dated best before August 13th, 2013....the batch ID number was 22200673 and 238L06.</p> <p>The second bag I fed to them that they got sick from was best before October 13th, 2013 ID# 22960637 2045L06. I do still have some of this kibble if you would like to test it.</p> <p>I stopped feeding my dogs beneful. I told the grocery store that they should notify the company of the problem. I just saw online that someone's dog died of kidney failure from eating Beneful. I would like this looked into. I spent several hundred dollars at the vet's. The fact that this is widespread information on the internet is EXTREMELY concerning.</p>	9	Years	Hound (unspecified)	Dog		
EON-113279	1/31/2013 10:36	beneful	It is obviously a well known issue that beneful brand is causing illness and death in our dogs. Why is the FDA turning a blind eye to this? I would say it is time for an investigation on your part.						
EON-113233	1/31/2013 9:12	Purina Beneful Healthy Radiance Dog food	<p>On May 24th my healthy dog started shaking, which then led to a full on seizure. We took her to the emergency vet in (b) (6) where she was reported with a 110 degree fever. They gave her medication to stop the seizures, and we transported her to another emergency pet hospital (piper memorial) Over the next few days, she continued to seize, as well as develop brain swelling and pneumonia. many tests were taken, including a cat scan. Her neurologist could not determine the cause of the illness, and said it looked like it could be a toxin. She was always in out sight, and did not get into anything different. on (b) (6), after days of expensive medication and wonderful medical treatment, her death was imminent, a her brain was pushing down through her brainstem, and could not breathe. I made the choise to put her down, as they said she would go within the hour. The only food (b) (6) ever ate was Purina Beneful. Both Healthy Radiance and Healthy life. For a 2 year old dog to die, with no trauma or immediate cause, Iwould like this dog food to be investigated.</p>	2	Years	Boxer (German Boxer)	Dog	30	Pound

EON-113231	1/30/2013 23:30	Milos Kitchen Chicken Jerky	I purchased Milos Kitchen Chicken Jerky treats for my dogs in 2012. In Jan 2013 my family had to euthanize our pet (b) (6). I read today of this product being recalled and began to research this further. I was sad to discover that the symptoms our dog had were aligned with the many deaths reported because of this product. I believe my dog was affected by this product. I was shocked to see the number of reports and the length of time since the reports began. If I had known of this I would NEVER bought, nor given, our dogs these treats. Now, after learning of the dire affects this product had, I will have to take our other dog in for complete diagnostics as a very steep expense. I am also very disappointed that a product with this track record was still acceptable to be sold. If this was a product affected/killing humans this would have been pulled immediately. What steps can I take to be reimbursed for the care we had to pay for our dog that had died (b) (6) and our dog that will now have to be completely examined for affects (b) (6)?	7	Years	Schnauzer - Miniature	Dog	18	Pound
EON-113230	1/30/2013 23:27	purina beneful healthy weight	Since probably march of 2012 we switched our 2 dogs to Beneful healthy weight. in Nov 2012 my (b) (6) became ill, he was throwing up, then trying to throw up with nothing coming up. He started going in circles, lying down then getting back up...repeating this continuousy. He began whinning and i knew something was diffently not right and call the vet. I rushed him to the vet and they did xray. He had Bloat and his stomach began to twist! he was already becoming shocky! Within an hour of having noticed him getting sick we had to put him down.	6	Years	Retriever - Golden	Dog	90	Pound

EON-113229	1/30/2013 23:00	Waggin Train Wholesome Duck Jerk Tenders	<p>For the past three months I have been feeding my 8 year old coconut retriever Waggin Train Duck Jerky Tenders that I bought on sale at the local Wal-Mart. She has been having lots of explosive watery (sometimes yellow) diarrhea for some time although I cannot say for sure this started when I began buying the wholesale 16oz duck jerky treats at Wal-Mart. Approximately early December I noticed she was becoming lethargic, wouldn't get up to greet me when I came home, laid on the floor instead of the couch, and seemed to be having respiratory trouble which included panting at random times for no obvious reasons and loud breathing when she was lying down with expiratory wheezes that seemed to cycle in intensity every couple days. Some strange things I observed were frequent very loud gurgling/rumbling sounds coming from her abdomen. Also she kept going under the bed and kitchen table for long periods of time. It is my opinion that this is photophobia because she only does it when I have the lights on full brightness-when I dim them or turn them off she comes out from under the bed and table. I do not know if this behavior is related but looking back it did start after I started giving her the treats daily. On 12/16/2012 I also bought Waggin Train Big Blast Duck Wrapped Pork Skin Twists with Chicken Liver and Waggin Train Ham Slices and was giving her one or two of these treats a day in addition to a couple of the duck tenders. On 12/24/2012 my dog's lethargy and breathing difficulty became so bad that I took her to (b) (6) emergency clinic in the middle of the night. At (b) (6) they could find no reason for the breathing trouble or lethargy, X-rays showed no sign of pneumonia or infection, she did not have a fever, Urinalysis was normal, blood work was essentially normal except for mildly elevated liver enzymes - ALT of 124 (normal is 12-118), EKG showed 1st degree heart block (a benign condition), no signs of heart failure. I was later told by the vet the official radiology report included the possibilities of inflammation or infection of the trachea, lungworm, or a slight degree of tracheal collapse, but none conclusively, and which may or may not be related to her present condition. The vet recommended a cardiovascular evaluation due the incidental finding of a faint 1/6 heart murmur she heard and to return for more blood work in a month to test liver function because of the slight elevation. When I returned home I immediately stopped all of the dogs jerky treats until I could find out the cause of her illness - feeding her only her normal dry food. I also ordered Fenbendazole online to cover lungworm and pressed the vet for antibiotics just in case she did have a lower respiratory infection not picked up on the X-ray. After some research online I emailed Waggin Train asking them what the source of the glycerin in the jerky was from and asked for reassurance it was not produced from the poisonous Jatropha plant. I received no response. Within 1-2 weeks of removing the jerky treats from her diet and treatment with antibiotics and fenbendazole her respiratory issues started slowly improving. For the first time in months she was having normal solid</p>	8	Years	Retriever (unspecified)	Dog	60	Pound
------------	-----------------	--	--	---	-------	-------------------------	-----	----	-------

--	--	--

bowel movements and much more energy. After her improvement on 1/18/2013 she had her cardiology work up at (b) (6). Her echocardiogram revealed a functional ejection murmur and trace mitral and tricuspid valve regurgitation with an ejection fraction of 70% (very good EF). The vet concluded her respiratory trouble definitely was not related to her heart. He viewed the previous X-rays and did not think there was an obvious tracheal abnormality. Relieved by her normal cardiology exam and improvement in her diarrhea and respiratory health I decided to resume feeding her only 1-2 of the Waggin Train Duck Jerky tenders daily - only because I had some still left over from before her original vet visit 12/24/12. The FDA reports I read online were mostly from chicken, not duck so I assumed it was probably ok. Within a couple days her watery yellow explosive diarrhea returned, she once again was panting, wheezing, and lying flat on the carpet all the time, lethargic, not eating much, and disengaged. She also started going under the bed and kitchen table again when all the lights were on. Yesterday I called Nestle Purina and asked for a refund on the rest of the duck treats and once again asked about the source of the glycerin used in the treats and asked if it was derived from the Jatropha plant. The manager was consulted and I was told they could not give me an answer. The only ingredients in the jerky are duck and glycerin. Nestle Purina does not know what one of the two main ingredients in their product is derived from? I find that very hard to believe. Today I inspected her stool and noticed blood in her diarrhea. She currently continues to be lethargic and have respiratory trouble and diarrhea, but not to the degree when I had to take her to the vet 12/24. At this time she is not getting worse. I have no doubt in my mind at least some if not all of her health issues are related to the Waggin Train Duck Jerky treats. I take them away and she gets better. I start giving them to her again and she gets worse. The reason I was feeding her duck jerky (instead of chicken jerky) was because she had what I thought was pancreatitis from overfeeding/allergic reaction to Waggin Train Chicken Jerky treats one year ago! At that time she had constant vomiting of green-yellow liquid, diarrhea all over my apartment, drinking bowl after bowl of water, lethargy, and two seizures (one witnessed by my friend) with the onset exactly a day after I gave her a handful of the Waggin Train Chicken Jerky! I thought it was because she may have allergies to chicken, I never even suspected the actual jerky/brand could be related to that event. Now, after reading dozens of identical reports online I do not doubt it was caused by the treats. She recovered from that incident in a little over a week refusing to eat anything for several of these days. Anyways, I am taking her again to the vet this week because of the blood in her diarrhea and to recheck liver function. My veterinary bills so far total over \$2,000.

EON-113228	1/30/2013 22:00	Purina Beneful Healthy Radiance Dog Food	We had fed our 3 dogs Beneful for a couple years. All of a sudden my oldest dog (7 years old) had diarrhea and vomiting. The next morning I took her to the vet and they did xray and blood test for pancreatitis. Blood test was positive. She spend 4 days in the vet hospital on IV's and meds. Now she is on Hills Prescription ID Low Fat diet. A week later my middle dog (6 year old mixed breed, female, neutered dog) started the same symptoms only not quite as severe. I took her to the vet and she too tested positive for pancreatitis. Now I have two dogs on the prescription diet (2 cans per day) and I can only hope the third one doesn't end up with this disease. I have seen many articles/sites where I am not the only person experiencing problems. The only common denominator was the food. I believe something should be done before more poor animals die of extremely painful deaths or are hurt for life.	7	Years	Mixed (Dog)	Dog	37	Pound

EON-113226	1/30/2013 20:36	Wagon Train Chicken Jerky Treats	In November he peed on a chair in the house. This was not normal for him so I took him to the vet. He has also been extremely thirsty and urinates more often than normal. He has since become very lithargic. The vet did a series of tests and bloodwork, since his urine was so diluted the results were non conclusive but his calcium levels were high. He has since had 2 of 4 of his parathyroid glands surgically removed. His health continues to decline. His favorite treats were WAGON TRAIN CHICKEN JERLY. He ate about 5-8 of these daily. All current tests at the vet are still inconclusive and all symptoms remain. (b) (6) was an extremely healthy dog who very active. His weight, bones, and spirit before this incident were that of a 6 yr old dog. His entire life I have either prepared his food or he has eaten oraganic dry meal. the WAGON Jerky treats and greenies (which he only had about twice a week) were his go to treats.I am having further urin and kidney tests done this week. His vets name is (b) (6) at (b) (6). (b) (6)	11	Years	Siberian Husky	Dog	53	Pound
EON-113225	1/30/2013 20:15	Snausages in a Blanket (Beef & Cheese Flavor)	On three separate occasions, (b) (6) (breed is a Nova Scotia Duck Tolling Retriever...not on your drop down breed list above) was given Snausages in a Blanket, beef/cheese flavor (1 to 1.5 treats) each time before going to sleep. The following morning, we observed diarrhea and vomiting with some lethargy. The treats were not administered on consecutive evenings, and the symptoms between consumption of each treat resolved completely (e.g, each incident was separated by at least 3 days without a treat, where symptoms cleared up). There is a perfect correlation between treat consumption and illness. Having endured this previously with the Waggin' Train treat incident, I am quite comfortable stating that something isn't quite right with these treats. It could be simple intolerance or an allergy to one of the slew of artificial coloring agents or preservatives in the treats, but nevertheless, this is an unexpected adverse event.	6.3	Years	Unknown	Dog	58	Pound
EON-113148	1/30/2013 13:51	Yam Good wholesome yams wrapped with chicken	We noticed our dog became weak, blood in stool, bruising, short of breath, couldn't go for a walk, increased panting, and would just collapse on the floor. The only thing different were the new treats Waggin Train Yam Good wrapped with chicken. with all this happening she than also suffered a slight stroke from it and has weakness from that. For some reason I had a feeling it may be the treats and put them away and noticed today at the grocery store there was a recall. At the time I was worried the treats may of been contaminated in some way with rat poison or something. The dog was taken to the vet and they did lots of testing and found the one thing that was very abnormal was her platelet count was dangerously low. They wanted us to take her to the Emergency Vet Hospital for a blood transfusion. They put her on antibiotics for 2 weeks and prednisone and she is doing better. She still has some effects from the stroke and has difficulty going upstairs and vision issues.	11	Years	Other Canine/dog	Dog	78	Pound

EON-113086	1/30/2013 10:36	Wellness Small Breed super 5 mix Healthy Weight	2 weeks ago in petco store i bought a bag of wellness small breed super 5 mix healthy weight in it were maggots, spider webs, moths very disgusting. I returned it. Now yesterday i bought the same brand of food again in different store petsmart i have the same problem with the food is off color, long spider webs, and some insects. The food said it was best by 04/Apr/2013 Upc code 076344a91192 12 pounds. i purchased the product yesterday 1/29/13 at petsmart of (b) (6). (b) (6).						
EON-113085	1/30/2013 10:27	Waggin Train Jerky Tenders Chicken	August 12, 2012 after eating approximately one third of a 40 oz bag of Waggin Train Chicken jerky/tenders, he suffered a grand mal seizure. January 28, 2013, after consuming more than normal but less than in August, he suffered another grand mal seizure. His bloodline is known and shows no evidence of seizures problems or disorders. He was back to normal within 48 hours both times.	8	Years	Mastiff - Tibetan	Dog	107	Pound
EON-113050	1/29/2013 23:36	Kingdom Pets Chicken & Sweet Potato (Delicious Jerky Treats - All Natural Ingredients)	We adopted (b) (6) from PAWS rescue in December 2007. At that time, she had delivered a litter of puppies and had urinary stones. After healing, she was in excellent health and had a great amount of energy and vitality. In 2011, (b) (6) was rewarded with Kingdom Pets Sweet Potato treats twice a day for about 30 days. By December 2011, she almost went into total kidney failure. Our other dog, (b) (6) died from kidney failure since she was older and had a more compromised system from years of prior abuse at a breeding farm. (b) (6) was a fit and health dog, but since ingesting these treats we have had to place her on a special kidney diet, and put her on daily medication. Just this week, she has gotten worse and we are today treating her with intravenous fluids at our veterinarian. I believe that both (b) (6) and (b) (6) kidney issues are totally due to their eating these Kingdom Pets Sweet Potato treats since they both developed similar symptoms. (b) (6) health has been tenuous, but improving, but she is currently in decline. I am very unhappy that Costco continues to sell these treats since despite the reports of them being safe, I believe they are the direct cause of both of my dog's health problems. It is now a month later and (b) (6) is days away from our decision to put her to sleep. We have spent thousands of dollars to try to maintain her as long as possible, but her kidney values are going up and we are losing the battle. I truly believe that these treats are the direct cause of her demise and of our other rescue dog, Shelby since they both are going to die after eating the same product.	6	Years	Schnauzer - Miniature	Dog	23	Pound

EON-113035	1/29/2013 20:15	Purina Beneful Original	<p>I purchased Beneful Dog food to try a new food that would help with my dog's gas... We started giving the food to her about January 10th; I purchased it from Sam's Club in (b) (6) on January 8th. On or about January 20th my family noticed our dog was not acting her usual self. We watched her for a few days and just figured she was a little off and never really gave much thought to it... On Saturday evening January 26th she started vomiting. She vomited a few times and started becoming more lethargic. Sunday morning she didn't show much improvement. She was getting around OK but wasn't eating or drinking. Monday morning her condition had worsened exponentially. She could barely walk on her own. We called the veterinary Monday morning and took her in. She had to be carried to the car and into the vet's office. It was determined that she was dehydrated and she was started on a saline drip, given antibiotics and vitamins and something to help with the vomiting. A blood chemistry was run on her and her blood toxins were very high which showed possible poisoning (per the vet). We admitted her to the hospital and went home to try and determine what she might have eaten to cause this. We could find nothing in the house or in the back yard. We have small children and anything toxic is locked up and out of reach for them or the dog. We were at a complete loss as to what might have happened to her and so was the vet. The following morning (b) (6) the vet called and told us she was showing some neurological symptoms now and her new blood tests shows her blood toxins had elevated. Her body temperature was down to 96 degrees (100-101 being normal). At this time the vet told us there wasn't much we could do for her and suggested euthanasia to not prolong suffering the inevitable. At a total loss for what might have happened I started searching the internet for answers and that is when I discovered several hundreds of people with the same issues feeding their dog the same Beneful dog food we were feeding our dog. I printed an article out and took it to my vet and she was in disbelief but said what was described in the reported Beneful related deaths was exactly what her symptoms and tests showed and that it answered all the unknowns. So I find it to be more than a coincidence that my healthy 2.5 year old dog can go from great health and physical condition to not being able to walk and death in 2.5 weeks time after switching her dog food.</p> <p>I have contacted my vet to see what kind of tests/autopsy we can do to prove that it was in fact the dog food that caused this to happen. She has contacted a university and a few other labs and is awaiting instructions from them. I also have the remaining dog food so tests can be run on it also.</p> <p>I do not know what needs to be done from here, but I definitely wanted to report this issue to the FDA.</p>	2.5	Years	Mastiff	Dog	95	Pound

EON-113032	1/29/2013 18:57	Beneful Original	<p>I was feeding both of my dogs beneful for about a year. In late October/early November both dogs started to throw up after eating. They became a daily event. About a week after the throwing up began, my Beagle became very lethargic and stopped eating entirely. We took her to the vert where they discovered she had a severe yeast infection throughout her body- they put her antibiotics, drew blood and sent us home. The next day when her blood test results came in I was informed she was in the late stages of Renal Kidney Failure. In the next 3 weeks we would spend \$5200 dollars on vet bills and medical stay trying to save our dog. She died in early December after she developed blood clots throughout her body and one went to her brain- we had to make the unbearable decision to put her down. She was in so much pain and the vet said there was no chance she would recover. One of the vets said her sickness was similiar to what would happen if she would have ate antifreeze. The same week our beagle was diagnosed with kidney failure our lab developed knots all over his body (there was about 7). We took him in and they tested them and determined they were not cancerous. Within 1 week of taking him off the Beneful, they completely disappeared. I am extremely upset and just frustrated beyond belief with Beneful. I have ready over 315 complaints- same symptoms and same ailments that my dog died from. I have reached out to them several times and just get the same answers- that there is nothing wrong with their product and there is a lot of misinformation involved. Hundreds of dogs have become ill and many have died and something needs to be done. I beg you to please do something. This is not right.</p>	7	Years	Beagle	Dog	28	Pound

EON-113025	1/29/2013 17:36	President's Choice Nutrition First Premiere For Skin and Coat chicken strips	<p>(b) (6) was a 5 year old male dog of mixed breed. He was strong and healthy and had no previous health issues.</p> <p>(b) (6) was rewarded with a couple of President's Choice Nutrition First Premier for Skin and Coat Chicken Strips on December 24th and then again on December 25th during a morning walk. I had purchased the chicken strips from a (b) (6) store in (b) (6) and brought the strips to (b) (6) thinking they were safe.</p> <p>When we were returning from the walk (b) (6) had diarrhea. By the middle of December 25, (b) (6) had begun vomiting and we noticed that there were undigested pieces of the chicken strips in his vomit. He lost his appetite.</p> <p>His health continued to deteriorate over the next couple of days as evidenced by his lack of appetite and thirst, as well as lethargy. We decided to take him to the vet on December 28th because we had not seen any improvement in his constitution.</p> <p>The vet informed us that (b) (6) was severely dehydrated and treated him with intravenous fluids. They kept (b) (6) overnight. The next day December 29th, (b) (6)'s liver function was tested.</p> <p>The liver test came back normal and the vet believed that (b) (6) would recover on his own. We took (b) (6) home that afternoon and he appeared to be feeling much better. His energy had returned and he was excited to be home. That evening (b) (6) exhibited a normal appetite and we were hopeful that the situation had been resolved.</p> <p>Dec 30th (b) (6) condition deteriorated. He no longer had an appetite or would he drink water. In the early afternoon we began to notice that (b) (6) was displaying weakness in his hind legs and within the hour he was unable to stand. We rushed him back to the vet. We were informed that he was dehydrated again.</p> <p>We requested that the vet test (b) (6)'s kidneys to ensure that they were functioning properly. The vet kept (b) (6) overnight and again provided him with intravenous fluids. When we returned the following day we were informed that (b) (6)</p>	5	Years	Other Canine/dog	Dog	60	Pound
----------------------------	-----------------	--	--	---	-------	------------------	-----	----	-------

			<p>had kidney damage. The extent of the damage could only be confirmed by ultrasound which meant (b) (6) would have to endure a 2 hr drive over rough roads.</p> <p>The results of the ultrasound would not change the treatment. Due to his lower kidney function, (b) (6) would be required to survive on a modified, low-protein diet specially formulated for dogs with kidney problems. He would also have to consume a greater volume of water to replace fluids lost through increased urination. We purchased the food and electrolyte powder from the vet and returned home with (b) (6).</p> <p>It was now late afternoon on December 31, 2012 and we had plans to travel for a few days to a different part of the country. We were scheduled to depart early New Year's Day and had arranged to have a neighbour look after (b) (6) while we were away. We were extremely concerned that (b) (6)'s condition would deteriorate again when his hydration level dropped. We provided the neighbour with several litres of electrolyte-infused water and the low-protein food purchased from the vet. We also instructed her to bring (b) (6) to the vet if he experienced any complications.</p> <p>As communicated by our neighbour, (b) (6)'s condition appeared to stabilize over the next few days. He adjusted to the low-protein diet and seemed to be consuming a sufficient volume of water. While we knew that (b) (6)'s kidney disease was a long-term condition that would require constant monitoring, we were hopeful that he would be able to live a relatively normal life. However, during a phone call with the neighbour on January 4, we learned that (b) (6) was not doing well and that she had decided to take (b) (6) back to the vet. The vet said he ate and drank that night. At 1:13 am on (b) (6), (b) (6) woke the vet as he was crying and panting. A few minutes later he died. The vet gave him cardiopulmonary resuscitation but couldn't bring him back.</p>

EON-112985	1/29/2013 14:00	Beneful Dog Food	<p>Recently, I lost my 8-yr-old Pomeranian due to renal failure. He was previously a healthy dog. I fed him Beneful brand dog food almost exclusively, giving him other brands of treats. After his death, it came to my attention that there had been numerous reports of similar dog deaths following the ingestion of Beneful. I read many testimonials from dog owners whose precious pets had the same symptoms of diarrhea, vomiting, lethargy, and then either liver or renal failure. These reports dated back several years, and it sounds as if the FDA was notified.</p> <p>Can you please clarify this for me? It is distressing to think that a product caused so much suffering without the FDA knowing about it, testing it, and/or not acting upon it to notify the public as to its safety.</p> <p>Thank you for any information you can give me.</p>	8	Years	Other Canine/dog	Dog	17	Pound

EON-112909	1/28/2013 20:06	Milo's Kitchen Chicken Jerky	<p>Our 2 cocker spaniels have never been sick and have never been boarded so they do not come in contact with other animals. One of our dogs (b) (6) started vomiting and had diarrhea on and off beginning in November 2012 and to be seen and treated by our vet. She could not determine the cause of the illness. In January 2012 our other cocker started getting lethargic, drinking a lot of water, not eating, and had diarrhea, and we could also tell he was feverish. I immediately took him to the vet where they kept him for observation, gave him fluids to get his fever down, and placed him on antibiotics. They could not find the cause of the illness in (b) (6) either. While I was leaving (b) (6) at the vet's, I attempted to purchase Milo's Kichen jerkey treats and was then informed they had been recalled. I spoke to the vet immediately and told her we had been feeding the jerkey treats to both dogs and in fact still have some of the treats left at home. She felt that since both dogs (living in 2 different locations - one in (b) (6) - and the other with our daughter in (b) (6)) had been sick with similar symptoms and been fed the jerkey treats every day, the treats could be the cause. We immediately stopped feeding them the treats and they are recovering. They have remained on the same dog food (Pinnacle Trout and Sweet Potato) for several years and were given no other food.</p>	8.5	Years	Spaniel - Cocker American	Dog	38	Kilogram

EON-112719	1/28/2013 13:42	Beneful Healthy Radiance	<p>Back in June of 2011, my little girl (b) (6) who is half Italian Greyhound and half Min Pin started getting sick. She was very healthy and had a vet visit the month before which was all good. The vet said she was really healthy and all her tests were negative at that time. Then in June, (b) (6) started getting what the vets call "wheals" but I called them hives because I didn't know what they were. To me it looked like an allergic reaction to something. She had it all over her head and face and down her neck and onto her back. It didn't seem to bother her but I knew something was wrong. After a while she started acting funny and little did I know that this was the beginning of a very long journey for both of us. (b) (6) started getting very slow and very hot feeling. This little girl has always slept in bed under the covers since she was a pup and she was sleeping on the floor or in the kennel which she never does. She started getting distant from me and her feeding habits changed. I wasn't seeing her drink much but she sure had to go potty a lot. When (b) (6) got swelling in her throat area, she would look like a pelican, I immediately took her to the vet! I have a picture of the swollen neck and this was the 3rd time she had gotten it. The picture I have was taken on 11/28/11. When she did get the swelling on her neck it would happen within hours and her neck would swell right up. That's how fast what she had would progress! When she had the swelling on her neck and the wheals, she acted like herself with no recourse. After a couple of days, sometimes only a day, the sickness would set in and FAST! She would go downhill in a matter of hours and I rushed her to the vets many, many times to keep her alive! (b) (6) would start acting very lethargic, would refuse to eat (even the good stuff, you know people food), wouldn't drink, start to shake, have loss of control of limbs (head, neck, couldn't walk), had a hard time seeing things (still does at night, she can't see anything and will bark at me sometimes when I walk into a room), have a very high fever of 104 to 105, start panting, restless but can't move so she would cry and probably more that I can't think of. I took her to 2 different vets, many times, at least every 2 weeks or when she had an episode and all I got was that this might be a tick disease and gave her meds with prednisone as one of them. Every time I took her in blood work was done and her platelets were so low they didn't know how she was still with us. She was extremely dehydrated, weak and her fevers were always around 104 degrees or more. I was at the time feeding (b) (6) Beneful Healthy Radiance after a switch from Natural Balance small breed food. She had eaten Beneful since she was a pup but I tried the Natural Balance in January & April of 2011 then I switched her back to Beneful in May. (b) (6) was at the time a little over 2 years old. The vets had no idea what was causing her very weird onset of symptoms and tried a prescription allergy medicine which made the wheals worse but like I said I noticed things would go away with the Prednisone. I had enough with the vets not knowing what was wrong and they even told me I should see a specialist that I went to the (b) (6). I</p>	3	Years	Mixed (Dog)	Dog	18	Pound
------------	-----------------	--------------------------	--	---	-------	-------------	-----	----	-------

--	--	--

figured that if I would spend the money for my little girl, I might as well make sure it's worth it! After bringing (b) (6) in for a consultation and running some blood work, she broke out in the swelling on her throat so I immediately scheduled an appointment to show them what I was talking about. They were baffled at what they saw when I brought her in and told me they would like an aspiration of that swelling because all of the other tests they ran were negative but her white blood cell count was very low and they couldn't understand why, and they ran a lot of tests! They still did not know what they were dealing with but did prescribe prednisone because we knew that worked. I had the aspiration done and the results came back with Immune Mediated Vasculitis which was given to me in December of 2011. We went through this up and down battle for over 6 months and I was so scared I was going to lose her many times but with my perseverance, quick response to when she needed the vet and her holding on for me, we finally got an answer. This is something very rare the vets told me and I would have to keep her on medicine for a long time if not her entire life to keep her alive. I have spent thousands and thousands of dollars on my little girl but no amount of money can replace her, she is one of a kind and I will beg, borrow and steal to make sure she gets what she needs to survive! I do have a great job so the stealing won't be happening, lol! I have had (b) (6) on Atopica which is a steroid but does not allow weight gain and the many potty breaks that prednisone does and she also takes Pentoxifylline since January of 2012. The Atopica is very expensive but it works and she is doing fabulous! She has not had any of the symptoms since she has been on these medications and she is also on a special raw organic diet and dropped the prednisone weight! After all these symptoms started I really researched the food industry and her symptoms. I went through all kinds of foods but I settled on a raw organic diet. I have tried placing her back on dry food but I am so scared that this could happen again and her tummy prefers the raw, she gets horrible diarrhea when I try dry foods that I just take the risk of feeding the raw diet. I know some people have gone through the symptoms that I listed above I had to push things aside to cover her bills but I did it and her and I both survived! I don't know for sure what caused this to happen to my (b) (6) but from what I have read with the reactions from other dogs to the Beneful, my (b) (6) symptoms are very similar and it is very scary that they have not done a recall with this food! I think Purina is scared because if they do a recall, then they may have to compensate to all the families that have lost and/or paid excessive amounts of money for this needed vet care to save or try and save their family members life! This is preposterous and a malicious way to treat these wonderful creatures, that to many are family! Step up to the plate Purina and take care of the people that have put there trust and faith in you! That is all as pet parents we ask. To help us all get through this and save as many lives left that we can! Please Recall this food!!!! Thank You

EON-112647	1/27/2013 16:42	Canyon Creek Ranch Brand Natural Chicken Tenders	<p>About Dec. 21, I noticed that one of our two dogs was vomiting a little bit, but was unsure which one. Once I realized it was (b) (6), I tried some clear chicken broth to see if maybe her stomach was just a little irritated with regular dog food. When she vomited that back up, I got her to the vet quickly. He did some tests and informed us that her liver enzymes were elevated "off the chart", along with high bilirubin numbers. He sent us to (b) (6), here in (b) (6).</p> <p>She was a patient with (b) (6) for several days as they tried to determine a diagnosis and what they could do to help our dog. They started I.V. fluids, took blood samples for bile acids, did an abdominal ultrasound, and began treatments of "IVF, GI protectants, liver protectants", etc.</p> <p>By (b) (6) after extreme measures were taken to help our dog, and after performing all kinds of tests, she clearly was dying, and nothing more could be done to save her. We held her and loved her as she was euthanized, and then my husband and I transported our little girl, ourselves, directly to the vet school at (b) (6), in (b) (6). Our family vet had made arrangements on our behalf for them to do a necropsy on our pet.</p> <p>I wanted a necropsy performed because I wanted to know what had killed our dog.</p> <p>The results that came back from (b) (6) were incomplete and not specific to any one cause. So that's where we've left it.</p> <p>TODAY, I read that illnesses and deaths have been linked, unofficially, I guess, to dog treats manufactured in China. A bell went off: I'd bought at least two packages (maybe even three or four over time?) of Canyon Creek "Tenders" preceding my dog's illness, and given these "treats" to her.</p> <p>TODAY, in the back of my pantry, I found what's left of one of those bags. Sure enough, it was made in China, it's "Canyon Creek Ranch Natural Chicken Tenders". Here's the LOT NO.: G1CA3716A</p> <p>I realize I've given informal and inexact information here, but perhaps it might be possible to gather Punkin's actual medical records from 1) the family vet, 2) (b) (6), and/or the vet school at (b) (6) that performed the necropsy. However, about 13 months has passed now, so perhaps the records have been deleted or otherwise destroyed.</p>	6	Years	Corgi - Welsh Pembroke	Dog	23	Pound

			<p>That's where it stands NOW. I'd still like to know what killed my dog.</p> <p>Thanks.</p>

EON-112641	1/26/2013 18:42	Waggon Train Chicken Jerky Tenders	In the middle of December, my dog, (b) (6) developed constipation so I tried to give her Metamucil to help her go to the bathroom. When that didn't work and I noticed she was having trouble going up and down stairs, we took her to the vet. Without drawing blood, he diagnosed a kidney infection and put her on antibiotics. A few days later, on Monday, January 14, 2013, when there was no sign she was getting better, only weaker, we took her back to the vet where blood was drawn and it was determined that her kidneys were failing. The doctor prescribed a 3-day diuresis to flush out her kidneys in the hopes of regenerating cells. On the 3rd day, (b) (6) seemed to be coming back to her old self. The vet said we should be cautiously optimistic - and in a side note, mentioned that many dogs had been having kidney failure due to Waggon Train Chicken Jerky Tenders. She came home and ate some boiled chicken, drank water, peed, didn't vomit, begged for treats, etc. Unfortunately, by the next day, she was back to lying around, not eating, and barely drinking water. Over the next several days, we tried everything we could to rehydrate her and settle her nausea, but it was no use. She ended up vomiting up blood and died in her sleep later that same night, Sunday, (b) (6).	7	Years	Mixed (Dog)	Dog	15	Ounce

EON-112640	1/26/2013 17:15	Purina Beneful Dog Food	<p>Around the last part of October (b) (6) suddenly began having seizures. I took her to the vet and he determined that she had a very high fever and gave her antibiotics. She improved slightly, and the seizures slowed, but she began to go downhill again within a couple of weeks. She became lethargic and started vomiting constantly. She started having diarrhea. She was constantly thirsty and would drink so fast that she would choke and vomit. She lost 10 pounds in 7 days and I took her to the vet again. Her abdomen had begun swelling and he thought it was her liver. He gave her antibiotics and told us to bring her back in two days if she wasn't better. She improved for one day, then her condition quickly degraded. The night before (b) (6) she began vomiting and having diarrhea constantly, thick black goo from both ends. She wanted to go to the woods but we kept her in her crate. Thanksgiving morning she was cold and still, breathing shallowly. She began to convulse and died after 15 minutes of that. When my son picked her up to carry her to the backyard to bury her, thick black goo ran from both ends, as if she had melted inside.</p>	7	Years	Retriever - Labrador	Dog	75	Pound
EON-112639	1/26/2013 17:15	Purina Beneful Healthy Radiance	<p>I purchased Beneful Healthy Radiance for my 6 year old Boxer a few weeks ago. As he started eating it, he became lethargic, then he started to have diarrhea, vomiting, weight loss, drinking excessively, and then ultimately stopped eating it a few days ago. We brought him to the vet and she said his liver enzymes were extremely elevated and he was slightly anemic. She asked what he was eating and we told her Beneful and she said to discontinue immediately because of the recent reports about aflatoxins in the food. She referred him to an emergency clinic and they wanted to run \$2300 in tests. We couldn't afford it, so we brought him home, switched his food and gave him Milk Thistle for his liver. He seems to be responding well; he started eating again since yesterday and he's up and around the house. In a few days we want to bring him back to the vet to see if his liver enzymes came down. I work for Health Care Compliance for a major healthcare company and I know how regulated our industry is around manufacturing. After seeing my dog before vs. after the Beneful, I have no doubt that the food caused his illness. There are over 300 reports on Consumer Reviews and vets and PetSmart employees are wondering when the food is going to be recalled. Cornell University is also doing a study and for \$1000 my vet can send them the dog food I purchased to analyze, which I'm not going to pursue. I already spent close to \$300 this week in trying to diagnose the illness. I have the bag of Beneful. The Bar Code # is 017800135757 and the other manuf. number is 17800-13575. I can provide the food if you'd like to test it.</p>	6	Years	Boxer (German Boxer)	Dog	70	Pound

EON-112637	1/26/2013 16:48	Christmas stocking rawhide treats	I gave my dogs rawhide chews that were packaged as Christmas treats. All of my dogs suffered gastro-intestinal upset, some worse than others. Black diarrhea, vomiting, abdominal pain. After examination by the vet he said they had been poisoned by the treats. Despite his best efforts my dog died after 10 days due to liver failure. My other 4 dogs had the same symptoms but less severe and made recoveries. I thought one dog would also die but I was able to save her and she was younger than the shepphard.	15	Years	Shepherd Dog - German	Dog	70	Pound
EON-112635	1/26/2013 15:12	Smokehouse chicken breast strips	<p>Husband decided to purchase treats in the spirit of Christmas holiday. We NEVER buy dog treats! we only feed carrots, apple, and bananas as treats. A few days after the holiday my husband gave all three of our dogs the treats. (b) (6) being a large dog received multiple treats while our other 2 dogs a Chihuahua 11 pounds and a terrier mix 7.4 pounds each only received 1 treat total. A day or so passes and my husband gives (b) (6) more of the treats...the other dogs none. My husband thinks he only gave them to (b) (6) 3-4 days total.</p> <p>I thought we noticed (b) (6) drinking more water then usual but did not mention it to my husband. A day or so later (b) (6) is drinking and my husband stated he thought she seemed to be drinking more water then usual.</p> <p>I immediately went to the jerky treat bag and saw on the back lower corner that they are made in China. Front of the bag has a sticker stating Tested in the USA! The next day I got an emergency vet appointment and had 2 of the dogs tested because my husband didnt want to tell me he gave to all three dogs. (b) (6) and (b) (6) (terrier mix 7.4 pound) get bloodwork done. Liver and kidney function tests.</p> <p>Vet calls to tell me (b) (6) is in Acute liver Failure. I do not have any copies of the labs. The date was 1/11/13. I immediately took (b) (6) to (b) (6) in (b) (6). (b) (6) was admitted to the hospital for the elevated liver enzymes, low platelets. IV fluids, platelets , and medications to support her liver started. Lab testes revealed negative results for other tick born illnesses that would lead to elevated liver enzymes and her Lyme titer was considered low meaning she did not have active Lyme disease that would cause elevated liver enzymes. Spleen biopsy was done to rule out cancers that would cause liver enzyme elevation. Over the course of 3 days (b) (6) liver enzymes started to decrease (b) (6) was discharged on 1/13/13 and was on supportive care since her discharge. (b) (6) continues to have follow up blood testes to monitor her liver. Her enzymes are slowly coming back to normal.</p>	7	Years	Pointing Dog - German Short-haired	Dog	68	Pound

EON-112599	1/25/2013 9:39	Dentley's wrapped rawhide sticks with real chicken	<p>I have a 4 year old Morkie (Maltese/Yorkie mix). She has always been a finicky dog but the one thing she loved were chicken treats and she had been given them since she was about 6 months old. I gave her all brands and varieties. All were from China, I now have discovered. Around Nov. of 2012, I tried Dentley's rawhide sticks wrapped in chicken. She never ate the rawhide, but loved chewing the chicken off of these sticks. She loved these so much that I would give her them throughout the day, sometimes the entire bag of ten. I didn't see any limit on how many you could give, and the chicken on these rawhide sticks was very thin, so I figured that the amount of chicken she was eating was equal to about two large chicken strips. On Jan 11th, my dog stopped eating. We were having a number of family stresses at the time, so I thought she may have been reacting to our stress. But she started vomiting and was drinking and urinating more than usual. I started giving her a concentrated nutrient/energy paste supplement and took her to my vet on Jan 20th. My vet x-rayed her and did blood work and found both normal. So she was hydrated and given Cerenia for nausea. I was told to feed her chicken and rice and was told that she had depression based on my history. (I told the vet that I gave her these treats everyday but she, like myself, was unaware of the warnings). My dog continued not to eat and on Jan 22nd I took her to the hospital. There she was found to be dehydrated and tests showed she had glucose in her urine, as well as low potassium and low blood sugar. She had the classic symptoms of Fanconi syndrome and based on her history and the fact that she is not a breed that gets this genetically, it is believed that it was acquired from the treats made in China. She spent two days in the hospital. She is home now but is still not herself. She has very little energy and continues to drink and urinate a lot. The sad part of this is that I had no idea these treats were dangerous. Upon researching this on the internet, I am now aware that there have been reports of dogs becoming ill on chicken Jerky from China since 2007. I read a number of stories of people who lost their dogs to this problem, and it just breaks my heart. I don't understand why you don't demand these treats be removed from the shelves. We depend on you to protect us. I understand that the reason there was not a recall was that it was not known why dogs were getting sick and dying. But if potato chips were making humans sick and die, would you wait to find out what it was about the potato chip before removing them from the shelves? I understand that Australia banned these products from China and Vietnam and the cases of Fanconi Syndrome abated. I was clueless and so was my Vet. On Jan. 9th, three major manufacturers of these treats did a voluntary recall. No mention of dogs getting sick was in that recall. It sounded like they were just being cautious. So people still are not taking this as something to be worried about. My vet bill so far is \$3000. And her life, if she survives this, will most likely be shortened and consist of continual visits for lab work and follow up appointments. I would do anything for her. I thought I was giving healthy</p>	4	Years	Mixed (Dog)	Dog	8.7	Pound
----------------------------	----------------	--	---	---	-------	-------------	-----	-----	-------

			<p>treats. And the brand I was poisoning my dog with is still on the shelves. Please don't let another dog owner go through what I am going through right now. If the voluntary recalls were done after it was discovered that there were traces of antibiotics found in the chicken, and we now know that the Chinese feed their chickens these antibiotics, I think we can assume that this is probably the problem. It would make sense that dehydrating chicken meat from chickens fed antibiotics may be the problem. Especially knowing that there are cases of antibiotics causing Fanconi syndrome in dogs. So please recall all of these treats. Every brand should be off the shelves. And any product made in the USA that uses ingredients from China should be made to put that on their packaging. Right now I can go to Pet Smart and buy the product that caused my dog's illness. I just want to add that I have been told that the FDA posted a warning. Where does one have to go to see this warning? Do I have to Google search things I buy for warnings online? If there is a risk of illness, and you don't issue a recall, shouldn't that warning be on the packaging of the products that are dangerous? Please do something about this. Please protect us. Thank you</p>

EON-112583	1/24/2013 19:45	BENEFUL	<p>My little teacup poodle (b) (6) died of kidney failure on (b) (6) between 3am-430am. We used to feed him the Beneful brand of dog food made by Purina. Last week I found out from my mom that Beneful causes blindness, seizures, and kidney failure in dogs, my mom found out from a friend, and a number of people have complained about the dog food to the FDA and to Purina because they had to put their dogs down because of the illnesses the food caused and they refuse to take the food off the market. My little baby (b) (6) went blind in December of 2011, and got depressed and didnt want to do much but he was eating and drinking just fine. A couple months later his poop starts having blood in it and was runny and slimy so we switch his food from beneful to EN which is a vet prescribed diet that one of my other dogs has to have because her digestive tract is messed up. The EN seemed to help (b) (6) for a good few months. Around the late fall of 2012 (b) (6) started throwing up but he continued to eat and drink and use the bathroom like normal, at first I thought it was normal cuz another one of my dogs throws up sometimes. The throwing up had gotten more worse and we brought him to the vet on 01/11/2013 and the vet said he had some parasites so she gave him a shot for nausea and stuff. for 4 days he didn't puke so i thought he was getting better. The spring semester started here at (b) (6) on (b) (6) and my little baby (b) (6) went down hill the next day or so and got depressed even more and started throwing up again but it was worse than it was before. This time he refused to eat and drink and that is when my mom told me about how beneful was bad for dogs because she had just found out. My mom brought (b) (6) to me on Friday and he tried to drink water but he threw it up. I was so worried about my baby, and on Saturday morning we brought him to the Vet and she said it was kidney failure and she did some blood work to be sure and re-hydrated him and gave him another shot for nausea and we took him home and i gave him water through a dropper and we pulverized his food and i was feeding with a dropper. We found a natural/ herbal medicine called kidney rejuvenator and we bought that so we could try to save him but sadly he died yesterday so we couldnt save him. After we buried him the Vet called and told us it was Kidney Failure and that his kidney enzyme levels were so high they were off the charts and there was nothing they could have done. I can't let Purina get away with making bad food that kills animals. Other people have complained and it doesn't do anything. All they did was put a complaint number on the website and continue to sell the food so other animals can get sick. I think that is wrong. Animals are my life especially my animals and I believe that if a dog food is bad for an animal then it shouldnt be on the market. If you people don't investigate of why dogs are getting seriously ill and dying from this food and take it off the shelves, I will be sure to file a LAWSUIT against you and Purina. I have already contacted a layer about it.</p>	7	Years	Poodle - Toy	Dog	6	Pound

EON-112571	1/24/2013 16:24	Xylitol Spry Dental Defense System	One of my dogs accidentally ate a product containing xylitol. The packet was in a bag of items from our dentist. We were unaware that it was in there. When we realized it, we called ASPCA poison control who told us to take the dog to the emergency vet asap. I realize that it is our responsibility to monitor our dog's behavior, but when I contacted the manufacturer about the toxicity of xylitol to dogs, they denied that it was toxic and copied me a list of items the ASPCA calls toxic to dogs. They conveniently left off xylitol which is also on the list. Xyclear, the manufacturer is saying there is no evidence to support this, when both the FDA and the ASPCA list xylitol as toxic. They are giving out incorrect information to consumers which can result in the death of their pets. We took our dog to the vet where she was monitored for 12 hours. The amount she ate was on the borderline of toxic, but it was judged that she remain to be monitored. Fortunately my dog is fine, but I think that Xyclear is being irresponsible telling people that there is no evidence for xylitols toxicity.

EON-112519	1/24/2013 0:06	Eukanuba Dachshund Adult	<p>Description and Details Information Also included on attachment)</p> <p>Date problem started 12/15/2012 (b) (6) Date of recovery 01/22/2013 on going</p> <p>Date problem started 10/20/2012 (b) (6) Date of recovery 01/22/2013 on going Describe what happened</p> <p>For the past 5 years I have been feeding my miniature dachshund (b) (6) (date of birth (b) (6)) Eukanuba for dachshunds. My daughter who does not reside with me has been feeding her miniature dachshund dog (b) (6) (age 6) the same food. (the dogs are not related) For the past several years we have been purchasing 2 14lb bags from Pet flow. At times (b) (6) will stay with me and (b) (6) will stay with my daughter at which time they are both fed from the same bag of food. Until recently, both dogs have been the picture of health and have been seen by the vet for routine vaccinations. On Sunday October 14, 2012 my daughter left (b) (6) with some friends as they were going to be out of town until October 20, 2012. These friends have watched him in the past and have never had any problem. During his stay he eats his normal Eukanuba for dachshunds food.</p> <p>When they returned their friends said that (b) (6) had been acting strange and was not his normal self and did not really want to eat. They said he would whine when they tried to pick him up and was somewhat lethargic. When my daughter returned home they also noticed that he was not feeling well and his stomach was a little bloated and hard. He was very sensitive to the touch and would screech when we tried to pick him up. Initially they thought he was just out of sorts from being away from home. His condition worsened and on October 24, 2012 they took him to the vet. At that time the vet ran several blood tests and advised them that his liver numbers were high. And that they believed that he had a liver infection. They were asked if he had eaten anything that was dangerous to his health like mushrooms or other plants. To our knowledge he had not eaten anything out of the ordinary. (b) (6) does not typically eat things or chew things other than his own food and toys. At that time the vet put (b) (6) on an antibiotic and liver enzyme pills to help with his ailment as well as a pain pill to help with his stomach pain. At that time they did not suspect his food was an issue so he continued on his food. Although he did improve somewhat, he was not getting back to his old self.</p> <p>He stayed on his antibiotics for two weeks and was showing some improvement. On November 28, 2012, my dog</p>	69	Months	Dachshund - Miniature	Dog	9.5	Pound
------------	----------------	--------------------------	---	----	--------	-----------------------	-----	-----	-------

			<p>(b) (6) went to stay with my daughter while I was on vacation. During this time both dogs were fed the same food from my daughter's supply. During this time (b) (6) was still not 100%. On December 9, 2012, I picked up (b) (6) and took her home. (b) (6) seemed to continue to get sicker and he was so sick and in pain that they had to take him to the vet again. At that time the blood tests were run again and his liver count was high again. This time he was placed on two antibiotics and they were told to change his diet to boiled rice, boiled chicken, cottage cheese and Hill Prescription i/d low fat food. On Sat December 22, 2012, I called my daughter and told her that (b) (6) had not been feeling too good and was not herself. She was lethargic and not acting normal in addition she screeched at the touch of her upper body. Late in the day Dec 24, 2012 (b) (6) and I went to my daughter's house for Christmas. When (b) (6) got there my daughter said she has the same symptoms as (b) (6). We then thought that the only thing that the two dogs had in common is that they were both fed from the same bag of food while (b) (6) was with them end of November beginning of (b) (6). (b) (6) was taken to the vet on Dec 26th 2012 and was diagnosed with pancreatitis, the vet put her on a pain pill, antibiotic, muscle relaxer and was on IV until (b) (6) and placed on a limited diet Caned Hill Prescription i/d low fat food and medication. Both (b) (6) and (b) (6) vets said their conditions could have been caused by contaminated food and suggested we notify the manufacture. Since December 24, 2012 (b) (6) and (b) (6) have not had any Eukanuba for dachshunds, they have both been on special diets and both are making recoveries. On January 7, 2013, (b) (6) went back to the vet for a recheck and his liver enzymes were normal. My normal practice for storing the Eukanuba for dachshunds is to place it in a plastic container to keep it fresh and dry. I have always done this and did not notice anything abnormal about the food. I had just ordered and received a new batch of Eukanuba for Dachshunds; I had opened my bag and was going to take the closed bag to my daughter. I noticed that the new food had an entirely different look, I also have a sample of that new food but I had notified Pet Flow of our problem and that both dogs were now on special prescription food. They told me to return the closed bags (which I have done) and to discard the new opened food which I had transferred to my Plastic container. I did take out a small sample should it be needed for checking. My daughter has a sample of the food in question and is trying to locate a testing facility to see if there is a problem with the food. Since there seems to be no other logical explanation for why both dogs became sick with similar ailments and when both were taken off of their shared food, have been recovering,</p> <p>(b) (6) also has a problem with his leg, and (b) (6) a problem with her neck. I believe that in addition both dogs may have injured themselves in their weakened conditions as these problems did not</p>						
--	--	--	--	--	--	--	--	--	--

			<p> own dogs may have injured themselves in their weakened conditions as these problems did not exist previous to their illness. There are no other explanations. It would appear to have had something to do with their food. My daughter is willing to allow you to have a sample for testing if you provide instructions and pay for any cost associated with the testing. It is our intention to notify the FDA with a copy of this letter and the supporting documents also. My daughter has researched the issues related to contaminated dog food and found that it is not an uncommon occurrence. It is our desire to try to determine the cause of our dogs' illness and if it is related to the food we would be hopeful that Eukanuba (Proctor and Gamble) would both take financial responsibility and attempt to determine if any other dogs were affected by this food. </p>

EON-112416	1/22/2013 13:51	Waggin Train Chicken Jerky Treats	<p>Thursday, (b) (6), went to work - (b) (6) was fine - playing, barking - no sign of illness. Got home from work about 4 p.m., he was listless and acted like he didn't feel good. About 7-8 p.m. started vomiting. Would drink water, but wouldn't eat. Layed around all evening. I woke up about 1 a.m. and found him breathing rapidly and moaning whenever I touched him. I took him to the Emergency Vet then. They did blood work, gave him IV fluids and pain medicine. By about 4 a.m., he was having loose stool with blood noted. By 6 a.m., he was bleeding orally and was basically non-responsive. I took him to our regular vet at 8 a.m. They did x-rays and found blood in his belly; the vet said he either ruptured his gallbladder or had bleeding from his liver. He was in extreme pain by this time and even the pain med they gave him did not help. I had to make the hardest decision of my life and ended up having him euthanized. Less than 24 hrs. had transpired and my beloved dog was dead. He was an indoor-outdoor dog, stayed only in our yard (had an underground fence), no visible signs of injury. Did not relate his death to the chicken jerky treats until a recall was started. Our dogs ate at least 3 jerky treats daily. We feel terrible knowing that we contributed to his death. Knowing that this company knew what was happening is outrageous and is unconscionable. If we can help one animal from becoming sick or dying, we are ready to help however we can. Going thru this was torture for our dog and ourselves. He is missed every day. His companion dog is still wandering from room to room looking for his "brother". The sadness persists - waiting for him to greet us at the door, letting us know he was ready to eat and just being a source of comfort. We no longer have that comfort because of these "treats".</p>	10	Years	Terrier - Jack Russell	Dog	30	Pound

EON-112318	1/20/2013 20:30	Waggin Train Wholesome Chicken Jerky Tenders	My dogs have eaten Waggin Train Chicken Jerky treats daily for 1.5 yrs but this time they experienced Diarrhea w/ blood, vomiting, wouldn't eat for 4 days. Symptoms lasted for 4 days for my Yorkie (b) (6). The symptoms started a day later for (b) (6)/Shih-Poo. Similar symptoms w/ diarrhea w/ blood, vomiting, wouldn't eat for a few days. He wasn't as sick as my Yorkie. He is bigger at 15lbs vs. 10lbs. This could be the reason. However, they were both really sick and they have been on the same food/treats for 2 yrs so I know the Waggin Train Chicken Jerky was the cause of their illness. Especially when I was told they were recalled.	2	Years	Terrier - Yorkshire	Dog	10	Pound
EON-112317	1/20/2013 19:15	Waggin tails chicken jerky treats	Dog had uncontrollable diarrhea and was lethargic for 2 days after eating chicken jerky treat by Waggin Tails purchased at Walmart. Did not realize illness was from treats so gave her another treat When she was feeling better and it started all over again. Finally took her to vet who put her on antibiotics and threw treats away. Few days later I saw reports about Waggin Tail Treats. Luckily my dog survived.	4	Years	Terrier (unspecified)	Dog	22	Pound
EON-112316	1/20/2013 18:15	Beneful	(b) (6) had seizures and vomiting within minutes of eating. He has extreme skin issues now as well as an ear infection. This began in late 2012. The itching and ear problems continue. Without a muzzle and cone on he will chew his skin off his body in seconds. He had incredible thirst but now I cannot get him to drink water. I cook him food and add extra broth to get him to consume enough liquids. Since discontinuing the Beneful dog food and putting a muzzle and cone on him his wounds are healing and his hair is beginning to grow back. I give him allergy medication 2 times a day and cleanse his wounds with antiseptic as well as cook rice and veggies with chicken or beef for him. With just the muzzle he was able to nibble away at his legs so we also had to put a cone on. He is uncomfortable and paces a lot because his skin bothers him. When his muzzle and cone are off for eating and drinking he has to be watched every second or he will chew his skin off. We at first just used the cone but he got it off during the night and I woke up to a very bloody mess of a dog with raw skin all over laying outside my bedroom door. I got sick.	5	Years	Shepherd Dog - German	Dog	65	Pound
EON-112314	1/20/2013 15:45	Purina Beneful Healthy Weight	My dog was sick for 5 days and had constant diarrhea. I took him off the food and eventually came back to good health, and solid poop. We tried giving him the dog food again as I cannot afford to waste it, and he is now back to having diarrhea. I will not be giving him any more of this food.	11	Years	Chien Français Black et Orange	Dog	23	Pound

EON-112310	1/20/2013 10:36	Purina Beneful Healthy Radiance	<p>Our dog (b) (6) was a very energetic boxer. She has been on Beneful Healthy Radiance since we got her at 1 year old. As she aged she would go a few days without eating and then everything would be normal again and she'd eat fine. This began infrequently but the past year, it really began increasing. We hit the point of no return December 23, 2012. She began puking daily sometimes once a day, sometimes 7 times a day. She also had diarrhea the first few days. We took her to the vet. The first vet, (b) (6), from (b) (6) in (b) (6) recommended we change her dog food to Science Diet Lite. We tried this. (b) (6) would not eat it and continued to puke daily. We took (b) (6) back to the vet on (b) (6). (We primarily dealt with (b) (6) and (b) (6) from this point on.) This time we did bloodwork on her. Results showed that she wasn't in liver or kidney failure. Finally on the last visit we had x-rays done to see if there was a foreign object lodged. There was nothing abnormal, except (b) (6) had a slightly smaller liver. At this point, (b) (6) felt comfortable treating her symptoms and gave her serenia to treat her puking (b) (6) stopped puking for 3 days. We were also giving her chicken and rice to eat at this time. We had 1 pill left and the vets told us to see what happened when she didn't take the pill. She began excessive drooling. When we spoke to the vet, they said (b) (6) was nauseated. We gave her the last anti-nausea pill. It didn't work. She puked blood in the morning and was still excessively drooling. We spoke to the vet again and they decided that (b) (6) did not have gastroenteritis or pancreatitis like they thought. More than likely it was a gastric ulcer, gastric tumor, or cancer. We chose not to confirm the diagnosis due to the cost and the outcome for these were all the same. On (b) (6) we put our 6 year old hyper boxer down.</p> <p>Today I was on facebook and saw a post about beneful dogfood killing animals. Unfortunately, it's too late for us, but if this is the cause for my dogs unexpected death I am extremely disappointed that there is no FDA regulation on dogfood. This has already caused 220 deaths that I have read. Please do something, so other dog owners do not have to undergo unfairly losing a loved one like we did.</p>	6	Years	Boxer (German Boxer)	Dog	170	Pound

The next morning he had vomited the entire thing up on the stairs.			Mixed (Dog)	Dog		

EON-112308	1/19/2013 23:36	Beneful original	Both of our dogs had this food (fox terrier and Maltese). Our Maltese, (b) (6) was the first to get sick. She got sick in December. She starting throwing up and had diarrhea. She was taken to the vet. They did fecal samples and blood work. Everything came back normal. She had been lethargic for weeks and also randomly shaken during the day. They decided to switch her to prescription gastro dog food along with putting her on a probiotic and daily pill. After 1.5 weeks she was better ((b) (6) was also given the gastro food for easier feeding). On Jan 11, 2013 (b) (6), our fox terrier starting throwing up and had diarrhea. She was also lethargic and constantly shaking. We took her into the vet to day (1-19-13) and thy Dan a bunch of tests and did blood work. Everything cam back normal. We too them that we were feeding her the Beneful. They mentioned that another dog had come in today with the Sam symptoms and was also on Beneful. When I got home I google the name and saw the recent problems dogs are having when eating this food. (b) (6) was put on gastro dog food, probiotic and a daily pill.	7	Years	Terrier - Fox Smooth	Dog	12	Pound
EON-112307	1/19/2013 22:45	Beneful Original (Dog Food)	My complaints for both of my dogs are due to concern of the Beneful pet food accusations. During the Summer of 2012, (b) (6) began losing weight and was panting at night. Our other dog (b) (6) passed away on (b) (6) which we suspected was causing stress on (b) (6) and the symptoms. On (b) (6) (b) (6) was pacing the house drooling and would not sit or lay down. She was take to the vet and it was determined that she was experiencing GDV. She was euthanized that day (b) (6) was 49lbs on the day of her death, she was 63 lbs just a few months prior. (b) (6) consumed 3 cups of Beneful original per day for the past 6 years.	14	Years	Weimaraner	Dog	49	Pound
EON-112306	1/19/2013 22:30	Beneful Original (Dog Food)	During the Spring of 2012 (b) (6) began having incontinence issues and it was determined that her liver was not functioning properly, an ultrasound was done and several masses were found on her adrenal glands, and kidneys- and she was losing weight rapidly. On (b) (6) (b) (6) became bloated and was suffering from GDV. She was euthanized that same day. We have 2 Weimaraners. My other dog (b) (6) (14 yrs old), began to bloat and had to be euthanized on (b) (6). (filed additional complaint for (b) (6)). Both of my dogs consumed 3 cups of Beneful dog food everyday for the past six years.	12	Years	Weimaraner	Dog	50	Pound

EON-112305	1/19/2013 19:15	Milo chicken jerky	My husband commented that (b) (6) had been drinking a lot lately. The next day on Facebook I saw a warning about dog treats from china that were making dogs sick. On the list was Milo's Chicken Jerky. We had bought a small bag to see if (b) (6) would eat them. She had eaten all of them over a couple of wks. We had just bought a big bag but she hadn't eaten but a few of those. I looked up to see what the symptoms were. One was excessive drinking and frequent urination.. (b) (6) usually goes to bathroom right before bed and doesn't go again until morning. That night she went before bed twice on paper during night and again in the morning. We called our vet and took (b) (6) in. Our vet checked urine and did blood test. Her liver and kidney numbers were up from test done 2 years ago. We have (b) (6) on a low protien diet. We are making sure she drinks a lot and we will take her back in 6 wks if we don't need to bring her back in sooner. We took (b) (6) to the vet on January the 9 of 2013.	8	Years	Poodle - Toy	Dog	6	Pound
EON-112304	1/19/2013 17:24	Milo's Kitchen Chicken Grillers	The owner gave (b) (6) two treats that he had not had before. About 30-45 minutes later, (b) (6) had a seizure-like episode in which he fell on his side and had generalized tremors and vocalizations. The seizure lasted about 2 minutes. Afterward, his legs trembled slightly for a period of time. (b) (6) appetite has not been very good for about 5 days, and he has also had bad gas since the event. The owner is concerned because on January 15, 2013, the product given to (b) (6) was voluntarily recalled due to residual antibiotics.	10	Years	Mixed (Dog)	Dog	22.3	Pound
EON-112303	1/19/2013 14:30	Purina Cat Chow INDOOR	Around Christmas, I was feeding my usual food, Purina Indoor formula. I have three feeding stations (a bag fits at each one) At one station, the cats quit eating the food, and one became sick. (b) (6), quit eating, starting vomiting. Within two days, (b) (6), began doing the same. At the second station, a third cat, (b) (6) did the same as described above. I immediately removed the food and verified the bags were all of the same origin. I called Purina to notify them and see if there had been a recall. The rep informed there had not.... I treated all cats with supportive therapy, SQ fluids and force feeding....They turned around with 7-10 days. Unfortunately, I had forgot a little amt. of Purina food in a station tupperware, I had previously mixed the food to transfer to a new brand (after this situation). Well, (b) (6) ate it and became sick again. I felt it was necessary to take him in to the vet this time, to make sure his kidneys/liver had not been affected. Luckily, they had not, but the vet verified, it was probably some sort of intestinal infection (to the best of his knowledge), possibly induced by the food. I have now switched brands. I was a previous Purina customer for over 15 years,	3	Years	Domestic Shorthair	Cat	8	Pound

EON-112302	1/19/2013 13:36	Dentley's Natural Flavor Rawhide Chew Chips	<p>there have been 3 separate days when I gave her a whole piece, she ate it and had a seizure that evening. this was about a month ago.</p> <p>there have been 2 separate days where she has gotten a hold of the same treats chewed on them for up to an hour (because I was unaware she had it), but they were taken away before she could eat it entirely, and those evenings she had a seizure. 1 day where she had gotten a hold of one for a few minutes (i had to pull the pieces out of her mouth and throat) she had a very short/minor seizure that evening this was all this week.</p> <p>in this same week 2 other dogs were given these same treats (same bag) , but no noticeable side effects and no seizures.</p>	14	Years	Mixed (Dog)	Dog	40	Pound
EON-112301	1/19/2013 13:24	Great Life Freeze Dried Meat Treats Chicken breast for dogs	Two of my dogs were given this treat and both had diarrhea and vomiting at the same time, didnt pin point was made them sick until the remaining bad of treats was givin to my daughters dog about 4wks later and her dog also had diarrhea and vomiting.	8	Years	Beagle	Dog		
EON-112300	1/19/2013 10:36	Waggin' Train and Canyon Creek Ranch Chicken Jerky	We brought our Boston Terrier on 12/24/10 and she was 8 weeks old. In 3/27/11 we gave her Chicken Jerky from Wlamart to chew on and one piece about the size of a fifty cent piece got lodged in her throat. We took her to the Vet and they ran X-rays to see what was wrong with her. They did several different treatments and nothing was doing the trick to dislodge it. We spent almost \$1000.00 dollars and then we were told they would have to do exploratory sure and it would be over \$1800.00 more. I can tell we are so extremely upset but we are normal people and spending thousands of dollar is not available to us. We told our Vet we would give it until Monday which was two more days. On Sunday 4/3/11 we took her for a ride in the car and she was so ill we took her home as we were walking into our home she started to throw up and up came the piece of the chicken jerky which had been in her throat for 8 days. Crazy how something could be in her body and when it came out the structure was still the same. I will never allow any person I know to buy or use that product again. While in that state for 8 days it has caused my stomach issues that we still deal with today. We have had to continue with giving her stomach medicine and the Vet today is not sure if the issues she had during that 8 days have lead to her allergies. When I total up our medical bills for our 2 year old dog, We are at over \$5000.00.						

EON-112299	1/19/2013 10:36	Cadet Gourmet Ducky Jerky	<p>I bought this product in late July 2012 and gave it to (b) (6), (b) (6) and (b) (6). (b) (6) is a 90lb and was almost 11 at the time. I also gave the jerky to (b) (6) who is a 60 lb dog and was about 10.5 at the time. Both of those dogs violently vomitted about an hour after eating the jerky. They vomitted in a way I have never seen in all their lives nor have they ever again. I immediately stopped giving the jerky and contacted the distributor. (b) (6), however, visibly began to lose weight about the middle of August/early September and then became lethargic. I took her to the vet and the vet began by doing a fecal and testing for Lyme's and heartworm. The tests were negative. Her decline continued and so the vet did a full blood panel. We got the results indicating acute renal failure. The doctor told me that she probably had lost 75% of her kidney function and that she was going to die. We made the decision to humanely euthanize her the day after we got the results from the vet. We are currently working with (b) (6), (b) (6) and (b) (6) at the FDA. We have had regular contact.</p>	7	Years	Beagle	Dog	22	Pound
EON-112298	1/18/2013 22:54	<p>Royal Canin Puppy / Choit Extra Small puppies up to 10 months. Dogs up to 8lbs. Green and white bag.</p>	<p>I went to Pet Supplies Plus in (b) (6). asking for the best food for a toy sized puppy. They pointed me to a 3lb bag of Royal Canin, green bag, X-Small, puppy/choit, for extra small puppies up to 10 months and 8lbs.</p> <p>My puppy was passing iams puppy food normally with solid stool 24 hours ago. I've fed her this food a total of 4 times. She immediately started to have soft stool, then diahrea, and now she is pooping blood in less than 24 hours. she appears to be having trouble urinating as well. Her spirits remain high. I have taken her off the food and put her on the old food again. I will notify the company and pet store asap about this problem.</p> <p>I want to reiterate that my puppy was PERFECTLY HEALTHY 24 hours ago. I have her back on her old dog food and I hope she recovers.</p>	12	Weeks	Chihuahua	Dog	3	Pound
EON-112294	1/18/2013 19:39	Purina Beneful	<p>I was told by someone who feed their animal Purina Beneful (spelling of Beneful?) that their dog got really sick after eating it. I did not see this first hand and I saw on the internet that people posted the same problem - some animals had died or had kidney problems. I am just asking you to look into this further - I love animals and I am speaking for them. I spoke to (b) (6) on the phone and told her verbally (FDA). I also called the company and they said they stand by their product. So, please investigate this for the animals. Thank you. I know that their treats had antibiotics in them and were recalled.</p>						

EON-112291	1/18/2013 17:24	Purina Beneful healthy weight	<p>2 known seizures from above mentioned dog. Vet is aware of & now trying to determine background. All canines have been on Beneful healthy Weight purchased @ Sams Club w/in the past 6 months. My other canine passed away March 2012 due to a seizure as well, makes me wonder. Our other living canine Shetland Sheepdog tends to drink a lot of water, albeit, none of my canines are kept very active...I hope I don't have exorbitant vet bills or heartbreak for something I may have given her. Also hoping we don't witness a seizure from her...was bad enough seeing 2 animals suffer. Please research Purina's pet food...it may not help pets lost, but perhaps can prevent heartache for others IF Purina may be a culprit.</p> <p>Would be happy to provide you w/ vet info related to above referenced dog upon your request.</p>	8	Years	Mixed (Dog)	Dog	60	Pound
EON-112269	1/18/2013 15:24	Purina Beneful Healthy Weight	<p>My dog was a very healthy bulldog who received regular vet check-ups and had very few medical issues throughout her life. At the time of her death, she had no medical issues and was not being treated with any medications. Her diet consisted of Beneful Healthy Weight formula twice a day. The day she died, she ate her breakfast normally and suddenly became extremely lethargic with a loss of appetite and vomiting. We left home for a short outing and returned to find her dead. She was only 7 years old, still young for her breed.</p>	7	Years	Bulldog	Dog	40	Pound
EON-112253	1/18/2013 13:30	Purina Beneful Healthy Weight dried dog food	<p>My dog was seen by her vet on 12-12-12 for her yearly shots. No problems. She has been eating Beneful healthy weight for approx 1.5 years to lower her weight. She has had no problems until this last bag 31.1# UPC 17800-13460 code #22781085-0804L06. Then we noticed that she was excessively drinking but her urine output had not increased to match the intake. Then I saw this notice on the internet.</p> <p>http://www.examiner.com/article/purina-s-beneful-dog-food-killing-dogs-nationwide-no-recall-issued-by-fda?fb_action_ids=515110285186564&fb_action_types=og.likes&fb_source=other_multiline&action_object_map=%7B%22515110285186564%22%3A394739263949622%7D&action_type_map=%7B%22515110285186564%22%3A%22og.likes%22%7D&action_ref_map</p> <p>if you check out this notice you will see that excessive thirst is one of the noted side effects. I removed my dog yesterday from Beneful and have placed her on lams dog food. This dog food should have been recalled but to date it has not. I do not know if my dog has sustained any long term ill effects or health problems due to this dog food as we are now playing a waiting game. Waiting to see if the problem will correct itself.</p>	6	Years	Sheepdog - Shetland	Dog	35.7	Pound

EON-112199	1/18/2013 10:00	Purina Beneful Healthy weight	Starting in June 2012 I switch dog food brand from pedigree to Purina Beneful healthy weight. About 2 months later my dog starting vomiting and eating less. I took her to the vet. in August 2012. They did test and said she was healthy. They told me to keep her on the same food and give her pepto bismal if she continues to vomit. After about 2 months, we noticed less eating and excessive hair loss. In December 2012 we took her back to the vet. for more test. The vet told me that her kidneys were failing. They gave her an IV and antibiotics. We again took her back to the vet a week later for more IV and test. She then became lethargic and would not eat. A few days later she could not walk, she began shaking. We took her back to the vet. again 2 days later. The vet. agreed that her kidneys were failing and he thought she was eating something bad that was making her sick. A day later we put her to sleep. My cat also had the same symptoms as my dog. Three weeks ago we put my dog to sleep, over the past week my cat has not thrown up or losing any more hair. I threw away my dogs food and bowls 3 weeks ago. After investigating Beneful food online, I saw that several hundred other people were having the same problem with their pet and were feeding them beneficial. I really believe beneficial killed my dog and almost killed by cat.	8	Years	Mixed (Dog)	Dog	45	Pound

EON-112153	1/17/2013 14:39	Canyon Creek Ranch Brand Chicken Tenders Low Fat Genuine Treats for Dogs	Product: Nestle Purina Canyon Creek Ranch 30 oz. Chicken Tenders 2220T027 101CK1 B/B Aug 2014 CA 6986 Aug 2012 Emergency Vet: (b) (6) (b) (6) Regular Vet: (b) (6) (b) (6) Purchased early Dec 2012 Petsmart (b) (6) Fed 1 strip per day (bag recommends 2 per day) to healthy energetic 18mo old, 22lb female mini cattle dog. After feeding for approx 30 days, dog became listless with vomiting on Jan 10, 2013 with loose stool. On morning of Jan 11, 2013 vomiting continued with unproductive bowel straining resulting in fresh red blood coming from rectum. Same day visit to regular vet who observed fresh blood in rectum. Prescribed Flagyl and sent stool to lab for parasite, giardia tests. Same day dog quit eating everything except the CC chicken strip(1) and was extremely listless with more vomiting. Vet called on Jan 12, 2013 with lab test on stool all negative. Suggested to feed baby food, dog drinking lots of water and urinating, continued vomiting and listlessness. Jan 12 thru the am of Jan 14, 2013, dog refused all food but continued drinking water and urinating. Morning of Jan 15, 2013 dog extremely listless, vomiting, refusing food, shivering. Vet performed blood profile work and called later in the evening recommending I take the dog to Emergency treatment as the liver and kidney enzymes were "off the chart". Evening of Jan 13, 2013 dog admitted to (b) (6) for treatment. At 1:00am on Jan 14, 2013 Vet called me at home to say dog was in crisis, heart rate of 38, and was currently stabilized. While talking to her, the dog went back into crisis and vet had to call me back after re-stabilizing the dog. On morning of Jan 15, 2013 the dog was transferred to the day care of regular vet for continued observation and IV fluids. That evening dog returned to ER for maintenance and recheck of electrolytes. Condition was slowing improving and on the morning of Jan 16, 2013 the dog was readmitted to reg vet for IV fluids. The afternoon of Jan 16, 2013 we brought the dog home where she is slowly recovering. She lost 4 lbs in 4 days. On Jan 16, 2013 the blood profile tested for Addison's disease with almost total adrenal failure. Dog is prescribed prednisone 2X per day and percorten injection every 25 days for life. I still have the uneaten CC chicken tenders (5) in the original bag. I did not learn of the recall until the morning of Jan 14, 2013. I think someone ethical should test the remaining treats in the bag. My dog was completely healthy prior to eating these contaminated treats and has never been treated for any health issues. I did report this to the Petsmart store and was given a full refund. The manager told me they would	18	Months	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	22	Pound
----------------------------	-----------------	--	--	----	--------	---	-----	----	-------

			destroy the returned unopened bags of treats. I am keeping the original opened bag for myself in the hope some testing can be done. The manager was not interested in the lot number of the opened bag. The store shelf did have a sign posted that the treats had been recalled and none were on the shelf. I am also reporting this to the State Dept of Agriculture/Oregon and the Pet Food Manufacturer.						
EON-112136	1/17/2013 11:48	waggin train	<p>i gave my dog a waggin train dog treat that was peanut butter wrapped with rawhide the wrapped with chicken jerky approximately 5 hours later i took her to (b) (6)</p> <p>(b) (6)</p> <p>due to severe abdominal pain. they x-rayed her and asked me to bring her back the next day for an ultra sound.</p> <p>the ultra sound showed fluid in her abdomen. and they immediately did surgery.</p> <p>they prescribed her amoxicillain and tremadol as well as pepcid ac and a diet of lean meat and rice</p> <p>she seemed to improve but had no appetite .</p> <p>After 3 days I called dr labonde and he suggested I start using baby food to stimulate her appetite this seem to work but after a few weeks she seem to be relapsing</p> <p>on Jan 3rd I called (b) (6) on the 4th of jan. and he suggested to give her some pepcid ac and if she didn't get better by Monday bring her in.</p> <p>the next day I rushed her to the vets office as she was declining fast.</p> <p>(b) (6) saw (b) (6) and immediately took in back to give her fluids and ask me to call in 2 hours</p> <p>2 hours later he called and said I had to take her to a critical care hospital</p> <p>I lost her at 3 am Sunday morning.</p>	11	Years	Retriever - Labrador	Dog	70	Pound
EON-112130	1/17/2013 10:24	Wellness Simple Limited Ingredient Diet Turkey and Potato Formula	Opened Can of dog food on January 17, 2013 to find mold on the top of the Wellness Simple brand of canned dog food (Turkey and Potato). Opened another can as a reference and it was fine. Took picture of the cans to compare.						
EON-112126	1/17/2013 9:54	Beneful Playful Life Dog Food	After feeding (b) (6) Beneful Playful Life dog food for two months, she lost a noticeable amount of weight, has been vomiting and has diarrhea. At first I thought she might have gotten worms from my puppies. But she has been treated for worms and without noticeable improvement in symptoms. She is going to the Vet for a blood work-up on 1/19.	8	Years	Mixed (Dog)	Dog	50	Pound

EON-112114	1/16/2013 21:30	Purina's Beneful Healthy Fiesta	<p style="text-align: center;">To Whom It May Concern;</p> <p>My name is (b) (6), last month my dog passed away due to an illness of unknown causes. When he got sick I checked the FDA's recall list to see if Purina's dog food, Beneful, was on it. At the time it was not, but weeks later I am seeing complaints and cases where beloved pets have been becoming sick and/or dying after eating this food purchased between October 2012 through currently January 2012. I believe this could be the answer to this unsolved mystery.</p> <p>(b) (6), a then 8 year old Schnauzer, was always happy and active. He carried himself with pride and always appeared to have a smile on his furry face. He stopped being himself the week of Thanksgiving this year. He began to lose interest in his food (Beneful Healthy Fiesta), and within days refused to eat it and would only drink water excessively to the point of vomiting. He lost all of his energy, had runny stool and even began to urinate in the house. All of these signs screamed something was seriously wrong; this was no upset stomach or doggy depression. I got him an appointment with (b) (6) at (b) (6) in (b) (6). She soon realized (b) (6) sickness was more than her small clinic could handle so she got us in at (b) (6) in (b) (6) with (b) (6).</p> <p>At the time we did not know (b) (6) would become a large part of our lives for the weeks to come. Numerous tests were done, with no answers as to what was wrong. Clearly he needed medical attention so the clinic kept him for a week to get him fluids. Over that week (b) (6) consulted with other doctors and even called in a blood specialist, debating heart problems, liver and kidney failure. Still, the cause of his illness, or even what it was, remained a mystery. Finally, they settled for Addison's Disease. There were no clear signs this was the problem, but it was the only option they had to choose from considering the situation. Something had to be done or we would lose him. (b) (6) was sent home for a week on medication. At first he seemed to have some of his energy back, started eating again; and I can't tell you how relieved I was to see that beautiful (b) (6) smile again. It did not last long though.</p> <p>Days after he came back home he began to go downhill once more; tired, glazed eyes, vomiting, wouldn't eat/drink, and even started to develop bruising on his chest. We went in for our follow up on (b) (6) to see how the medication was working, which it no longer seemed to be. (b) (6) was very disappointed to see he was no longer improving, so she ran some more tests and</p>	8	Years	Schnauzer (unspecified)	Dog	28	Pound
------------	-----------------	---------------------------------	---	---	-------	-------------------------	-----	----	-------

--	--	--

consulted with a specialist again. It appeared the bruising on his chest was being caused by blood clots. Something was causing his blood to constantly clot, and the only option left was to try bloodletting. Half way through the procedure they had to stop, his blood was clotting too fast for them to keep up with. The only option left was to put him down, or send him home to pass with those who love him there by his side.

There is nothing worse I could ever imagine than that moment when I was told they could send him home with sedatives to keep him relaxed. No one spoke the word death, it was just implied. For hours I laid with him on the floor, telling him how much I love him. It was clear then, he couldn't hold on any more. He began to get lethargic, standing up to cough and then dropping to the floor due to lack of energy. Around 11pm he began to cough up blood, I made the hardest decision a pet owner can make, and decided to take him to (b) (6), in (b) (6) to be put down. Once we arrived there, he passed away in the exam room before the doctor ever got the chance to come in. Weeks later, I am still traumatized by seeing the life go out of his eyes, his paws go limp and the unforgettable smell of death.

I now have a void in my life that can never be replaced. Myself, my family, and the precious veterinarians that did all they could, have been left without any answers. If this is happening to other owners and trusting customers, it could happen to us as well. It seems to be the only answer available, and I want to get to the bottom of it. If this product is to blame, someone needs to take responsibility. I should not have to feel like I killed the most important living being in my life, just because I was foolish enough to put my faith in a company that claims to promote overall good health in pets.

Praying for justice,
(b) (6)

Product Details:

Purina's Benful, Healthy Fiesta w/ moist chewy chunks (15.5 lb bag)- description on bag, w/ real chicken & wholesome rice, accented with vitamin-rich vegetables and avocado.
This food was purchased in October 2012, at Walmart on (b) (6), in (b) (6).
Best by date: August 2013

--	--	--	--	--	--

--	--	--

Best by date: August 2010
Lot number: 22381084 0437L06
UPC/Barcode: 0 17800 14197 0
Barcode on Walmart Sticker: 17800 13468
Bag also claims to be manufactured at Nestle Purina Petcare Company, St. Louis, MO 63164
I do still have the bag, there is a bit of food left for testing. Most of the food was wasted due to (b) (6)'s refusal to continue eating it. Maybe he sensed something I just couldn't understand. Up until he got sick, (b) (6) consumed at least 2 cups of this food per day, sometimes more considering his appetite.

EON-112084	1/16/2013 15:09	Milos Kitchen Chicken Grillers	After (b) (6) ate Milo's Chicken Grillers she started acting strangely, vomited a lot of bile up and pieces of the treats, took her to the vets, she was in kidney failure, I rushed her to the Intensive Care Unit in another city, she had extensive testing, was on IV for 3 days, all tests show no signs of infection however the blood work and her ultrasound show she is in kidney failure and the vet confirmed it was from toxins, all other possibilities were ruled out. (b) (6) is a coton de tulear, their normal life is 16 - 20 years, I had blood work done this past summer and she was fine. (b) (6) remains listless, she is not eating and she has a very high amount of protein in her urine. I am beyond anger and I have saved the toxic treats, I plan to have them tested, I have also saved all of her medical records.	7	Years	Coton de Tuléar	Dog	11	Pound

EON-112078	1/16/2013 14:39	Purina Beneful Healthy Weight	We have been purchasing beneful for years, but this one particular bag caused many problems. Our dog eats like a fiend. She is obsessed with food (lab/basset mix and also has previous homeless fears of never seeing food again). A couple of days into this bag we noticed she was slower to eat it than usual. We thought maybe her mouth was hurting so softened it or added dry food and she would eat it right up. This last a couple more days. Finally she started grazing (huge warning sign...never seen this before). A couple days after this she stopped eating, became lethargic, had upset bowels. We took her to the vet and got xrays and lots of blood work with nothing determined. We got some antibiotics and antacids and she was good as new (we also threw out the bag of food as our vet said this was likely the case). She has now been eating (another brand) problem free.	8	Years	Mixed (Dog)	Dog	44	Pound
EON-112066	1/16/2013 13:48	Purina Beneful Healthy Radiance	I mixed Purina Beniful Healthy radiance in with my normal food of Natural balance Potato & duck formula, to try to switch them to a cheaper food. Within 10 minutes after eating they vomited all the dog food they ate, I thought it was strange, since they rarely ever vomit, and when they do its always been bile from eating grass outside. The next time they ate same thing happened, they also were not as excited to eat their food, its been 4 days and I just looked on line and a ton of other consumers have the same problem. I called the manufacturer and the customer service rep said they do not have any recalls on this product and has not had any complaints...I guess he would be called an excellent employee if I was employing him, however, this is affecting the health of many animals who have no voice. Please initiate a recall, I normally never get this fired up about something, however I know for a fact that my dogs were sick because of the food. No doubt about it. I will be getting my current 15lb (lovely that I bought so much) tested to see whats wrong with it, and should have those results soon.	2	Years	Shih Tzu	Dog	9	Pound
EON-112065	1/16/2013 13:48	Waggin' Train Chicken Jerky Treats Canyon Creek Chicken Jerky Treats	Dog had diabetes under control for two years. Dog had been given Waggin' Trails and Canyon Creek brand chicken tenders which she would eat. Dog became lethargic and not wanting to eat normal kibble/moist food meals. Dog became unsteady on feet and would fall over. Vet diagnosed kidney failure. The vet did not understand how this came on so suddenly when the dog had been in good health prior. In fact, the dog was in good enough health to have had \$6,000 worth of catarac surgery just prior to this happening. Dog died tragically from renal failure.	13	Years	Retriever - Labrador	Dog	90	Pound

HE WAS UNABLE TO SEE IF HIS HEAD WAS TILTED DOWN AND UNABLE TO FUNCTION	11	Years	Sheepdog - Shetland	Dog	31	Pound
EON-112046	1/16/2013 9:00	Beneful Beef Stew	On Sunday, I fed him Beneful Beef Stew. He threw it up later that night. He was not a dog that normally threw up. He became quite ill, due to his age, he could no longer have shots and was afraid to take him to vet, due to germs. He died on Friday (b) (6).	20	Years	Mixed (Dog)	Dog	8	Pound
EON-112045	1/16/2013 8:33	Purina Beneful Healthy Weight	My 6 yr old Bichon/Cairn mix has always eaten Beneful by Purina and has always been healthy with no medical problems. We bought a new bag of Beneful Healthy Weight from Walmart around Christmas. (22931085 2047L08 October 2013) Our dog has been plagued with vomiting since opening the bag. We have been trying to figure out what is causing the vomiting which happens after she eats her food and continues as just bile. I am now reading that this problem is not just isolated to my pet but is widespread for pets consuming Beneful products. In addition, I have noted that Beneful has been associated with pet illness due to mold in 2007. I am extremely disturbed that neither Purina nor the FDA has taken action to notify pet owners of the widespread complaints or to reasonably address this matter. I will no longer be purchasing or feeding my pets ANY Purina products until this issue is addressed. Purina's response is to simply tell consumers how great their product is. I have kept a sample of the food in question and will be arranging to have the food tested whether through our vet, the ASPCA, or any other independent organization.	6	Years	Mixed (Dog)	Dog	17	Pound
EON-112042	1/16/2013 3:00	Treats 100%natural Chicken Breast Tenders 100% chicken Breast Fillets CPI Brand	After eating chicken jerky the chihuahua vomited the whole treat. EON-112034	1/15/2013 19:54	Kirkland Signature Super Premium Adult Dog Chicken Rice & Vegetable Formula	I fed (b) (6) out of a brand new, just opened bag of Kirkland Signature Super Premium Adult Dog Chicken, Rice & Vegetable dog food. Later that night she had diarrhea and it continued on into the next day. She had been eating this brand and variety of dog food for over a year. I have ruled out that she may have developed an intolerance to something in the dog food. I have another dog (b) (6), approx. same size but different breed also developed diarrhea at the same time after eating the same food.	5	Years	Akita	Dog	30	Pound
EON-112033	1/15/2013 19:33	Milo's Kitchen Chicken Jerky	After giving my dog the treats, she increased the amount of water she was drinking and was unable to control her bladder. There appeared to be blood in her urine. After this continued for two weeks and due to her age, we put her to sleep.	10	Years	Samoyed	Dog	45	Pound
EON-112023	1/15/2013 15:18	Beneful Healthy Radiance	Please see above--very strange behavior, aggression, aloofness, sense that the dog was in some kind of pain, stopped eating, possible seizure.	10	Years	Retriever - Nova Scotia Duck Tolling	Dog	70	Pound
EON-112022	1/15/2013 15:18	Waggin Train Wholesome Duck Jerky Tenders	She ate the treat before bed on Fri evening. On Sat morning I let her out and she urinated and came back in. I noticed she was licking herself frequently and around 10:30 am was laying in a puddle of urine. I had her get up and go outside. On her way out she was dripping urine. She went outside and relieved herself again. I brought her in wiped her down and dried her off then started cleaning up the spot she had been laying in. I looked over and she has in a puddle again. I took her to the Emergency Vet Clinic. They ran a quick dip test that showed no infection but an increase in protein and low specific gravity. So they did an x-ray to see if she had any stones that could be causing this. The x-ray showed everything to be fine. So they ran a blood panel to check her kidney values. Her blood panel came back fine. There was no medical reason for the incontinence. The only thing we can think may have caused the incident is the treats. They were a brand new bag. She only had 4 (daily max on bag says 5). They were the Waggin Train Wholesome Duck Jerky Tenders best before Dec 20013. Other date codes include CA6693 Jun 2012 2177T028 0101WG2	4	Years	Shepherd Dog - German	Dog	80	Pound
EON-111991	1/15/2013 9:39	Milo Chicken strips	We had recently switched from a different treat exclusively to Milo Chicken strips which she absolutely loved. This went on for approximately 3-4 months during which she contracted a severe urinary infection requiring numerous visits to Vet and multiple medications. She would wake up at all hours crying and would need to go out. After 2 weeks of Bayril we seem to have gotten her condition under control. We have stopped the Milo treats. My dog has NEVER previously been sick, and never even required a visit to the vet other than normal checkups and shots. I had never seen her so uncomfortable and in so much pain.	10	Years	Shepherd Dog - Australian	Dog	50	Pound

EON-111980	1/14/2013 21:09	Eukanuba Dachshund Adult	<p>For the past 5 years I have been feeding my miniature dachshund (b) (6) (date of birth (b) (6)) Eukanuba for dachshunds. My mom, who does not reside with me has been feeding her miniature dachshund dog (b) (6) (age 6) the same food. For the past several years we have been purchasing 2 10lb bags from Petflow. At times (b) (6) will stay with us and (b) (6) will stay with my mom at which time they are both fed from the same bag of food. Until recently, both dogs have been the picture of health and have never been seen by the vet for anything other than routine vaccinations.</p> <p>On Sunday October 14, 2012 we left (b) (6) with some friends as we were going to be out of town until October 20, 2012. These friends have watched him in the past and have never had any problem. During his stay he eat his normal Eukanuba for dachshunds food. When we returned our friends said that (b) (6) had been acting strange and was not his normal self and did not really want to eat. They said he would whine when they tried to pick him up and was somewhat lethargic. When we got home we also noticed that he was not feeling well and his stomach was a little bloated and hard. He was very sensitive to the touch and would screech when we tried to pick him up. Initially we thought he was just out of sorts from being away from home. His condition worsened and on October 24, 2012 we took him to the vet. At that time the vet ran several blood tests and advised us that his liver numbers were high. And that they believed that he had a liver infection. We were asked if he had eaten anything that was dangerous to his health like mushrooms or other plants. To our knowledge he had not eaten anything out of the ordinary. (b) (6) does not typically eat things or chew things other than his own food and toys. At that time the vet put (b) (6) on an antibiotic and liver enzyme pills to help with his ailment as well as a pain pill to help with his stomach pain. At that time we did not suspect his food was an issue so he continued on his food. Although he did improve somewhat, he was not getting back to his old self. He stayed on his antibiotics for two weeks and was showing some improvement.</p> <p>On November 28, 2012, my mom's dog (b) (6) came to stay with us while she was on vacation. During this time both dogs were fed the same food from our supply. During this time (b) (6) was still not 100% On December 9, 2012, my mom picked up (b) (6) and took her home. (b) (6) seemed to continue to get sicker and on Christmas Eve he was so sick and in pain that we had to take him to the vet again. At that time the blood tests were run again and his liver count was high again. This time he was placed on two antibiotics and we were told to change his diet to boiled rice, boiled chicken, cottage cheese and Hill Prescription i/d low fat food.</p> <p>On Sat December 22, 2012, my mom called and said that (b) (6) wasn't feeling too good and was not herself. She was lethargic and not acting normal. On Dec 24, 2012 my mom and (b) (6) came to our house for Christmas and when (b) (6) got here she had the same symptoms as (b) (6) I then</p>	6	Years	Dachshund - Miniature	Dog	12	Pound
------------	-----------------	--------------------------	--	---	-------	-----------------------	-----	----	-------

			<p>thought that the only thing that the two dogs had in common is that they were both fed from the same bag of food while (b) (6) was with us in November. (b) (6) was taken to the vet (see statement from (b) (6) re details) and diagnosed with pancreatitis, and placed on a limited diet and medication. Both (b) (6) and (b) (6) vets said their conditions could have been caused by contaminated food and suggested we notify the manufacture.</p> <p>Since December 24, 2012 (b) (6) and (b) (6) have not had any Eukanuba for dachshunds, they have both been on special diets and both have made great recoveries. On January 7, 2013, (b) (6) went back to the vet for a recheck and his liver enzymes were normal.</p> <p>My normal practice for storing the Eukanuba for dachshunds is to place it in a plastic container to keep it fresh and dry. I have always done this and did not notice anything abnormal about the food. I have a sample of the food left and am trying to locate a testing facility to see if there is a problem with the food.</p> <p>Since there seems to be no other logical explanation for why both dogs became sick with similar ailments and when both were taken off of their shared food, have been healthy, it would appear to have something to do with their food.</p> <p>We are willing to allow you to have a sample for testing if you provide instructions and pay for any cost associated with the testing. It is our intention to notify the FDA with a copy of this letter and the supporting documents also. I have researched the issues related to contaminated dog food and see that it is not an uncommon occurrence. It is our desire to try to determine the cause of our dogs illness and if it is related to the food we would be hopeful that Eukanuba (Proctor and Gamble) would both take financial responsibility and attempt to determine if any other dogs were affected by this food.</p>

EON-111977	1/14/2013 19:33	Milos Kitchen home style dog treats	I have been feeding my dog, (b) (6), Milo's Chicken Jerky's for a long time 6months or longer. She had gotten sick about a month ago with vomiting, gastrointestinal issues such as vomiting up blood, her leg was so swollen that she couldn't walk on it, it was bleeding out of her leg. Very depressed state and unable to eat for a week,lost a lot of weight at the time prob 6 pounds. Took her to family doctor, then she got worse with vomiting blood, took her to the emergent animal clinical and then the next day back to my family doctor and then referred over to (b) (6) in (b) (6) for follow up on blood work. Her white blood count cells were very low and then wanted to admit her and do a blood transfusion. They were not sure what the problem was, that thought that she had eaten something that she shouldn't have. They said her blood was not coagulating for some reason They wanted to admitted her for blood transfused but I was scared and asked if there was anything else we could do for her at home. They put her on various medications,about six different ones, to treat this problem that they didn't know what it was. It took her two weeks to recover from this incident and I thought I was going to lose her. I spent about 1500.00 or more on hospital visits and doctors appt and medications only to find out they didn't know what it was, but I do believe now that it was from the Milos' Chicken Jerky she has been ingesting.	6	Years	Spaniel - Cocker American	Dog	25	Pound

EON-111975	1/14/2013 18:45	Beneful Healthy Weight	<p>(b) (6) was our 7 year old Italian Greyhound. We also have a 8 year old Schipperkee as well. we began using Beneful dog food about a year ago and noticed that (b) (6) began urinating & defecating in the house and in his crate. About the in October 2012, (b) (6) began vomiting quite frequently and often refused to eat. By November, (b) (6) would have bouts of bloody diarrhea and refuse to eat. We took him to the vet where they did blood work and stool samples and began testing him for diseases. By December, we had to almost force feed (b) (6) and within 6 months he has lost 4 pounds. While (b) (6) was never overweight you could begin to see every single bone in his body and was looking malnourished. After going to the vet at least once a week to see what was wrong with (b) (6), they sent us home with a stool hardener and some anti-vomiting medicine. (b) (6) would still not eat which made giving him his medicine very difficult. My (b) (6), (b) (6) could barely walk, refused food at all, was vomiting up to 5 times a day and had bloody stools. We've spent over \$800 in vet bills ruling out disease after disease. Soon, (b) (6) begin having an odor about him and on (b) (6) (b) (6), we took him back to the vet. The vet took one last look and (b) (6) and told us we should probably put him to sleep as his condition was deplorable. This was heart breaking...I never wish this feeling upon anyone in the world and our pets mean more to us than just animals. By the end of (b) (6) our other dog began refusing to eat...without hesitation, we took him to the vet and the vet suggested we change dog food immediately. After seeing these articles about Beneful dog food, I cannot help but think it killed our little (b) (6). Our other dog (since being on the new food) has been 100% himself. He is loving his new food, is health and active. I beg you to research the Beneful dog food. I would be more than happy to provide all of our vet bills and research testing in this research as this may save another dogs live. Please do not hesitate to contact me at the numbers provided. Sincerely, (b) (6)</p>	7	Years	Hound - Italian	Dog	9	Pound

The vet notified me of a potential issue with the chicken jerky that dog was consuming.	11	Years	Mixed (Dog)	Dog	85	Pound
EON-111946	1/12/2013 10:48	milos kitchen	I started giving (b) (6) treats made by Milos Kitchen in August 2011. She didn't like the jerky, so I started giving her the cutlets. Within two weeks after introducing each product, she refused to take the treat out of my hand. By mid September, she became listless. By the end of September, she started wetting areas that she slept in. We took her to the vet, who told us that kidney damage had started. The vet put her on medicine. We took her back to the vet after 10 days and the damage was increasing. (b) (6) our family member had to be put down because her kidneys shut down. I told the vet what I suspected right from the beginning. (b) (6) had never stopped eating treats or her regular food. We still grieve the loss of our perfect little girl. I was angered every time I saw Milos Kitchen commercials or in the grocery. I now check ALL foods that are made out of the U. S. Please stop allowing food products from other counties to enter our borders.	13	Years	Terrier (unspecified)	Dog	28	Pound

EON-111945	1/12/2013 0:03	Milk-Bone Brand All Natural Trail Mix With Real Beef & Sweet Potato	<p>After feeding our dog Milk-Bone Brand All Natural trail Mix With Added Nutrients (included as a free sample in a box of bones we purchased), he began showing signs of illness, vomiting often multiple times a day. When we stopped feeding him the food, he seemed to recover. Two days ago, after giving him some of the Trail Mix again (unaware of the connection between the food and his sickness), he again began to vomit multiple times daily. After researching online, we discovered that despite the "Made in USA" label on Milk-Bone dog treats, they are in fact made from ingredients in China. When reading the many reports of dogs becoming ill and dying of Chinese dog treats, we became very concerned, and have stopped feeding him the dog treats and are hoping for a full recovery soon. The FDA should be more strictly regulating Country of Origin Food Labels to specify where each ingredient was found.</p>	7	Years	Papillon - Spaniel - Continental Toy (with erect ears or with dropped ears (Phaléne))	Dog	9	Pound
EON-111942	1/11/2013 20:00	Purina Dog Chow Active Life	<p>Bought a new bag of Purina Dog Chow Active Life 12/30/12. Fed it to her on 12/31/12 @ 7 pm. On 1/1/13 at 5:45 am she began vomiting. She continued vomiting though out the day. On 1/2/2013 she refused to eat and could not keep water down. Bought her into the emergency Hospital on 1/3/13. They performed x-rays. blood work and noticed she had a slightly elevated temperature, they gave her sub-q fluids and an injection of Cerenia and sent her home. On 1/3/13 her symptoms worsened as she refused all food and water and would not get up without coaxing. On 1/5/2013 in the am she began stumbling until she collapsed on the floor. At that point we rushed her back to the emergency hospital where she spent the night. Her temperature at the time she was admitted was 104.5. The doctors gave her IV fluids immediately. Since her tests came back negative for urinary infection and tick born infection. Her x-rays were all negative. The doctors do not know what exactly caused the episode.</p> <p>I have a second dog who refused to eat the food altogether and did not get sick. I tossed out all the food and bought a different brand from another company which both dogs are eating and doing fine.</p>	7	Years	Mixed (Dog)	Dog	55	Pound

EON-111938	1/11/2013 16:33	Milo's Kitchen Chicken Jerky	<p>I gave my Beagle some Milo's Kitchen Chicken Jerky treats in the afternoon and early evening of 1/2/13. He would not eat any food for dinner and then he began moaning as if in pain in the late evening of (b) (6). I thought that his teething may have been the cause. He moaned all night long and by morning on (b) (6) his moans began being followed by barks. Again he would not eat. I called for the earliest appointment with his veterinarian and got scheduled for early afternoon on (b) (6). He threw up five times before leaving for the appointment and moaning/barking continued. I noticed chunks of Milo's Kitchen Chicken Jerky in his vomit. Once at the vet's office, his condition became increasingly worse. They ran several tests including Parvovirus, CBC, Chem. profile/electrolytes, radiograph and intestinal parasite screen, but could not determine what was wrong. They suspected it was some sort of toxin from something he had ate, but blood work came back normal. He was terribly weak and seemed to lose his vision. He no longer moaned, just barked profusely as if in terrible pain. The vet gave him fluids, steroids and antibiotics and sent him home with instructions of how to care for him during the night. I was to update the vet with his status first thing in the morning. When I got him home, he was even more weak. He could barely stand, and when he tried to walk he would stumble as if he was intoxicated. He began urinating uncontrollably and vomiting returned as well. He developed diarrhea later in the night and at this point, he would cry out in pain with a bark with each and every breath. This continued throughout the night until the early morning of (b) (6). I gave him his oral antibiotic, Clavamox, as instructed by the vet, but his condition had not improved. I tried to contact the vet but had to leave a message instead. Without wanting to wait, I then took him to a local pet hospital. He was tested again for Parvovirus and it came back negative. He then passed away, at about 10:20am on (b) (6) before any other tests could be performed. The hospital offered to perform an autopsy and I gave them the go ahead. The autopsy determined that his heart, lungs and liver seemed to be normal. He had small traces of round worm in his stomach, but not enough to cause any serious bacterial infections. A very small bone was found in his stomach as well, but they said it was not blocking anything, nor did they think it could have due to its small size. They concluded that he must have ingested something toxic, but they did not have the required equipment to test a tissue sample to determine the exact cause. Whatever the cause, it took hold and ended his life within 36 to 48 hours.</p>	7	Months	Beagle	Dog	10.5	Pound

EON-111926	1/11/2013 14:48	Canyon Creek Ranch Brand Western Style Cowboy Steaks	Dog, (b) (6), ate 1 Canyon Creek Ranch Cowboy Steak, made with chicken jerky, on 1/6/13. The next day, 1/7/13 he began experiencing the following symptoms, vomiting, diarrhea and loss of appetite. He experienced these symptoms until 1/11/13 and has no recovered fully. He was taken to the veterinarian on 1/9/13 and his vitals came back normal and they indicated it must be something he ingested. Outside of his normal food, this treat was the only thing he consumed.	6	Years	Chihuahua	Dog	5.5	Pound
EON-111910	1/11/2013 12:45	Waggin Train Chik'n Biscuits Recipe	(b) (6) was given Waggin Train Chik'n Biscuits Recipe dog treats within 60 days of her getting very sick, eventually, she wouldn't eat, but she continued to eat the treats. I did not know that I was continuing to hurt her health by doing so, but since she wouldn't eat anything else, I thought something was better than nothing. I have read all of the consumer report online postings of over 145 individuals that gave their dog these same treats, they all have complained of the same symptoms that my dog experience. I can't help but think that this could not be a coincidence. The single number one symptom that occurred with all of these dogs was that they would no longer eat, something in the treats, was poisoning their system. My dog started vomiting, had diarrhea, kidney issues of constantly drinking water and urinating. Later, as she continued to get sicker and sicker, she began to pant heavily, shaking, gurgling in her stomach, became sleepy and had low energy level. The vet diagnosed her with a kidney failure. I did not know at the time that the China made treats were being recalled at the time and did not suspect them as the cause of my dog's illness. Only as of November 9, 2013 did I hear about the recall on my local news channel in (b) (6). I am just heart broken that my little dog is gone, that something that was to be a treat, apparently helped to end her life or did end her life	12	Years	Shih Tzu	Dog	15	Pound

EON-111888	1/10/2013 22:33	Dingo Dental Mega Bones	<p>Saturday 12/29/12: gave her a newly opened Dingo Dental Mega Bones. After she ate half of it I took it away from her to save for the following day.</p> <p>Sunday 12/30/12: I gave her the remaining half of the Dingo Dental Mega Bone and she finished it.</p> <p>Monday 12/31/12: she ate dry dog food in the morning as usual but by that evening she was uninterested in her dry dog food dinner and would only eat some dry dog food with coaxing. This is unusual for her.</p> <p>Tuesday 1/1/2013: early in the morning she defecated in the house. She has never done this before. When she was outside she was lethargic and eating grass. She refused to eat her dry dog food breakfast. I offered her yogurt and she refused that too. That also has never happened before. By early afternoon she was vomiting white, foamy bile and grass, at least 3 times. She wouldn't leave the yard when I tried to walk her. By mid-afternoon she defecated bloody diarrhea in the house.</p> <p>Between 4 and 10pm she vomited white, foamy bile 3 more times and eliminated a blood (75%)/water (25%) mix from her rectum every 45-60 minutes 6 times. All evening she was lethargic, lying down, shaking, with her eyes half open. I got 1 dose of Pepto Bismol into her.</p> <p>Wednesday 1/2/2013: She was given a second dose of Pepto-Bismol and continued to drink water and urinate - but she continued to refuse to walk or eat (dry dog food or yogurt). By later in the day she was standing/walking again without coaxing and wagging her tail.</p> <p>Thursday 1/3/2013: She was given a third dose of Pepto-Bismol and continued to drink water but refused her morning dry dog food. In the evening she finally ate a small serving of boiled fresh chicken and white rice. This was her first meal since Monday 12/31.</p> <p>Friday 1/4/2013: She had bloody diarrhea in the house twice and urinated in the house twice. Food was stopped again and an appointment was made with the veterinarian for the following morning.</p> <p>Saturday 1/5/2013: She woke me to go outside 3 times between midnight and 6am and eliminated more bloody diarrhea. More bloody diarrhea on the way to the vet. The vet who examined her said she was mildly dehydrated. Fecal and blood tests done. Red blood cells (PCV) were elevated at 65%. I was told she had Hemorrhagic GastroEnteritis (HGE). The vet offered to admit her but because it was the weekend staff would only be in the office to administer medications, not for observation. I was given instructions to withhold food for another 24 hours, administer 150ml of saline subcutaneously two times per day and give the following medications two times per day: Sucralfate 1gm, Metronidazole 250 mg, and Amoxicillin 250 mg. I was also given Cerenia 60 mg tablets to administer in the event of nausea. The bill for her services was \$240.41.</p> <p>Sunday 1/6/2013: Saline and medications continued as instructed. No elimination. Small amounts of fresh, boiled chicken and white rice were given. She tolerated it well.</p>	9	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	40	Pound

			<p>Monday 1/7/2013: Saline and medications continued as instructed. Slightly larger amounts of fresh, boiled chicken and white rice were given. She tolerated it well.</p> <p>Tuesday 1/7/2013: Saline and medications continued as instructed. Small amounts of her regular dry dog food were added to the fresh, boiled chicken and white rice. She has had her last dose of Sucralfate. She is to be on the Metronidazole and Amoxicillin until Tuesday 1/15/2013.</p>						
EON-111887	1/10/2013 22:33	waggin train chicken jerky	gave my dog the waggin train chicken jerky nod Milo's chicken jerky for the past year, now my dog has liver problems associated with the treats.	2	Years	Maltese	Dog	5	Pound
EON-111882	1/10/2013 20:33	Waggin Train Wholesome Chicken Jerky Tenders	I have been feeding the Wagon Train chicken jerky treats for years. About 6 months ago I increased her treat to a full treat instead of a small amount. In Sept/Oct she was diagnosed with Kidney Failure. I have been told that she has months to live and I give her fluids everyday. I had NO idea the risks of these treats as they are available at Wal Mart. If there is a problem you should pull these off the shelf!	6	Years	Mastiff	Dog	195	Pound

EON-111878	1/10/2013 16:39	Milo's Kitchen Chicken Jerky	On Jan 3 2013 at 5:00am, (b) (6) was whining and woke me up. I found that she had pooped in the house, near the door. The stool was partially formed and then a lot of liquid diarrhea. I let her outside and she had explosive liquid diarrhea. She had no change in her food or the possibility of getting into anything. She acted fatigued and disinterested and slept the rest of the morning. I went home at lunch and she continued to have moderate amounts of liquid stool. That night she stopped multiple times on her walk for small amounts of liquid stool. I fed her some rice with a small amount of soft food later that evening. She was fine through the night and ate breakfast in the morning and was acting her normal self again. I gave her some chicken jerky when I put her in her crate for the day. When I got home she had 2 large liquid stools in her crate. She continued to have medium liquid stools that evening. I gave her a Pepto-bismol that night and only gave her small amounts of food over the weekend. Her stool returned to normal and she was behaving normaly. I did not give her any treats all weekend. On Tuesday 08 January she was given a couple of pieces of the Milo's chicken jerky. On Wednesday 09 January, she again woke me up in the early morning to have explosive diarrhea. I felt like there was something wrong with that bag of treats but couldn't quite figure out what other than to say that I couldn't find a big whole piece in the bag. They all seemed small and odd pieces. I suspected there was something off but then just saw the news report about the recall and I will definitely not feed her any more.	4	Years	Retriever - Labrador	Dog	42	Pound
EON-111861	1/10/2013 12:09	Milo Kitchen Chicken Jerky and Chicken Grillers	I was picking up my 1 year 8 month old puppy when I noticed she had some diarrhea in her crate, upon inspection it was a massive amount. Upon learning this I called her vet and we collectively decided to monitor her for the night. Upon getting her home and she went outside to poop, she had more diarrhea this time it had blood. Her regular vet was closed so I rushed her to an emergency vet and they decided she had some gastrointestinal "bug" so she was sent home with antibiotics. We followed up with her regular vet the next day and a fecal sample was submitted. My pup does not normally have a sensitive stomach, so it was out of the ordinary she had diarrhea especially had it all over her crate.	1	Years	Collie - Border	Dog	31	Pound

EON-111842	1/9/2013 21:00	MILO'S KITCHEN CHICKEN GRILLERS	Each time had one was never fully digested it and would vomit piece of Milo's Kitchen Chicken Grillers in same size it was eaten as. Would occur within 2-3 hours after having treat. First couple times thought was activity she was doing after treat of running, but put bag to side and rarely gave to her, had just recently in last 30-60 days purchased this and out of the 6 or so times given to her she has vomited it up hours later.	6	Years	Maltese	Dog	13	Pound

EON-111840	1/9/2013 17:45	Waggin Train Chik'n biscuits	<p>(b) (6) had been having stomach issues with vomiting, diarrhea, lack of appetite, and not her usual happy self. She had been to the Vet various times but we never really knew what was wrong. In (b) (6) of (b) (6) she got worse and was at the Vet hospital for about 10 days before her organs finally shut down. They did everything to try to save her but she was suffering too much and I decided it was time to put her to sleep. I never realized that it was the Wagon Trail Dog treats (chicken biscuits and chicken jerky) until we got another dog and noticed the same yellow vomit, diarrhea and other symptoms after feeding him the treats about two weeks ago. I then had a conversation with an acquaintance that have the very same experience and had one of her dogs recently die. She said she reported it with with the manufacturer and FDA, so I felt it was my duty to report it too.</p>	3	Years	Terrier - Yorkshire	Dog	3	Pound
EON-111839	1/9/2013 16:48	Nutro Lite Lamb and Rice formual Dry Dog Food - new and Improved formula	<p>Here is the email I sent to Nutro directly which I believe explains the issues well. Please feel free to contact me should you require any further information.</p> <p>Have been feeding our dog your Nutro Lite Lamb and Rice for years (she is now 9) and there would appear to be something terribly wrong with your recent formulation change (Nov 2012).</p> <p>Between Thanksgiving and Christmas we diligently followed a phased approach to weaning her onto your "New and Improved" formula and she went from eating her food to barely touching it, to not touching it at all by Christmas Eve 2012.</p> <p>Then came the disorientation, the equilibrium issues, the vomiting etc, to the point where she appeared to age five years overnight. She could no longer navigate steps and even had difficulty standing at all. We were convinced she'd be dead on Christmas.</p> <p>In desperation my wife did some web searching and found numerous similar complaints about dogs having trouble with your new formulation of food. We immediately removed her from your food and began home cooking food at our Vet's suggestion and she made a dramatic improvement.</p> <p>Unfortunately she still refuses to navigate steps which is proving to be an issue but one we'll gladly deal with so long as we can keep her alive.</p> <p>We returned all the new formula of your food to our local Petco in (b) (6), (b) (6) and will no longer be using your food.</p> <p>I strongly suggest that you look into this matter further and consider pulling the food off the shelves until such time that the food can be examined and the cause of our and others problems can be thoroughly understood.</p> <p>Please feel free to contact me directly for any further information you need relative to this concern.</p> <p>Sincerely, (b) (6)</p>	9	Years	Retriever - Labrador	Dog	60	Pound

EON-111838	1/9/2013 16:33	Milos Kitchen Home-Style Dog Treats Chicken Jerky, Waggin Train Wholesome Chicken Jerky Tenders	After beginning a regimen of 1 small chicken jerky treat (Waggin Train) on a daily basis I noticed that the animals (I have 3 dogs, 2 cats) began drinking more water than usual. I assumed this might be due to one of the ingredients in this specific treat so I began alternating it with several others containing beef or other ingredients and prepared differently than the jerky. I also tried another brand (Milos Kitchen) to see if it made a difference. It did not. Recently, within the last week, one of the animals (Leo) began acting lethargic, diminished appetite, and sleeping more than usual. At that point I began surfing the web to look for information and discovered that your agency was conducting an investigation into these products. I then contacted the manufacturers and inquired about any action they were taking. I did receive a response from Nestle (Waggin Train) offering me a full refund on what remained of their product and informing me of what I already knew about the investigation. They did emphasize that this was a "voluntary" action and that no official recall had been instituted. As of this writing I have not received a response from the makers of Milos Kitchen products.	10	Years	Mixed (Dog)	Dog	8	Pound

EON-111834	1/9/2013 15:54	Pedigree-meaty round dinner, Pedigree, Pedigree-chopped beef	<p>While treating the esophagus I cooked her meals of chicken and rice. After about a month of this I decided to try some can dog food to see if it would stay down without the throwing up returning. I bough Pedigree can dog food. She ate it, she liked it, it stayed down, so I bought more. Between December 31, 2012 to January 5, 2013, she ate 8 different cans of Pedigree and had 6 seizures. First one on December 31, 2012 she was lying down and tried to get up. It was like her front legs were having cramps and she couldn't get up. That didn't last long so I really didn't suspect anything serious. Then on January 1, 2013 we were out walking and 2 times in a 27 minute period she staggered to the right, as if someone had punched her. Her left legs kept trying to walk, but it was like a swimming motion and she couldn't get her footing. This was brief, she continued walking as if nothing had happened, then the second time was the exact same way. Took her to the vet on 1-3-2013 for follow up X-rays on esophagus and a new vet in the office, not my normal one I see there, diagnosed her with an ear infection. I got her home and she had a terrible staggering spell, came walking down the hallway leaning on the wall with her body to hold her up. January 5, 2013 she was asleep in the bed with me it was 1:30 a.m., I was watching TV. Suddenly she jerked her head up wild eyed and scared looking, tried to crawl to me, couldn't. I grabbed her, she began jerking all over. Body spasms, head jerking all around, she was breathing hard through her nose, eyes wide with fright, this lasted 3 to 4 minutes. After she quit jerking she seemed afraid but okay. Then at 3 a.m. she had a repeat of the 1:30 episode. So back to the vet she went on January 5, 2013. He ran a serious of test, x-ray lungs and heart for possible Congestive Heart Failure, talked about a Cat Scan of her brain. Gave her a water pill to take twice a day. I had a friend tell me about a dog her daughter had who had seizures due to dye in some foods. So I immediately decided to stop the can food and go back to cooking for her. I searched the internet and found a lot of complaints on Pedigree. One woman in California wrote on Consumeraffairs.com about her 6 year old dog having the exact same symptoms as (b) (6). But she had dry dog food, not the canned food. (b) (6) has not had any Pedigree since Friday evening January 4, 2013. The Last seizure was January 5, 2013 at 3 a.m. She is now acting normal and bouncy, have not seen any sign of staggering, spasms, or seizures. She is a house dog and does not go outside unsupervised.</p>	12	Years	Mixed (Dog)	Dog	33.4	Pound

EON-111830	1/9/2013 12:03	Blue Buffalo canned/dry food (feline maintenance)	<p>The owner has several cats currently eating Blue Buffalo canned/dry food. EON-111825	1/9/2013 1:00	Canyon Creek Ranch Brand Duck Tenders	<p>Petco</p> <p>I recently purchased "Canyon Creek Ranch" brand "Duck Tenders" by manufacturer "Waggin' Train" from a Petco store in (b) (6). I have been purchasing products from Petco stores for my Yorkshire Terrier since we got her as a puppy a year ago. I thought that this would be a nice treat for her training needs. I purchased a bag and began "rewarding" her with a jerky treat about once a day (instructions tell me that I can give more, but one is enough). After only two days, my Yorkshire Terrier began to exhibit severe vomiting and diarrhea lasting through the second evening, night and into the next morning. She became lethargic and unresponsive that next morning. She was immediately taken to her veterinarian who began a treatment based on the symptoms and product description (we brought the product to office with us). Our terrier ((b) (6)) was placed on intravenous medication to flush her system and reverse renal failure. On her 2nd day of treatment to try to bring her out of renal failure. Treatment was continued for two days until the pet stabilized. The only change to our pets very stable diet was the introduction of these treats. Our Veterinarian recommended that we not ever use pet food that had been imported from China. I contacted "Waggin Train" via telephone, as well as their website and facebook page. I also have contacted Petco, where we purchased the product. After some research on the internet, it appears that this is a well known issue with this product, and has even been reported by the FDA.</p>	12	Months	Terrier - Yorkshire	Dog	5	Pound

EON-111824	1/8/2013 23:48	Purina Beneful Healthy Radiance	We started mixing Beneful with her old food, Science Diet, to save costs beginning in May 2012. Eventually the Science Diet was gone, and she was only eating Beneful. Nov. 6, she ate a whole bowl and vomited. She vomited 4-5 times that day. She barely ate at all the next week. Nov 13 she vomited all day again, 4 - 5 times. She still wasn't eating. Went to the vet Wed. Nov 21. WBC count was high (17) with high neutrophils. Liver enzymes elevated. Started antibiotic. Saturday, Nov 24, she almost died - wouldn't eat or drink, feverish and lethargic all day. Next couple of days, she'd drink, but still wouldn't eat her Beneful. Wed. Nov 28, went to the vet again, and started on chicken and rice diet. She was STARVING for decent food. Vet diagnosed pancreatitis based on her species specific canine specific lipase = 649. Normal is up to 200. Suspicious is 200 - 400. Over 400 is diagnostic for pancreatitis. She is recovering beautifully on home cooked food and raw meaty bones.	8	Years	Mixed (Dog)	Dog	34	Pound
EON-111823	1/8/2013 21:45	Kirkland Signature Super Premium Adult Dog Chicken Rice & Vegetable Formula (maroon 40lb bag from Costco)	My female Labrador has been eating Kirkland Superior Premium Adult Dog Food Chicken Rice and Vegetable Formula since June of 2012. We bought a new bag on 12/17/12 and started feeding it to her on 12/23/12. She has been throwing up a lot and has had terrible smelling gas. We checked some of the uneaten food on the evening of 1/8/13 after our dog vomited immediately after eating. She didn't eat the food we gave her that morning. The kibble smells very odd. We have saved some in a zip lock bag and returned the remainder to Costco. We have recorded the manufacture information from the bag. I researched this food and a lot of people have been claiming their dogs have been getting sick recently from this food and several have claimed their dogs have died. This brand was subject to a recall in May of 2012 but our dog was on a different brand at that time (puppy food).	19	Months	Retriever - Labrador	Dog	63	Pound
EON-111818	1/8/2013 20:18	Wagon Trail Chicken Treats	(b) (6) began to lose weight over a month long period from January 1, 2012 to February 4, 2012. She became disinterested in food and increased her water intake. We had been using the Wagon Trail Chicken Jerky treats for a period of months before this. Her condition was somewhat gradual in that we did not notice a sudden change - a month long questioning about her weight became serious when she finally refused to eat at all. She had been active, vital, muscular and absolutely no health problems whatsoever. We took her to the vet, a blood test revealed kidney failure and within 2 weeks she was gone. Chicken treats are the only suspect. Although she was eleven, many of her 10 siblings are still thriving. She was by far the youngest looking for her age. No way to know if the chicken treats were the cause as I learned of this issue soon after her passing as I was sharing our story.	11	Years	Mixed (Dog)	Dog	78	Pound

EON-111722	1/6/2013 20:09	Milos Chicken Jerky	Over the period of a few weeks we fed Milos chicken jerky to our dog. He became ill and had bloody diarrhea, vomiting, lethargy and loss of appetite. We took him to the vet and they checked his blood. His liver enzymes were over 1500. They put him on a medication to help lower his enzymes and gave him something for the diarrhea. We took him back in for a 2 week checkup of his liver enzymes. They were cut in half by the medication. He was feeling better. We gave him more treats, not knowing that was the thing causing the problem. He passed away 4 days later.	15	Years	Retriever - Labrador	Dog	58	Pound
EON-111721	1/6/2013 17:03	Before Grain Chicken 5.5 oz Cat	I opened a can of cat food and there was severe mold on the food. I noticed that the can did not make a noise if it was vacuum sealed. I started going through other cans and they were not sealed, if you pressed on top of the lid the lid would cave. I have encountered at least 20 out of 48 cans from the 2 cases I purchased.						

EON-111720	1/6/2013 17:03	Kirkland Signature Mature Dog Food	I have been feeding my dogs Kirkland Mature Dog for years and the dogs seemed to like it however the bag that purchased in Dec 2012 the dogs would not eat. I thought they were just being finicky so I mixed wet dog food in it so they would eat. (b) (6) would eat all of his food however my other dog would only eat the wet food. A few days after he started to eat the new food he appeared to be having problems with congestive heart failure. The vet stated that his liver and spleen were enlarged and his lungs were filling with fluid. We thought this was his congestive heart failure worsening so we put him down. My other dog did finally start eating some of the dry food 12/27 - 12/30 however ate very little. She stopped eating completely on 1/2/2013 and I took her to the vet on 1/4/2013. The vet said she has an enlarged spleen. She is an older dog so we thought this was her aging process however the fact that they both would not eat the food and both have spleen issues a few days after makes me wonder if something is wrong with the dog food. Is there someplace I can send the food to be tested?	11	Years	Bulldog - American	Dog	105	Pound
EON-111718	1/6/2013 8:24	MILO'S KITCHEN chicken treats and chicken meatballs	Prior to consuming MILO'S KITCHEN chicken treats and chicken meatballs, Iris was a very healthy, very active 4 year old 11.5 lb miniature dachshund. I noticed she was drinking and urinating more often which is a sign of diabetes. As an RN, I was able to check her urine and it showed trace glucose in her urine. She was brought to the Veterinarian for a complete physical and blood workup. Her blood glucose was within normal range however her urine still showed glucose. The veterinarian discovered via the FDA these symptoms were appearing on pet foods manufactured in China and MILO'S KITCHEN was among the culprits. Iris is now continuing with (Polydipsia and Polyuria) , listless and has to be coaxed to eat. There is a toxin in the food manufactured in China that causes kidney dysfunctioning and large polymers such as glucose are not able to filter through the kidneys. This excess glucose causes increased thirst, increased urination, listlessness and predisposes the animal to increased risk for infection. MILO'S KITCHEN is directly responsible, and should be held accountable for the compromised and deteriorating health of an otherwise healthy dog. I will be using social media to spread the word to NEVER USE ANY ANIMAL PRODUCTS MADE IN CHINA ESPECIALLY MILO'S KITCHEN.	4	Years	Dachshund - Miniature	Dog	11.5	Pound

EON-111582	1/3/2013 13:45	CHEWMASTERS Chicken Strips	<p>Gave our dog Chicken Jerky treats made by Chew Masters, obtained from Costco. The next day our dog became sick, symptoms worsened with time. Symptoms include vomiting, diarrhea, diarrhea with blood, lethargic, excessive thirst. He did still have an appetite.</p> <p>Took him to the veterinarian, they analyzed a stool sample, placed him on an easy to digest diet, and gave him a week's supply of antibiotics. The veterinarian could not determine what the cause of his illness was. The stool sample was negative for parasites.</p> <p>He became better after he was on his special diet and not eating his normal food or treats. We reintroduced his normal food slowly. He was doing well. Once he was completely off the special diet, and fully on his normal diet, he was still doing excellent. We reintroduced his treats (chicken jerky) and he instantly became sick again.</p> <p>We placed him back on the special diet and he eventually regained normal health. We did not give him any more chicken jerky treats. He has been on his normal food for approximately 1.5 months and he is doing great. It is very clear that the cause of his illness was the chicken treats, as we have returned him to his normal diet; the only thing that has changed is the absence of the chicken jerky treats. He has consumed chicken that was cooked for human consumption, and had no reaction to the cooked 'human' chicken.</p>	1.5	Years	Poodle - Standard	Dog	50	Pound
EON-111561	1/2/2013 22:57	WagginTrain Wholesome Chicken Jerkey Tenders	I received these treats from my sister for a Christmas present for my dog and I gave her one right after Christmas and she had some loose stools but I did not think too much of it as she is an older dog and sometimes that has happened, but then this past weekend I gave her one on Saturday and one on Monday and then she got severe diahreah and did not want to eat.	15	Years	Spaniel - Cocker English	Dog	44	Pound

EON-111517	1/2/2013 13:30	Milo's Kitchen® - Home-style Dog Treats	Shortly after buying the product Milo's Chicken Jerky Treats (for dogs) we realized our dog was getting skin irritation (an allergic reaction of some sort), where he started getting scabs on his skin and itching them profusely. This went on for a couple of weeks. The last episode happened when he was given his last treat of Milo's Chicken Jerky and he froze and looked in pain. He started whimpering and could not move, he was frozen like a popcicle but kept crying like he was being tortured. At first we thought he was choking and maybe had the treat stuck to his throat. We took him immediatly to the Vet Hospital where his X-rays came back normal and there was nothing in his air vent. We are still waiting on the test results. Our vet advised us to keep our dogs from any jerky treats made in China because they are making dogs very ill. Our dog is doing much better today after we stopped feeding him the treats. His coat is much healthier and he stopped biting/itching himself.	5	Months	Maltese	Dog	7	Pound

EON-111479	1/1/2013 23:06	Kirkland Super Premium Adult Dog Lamb Rice & Vegetable Formula	The dog (goldendoodle) started vomiting and became very lethargic. He didn't eat for a couple of days, and drank little. He started to rebound after about three days, becoming more energetic and hungry. We fed him the Kirkland dog food again (It was a new bag), and within a few hours he began to vomit again. The next day he was very depressed, and vomited multiple times and had no interest in eating or drinking.	2	Years	Other Canine/dog	Dog	80	Pound
EON-111478	1/1/2013 15:27	meijer main choice chicken jerky for dogs	Gave chicken jerky, without knowing that there was a problem, days later the symtoms started of not eating, a little vomit and diarreha, and over the course of the next month and a half condition worsened until had to be put to sleep on (b) (6)	4	Months	Chihuahua	Dog	6	Pound

EON-111477	1/1/2013 15:21	Kirkland Super Premium Sweet potato and salmon	<p>For over a year we have been feeding our two dogs Costco Kirkland Salmon & Sweet Potato dry food along with Kirkland canned dog food. A week and a half ago I bought a new bag of the dog food and new cans of the dog food. Within 24 hours both our dogs threw up & had had very bad diareah. The older dog, 5 year old (b) (6) began to feel worse very fast and was much more quiet than usual. We took him into our vets office for treatment. They 1st did a check of his stool and found a hi level of bacteria. He was put on antibiotic pills and sent home. He seemed to get better for a few days then started to fall apart again. While he was home we fed him only special bland canned dog food from our vets. This time when he started to feel bad it was much worse and he became very weak, turned down food and water, & began throwng up again, . We took him in to the vets, they injected him with fluid via an i.v. They also put him on i.v. antibiotics, he did not show any improvement over a few days. A blood test was taken and it showed trouble with his liver and kidneys as well as bacteria in his blood. He remains at the vet's office but does seem to be looking better. We will see him again tomorrow. After we took him in the vets I called Costco corporate office to tell them about (b) (6) troubles. They asked me for the bad i.d. number for the dog food, but I told them I threw it away as I always place new dog food in a bin at home. The 1st person I talked to at Costco told me that they just announced a new recall of dog food within the past week. The next time I called Costco later that day I tried to speak to the same woman as she gave me her name and extension. My call to her extension was transferred to another Costco rep. I told them my story and asked to speak with the woman I spoke with earlier that day. The Costco rep told me that the woman I spoke with earlier had made an error and that there is no new recall for the dog food. Every time I tried to reach the 1st woman I spoke with my call was transferred to a new person. They confirmed to me that I bought the dog food under recall earlier in the year, but the last bad I bought was is not on a recall list. I imagine there is a chance that the LAST of the older dry food was fed to the dogs the day before they ate from the NEW bag I bought recently. I still have all the dry dog food in the bin at my home. I am sure there is some of the OLDER dry dog food at the bottom of the bin - maybe dog food that was under the recall.</p> <p>Today I looked at the website dogfoodadvisor.com and there are posts by people saying that there may be a brand new problem with Costco's dog food - several dogs sick, at least one dead - all within the last two weeks (December 2012) - same time frame of our problem. So far we are out \$1800 and will have at least \$300 more for (b) (6). Like many dog owners, we believe (b) (6) a member of our family. He showers us with love and devotion every day and we hope he gets better very soon. In terms of our other dog who also ate teh same food, (b) (6) our three year old female Airedale is concerned, she threw up and had diahrea and the same time as (b) (6) at the beginning of</p>	5	Days	Terrier - Airedale	Dog	47	Pound

			the problem and she threw up in the middle of the night last night. Other than that she seems fine right now.						
EON-111476	1/1/2013 13:06	Waggin Train Wholesome Chicken Jerky Tenders	I purchased Waggin Train brand chicken jerky dog treats from my local Ingles supermarket. I gave my dog (b) (6) two pieces the first day and that night he awakened me throwing up a yellow slimy material. Otherwise he acted normal. Two days later I gave him another treat and within four hours he was throwing up again. Same vile yellow substance. He threw up two more time and now his right lips and part of his muzzle are reed and inflamed looking. He is lethargic and doesn't act like he feels well at all.	17	Months	Hound (unspecified)	Dog	71	Pound
EON-111475	1/1/2013 12:36	Chicken Strips from Trader Joes	Both times she ate chicken jerky, She first started shaking and panting very fast, she then started scooting all over the floor, but it seemed that she could not stand up. She continued to shake and then threw-up blood and some dark yellow color, then she urinated, and had very severe diarrhea. Her eyes were very glassy and her pupils were very large. After about 20 minutes she was able to stand again. However, she was not herself for days. She still had diarrhea and could not keep food down. She was very quiet, weak and had a hard time holding her urine.	10	Years	Terrier - Jack Russell	Dog	14	Pound
EON-111474	12/31/2012 21:51	Canyon Creek Ranch® Chicken Tenders Dog Treats, Canyon Creek Ranch Cowboy Steaks Dog Treats	After feeding my Akita (100lbs) 3 of the Canyon Creek cowboy steaks she became extremely ill within hours! She started vomiting uncontrollably and than defecated and urinated at the same time. This was the second day she had the treat. I had previously tired Canyon Creek Chicken Tenders with her and that too made my dog ill with diarrhea. After doing some research online I found many websites with the same complaints. How can you allow PetsMart and other national stores in the US carry such a terrible product!! What a horrible experience my family and pet had to endure. No family should have to deal with this!!	6	Years	Akita	Dog	100	Pound

EON-111471	12/31/2012 21:30	Waggin' Train Chik'n Biscuits Recipe wrapped with chicken breast	Was fed 2-3 Waggin' Train Chik'n Biscuits Recipe treats on Christmas morning and within an hour, she went into a type of seizure where her eyeballs rolled into her head and her head was twisting to the left side uncontrollably. She couldn't stand and fell into an end table in the living room. We got her to sit and tried comforting her and petting her while we were completely confused about her condition. After a couple minutes her body began to relax, her eyes began to focus and she started panting. We then called the Vet who listened to these symptoms and asked us to keep her quiet and watch for recurring seizures or a pattern that he might evaluate. There have been no further episodes. We began thinking that these treats might be the problem and in researching this product have seen many complaints about this company specifically (Waggin' Train) and the health issues for dogs consuming their products, mostly those with chicken jerky imported from China. Just wanted to let someone know of our experience with this product for future health pet concerns.	10	Years	Shepherd Dog - Australian	Dog	65	Pound

(b) (6) gt severely ill after eating from the same batch which I saved & accidentally gave him, he was hospitalized Aug. 4 2010. (b) (6) passed away (b) (6) from Lymphoma. Now (b) (6) has failing kidneys....I have connected the dots & it points to Purina.	12	Years	Bengal	Cat	8	Pound
EON-111430	12/30/2012 10:06	Purina Tiny Bones	Christmas i gave my 3 poodles the Purina tiny bones as a gift. i gave them 2 a day. 2 days later (b) (6) had severe diarrhea and throwing up. I made an appt for Jan 2nd at my vet, but (b) (6) died the next day Saturday (b) (6). We found around our house the treat still intact but the outer part(white part) gone(in their fecal matter). We discontinued given them the treat on Thursday the 27th cause of all the diarrhea. All 3 eat the Cesars canine cuisine for years(no problems) Their treat was the Pup Peroni for years(no problems) I gave them the tiny bones and (b) (6) dies and the 2 others are recovering with lots of water and no more tiny bones. I just want to make a note of this in case there are any other problems with the product. Thank You (b) (6)	17	Years	Poodle - Toy	Dog	12	Pound
EON-111429	12/29/2012 15:51	Kingdom Pets Chicken Jerky	I purchased Kindom Pets chicken jerky products. My husband wrapped 3 bags to give to neighbor dogs and left them on the counter. They each had approximately 6 treats in them - 18 total. We left the house and my dog took them off the counter, opened the bag and ate them all..approximately 18. Being that they are supposed to be a 100% chicken product, the dog should not have gotten sick but he did. For approximately 48 hours he had severe diarrhea, vomiting and bright red blood in his stool and he could not control his bladder and peed all over. Obviously there is something other than chicken in this poisonous treat. from CHINA. After some internet research, I have learned that this has been going on for several years, yet the FDA does nothing to take this poison of the market...WHY????	2.5	Years	Poodle - Standard	Dog	70	Pound
EON-111428	12/29/2012 14:51	Dogswell Chicken & Sweet Potato	My Yorkshire Terrior became very ill ... and I had to take her to the emergency vet at 2:00 AM. She had vomited 3x the evening before. She was very lethargic the 24 hours prior. She had diarrhea the evening before. By 2:00 AM, her breathing had become labored and I found an "accident" where she had blood in her stool (and it was runny). When I took her to the vet, she was almost dehydrated. If I had waited til morning, the vet would have most likely put her on IVs.	6	Years	Terrier - Yorkshire	Dog	10	Pound
EON-111427	12/29/2012 14:30	Waggin' Train Apple & Chicken Wraps	I gave her 1 treat 12/24/12, around 2:00 pm, my husband gave her 1 treat around 2:30. She then would not eat her dinner that night or breakfast the next day. I know she vomitted outside at least once, possibly more. She did start eating again the evening of 12/25/12.	5	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattedog)	Dog	51	Pound
EON-111426	12/29/2012 14:15	Waggin' Train Apple & Chicken Wraps	I gave her 3 treats, she vomited 3 times in the house during 2 days. I'm not sure if she vomited more outside. She still wanted to eat, but not her usual amount.	11	Years	Retriever - Labrador	Dog	66	Pound

EON-111423	12/28/2012 21:42	waggin train wholesome chicken jerky tenders	She started having seizure like actions and then basically collapsed. Took her to emergency vet clinic who advised she was bleeding internally and also had cancer. At that time i chose to euthanize her. I strongly believe that the irradiated waggin train dog treats had some degree of cause for her sudden decrease in health and death. She had been eating the treats for a while then suddenly started refusing to eat them and within a month she was gone. I do not know if these treats have always been made in china and have always been irradiated but i have noticed a different texture and structure to the treats in the past several months.	12	Years	Beagle	Dog	45	Pound
EON-111262	12/28/2012 0:42	Happy Hips Chicken Jerky; Happy Hips Duck Jerky	I am a law professor who specializes in FDA law. As a litigator, I did product liability / product defect law. I am an informed consumer and a devoted "mom" to our family's beloved Keeshond. He loves "Happy Hips" jerky treats and lately, we have stupidly been indulging him with these, thinking that the advertised glucosamine / chondroitin supplements would help his joints. My dog is presently in (b) (6) with advanced renal failure and is probably dying. I am devastated and I am FURIOUS that these products are allowed access to U.S. markets after years of poorly advertised reports of similar complaints from dog owners who are spending \$1000's and suffering immeasurable heartbreak due to these toxin-laced products from China.	13	Years	Other Canine/dog	Dog	16.7	Kilogram
EON-111192	12/27/2012 9:30	Nutro Natural Choice Lamb Meal & Rice Adult Limited Ingredient Diet	12-27-2012 On Wednesday 12.19.2012, I purchased a 5lb bag of Nutro Natural Choice, Limited Ingredient Diet dry dog food with a UPC code of 79105 51352, from PetsMart located at (b) (6) (b) (6). I fed my 12yo golden retriever mix the dog food the next evening. The morning after I fed her I noticed that she had vomited all of the food back up, she was not hungry and I could tell she didn't feel well. She continued to throw-up the rest of the day. Saturday she had ceased throwing up but had no appetite and had no energy. I called the PetsMart where I purchased the product on Sunday to let them know there was a problem. On Wednesday 12.26.2012, I contacted Nutro on their Facebook page and they sent me an email through Facebook wanting me to contact their Consumer Affairs dept at an 1800 number. I called them. A woman named (b) (6) tried to shift responsibility to the consumer side of the transaction, I finally convinced her that she need to seriously look into this from their side. Wherein she said she would send me a sample kit where I could send them a sample of the food in question. (b) (6) my dog, has now been sick for 6 days, I'm feeding her milk and chicken broth which seems to be the only things she'll even allow under her nose. Given the accounts that I've read, vets are useless in treating or diagnosing the problem. Their only solution seems to be to put the animal to sleep. I'd like to have the food tested for contaminants such as melamine, so a proper diagnosis and treatment can be made.	13	Years	Mixed (Dog)	Dog	50	Pound

EON-111190	12/27/2012 1:21	Bulk Smokehouse Chicken Jerky Strap	<p>I came home on Friday Dec 14, 2012 and took my dog for a walk like I normally do. He vomited undigested food twice on the short walk. The next day he continued to get worse but the vomit turned to yellowish bile with foam. I called the vet on Sun 12/16 because he was still vomiting on a pretty regular basis- every 3-4hrs. I took him in for an appt on Mon 12/17. He was given anti-nausea injections and fluids. The next morning he was visibly worse and could no longer open his eyes. I took him in immediately and he put on IV fluids and blood was drawn. Subsequent tests revealed that he was experiencing severe acute kidney failure. I watch my dog constantly and knew there was no possibility that he got into antifreeze or ibruprofen or raisins or grapes. I suspected his dog food because I had recently purchased a new bag of food and he had only been eating from it for several days.</p> <p>I purchase Premium Edge Lamb & Rice Meal made by Diamond. They recently had yet another recall on their dog food, this time due to a Salmonella outbreak. I called the number on the bag on Thurs 12/20 and spoke with a customer service rep named (b) (6) and a veterinarian named (b) (6). (b) (6) assured me that the food I had purchased was not under recall and asked instead about treats. She mentioned that (b) (6) symptoms sounded a lot like "fanconi syndrome" that dogs were experiencing from eating Chicken Jerky treats. I had also purchased three Smokehouse Chicken Jerky Straps the day I bought the dog food. I had fed some, but not all, of the product to my dog in the days preceding his illness.</p> <p>A subsequent search revealed that the FDA was investigating the danger of these treats to dogs (which have caused thousands of illnesses and many deaths). I relayed the information to my vet (b) (6) (b) (6) and (b) (6) at (b) (6) in (b) (6) and supplied (b) (6) (b) (6) with information for contacting the FDA and also a piece of the jerky to be sent in for testing. I also have an additional piece of the treat my dog ate, plus the other two treats that were purchased.</p> <p>After leaving the vet hospital I went to the store where I purchased the items, (b) (6) (b) (6) in (b) (6) I spoke with the owner and they in turn spoke with the distributor and informed me the jerky treats I purchased in bulk were manufactured/distributed by Smokehouse and were made in the US. However, additional research has shown that Smokehouse also imports part of it's stock from China. I requested that the Chicken Jerky Straps be removed and sent back to the manufacturer and that a warning sign be placed to alert unsuspecting shoppers from purchasing these potentially lethal treats for their pets.</p>	5	Years	Chow Chow	Dog	70	Pound

EON-111163	12/25/2012 21:51	Nature's Variety Instinct Raw Lamb Formula	<p>December 14, 2012 (b) (6) was given a raw formula diet of Nature's Variety Lamb starting on Friday night. It was mixed with her regular kibble of Avoderm. She ate it with strong interest and finished the bowl. We went for a walk later that night and she had a normal bowel movement.</p> <p>December 15, 2012 (b) (6) I took (b) (6) out in the morning and her stool was a little softer than normal. Fed her with the raw food and continued to mix in the Avoderm kibble. I left for work around 9:30 am and returned around 7:15pm. I came home to see (b) (6) sitting in her own diarrhea in her crate, something she has never done before. Took her out for a walk, was too dark to tell what her feces looked like but when I returned home, she had blood on the fur around her anus. I still continued to feed the raw food mixed with the dry kibble.</p> <p>December 16, 2012 (b) (6) had episodes of diarrhea with blood throughout the night on the carpet. Took her for a walk in the morning and her stool was semi-loose. I thought that she was adjusting to the food so I fed her again with no kibble mixed in. I left for work at 11:30 am and returned at 6:15 pm to find her sitting in diarrhea in her crate again. Went for a walk outside and it was too dark to see her feces. I went to visit my sister and took (b) (6) with me, she threw up white foam in the car. I offered her raw food to eat at my sister's apartment, she ate half but declined the other half so I threw it away. We returned home, and got in bed. I woke up during the night and found (b) (6) sleeping on the couch after having more episodes of diarrhea on the carpet.</p> <p>December 17, 2012 (b) (6) I walked (b) (6) in the morning, stool seemed to be getting more firm. Went to work and then came home on my lunch break to pick (b) (6) up and bring her with me to work to have (b) (6) examine her. We took a fecal sample and decided to continue feeding her the raw food since her bowel movements seemed to be improving. (b) (6) and I went home that night around 6:00 pm. I fed her the raw food and we went for a walk. She had a bowel movement that seemed loose again. I went to work and discussed the situation with (b) (6) in which she decided to get her on metronidazole, her fecal came back negative. As the day went on, we got busy and I left, forgetting to get the medication. I Came home to (b) (6) sitting in her own diarrhea in the crate. Walked her, was too dark to see her bowel movement but when we returned to the apartment, she showed evidence</p>	2	Years	Poodle - Toy	Dog	8	Pound
----------------------------	------------------	--	---	---	-------	--------------	-----	---	-------

--	--	--

of blood again around her anus.

December 19 ¿ I decided to withhold food from her this day to try and calm her stomach. Came home from work around 6:30 and took (b) (6) for a walk. There was no accident left in the crate. When we returned from our walk, I offered her a frozen pumpkin ice cube, which she rejected and immediately after threw up clear bile. She went to bed while I was in the other room. About half an hour later, I went to check on her and she had vomited clear bile with small white foam all over the sheets. She came and sat in my lap, shaking. After texting (b) (6) throughout this time, we decided it would be best to take her to ER to at least get on fluids. When we arrived at (b) (6) (b) (6), she had diarrhea in the lobby in the color of strawberry jam.

While in the waiting room at (b) (6), she was acting calm and not her normal self, she was laying down a lot although still very alert. The doctor that saw her at (b) (6) had made suggestions and came up with an estimate of over \$2,000. I discussed things with (b) (6) and we decided to have (b) (6) stay overnight at (b) (6) for IV fluid therapy and to receive antibiotic and antinausea meds and would then continue treatment the next day at (b) (6).

(b) (6) ¿ I picked up (b) (6) around 8:00 a.m. I was told she did not have any episodes of vomiting or diarrhea. We went straight to (b) (6) and (b) (6) seemed feeling better already. When (b) (6) arrived around 9:00 a.m., we drew blood from (b) (6) and put her back on IV Fluid therapy. Her bloodwork results came back close to normal with her ALT slightly elevated and BUN slightly below normal but nothing that came even close to alarming. We administered an injection of Cerenia and she threw up bright yellow bile about 15 minutes later. She was very restless in trying to get comfortable in her bed but finally calmed down and rested while (b) (6) and I talked about aftercare treatment. Around 11:15 a.m., (b) (6) had her head up listening to (b) (6) and I talked when all of a sudden her eyes closed and she fell over. We pushed epinephrine and atropine into her IV, inserted an endotracheal tube, hooked her up to oxygen and started compression. She still had significant jaw stricture when we inserted the endotracheal tube. After trying CPR and administering more atropine and epinephrine for 10 to 15 minutes, there was no response and we called time of death at 11:30 a.m. She was submitted for a necropsy at the (b) (6) to try and determine cause of death.

EON-111162	12/24/2012 18:51	Royal Canin Special 33	She had severe diarrhea within 12 hours of eating food for the first time. Stopped eating/drinking. Fluid in abdomen - had blood and urine tests, x-rays and two abdominal scans. All tests negative for any disease/illness. Mild pancreatitis - vet concluded that it must be due to gastrointestinal illness caused by contaminated food. Cat ate nothing else - is indoor cat and we have no other pets. She received intravenous fluids, anti-biotics and pain medication and forty-eight hours later she is 100% better.	3	Years	American Shorthair	Cat	8	Pound
EON-111161	12/24/2012 14:00	Waggin' Train	On November 6, 2012 (b) (6) presented for lethargy of just over 1 week duration. Inappropriate urination in home. Hyporexic, PU-PD. Renal &/or prerenal azotemia (BUN 132 mg/dL; creatinine 4.2 mg/dL); hyperglobulinemia (5.6; decreased A/G 0.5; hypercholesterolemia (370 mg/dL); hyperproteinemia (8.4 g/dL); hyperphosphatemia (7.4 mg/dL); increased B/C ratio (31.4); eosinopenia (0.9)	2.5	Years	Dachshund - Standard Smooth-haired	Dog	9	Pound
EON-111160	12/24/2012 11:21	Hartz All Natural Premium Chews	Purchased a 3-pack of Hartz all natural premium chews for dogs; smokey pork bones. As soon as he began chewing on one of the bones, it splintered all over the place. A large sharp piece, triangular in size fell on the carpet. I immediately grabbed it. If he had swallowed it, his throat, stomach, intestines or bowel could have torn. I was horrified. After this incident, I read the fine print on the package which warns of splintering! How could they produce and sell such merchandise? The package was purchased at K-Mart and it says that it is proudly produced in the U.S.A.						

EON-111159	12/24/2012 5:27	Arm & Hammer Advanced Pet Care Fresh Breath & Whitening Dental Water Additive	About 2-1/2 weeks I purchased Arm & Hammer's Pet Dental Water Additive to address my dogs bad breath. I gave him a capful for every 8 oz of drinking water daily for a few days until I noticed he wasn't eating much of his dog food I stopped giving him the additive for several days. He had several episodes of vomiting and I noticed sudden weight loss. Now, he's in the hospital and experiencing renal failure.		3	Years	Dachshund - Standard Smooth-haired	Dog	10.6	Pound
EON-111158	12/23/2012 19:36	Purina Gourmet Gold Double Delicacies	<p>(b) (6) is normally a happy and healthy cat, i brought him purina gourmet gold double delicacies and have been feeding him it for a less than a day before he began to show symptoms of what i considered to be a upper respiratory infection or influenza. After routing around online and talking to friends, it was brought to my attention that these symptoms were cropping up all over with people feeding there cats the Purina brand of food. These symptoms ranging from third eyelids showing all the way to the severity of death directly after the food was adminstered.</p> <p>(b) (6) has been sluggish and slightly feverish ever since consuming the food, and also seems instinctivly to sense something wron with it , a sign that has again showed up in other animals regardin this brand, actually across even species barriers as dos seems to have similar issue with this brand of food.</p> <p>I was increadbly worried after realising this and immediatly stopped feeding him the Purina, even though admittedly he seemed to no longer want to eat it. After these fact were brought to my intention me and those that had been previously feeding there pets this brand ceased to so and noticed within a day there animals returning to tehre normal behaviour and looking much healither.</p>			Domestic (unspecified)	Cat			

EON-111157	12/23/2012 10:12	K9 Advantix II	<p>On Thursday 12/20/12 my husband administered K9 Advantix II to our dog on the back of the dogs' neck and down his back at approximately 7pm EST. About 2 hrs later he started acting strange, spinning around,clawing where he was sitting and after these episodes he would start stating. About 10 hrs later, on 12/21 the symptoms were more pronounced- and we suspected the symptoms were due to the K9 advantix II application. We called the vet who instructed us to immediately wash the product off with dish soap which we did 24 hrs later.....By that time the dog started more exaggerated limb movements-circling around ,digging at the place he is sitting- then staring into space.. He seemed to react to ie: our other puppy and even us with disinterest..just curling up and closing his eyes and sleeping. His personality is definitely changed. He is withdrawn,lethargic. 24 hrs after administering this dose we started at the recommendation of the Vet Emergency Clinic - to administer Benadryl which has helped subdue the dogs seizure like activities- . Noteworthy our emergency visit to the vet clinic solicited no abnormal behaviors.....!!!! Lab work-a complete blood count and all vital signs were normal!! His pupils were noted to be dilated,though. The dogs' appetite and urinating/defecating is normal...But the dog's personalty is very changed- and this day 4 after the Advantix application the dog still experiences seizure type activity although diminshed in nature. I have read on the Internet all kinds of articles /personal stories just like ours of owners experiencing seizures/neurological issues with their dogs after K9 advantix- dogs of all sizes ...having neurological isusues- and even death. There are so many reports out there I was surprised about this product. We wanted to report our issue in the hopes that you investigate further this drug and maybe save future dogs. I am definitely done with applying pesticides to my dogs-and will look at other alternatives.</p>	2	Years	Shih Tzu	Dog	18	Pound

EON-111155	12/22/2012 18:36	Waggin train wholesome chicken jerky tenders	I have been feeding him several chicken tenders a day for the last 1 1/2 weeks. I have noticed excessive thirst, lack of energy and an inability to climb stairs	10	Years	Terrier - West Highland White	Dog	21	Pound

EON-111153	12/21/2012 23:27	VitaLife Chicken Tenders	(b) (6) passed away from Kidney Failure due to eating VitaLife Chicken Tenders (Jerky Treats). He was a happy, healthy 8 year old pup until August when I fed him a jerky treat a day for one month. He was sick and had symptoms but sadly Kidney Disease is hard to detect until it's too late. His regular diet was nothing but a pure homemade diet of fresh meats and vegetables and the treats appeared to be a wholesome and healthy snack. They were marketed as 100% NATURAL, NO CHEMICALS, 100% CHICKEN. The packaging had a certification stamp that read "Quality Certified in CANADA" - since then they have placed a sticker covering this stamp that now reads "Proudly Made in our facility in THAILAND". I was fooled and manipulated by marketing. (b) (6) death came way too early.	8	Years	Terrier - Boston	Dog	15	Pound
EON-111152	12/21/2012 23:06	PURINA MIGHTY DOG PROTEINPACKED WITH LAMB & RICE	Opened a container of the product and found bacteria growing in the can. Opened a second container and found the same thing.						
EON-111136	12/21/2012 16:51	BLUE WILDERNESS High-Protein Grain-Free Natural Evolutionary Diet With Life Source Bits DUCK RECIPE	All cats would avoid the last bag of Blue Buffalo Wilderness Duck Recipe, with increased vomiting of undigested food when it was consumed. I threw that bag away, and opened bag I am reporting now. Vomiting continued, with (b) (6) becoming increasingly lethargic. He was coughing/gagging like he had a hair ball, so we thought nothing about it, and delayed taking him to the vet for no more than 3 days. I found him on (b) (6) hiding and acting like he was getting ready to die (I've been around cats my whole life, they act a certain way). He was losing copious amounts of hair, as well as rejecting all food, bottled water (something he loved more than life itself), milk, and cat nip. He was taken to the vet where it was found that his entire intestinal tract was full of gas and had ceased functionality. Gas build up in the stomach and esophagus was the cause of gagging. He underwent exploratory surgery, in hopes of finding a block. He had bile, and a dark brown "sludge" inside of his intestines that was "milked out through the packed off enterotomy incision", there was little to no feces inside the intestine, with small amounts of feces found in his colon that was worked to the rectum. He was unable to recover from the surgery, again filling with gas, and becoming neurologic. He had to be euthanized on (b) (6). With a change of food the remaining 3 cats have all recovered.	8	Years	Abyssinian cat	Cat	7.2	Pound
EON-111087	12/21/2012 14:15	Waggon Trail chicken Jerky	Bought the waggon trail chicken jerky treats and they made my dog sick to her stomach--throw-up. I threw the rest out because they smelled bad/looked bad and I told the Walmart manager about it.						

EON-111070	12/21/2012 12:12	Waggin Train Jerky Treats	Our dog was a consistant diet of quality pet food and milk bones which did not change before or after the incident. He did not have additional treats or table scraps. The only other item in his diet was Waggin Train Jerky treats when he became violently ill and had uncontrollable vomiting. The first time he vomitted it was a partially digested jerky treat and no other food. After 24 hours the dog had stopped eating and would vomit any water that he consumed. He was taken to the emergency clinic who unable to diagnose a problem but he was held over night and was rehydrated via a drip. He recovered and the jerky treats were removed from his diet, there has been no additional problems.	3	Years	Terrier (unspecified)	Dog	20	Pound
EON-111067	12/21/2012 11:36	Sildenafil	The pet was on compounded sildenafil for management of the pulmonary hypertension and right sided congestive heart failure. A new compounding pharmacy was used. The owner reports that it took approximately 1 week from the date the medication was placed in the mail until it arrived at her door. Shortly after starting the new bottle of medication the pet became very lethargic and was urinating more frequently. After a series of visits and diagnostic tests the pet was diagnosed with protein losing nephropathy. The owner is concerned that the new formulation of sildenafil may have caused this. The pet did have two siblings who died at a very young age of renal disease. The date problem started is an approximation. The date that I first saw the animal for the complaint was 11/20/12.	14	Years	Other Canine/dog	Dog	2.41	Kilogram
EON-111022	12/19/2012 19:15	Boots and Barkley Rawhide Retriever Sticks	She had a seizure in March, followed by one in September, then in November had a seizure that resulted in her death. She was tested for toxins for the initial seizure. Nothing was found; diagnosed with epilepsy. She was often lethargic which was unusual for her. The last seizure resulted in her death. The emergency vet said it caused her to stroke. I didn't think anything about these chew bones until I gave them to my sister and one of her dogs had a similar incident although it wasn't as severe. This dog was 6 and had never had any seizures before. She too was lethargic for a couple of days following the incident. The rawhide bones are the only common factor.	3	Years	Collie - Border	Dog	40	Pound

EON-110991	12/19/2012 0:57	Kingdom Pets All Natural Ingredients Chicken Jerky	<p>We purchased the chicken jerky treats at Costco several months ago. We noticed the dog was throwing up quite often. We changed his dog food and changed his treats. Symptoms got better. Then, the next time I was at Costco, I purchased the dog treats again (assuming that it was probably the food we were giving him that was causing his throwing up). A few days ago we realized he has been throwing up EVERY morning. We stopped giving him the treats for a couple of days and the throwing up stopped. Gave it to him again yesterday and he threw up this morning.</p> <p>I went to his groomer today and asked her what kind of treats she would recommend. I mentioned that we had been giving him the Chicken Jerky treats from our Costco store and her eyes got big. She said that they were made in China and that there may be a problem with the treats. I actually thought maybe she was a little crazy. But, when I came home and checked the bag; they are distributed by a company in the US but made in China. I then did a google search and see that there may have been several reports of possible problems. So, here I am, adding my 2 cents into the pile.</p> <p>I am fairly sure he will throw up in the morning; since I gave him some earlier today ---before I talked to the groomer. :(Would you like me to save the vomit for you????</p>	2.5	Years	Havanese	Dog	14	Pound
EON-110974	12/18/2012 17:28	Kibbles n Bits Meatballs & Pasta Dinner	<p>Purchased 12 variety pack of Kibbles n Bits in October 2012 and 2 dogs loved it. These were purchased at either Tom Thumb or Kroger in (b) (6). Purchased second 12 variety pack. Fed the meatballs & pasta to (b) (6) on 11/7. A 10 year old lab/chow mix. She ate, went outside, came back in within 10 minutes shaking, limping and thirsty. She would not eat for 5 days. On 11/11/12 I gave the Puggle a can of the same food and she refused it. (she eats EVERYTHING). Took (b) (6) to the vet on 11/12 and they were unable to determine cause with just blood work. Did not have \$ for additional tests. Vet gave antibiotics and fluids. (b) (6) appetite picked up and she would eat small amounts. On 11/21 she ate a little in the a.m. and then would not eat. She seemed to go downhill. Called Banfield @ 5 but they were leaving shortly. Following day was (b) (6). I woke up at 4 on Friday morning and (b) (6) was laying on the floor. I put her on the bed and gave her some water. I layed down beside her and she died about 5 minutes later.</p>	10	Years	Mixed (Dog)	Dog	31	Pound

EON-110970	12/18/2012 17:06	Kingdom Pets Chicken Jerky	(b) (6) was apparently normal for a majority of the day on 12/17/12. His owners gave him a Kingdom Pets Chicken Jerky treat at about 8pm. By 10pm (b) (6) had begun to act restless and was groaning. Then he began to vomit and become more lethargic during the course of the night. On presentation at Lifetime Animal Center today, (b) (6) was mildly tachypnic, lethargic and mildly dehydrated. Blood work revealed an elevated white blood cell count and mild hypokalemia. Treatment has been instituted with IV fluids, antibiotics and anti-emetics.	2	Years	Retriever - Golden	Dog	85.8	Pound
EON-110894	12/17/2012 20:21	Canyon Creek Ranch	I brought (b) (6) to her Vet on Dec 3rd because she was coughing. The vet said it may be kennel cough and prescribed antibiotics and cough syrup. On (b) (6) at 11:30pm, I came home, gave both dogs a Chicken Breast treat and started to clean up diarrhea from one of the dogs. I then noticed that (b) (6) was wheezing and coughing. She had clear white liquid and foam coming from her mouth. I brought her to an Emergency and they gave her something for her stomach and I said I would take her to her doctor in the am. I went to her vet at 7:30 am. They kept her for the day and did exrays of her chest and saw something a mass in there. He couldn't tell what it was. He said to take her tomorrow to a (b) (6). He said tell them it is an emergency to see the doctor quickly. I took her instead that night at 7pm. They took exrays and said that the mass looked better, broken up. The next morning is when the surgeon (b) (6) came and he did surgery to see what was there. He said it was a form of food. She died on the table. I had a biopsy done to see what it was and it was the chicken breast treat from Canyon Creek Ranch.	16	Years	Maltese	Dog	8	Pound
EON-110850	12/17/2012 15:06	Simply Nourish Adult Dog Food Lamb and Rice	Purchased Simply Nourish Dog food, from Petsmart, their own brand supposedly, and there were maggots when I opened the bag.						

EON-110803	12/17/2012 11:42	Taste of the Wild Pacific Stream Canine Formula	<p>(b) (6) has been eating Taste of the Wild (TOTW) dry dog food for 2 years. Sometimes different flavor formulations of TOTW are rotated. I feed twice per day at 10am and 10pm.</p> <p>I purchased a 30lb bag of Taste of the Wild dry dog food on 12-14-12 and began feeding the food to (b) (6) that evening. At 5am (b) (6) vomited.</p> <p>I fed the food again in the morning and evening 12-15-12 and again at about 5am (b) (6) vomited. I began getting concerned that he is ill, but did not associate the vomiting with the food yet.</p> <p>I fed the food again in the morning and evening 12-16-12 , once again (b) (6) vomited just before 5am.</p> <p>The only thing in (b) (6) routine that has changed is the new bag of food. I am going to buy new food today.</p>	3	Years	Retriever - Labrador	Dog	85	Pound

EON-110755	12/16/2012 0:24	Purina show goat	<p>I work at a co-op that is selling pet foods infested with bugs. Pantry moths and grain mites. Right now, on the shelf are 3 bags of goat feed that is infested with grain mites. There are bags of dog biscuits that have webbing in them from worms. The bird feed has all been replaced finally. But some of it was in bad condition and I don't think it should of been fed to the wild birds. I take the feed off the shelf only to have my manager put it back. I can't sell these products to the customers. When they bring them up to check out, I point out the webbing and the bugs. I know I would lose my job, but I can't have our customers feed this nasty feed to their pets. I love my job, I just can't do this to pet owners who trust us. There is an end cap in the store and some of the cat food is 2 years old! I think my manager buys too much feed and it sits in the warehouse over the summer months and gets infested. The store is located in (b) (6). It is the (b) (6). (b) (6) (b) (6). If you just tell them you received a complaint from a customer and not an employee, that would be great. They would fire me for sending a complaint to the FDA. The co-op is under the name of (b) (6). I hope you can help me, I don't want someones dog or horse or goat to get sick.</p>

EON-110737	12/14/2012 18:15	Milo's Kitchen Home-Style Dog Treats Chicken Jerky	<p>Presented 10-15-12 non-specific pain. Poor response to anti-inflammatory Prednisolone, Tramadol and Methocarbamol therapy. Represented 10-17-12 vomiting. Discontinued Prednisolone and Methocarbamol, treated with Cerenia, Metoclopramide and bland diet. 10-18-12 not better. Spec CPL negative for Pancreatitis. Labwork submitted including urinalysis, CBC, chemistries, Heartworm Test and Ova/Parasite with Giardia IFA. Leukocytosis (20600) found, Creatinine elevated (5.9) and BUN elevated (156). Urine Sp Gr 1.019 and no bacteria seen, but trace Glucosuria. History suggested pet had been getting 1 Milo's Kitchen Chicken Jerky Treat daily for the last 3 months. Diet Nutro Natural Choice and Iams. Other treat had been a "Vitabone" twice weekly. No exposure to ethylene glycol or other known toxins. Only medication was a heartworm preventative monthly (Ivermectin/Pyrantel).</p> <p>Had no prior history to suggest renal disease. Had not been losing weight prior to clinical signs, and was not polyuric/polydipsic. PCR submitted for Leptospirosis (blood and urine) as well as tick borne disease serology...all tests negative for disease or prior exposure.</p> <p>Over the next 10 days, (b) (6) was hospitalized twice for diuresis. He was anorectic and continued low grade vomiting. He was also painful about the dorsal abdomen suggestive of potential renal pain. Over the 10 day period, his signs subsided. Labs on 10-24-12 had Creatinine at 3.0, BUN 53. On 10-22-12, Creatinine was down to 2.2 and BUN 46.</p> <p>Clinically, (b) (6) is now doing fine. We have not had any further labwork or follow up to date. I suspect (but cannot prove) that the Milo's Kitchen Chicken Jerky Treats may have been involved in his nephropathy and trace glucosuria (and suspected renal pain). I still have the last bag of product the owner had in my possession. A report has been filed with the manufacturer.</p>	8	Years	Maltese	Dog		
EON-110735	12/14/2012 16:45	Waggin Train Wholesome Duck Jerky Tenders	<p>One evening our dog started limping, her back legs were giving out and she stumbling when trying to walk. She was very lethargic and we could not get her to walk. Her pupils were dilated and not responding or contracting to light. eyes were shut tight because of this. She was like this about 24 hours and we took her to the vet and they said it was a neurological problem and she had most likely ingested something toxic but could not do any tests to prove it.</p>	4	Years	Siberian Husky	Dog	70	Pound

EON-110649	12/13/2012 16:36	Merrick ball park bonanza five star entrees for dogs	Found piece of plastic, about two inches in length and with one end sharp, other squared off, in bottom of can of Merrick dog food in November 2012. Our dog did not consume the piece, as my husband detected it prior to leaving the food bowl. We were unable to contact Merrick as it was a holiday weekend here in Canada. November 11 weekend. However, we contacted the pet store of which we purchased large case lots of Merrick and they sent out a Merrick rep to the house here to view the plastic and record the can lot number. I also contacted Merrick and they are investigating the matter. They have requested the plastic as well. We will be giving it to the customer rep as we are not sure how mailing this type of matter across the border is handled. Please note that a very similar event happened recently to a consumer in the states, and the merrick can carried a similar type of sausage dog chunks as the can we found our plastic in - plastic pieces also look identical, although her piece was significantly smaller. Another consumer has reported nails in his Merrick dry dog food. Merrick told me that they are not aware of any renovations happening at the plant, but I wonder if this is how the material ended up in the cans. However, I am an RN, not an investigator, so will leave this in your hands and am thankful for any follow up you may do. I have included the link of the other lady who reported her Merrick incident but this is NOT related to me in any form, just noted it online when we were panicked and researching any other incidents online the day we found the plastic piece. Thanks Kindly. http://www.truthaboutpetfood.com/articles/response-from-merrick.html

EON-110512	12/10/2012 17:48	Purina Puppy Chow complete and balanced	<p>I purchased a bag of Purina Puppy Chow on December 3rd, at the Dollar Market in (b) (6) y which was on a Monday. I brought the food home and proceeded to feed my three dogs, a beagle, pug mix and miniature schnauzer. I began to notice on Wednesday the (b) (6) the dogs outside were lethargic and had vomited. My schnauzer inside ate on Wednesday evening but not as much as usual. On Thursday all 3 dogs were vomiting and had diarrhea which smelled really bad. My schnauzer ate a small amount in the morning and basically laid around all day which was very unusual. She began vomiting on Thursday evening a large amount of undigested food that had a terrible odor. She proceeded to vomit several more times and became very lethargic. I work as a nurse on nights so I crated her and had my husband and son watch her. She vomited one more time during the night but finally went to sleep. My husband said she was making sounds as if she were uncomfortable during the night. The next morning when I got home she was unable to stand and was vomiting every few minutes. I immediately took her to the vet and he kept her. He started an iv and started her on antibiotics. She passed away during the night. I picked her body up on Saturday morning and she was so bloated it didn't even look like my dog. I came home and checked out the other dogs which were drinking but not really eating. The vet told me to watch them and that if they had made it this far they would probably be ok. I stopped feeding them the dog chow on Thursday simply because I noticed the dog food had developed a really bad smell almost a rotten smell.</p> <p>My dogs have had puppy chow and dog chow for years without problems but I have never smelled anything like what was in this bag and what was coming out of all of them was a rotten smell. I contacted the company and expressed my concerns. This food is becoming more rancid as the days go on. I have been on several forums and it is the same symptoms as my dogs had and in some instances death, which occurred with my schnauzer. I want this to stop and as I explained to the company, it is not about the money because you can not replace my dog. (b) (6) was a part of our lives and my son's best friend. I will be happy to do whatever I can to make sure this horrible thing does not happen again. I can't leave my dogs and kept up and do not roam so I know they did not get into anything and my schnauzer was always inside. I also have 2 shepherds which were not given this food and they are fine with no symptoms.</p>	4	Years	Schnauzer - Miniature	Dog	8	Pound

EON-110204	12/5/2012 15:39	Dave's Chicken and Rice Delicate Dinners - Canned Dog Food HEALTHY NATURAL AND EASY TO DIGEST with ADDED VITAMINS & MINERALS.	<p>(b) (6) (2 years old beagle) and her sister (b) (6) (13 years old beagle) ate Dave's Chicken and Rice Delicate Dinners, canned dog food for dinner. (b) (6) ate all of her food, but threw all of it up an hour later. (b) (6) didn't finish her food and she loves to eat, and then approximately 6 hours later threw up a couple of times and was lethargic. I took (b) (6) to the vet's office where it was determined her liver values were at 3,029 due to toxcity. (b) (6) was admitted to the hospital for 2 days of IV fluids where her value finally dropped to 533, and she will be rechecked in a week. (b) (6) liver values were tested and were over 300+, but was determined she can recover on her own. I'm to bring her back in a week also to recheck her liver values. I have 7 dogs, and no one else is sick. Both dogs seemed to like the food less and less over the past couple 2 days, so I just thought they were being picky. Neither dog is allowed off leash or to roam in a backyard as I live in a condo. The vet determined this wasn't due to infection or cancer, but a toxin. I have since contacted the Manufacturer of this dog food by their website "contact us" form today, Dec 5, 2012, and advised I contacted the FDA. I wrote that possibly too much of one of the minerals has been changed in the formula by accident. I want this company to continue to sell this food after what made (b) (6) and (b) (6) sick is fixed. I'm sure there a good company that needs to find out immediatly what happened to their daily production of this food. Otherwise it seems to be a good food.</p>	13	Years	Beagle	Dog	35	Pound

EON-110150	12/4/2012 21:33	Premium Pet all natural dog treats duck sticks	Our beloved dog stopped eating and was vomiting and had uncontrollable mucousy watery stools dripping from her bottom. Her blood test results were off the charts and was suffering from kidney failure and pancreatitis. She could not keep her water down so I had to take it away. We went to the Pet ER twice for fluids and anti nausea medicine. She suffered tremendously before we put her down. She was an older dog but very healthy. I know her death was caused by these treats. I believe she was slowly poisoned	16	Years	Chihuahua	Dog	7	Pound
EON-110146	12/4/2012 19:09	Waggin' Train Wholesome Chicken Jerky Tenders, Milo's Kitchen Chicken Grillers	Dog began vomiting and had diarrhea which lasted for a month. Vet did blood work and discovered elevated ATL levels. Put her on Denamarin and brought her back for a retest in a month. ATL levels were higher even though vomiting and diarrhea had stopped. Did an xray which showed an undersized liver. Did a bile acid test which showed elevated pre test levels, but normal post test levels. Believe that liver damage is from chicken jerky treats. Has been eating one a day of the Waggin' Train and/or Milo's Kitchen for close to a year. Stopped treats and will retest in a month.	9	Years	Shih Tzu	Dog	12	Pound
EON-110145	12/4/2012 17:48	Nutro Natural Choice Lite Weight Management Chicken Whole Brown Rice & Oatmeal Formula	I bought a new bag of Nutro Natural Choice Lite Weight Management. The day after I started feeding (b) (6) the food, he started throwing up. After two days of throwing up, I took him to the vet. They ran a few tests on him and they couldnt find anything wrong from the blood tests. For the next three weeks, he threw up two or three times a week, has been laying around, and has been drinking alot more water than usual and hadnt been eating all of his food during feedings. I never thought it may be his food because he has been on the same food for a few years and has never had these issues. I gave some of the food to (b) (6) and (b) (6) because I was running low on their food and both of them started throwing up. I googled info about nutro and saw that there was numerous complaints about the same food my dogs were on and they had the same symptoms that my dogs were having. I changed their food and neither one of them has thrown up since and have been acting more "normal."	5	Years	Dachshund - Miniature	Dog	14	Pound

EON-110143	12/4/2012 17:42	Milo's Kitchen home-style dog treats Chicken Grillers	After (b) (6) bout of vomiting and diarrhea in June 2012, the owner stopped feeding table foods and started buying a new type of dog treat she had never eaten before called Milo's Kitchen Chicken Grillers. In October 2012 she presented for acute polyuria/polydipsia (PU/PD) and decreased appetite of 3-4 days duration. Urinalysis revealed significant glucosuria but her CBC/Chemistry results were normal (normoglycemia). Both blood and urine testing were repeated with new samples and the results still revealed glucosuria with normoglycemia. After doing research on possible causes for these symptoms and results, differential diagnoses included Acquired Fanconi's-like syndrome and so the owner was questioned on everything (b) (6) was eating and it was revealed that she was eating chicken treats that originated in China. The owner stopped feeding these treats and (b) (6) symptoms have since resolved (no longer PU/PD, appetite is normal again and no longer glucosuric) although she is still experiencing issues with urinary tract infections.	4	Years	Lhasa Apso	Dog	16.5	Pound

EON-110072	12/3/2012 17:54	Purina Dog Chow	<p>Two dogs and a cat. 5 year old healthy cat (b) (6) eats Purina Cat Chow and occasionally the dog food. 4 1/2 year old litter mate Shepherd mixed dogs eating Purina Dog Chow (b) (6) and (b) (6)." All animals are indoor animals and very healthy and active. Several weeks ago noticed some intermittent vomiting and diarrhea from all of them. Contacted the Vet who advised possible worm situation, gave de wormer to all of them. Shortly after that point they stopped eating dog food and would only eat treats or people food. Tried changing to a new bag of Dog Chow, ate some but then wouldn't eat again. Took (b) (6) to the Vet as she was exhibiting the worst symptoms and was found to be in acute renal failure with a poor prognosis. Aggressive treatment was attempted but she passed away a few days later. Brought the cat and remaining dog to the vet and there were also found to be in acute renal failure. (b) (6) was given a prognosis of "fair" pending hospitalization and aggressive treatment. (b) (6) was able to return home with us on a home cooked diet only with instructions to bring him in immediately if dog appeared sick or distressed again. (b) (6) was kept at the vet for several days and has since returned home not knowing if he will survive several days or months. Both of the animals kidney damage is permanent and irreversible and at the time it was detected it is estimated that the animals have probably lost approximately 75 % of renal function. Their urine was tested along with blood work to rule out any obvious toxins such as antifreeze. We were advised by our Vet practice that they generally see about 2 cases of renal failure a year which are generally a result of aging animals or ingested toxins such as antifreeze. They cited some concerns that they had 10 cases this month alone. We have no such toxins in our home, and anything likely to be in that same manner is in the garage, out of reach and not accessible to any of the animals. The house and yard were scoured all to no avail. Knowing that so many other animals had been affected we thought about the dog food. I researched several Purina websites, FDA, various sources and have found that there seems to be an alarmingly HUGE recent incidence of pets in acute renal failure nationwide all being fed a variety of Purina Pet Food products. All dates in this report are close estimates as I cannot recall specific days. We have even offered the cat his original food out of curiosity, obviously not to cause harm, and he fishes it out with his paw and will not eat it. Nor will teh dog eat the Dog Chow in question. We do not have the original package for the cat chow as we store it in an airtight plastic bucket alongside his food bowls which are inaccessible to the dogs. The cat will occasionally be found eating the dog chow though. Both remaining pets will need to have follow up lab work this week to see if they will be able to survive this event and maintain any kidney function off continual supplemental IV fluids and medications. We had to make the heartbreaking decision to euthanize (b) (6) as she was clearly suffering, had lost most of her sight, couldn't eat, continual vomiting and diarrhea, becoming very confused, and her</p>	4	Years	Shepherd (unspecified)	Dog	65	Pound

EON-110034	12/2/2012 17:03	Purina Beneful Playful Life	purchased purina beneful playful life for a change to her original dog food. she was given a bowl at night for 3 nights, on the third night she ate it then a couple hours later she started vomiting. she continued to vomit that night till it was just dry heaves the next morning. she's been lethargic since starting the new food so i looked on consumeraffairs.com and found over 200 reports of similar problems with beneful and even dogs that have died from eating it. something should be done.	3	Years	Retriever - Labrador	Dog	160	Pound
EON-110033	12/2/2012 16:12	Hills Prescription Diet i/d feline gastrointestinal health	Upon opening a can of food, there was discoloration and a funny smell. I opened another and, although there was a little discoloring, I fed some to the cat. A few hours later we discovered the cat vomited on the floor.	14	Years	Domestic Mediumhair	Cat	10	Pound
EON-110032	12/2/2012 15:57	Mini "Dingo" Jerky Chewz chicken chips	I would give a treat usually once a day, and I started to notice that his stomach was getting big. A few days later he started vomiting about every other day. By this time I had stopped giving him the jerky treats, knowing something wasn't right. He was very lethargic also. I saw a report on the news about the "made in China" dog jerky and looked at the bag to confirm they were from China. He vomited for a few more days, then stopped, and his bloating went down, and he feels fine now. I still have the bag of treats- over half full- and the receipt. Please let me know what I should do with them. Thank you (b) (6)	2	Years	Bichon Frise	Dog	17	Pound
EON-110031	12/1/2012 7:03	Wagon Train	Vomitting and diarrhea with bright red blood in diarrhea. Vet put her on special GI restore food and some meds. Told me to feed only special food. On the road to recovery everything was great until. Two days later she found one of the wagon train treats and ate half before I realized it, and now the symptoms are back again!!!	1	Years	Poodle (unspecified)	Dog	7	Pound
EON-109941	11/30/2012 13:39	kingdom pets chicken jerky item 169728	I bought a new package of jerky treats from costco and the next day, 8-26-12, the dog became very ill. I took the dog to the emergency clinic and they ran numerous tests and told me she was not in imminent danger and to take her to her regular vet on 8-27-12. The vet ran numerous tests on her and said she might not live. I saw a notice on the door about the chicken jerky and thought that might be the problem. The vet concurred. She was fine before I gave her the jerky. She survived. I have the rest of the jerky in my procession. Please advise. Thanks, (b) (6)	12	Years	Chow Chow	Dog	55	Pound

EON-109937	11/30/2012 13:36	Dave's Chicken and Rice Delicate Dinners - Canned Dog Food HEALTHY NATURAL AND EASY TO DIGEST with ADDED VITAMINS & MINERALS.	(b) (6) (2 years old beagle) and her sister (b) (6) (13 years old beagle) ate Dave's Chicken and Rice Delicate Dinners, canned dog food for dinner. (b) (6) ate all of her food, but threw all of it up an hour later. (b) (6) didn't finish her food and she loves to eat, and then approximately 6 hours later threw up a couple of times and was lethargic. I took (b) (6) to the vet's office where it was determined her liver values were at 3,029 due to toxicity. (b) (6) was admitted to the hospital for 2 days of IV fluids where her value finally dropped to 533, and she will be rechecked in a week. (b) (6) liver values were tested and were over 300+, but was determined she can recover on her own. I'm to bring her back in a week also to recheck her liver values. I have 7 dogs, and no one else is sick. Both dogs seemed to like the food less and less over the past couple 2 days, so I just thought they were being picky. Neither dog is allowed off leash or to roam in a backyard as I live in a condo. The vet determined this wasn't due to infection or cancer, but a toxin.	2	Years	Beagle	Dog	30	Pound
EON-109933	11/30/2012 13:09	Purina ProPlan Selects natural beef & barley formula adult dog food	When I opened a new bag of Purina Pro Selects dry dog food, 6 pound bag, beef & barley adult dog food, it was full of insects. Appear to be all life stages of the Indian Meal Moth. I immediately contacted Purina 1-800-776-7526 and was not satisfied with their explanation that the "insects chewed into the bag after purchase". Since I couldn't find my receipt, I notified Tractor Supply, WalMart and PetSmart, as those are the 3 stores where I could have made the purchase. I also notified a website (poisoned pets) to see if there had been a recall of this item. When I located my receipt, I went to PetSmart on Nov 29, 2012 to see if the item was still available. I intended to buy several more bags to check if insects were in more than one bag. All the bags were gone from the PetSmart shelf. No explanation was given to me by a store manager, other than "maybe there was a problem with the beef". There were other flavors of the same type of food, but all the 'beef & barley' was gone from the shelf; there wasn't even a price label remaining on the shelf. Just an empty space.						
EON-109878	11/29/2012 22:30	Waggin' Train	(b) (6) started acting dizzy and off balance and that was the first sign she was getting ill. After that, her bladder was not functioning properly as she was having many accidents in the house. Vomiting and weight loss followed. She started having hallucinations and was biting into the air (Fly catching as the vet called this). She was taken to the vet and her Blood test (Pun level was over 200) indicating Chronic Kidney Failure.	12	Years	Shar Pei	Dog	50	Pound

EON-109877	11/29/2012 21:57	Kraft Foods-Oscar Mayer Chopped Ham(Water Added)	<p>I bought 6 packages of Oscar Mayer's Chopped Ham from Walmart. When I arrived home and opened the one package, there was plastic INSIDE of the actual ham. My husband and children had made sandwiches and when they were eating they realized there was the plastic.</p> <p>I called the company and spoke with a very rude operator who would not direct me to the right person to speak to about the problem. After being persistent, she finally transferred me to someone who did not answer their phone. I left a voice mail, and they did call me back. When I spoke to this person and told them about the problem, they then transferred me to someone else. This person told me that they would be sending me a package in order to send the packages of meat back to the company. I do not feel as though they will handle it properly and I felt the need to report it to HHS. This is very unacceptable and the correct actions need to be taken. We do not know where this plastic was before or if it's contaminated and it should not be in the food my family and I eat. I still have a package and a half of the meat (stored in the freezer) and I would like for this issue to be resolved in the proper manner or I will feel the need to elevate the issue. Thank you.</p>

EON-109869	11/29/2012 15:42	Purina Beneful Healthy Fiesta Dog Food	<p>I have been feeding my dog Purina Beneful dog food for over the past year. I gave her the ¿Original¿ variety initially, and then switched her to ¿Healthy Fiesta¿ around May 2012. On or about, September 25, 2012 I took my dog to the vet for an annual exam. My veterinarian examined her, and despite a few small symptoms such as paw licking which he believed to be related to seasonal allergies, she was in ideal health. Approximately, two weeks ago, I purchased another bag of ¿Healthy Fiesta¿ Beneful dog food from (b) (6); 10 lb bag, Best by: Aug 2013, Lot #: 224010850246L09. I began noticing changes in my dog¿s behavior after opening the new bag and feeding it to her. During the course of the week she was on the new bag of dog food, she was listless, barely eating her food, and vomited twice on Friday, November 16th, 2012. During this period, she was not exposed to any new foods, treats, nor were there any signs that she had gotten into any trash or ingested any other product.</p> <p>On Monday, November 19, 2012, her stomach was very upset and she refused to eat her dog food and attempted to eat grass when she was outside. Her skin felt extremely hot to the touch and she was lethargic. On Tuesday, November 20th, I arrived home to find diarrhea in the bathroom and one of her eyes swollen shut. I rushed her to the emergency medical clinic where blood work was done. Her screens came back ok, but she was dehydrated and had to receive fluids and antibiotics. Unfortunately, the vet was unable to find a cause for the eye swelling but provided instructions on how to treat the symptoms.</p> <p>At my follow-up vet appointment, after describing the symptoms above and my dog¿s changes in behavior, my veterinarian believes that there is a strong relationship between Purina¿s Beneful dog food and my pet¿s onset of health problems. Additionally, the symptoms that he originally believed to be as a reaction to seasonal allergies, could likely be a result of this dog food. He notated the name of the dog food, lot number, and the place of purchase for future reference for his other patients.</p> <p>After my experience, I conducted some internet research to see if there was a possibly a recall, and found hundreds complaints on http://www.consumeraffairs.com/pets/beneful.html of pet owners who had dogs that exhibited similar symptoms as mine, and some who eventually lost their pets due to organ failure and other complications. I also spoke with several of my friends and acquaintances who have heard similar complaints surrounding Beneful dog food, especially within the past two months.</p>	4	Years	Havanese	Dog	10	Pound
------------	------------------	--	--	---	-------	----------	-----	----	-------

			<p>Fortunately, due to my quick response in seeking medical attention, after receiving medication and being on a bland diet for approximately 6 days, my dog is in recovery and seems to be stable. I am slowly incorporating Blue Buffalo Grain-Free Freedom dog food back into her diet. Also, I still have the Beneful dog food and the original packaging at my house. It should be noted that the bag has a very strong, pungent, smell to the food.</p> <p>I believe it is imperative for FDA to explore some of the complaints made against Purina, and specifically the Beneful dog food product. I have contacted my veterinarian, emergency vet clinic, groomer, and have encouraged others with pets to file formal complaints with your agency. I plan to contact the company directly, as well as the distributor, and other associated entities in order to prevent any other pets from being harmed either directly or inadvertently as a result of this company's products.</p>						
EON-109868	11/29/2012 13:06	Milo's Kitchen HomeStyle Dog Treats Chicken Grillers	On 11/20/12 (b) (6) was presented for urinating and drinkling a large amount. His physical exam was essentially within normal limits. We submitted blood work. (b) (6) blood work was suggestive of Fanconi syndrome. I asked the owners if (b) (6) was eating any dehydrated chicken treats. The owners reported that they were feeding Milo's Kitchen treats,	13.5	Years	Lhasa Apso	Dog	21.7	Pound

EON-109860	11/29/2012 10:45	Dick VanPattens Natural Balance Healthy Bones for Dogs Turkey Oatmeal and Cranberry for SMALL BREED dogs	<p>I have two yorkshire terriers, (b) (6) and (b) (6). (b) (6) is 5 years old and weighs 5.5 pounds. (b) (6) is 4 years old and weighs 7 pounds. They have been eating "Natural Balance Health Bones Turkey Oatmeal and Cranberry" for a couple of years. They get these as a treat. They do not eat any other dog food product. They eat a prescribed, measured home cooked diet. On Sunday I purchased a new bag of these bones. They had two bones each on Sunday, Monday and Tuesday morning. When I came home from work on Tuesday afternoon, (b) (6) had thrown up his breakfast and the bones from the morning and had diahreea in his crate. (b) (6) had thrown up a little in her crate. (b) (6) pooped immediately (not usual) when I took her out. They both ate their usual food for dinner and (b) (6) proceeded to projectile vomit this up and then vomit about 8 more times until just yellow sticky goo came out. I took (b) (6) to the vet and left (b) (6) home. The vet gave (b) (6) an injection of fluid under his skin so he would not dehydrate and told me to withhold food until Wed a.m. and then to feed him only small portions of plain chicken and rice for the next five days. When I returned home I found that (b) (6) had diahrrea in her crate. 3:00 a.m. Wed morning (b) (6) woke me and had diahrea once again. I fed (b) (6) plain chicken and rice and nothing else as instructed on Wed a.m. and did the same for (b) (6) since she seemed to be getting sick too. (b) (6) had loose stools after eating. I went to work but came home early at 12:30 p.m. (b) (6) was OK but (b) (6) had thrown up her entire breakfast and had bad diahreea in her crate. I took (b) (6) to the vet that afternoon and he gave her a fluid injection, Cerenia and put both dogs on a course of metroniadizole. Both of my dogs were violently ill. My dogs do NOT go outside except if carried. They go to the bathroom on wee-wee pads in the basement and they do not come in contact with any other dogs. The single change that was the common denominator and consistent relative to timing for BOTH dogs was the Natural Balance bones product. My dogs have food reaction when I try them on something different but these bones they have had before AND they have NEVER had a reaction this severe. I am seriously concerned that there is something bad in this batch of bones. I tried twice to call Natural Balance and left a message with Customer Service yesterday but never got a return call. I will try them again today.</p>	5	Years	Terrier - Yorkshire	Dog	5	Pound

When meds completed vomiting returned but was dark with fowl smell. Vet suggested it was bile as it was mid day and her moring food has been digested. Prescribed anti acid treatment by Vet. White and red cell blood work done and came back normal. Continue anti acid meds, with the next steps xray and ultra sound.</p>	8	Years	Retriever - Labrador	Dog	172	Pound
EON-109858	11/29/2012 10:27	Brew Chews	<p>I am just concerned with a dog treat company I have learned about in (b) (6). The Company is called Brew Chews and I just felt the way these treats were being created could be harmful to pets without anyone knowing. I have heard these treats were made in a apartment kitchen. My concern is if these treats were produced in a random kitchen what type of sanitary procedures are taking place. Along with the treats are made with used beer grains which the grains came from where? and how were they handled also. I see to many areas of potential hazards.</p> <p>here is the website. www.brewchews.net. also these are in the (b) (6) being sold to the public</p>						

EON-109856	11/28/2012 22:00	Cadet Sweet Potato & Duck Wraps	2 hours after eating 2 treats (Cadet brand Sweet Potato & Duck Wraps), (b) (6) became extremely lethargic, did not eat, did not drink, and only got up to go outside to potty. Came back in immediately and laid back down. She was worse the next day, feverish and shaking. We then took her to vet, and she is receiving fluids and slowly recovering. CBC normal.	2	Years	Retriever - Chesapeake Bay	Dog	65	Pound
EON-109854	11/28/2012 17:57	Iams Proactive Health Mature It took me a few day's to catch on to the fact that it was the food making her ill.	I purchased the bag of Iams Mature Dog Food on Sunday Nov. 25th. Fed my dog the new food at approx. 4:30 pm Sunday Night. On Monday morning at approx. 5:00 am she awakened me by coming over to my bed, she was trembling as if in fear. I checked the weather/NO approaching storm there was nothing to be fearful of.) So, I took her outside. She walked unsteadily and was trembling the entire time, she went outside and did her morning business (which was unusual she usually waits until 7:00 am, I checked her stool and it looked a little 'loose') When we went back inside was very clingy and continued to follow me around looking to be comforted. She needed to go out again (which is not her normal) to void her bowels. Then she began pacing unsteadily and walking with her nose on the ground as if she were skulking looking for small places to hide ie., bathroom between the bed and wall. She obviously was not herself so I made a Vet's appt. and we went to see the doc in the afternoon (soonest appt available) She appeared to have gotten better as the day went on. So, I assumed she was ok. The next morning she woke up looking ok went out did her biz came back inside and ate. Approx. 45 mins to an hour after eating she became ill again, only worse. Went to see my vet at 2:00 pm on Tuesday Nov. 27th, he referred me to (b) (6) (b) (6). Started the process at (b) (6) at approx 3:15 Since they have more diagnostics available. I have not gotten the test results but I spoke with a (b) (6) who mentioned her liver panel was elevated. I will have her checked in two weeks again.	10	Years	Mixed (Dog)	Dog	66	Pound
EON-109853	11/28/2012 16:51	DENTASTIX DAILY ORAL CARE Fresh	Nov 4, 2012 about 6pm (b) (6) had a grand mal seizure, took her to the ER Vet where she was kept overnight, took a lot of bloodwork, urinalysis, x-rays, watched her for the night, had no further seizures. The following day transferred her to regular Vet for remaining 24hour period to make sure she had no other seizures. Vet found nothing obvious that would have caused this seizure, she only found "Ketones" in (b) (6) urine, which can indicate diabetes, but her blood sugar levels were fine. Took (b) (6) to the Vet a week later, and while waiting to leave the Vets office she started having another seizure, they took her back to a room, gave her some valium, and kept watch on her for a few hours. Vet thinks since (b) (6) never had any other seizures that this was remnants from whatever had caused the first seizure. One of our other Dogs, (b) (6), had a seizure 2-1/2 days later, very similar to (b) (6), since neither dog had seizures before I figured it had to be something environmental. After ruling out anything around the house, such as poisons, wild mushrooms or weeds etc, I asked my husband if there was anything new in their diet and he told me about the new "Fresh" Dentastix. When I call Mars Petcare to report this I asked what were the additional ingredients in these new "Fresh" Dentastix than the other, and they told me "Eucalyptus Oil". After doing some researching I have found out that "Eucalyptus Oil" can be toxic to canines, and also cause seizures.	5	Years	Mixed (Dog)	Dog	23	Pound

EON-109852	11/28/2012 15:51	Young Again Zero Carb Cat Food	<p>A patient in our hospital is being fed one of the cat foods from this company: http://www.youngagainpetfood.com/10browse.asp?category=cats&ProductCode=92100. Having not heard of it before, I looked into it. There are some incorrect and questionable legal health claims on the website as well as questionable labeling/product naming. Among other things, the website implies or directly states that their diets, because of the low carbohydrate concentrations and no grain, can be free-fed and will prevent or cure obesity, despite the extremely high caloric content (~590 kcal/cup).</p> <p>Even more concerning, there are also many statements regarding the use of the product for diabetic cats including the statement "With a carb-free diet, Type 2 diabetes, if caught early, will often become dormant or may even be reversed. And studies show that about 80% of all cats that develop Type 1 diabetes will no longer need insulin shots if they're switched to a zero carb diet soon after developing the condition."</p> <p>Conveniently, one of their cat foods is called "Zero Carb". I'm concerned that pet owners might think that they can stop giving their cats insulin if they use these diets. Even more disturbing is that cats with Type 1 diabetes will ALWAYS need insulin, regardless of diet. There are also no studies that I am aware of that utilize "zero carb" diets as they are pretty hard to formulate as compared to "low carbohydrate".</p> <p>Additional info from website: Young Again Cat Food Benefits In less than three months, Young Again may help your diabetic or pre-diabetic cat :</p> <ul style="list-style-type: none"> Better manage their diabetes and possibly reduce or eliminate their need for insulin Increase lean muscle and lose excess fat Want and need to eat less - and never go hungry Quickly achieve and stay at their healthiest weight Have much more energy and a friendlier disposition Also avoid urinary tract issues Produce less solid waste for a cleaner litter box Have the soft, kitten-like fur you love to touch 						
			<p>Although our patient has no obvious ill-effects other than morbid obesity (which the diet either caused or didn't fix), I really worry that other cats could suffer health problems (obesity, uncontrolled diabetes) if owners took the information on the product website as factual.</p>						

EON-109775	11/28/2012 1:21	Nature's Variety Instinct Grain-Free Nutrition Rabbit Meal Formula	<p>11/10/12: I purchased a new bag of dog dry kibble--Nature's Variety Instinct Rabbit from (b) (6) (b) (6)--and fed my dog that same evening of the new kibble for dinner. She had extremely loose stool/diarrhea (pretty much watery); needed to potty multiple times that night--almost every 15mins to 60mins. My dog also vomited everything she ate. Her whites of her eyes also looked red. Later that night--close to midnight--I feed her some rice and boiled chicken breast--no vomiting.</p> <p>11/11/12: I continued to feed her the new kibble the next night. The exact same symptoms occurred.</p> <p>11/12/12: I phoned the (b) (6) regarding my dog's symptoms. I also told them the night before the new kibble was given my dog missed her evening medicine. Since they could not diagnose my dog over the phone, they advised me to only give her the Soloxine medicine only--until she was back to normal. I also asked if it was okay to give her rice and boiled chicken breast instead of her kibble--they said that is fine.</p> <p>11/12 ~14/12: I did not feed my dog the new kibble. Dinner consists of white rice and boiled chicken breast. Loose watery stool/diarrhea continued but improved. No vomiting. On 11/14/12, stool was soft but not watery.</p> <p>11/15/12: Since her stool was not watery, I decided to feed my dog the new kibble for dinner. The exact same symptoms as 11/10-11/12 occurred. My dog's stool was extremely loose and watery. My dog had to potty multiple times that night. She also vomited everything she ate. Her whites of her eyes also looked red. This is when I know that the new kibble was the culprit since her normal routine was the same (excluding Vet's recommendation of staying on the Soloxine medicine only).</p> <p>11/16/12: I returned the new kibble bag to the feed store.</p>	8	Years	Mixed (Dog)	Dog	53	Pound
EON-109774	11/28/2012 0:12	UNKNOWN - SOLD AT COSTCO	MY DOG BEGAN TO LOSE HER APPETITE OVER A PERIOD OF 3-4 MONTHS BUT I THOUGHT IT WAS DUE TO THE TYPE OF DRY FOOD SHE HAD. I TRIED 3 DIFFERENT BRANDS BUT I DID NOT SEE AN IMPROVEMENT IN HER DESIRE TO EAT. THEN ABOUT A MONTH BEFORE HER DEATH, FREQUENT URINATION BEGAN TO OCCUR, NERVOUSNESS, UNCOMFORTABILITY, THEN FINALLY VOMITING HER FOOD AND THEN BILE THE DAY I TOOK HER TO THE VET. HER FLUIDS IN HER KIDNEYS WERE LOW AND DRS WERE UNABLE TO STABILIZE THEM OR HER HEALTH AFTER 4 DAYS. THEY SAID HER KIDNEYS WERE FAILING.	7	Years	Pit Bull	Dog	70	Pound

EON-109750	11/27/2012 12:06	Milo KitchenChicken Jerky Treats	Dog came in for skin issues and was placed on antibiotics and steroids. 2 weeks later, she began having episodes of dyspnea. Bloodwork, abdominal ultrasound, and echocardiogram were unremarkable. It was, however, discovered that she was extremely hypertensive and had a severe protein-losing nephropathy. Urine Protein/Creatinine ratio= 5.8. ACTH stim test was normal. She did not have any glucose in her urine. Specific gravity was 1.037. Urine culture is pending. The owners mentioned that she had been eating Milo Chicken Jerky treats and the ingredients stated that the chicken came from China. She had been eating them for 6 months. The owners had already thrown out the bag when they told me this, as they had seen something about kidney issues and the treats on the internet.	5	Years	Terrier - Yorkshire	Dog	11	Pound

EON-109663	11/26/2012 22:15	waggin train chicken tenders	Fed dog some jerky treats. Dog became very lethargic. Began vomiting everything up. Could hardly walk. Took him to the vet, advised to give only water and special food- hills science diet canned food. He took a few days and was back to old self. Gave him 1 jerky treat not knowing that this was what was poisoning him. Dog got ill again a few hours after ingesting product. Could not walk. Took several months to recover completely. Not sure if he has anylong term effects This crap is poison and must be removed from store shelves!!	5	Years	Shih Tzu	Dog	11	Pound
EON-109653	11/26/2012 20:57	Waggin' Train Wholesome Duck Jerky Tenders	My dog had five pieces of Waggin' Train Duck Jerky Tenders over the course of two days. Then he stopped eating for two days. After this, he began to have frequent bloody diarrhea, later diagnosed as hemorrhagic gastroenteritis. In addition, he vomitted twice. Since this happened over Thanksgiving weekend, I was unable to see a veteranerian until he had been sick for four days. My vet prescribed several medications to treat my dog's condition. I believe the jerky treats were the cause of his illness, since this was the only new food item given to my dog during that time. I am very confident that my dog did not consume anything that I was unaware of during this time. My dog is current on all of his shots and received a flu shot in September. He is still unable to eat, but I expect him to recover.	3	Years	Shih Tzu	Dog	13	Pound

EON-109496	11/25/2012 23:06	VitaLife Chicken Tenders	<p>I am writing to you today to address an issue of great concern and urgency that is very personal to me and my family as we have 1 dog who is suffering kidney failure due to eating VitaLife Jerky Treats. After 2 months of suffering I will need to put him down this week. Pet treats imported from China continue to sicken and kill pets at an alarming rate - a tragedy that can be prevented if the FDA takes three important and available steps.</p> <p>By the FDA's own count, there are well over 360 deaths and over 2200 illnesses currently linked to these treats. In truth, the ACTUAL number of pets that have perished or become ill, but whose owners have failed to make any association, may very well reach into the tens of thousands. The known numbers alone warrant action.</p> <p>In 2011 President Obama signed into law the FSMA. The FDA now has the tools with which to put a halt to the death and chronic illnesses being suffered by our family pets. I am asking you to take these steps:</p> <p style="text-align: center;">- Deny Entry</p> <p>Under FSMA, if a food producer in another country does not permit the FDA to inspect its facility, the FDA can refuse to allow food from that facility into the United States. In April 2012, Chinese government officials overseeing plants that make chicken jerky pet treats refused to allow U.S. inspectors to collect samples for independent analysis. This act by Chinese officials gives the FDA the right to deny entry to the USA for products produced in these facilities, as provided under FSMA.</p> <p>In addition, Section 801 of the Federal Food Drug and Cosmetic Act gives the FDA the power to refuse import of animal feeds if they even appear to be adulterated. Section 801 also allows the FDA to make admissibility decisions using information and evidence from sources other than their own examinations, such as the test results from Germany provided to the FDA in September 2012 from CBC Marketplace. These test results showed that some samples of chicken jerky dog treats contain an unknown compound; something that should not be there and that wasn't in the control group of samples - evidence that some jerky products for dogs are adulterated. The same jerky treats that contain the compound had been fed to dogs that then had to have emergency vet care to survive what presents as toxic poisoning. Dogs continue to have serious health issues & this confirms the evidence provided by the thousands of reports of kidney disease, liver disease, Fanconi-like Syndrome, and death in dogs that have consumed imported jerky products. I am asking that the</p>	8	Minutes	Terrier - Boston	Dog	15	Pound
----------------------------	------------------	--------------------------	--	---	---------	------------------	-----	----	-------

			<p>FDA invoke that power and refuse import to any jerky products for dogs that are manufactured in China until the manufacturers can identify the compound and show proof that it has been eliminated entirely from their products.</p> <p>- Enforce a Mandatory Recall</p> <p>Direct quote from the FDA website: 'Before FSMA, FDA had to rely on a firm's voluntary decision to remove food from the marketplace that could be hazardous to humans or animals. Under the new law, the agency can order a recall if the company does not cease distribution itself and recall its product. If there is reason to believe that the food is adulterated or misbranded and that use of the product could result in serious illness or death, FDA can order that distribution be halted and all implicated products recalled.'</p> <p>The FDA now has the authority AND a preponderance of evidence to enact a recall. Hundreds of deaths, thousands of illnesses, an unknown compound identified and submitted to the FDA and the fact that the Chinese refused the FDA samples to be independently tested; these facts are all RED FLAGS that, in the VERY least, suggest that these imported pet products should no longer be GRAS!</p> <p>- POS Warning</p> <p>There are 3 major petitions started by victims of imported chicken jerky that have garnered over 165,000 signatures to date. These people are crying out for the right to have the expectation that, when they shop in a store in the USA, they are buying safe products. If the FDA chooses not to enforce a recall, then it is incumbent upon the agency to exert due diligence in alerting the public to the investigation of these products.</p> <p>Many pet owners have already made the connection, either through painful circumstance or publication, but there are many thousands of others who have not. Such pet parents deserve the right to make informed decisions for themselves. It is within your purview to require that all retailers of said product conspicuously post a cautionary notice AT POINT OF SALE. Such a notice should state that the FDA and CVM are currently conducting investigations regarding the safety of these foreign-sourced products, known symptoms and where to contact the FDA to report a death or illness. This notice will need to be posted regardless of denial of entry unless the recall is enforced and all product is pulled from the market</p>						
--	--	--	--	--	--	--	--	--	--

and all products pulled from the market.

Thank you for your consideration. I would very much appreciate a personal response to each individual request - as I stated this issue is very personal to me - as well as thousands of other affected pet parents. If only this information had been available to me, my dog and my family could have avoided a great deal of suffering and over \$6000.00 in veterinary care. Please help others avoid my fate by upholding the FDA's commitment to the American (Canadian) public and assert the power and responsibility afforded by the FSMA: 'working to ensure that unsafe foods are not distributed in the first place.'

EON-109495	11/25/2012 21:15	Nature's Logic Canine Lamb Meal Dinner Fare	Found mold like, white substance on several pieces of dog food kibble, appx 1/3 of the way thru a 24 pound bag. Photo available.						

EON-109493	11/25/2012 11:27	Waggin' Train Cowboy Steaks	<p>At 5pm on 11/24/12, I went grocery shopping at (b) (6) on (b) (6) (I've called them to request they take the brand off the shelves), and decided to give Waggin Train Cowboy Steaks(has chicken in it) a try. I looked at the packaging to make sure it wasn't made in China(after all the problems with dog food in China, I've been very wary) and I saw a big label that said it was Manufactured for and Distributed by a company in Anderson, S. Carolina. I fed (b) (6) one of the treats at 6pm. Between 6pm and when I went to bed, (b) (6) was already acting strangely. She didn't want to sit next to me..she actually sat very far away from me on the couch which is atypical for her. She seemed very sleepy. At 2am on 11/25/12, I was awoken abruptly to (b) (6) violently vomiting. She vomited at least 8 times within 1.5 hours and so I thought maybe it was the treat since it was the only thing different that I fed her. I looked, and in smaller, hardly legible font, the treats said, "Made in China". I looked up this brand online to see if it was recalled, and read about many cases of dogs getting sick from this brand and even dying! I immediately called the Emergency Vet in NYC to rush her to the hospital and tests were performed and she was given a a shot in her back for hydration. She seemed to have stabilized. My orders are to keep her on a bland diet, monitor for troubled urination, increased water consumption, lethargy etc.</p> <p>I am currently monitoring her to see if her condition improves. She has not thrown up in the past few hours, but she is licking her lips a lot(a sign of nausea in dogs). She seems "okay" but she is still lethargic and has been resting a lot. I am withholding water and food. I will be introducing W/D(sort of a bland diet from the Vet) in a few hours if she does not throw up the water I give her. I have made an appointment with my regular Vet tomorrow to do blood work and check her kidney and liver stats, since Waggin' Train treats are allegedly responsible for some incidents of kidney failure in canines.</p> <p>Please feel free to contact me if you need anymore information via phone. I'd be more than happy to help prevent more dogs from getting unnecessarily sick. I read that the FDA did perform some tests on this brand's treats, but the toxin in this treat is probably something we wouldn't expect or normally test for...I still have the treats I gave her on a shelf(as evidence) so if you would like me to give you those, I can give you those as well.</p>	7	Years	Terrier - Yorkshire	Dog	7.5	Pound
EON-109492	11/24/2012 12:51	Fromm Four-Star Nutritionals Chicken A La Veg	<p>The store was out of the food we had been feeding the kitten so at the owner's recommendation we bough a bag of Fromm Family Chicken a la veg. We began feeding it on Monday, November 19 or maybe earlier in the weekend. On Tuesday, November 20 we gave him 1/3 cup of the food in the morning. That afternoon he started throwing up and that evening he started acting quite sick-listless, a little weak or wobbly. I brought him to the vet first thing in the morning and her tests revealed that his kidney values were elevated (I'm not sure if I'm saying that right.) We brought him to the larger animal hospital where they attempted to flush his kidneys for 48 hours. His values continued to get slowly worse. We made the decision to euthanize him yesterday.</p> <p>The Best By date on product was 2/7/2014, the lot number is B08 10:50.</p>	6	Months	Unknown	Cat	6	Pound

EON-109491	11/24/2012 12:21	OI Roy Complete Nutrition	Everyone ate the dog food (including (b) (6), who was a cat... and (b) (6) which is kept outdoors)... within two weeks the cat suddenly died and the next day the dogs came down with what appeared to be parvo. The vet did not test and merely treated for parvo. In the two weeks before death, their stomachs gurgled alot, they had gas, and drank water way more than usual.	4	Months	Mixed (Dog)	Dog	2	Pound
EON-109490	11/24/2012 11:15	Milk-Bones Dog Biscuit	I have contacted Del Monte Foods to advise that their product Mild-Bones Dog Biscuits, regardless of purchase location, contain a tiny roach looking insect. These tiny insects hide inside the biscuit as well as at the bottom of the box. I just recently purchased a large box of the biscuits for "large dogs" and had to remove the biscuits from the carton and shake each biscuit to remove the large infestation of this insects. I do not want my two dogs to ingest these. I did not receive any comments from Del Monte only 2 coupons for free boxes of these biscuits. This is a nice gesture from them but this was not the purpose of my communication with them. I would really want this matter resolved, which could probably be resolved by changing the type of packaging to a seal-tight plastic bag, similar to those used by other companies.						
EON-109483	11/23/2012 14:21	Milo's Kitchen Chicken Grillers	We began giving (b) (6) Milo's Kitchen Chicken Grillers periodically which she had never had before. We did not change her food or medication other than the Chicken Grillers during this time. We gave her about 3 pieces per day and toward the end of the bag (about 5 or 6 days later) she began vomiting and fainted. She also cried when her abdomen was touched. We took her to the doctor and she was diagnosed with pancreatitis.	10	Years	Terrier - Scottish	Dog	22	Pound

EON-109370	11/21/2012 9:45	Waggin Train	My grandmother bought Waggin' Train dog treats, the chicken flavored. She gave them to my dog (b) (6) when I would visit her once a week. This went on for about 1 month until I was informed about the chicken from China killing dogs. I told her to stop and threw the treats out. (b) (6) ate about 3 chicken strips each time I went to her house, so he probably consumed about 15 total. I started noticing that he was drinking excessive amounts of water and peeing a lot, every hour, when he usually would only pee 3-4 times a day. He is house trained and has been for years, but started peeing inside. I took him to the vet and they said his kidneys were going bad. I switched his food to an all natural diet with no grain, wheat, or phosphorus. He seemed to be getting better after a few weeks. He wasn't peeing inside anymore. But then I noticed he wasn't peeing a lot at all. Maybe twice a day. This happened the past week; in the past week he has decreased in his urination and water consumption (after it went back to normal) and hasn't eaten anything. Every morning he throws up yellow bile and if he does eat a little he throws it up within 1-3 hours. I took him to the vet and his numbers are insane, the vet said he was in renal failure and the only thing I could do is give him fluids through a shot for the rest of his short life. The vet said he could live for days or months, it's hard to tell. His BUN level is 138 and it is supposed to be 7-25. I know this is from the Waggin Train treats because I have had many people tell me their healthy dog was fine until they ate these treats. My dog was in perfect health until he ate these treats. YOU NEED TO TAKE THESE OFF THE MARKET THEY ARE KILLING PETS!! How many pets have to die?	8	Years	Corgi (unspecified)	Dog	18	Pound

EON-109225	11/20/2012 13:06	9Lives Tender Slices (beef) with Real Beef Gravy	<p>Here is a copy of the message I sent to Del Monte, parent company for 9Lives Foods....November 20, 2012</p> <p>Dear Del Monte,</p> <p>Yesterday I purchased two four-packs of your canned 9Lives Sliced Beef in Gravy for my cats. I made this purchase at my local Publix (b) (6) When I pulled out a can I noticed that the top and bottom of the can was bulging although there were no obvious dents or nicks in the can. The can almost exploded its contents.</p> <p>I notice that there are people commenting on the Internet about canned 9lives cat food cans exploding. The comments go at least as far back as August 2012.</p> <p>Something is definitely wrong here and I would encourage you to investigate at least this particular batch of food.</p> <p>The bottom of the can reads</p> <p>Best By 10-104-15 2278BC A1BEF1443</p> <p>Thank you for your consideration. I will be returning to my local Publix for a refund but I hope you will pursue this matter further.</p> <p>I have seen the standard automated reply that most people receive from your company but it would be helpful to know that a real person will read this message.</p> <p>Best, (b) (6)</p>						
----------------------------	------------------	--	---	--	--	--	--	--	--

EON-109204	11/20/2012 11:57	Beefeaters Chicken Fillets Natural Dog Treats	<p>Only snack she received was chicken jerky strips, which were supposed to be healthy as they were 98% fat free. All of a sudden, she started not playing, not eating, vomiting, having diarrhea, drinking water excessively, and then after a couple of days she had no control of her kidneys at all. Dog would walk across room and just pee as she was walking. Or she would be sleeping and area was dry one minute, then completely wet the next as she had peed in her sleep and didn't know it. Took her to our Veterinarian and he ran blood tests. They came back as complete kidney failure. We tried 5 days of pumping fluid under the skin to flush the renal system and 3 kinds of antibiotics. Instead of getting better, she got worse in the space of a week. We had to put her down as there was nothing else the Vet could do and we didn't want her to suffer with a body full of toxins due to kidney shutdown.</p> <p>FDA really dropped the ball on making sure these types of foods for dogs or humans were safe to eat. I didn't realize that there was an issue back in 2011 or earlier. These things should have been taken off the market completely since there was an issue!</p> <p>In my opinion, the FDA owes me \$1,000 for the cost of a purebred miniature dachshund at \$500, and another \$490 for Vet services. That doesn't take into consideration the emotional trauma you put my husband and I through losing an extremely young dog that we loved like a child. Or the trauma we had to put the dog through to try and save her.</p> <p>Truly, I expect a check from someone for \$1,000 as reimbursement for something that should have never happened in the first place. I'm sick over the fact that FDA didn't take these chicken jerky strips off the market.</p> <p>My sister also has a dog (black lab) that had kidney failure and all she was getting for snacks is the chicken jerky too. Luckily being a larger dog, her system didn't go into such drastic illness and their Vet was able to bring the dog back around. But none of us should have to go through this if you were doing your jobs and inspections correctly.</p>	1	Years	Dachshund - Miniature	Dog	9	Pound

EON-109114	11/19/2012 20:12	Waggin' Train Wholesome Chicken Jerky Tenders	We were on our second bag of Waggin Train Chicken Jerky Tenders. Our dog probably gets 2 strips per day, usually when we have to leave her home alone during the day. Last week I noticed she was being unusually somber acting and lethargic, which is totally unlike her. Later that evening she all of a sudden started violently vomiting all over the house. I noticed there were chunks of what appeared to be her jerky treats. I thought that maybe she had gotten into something that made her sick to here tummy. Although I couldn't figure out how she would have gotten into anything because she is an inside dog and is always being watched when she is outside. The next day she was still a little somber acting but after a few days she was back to her playful, rambunctious self. I didn't give her any of the treats for a few days just because I didn't want to give her anything that might be hard to digest. After a few days, I gave her another treat when I left in the morning for work and again that evening when I left to pick up my daughter. Later that night, she started throwing up again. This time it was just the chunks of treat along with a clear liquid (she hadn't really been eating much after the first episode). I was totally baffled as to what was going on with her. Then my daughter told me that she had heard they were recalling the treats that we give our dogs. I looked it up online but couldn't find any official recall. Tonight I was watching our local news and they had a story on the dog treats and sicknesses it was causing. All of the symptoms they discussed were exactly what our dog experienced.	1	Years	Shih Tzu	Dog	15	Pound
EON-108976	11/18/2012 22:21	Iams Proactiv Mini Chunks	I have three dogs. They were fed Iams Proactiv Mini Chunks on 15 Nov 2012 at 4:00 pm. At 7:00 am (b) (6), I discovered two of my dogs deceased. One surviving dog was ill and had to be given fluids and medication by veterinarian for dehydration and diarrhea. There was a large amount of vomit and feces in their kennels. They are house pets and are supervised when outdoors. The UPC code is 1901401852 and lot # J1US561591 Best used by date 24 Jan 2014. There are also two additional numbers on dogfood bag-998622309, 22684177. The bag is 17,5 lbs. I think I purchased bag from (b) (6). The deceased was a 7 lb shih tzu and a pug shih tzu mix who was 15 lbs. The surviving dog is a 25 lb pug. The vomit consisted of dog food.	4	Years	Shih Tzu	Dog	15	Pound
EON-108975	11/18/2012 17:51	Waggin Train Wholesome Chicken Jerky Tenders	(b) (6) got a bladder infection, then stopped eating and starting drinking constantly, and begin peeing excessively. When taken to vet he had sugar in his urine and not in his blood. So the vet starting running tests to see what the problem was and was diagnose with Fanconi Sysdrome	7	Years	Pinscher - Miniature	Dog	8	Pound
EON-108973	11/18/2012 11:51	Waggin Train Big Blast pork skin twists with chicken liver	(b) (6) was given treats, one each day for three consecutive days. On day three, (b) (6) had an enormous increase in drinking and in urination, to the point where she even had an "accident" in the house in the morning of the fourth day, something that has not happened for several years. A friend mentioned hearing on the news something about a recall.	4	Years	Retriever - Labrador	Dog	55	Pound

EON-108972	11/18/2012 10:45	Purina Cat Chow Healthy Weight 3.15 lb. bag Best Used by date: Dec 2013 No. 21721085-0530L01 on the fold: 41309488-SP74030 UPC code: 1780014841.	<p style="text-align: center;">Complaint involving Purina Cat Chow Healthy Weight dry cat food</p> <p>RE: Purina Cat Chow Healthy Weight, 3.15 lb. bag, Best Used by date: Dec 2013, No. 21721085-0530L01, on the fold: 41309488-SP74030, UPC code: 1780014841.</p> <p>(b) (6) is a domestic shorthair cat who is 7 years old. He has always been extremely healthy. He and his three cat companions are and always have been exclusively indoor cats. (b) (6) tends to be overweight, so between his checkups of May 2011 and late May 2012, I had cut back on his food some, and he had lost 1/3 of a pound over that period. At his vet checkup on May 27, 2012, he was in perfect health, as are all of my other cats.</p> <p>Around late September or early October 2012, I switched (b) (6) and another cat, (b) (6) (about 11 years old), to Purina Healthy Weight dry cat food. A third cat, (b) (6) (12 years old), was fed a different food (and in a different location) because she is too thin (but she had access occasionally to small amounts of the Purina food. My fourth cat eats wet food only, not dry food.</p> <p>I probably bought and fed three or four bags of the 3.15 lb. Purina Healthy Weight cat food to my cats over the next several weeks (October; November). During this time, I noticed that both (b) (6) and (b) (6) had personality changes; they both seemed ravenous and agitated. (b) (6) began to throw up all the time, not only always and shortly after eating this food, but at other times in the day and in the evenings. (b) (6) and (b) (6) also began to throw up frequently.</p> <p>On November 13, I found (b) (6) in the basement having a Grand Mal seizure. He recovered that evening, and later I fed him only some wet food, which he threw up. Later in the evening, he seemed to be better and was able to hold down some food. I have no toxic plants in my house, and I had not used any chemicals or cleaners that might have caused this. I knew that the change in food to the Purina was the only change that could have caused this to happen.</p> <p>The next morning, November, 14, I went straight out and bought new food that was not Purina brand, and I fed this to all the cats. (b) (6) did not throw up; for the first time in many weeks; in fact, none of the cats threw up, and they all seemed so much calmer. There has been no vomiting and no seizures since I took them off that food.</p> <p>That afternoon, November 14, I took (b) (6) to the vet (b) (6) and (b) (6) had a</p>	7	Years	Domestic Shorthair	Cat	18	Pound
----------------------------	------------------	--	--	---	-------	--------------------	-----	----	-------

			<p>complete workup, including a physical exam and full blood work. These tests showed absolutely no problems; but (b) (6) had lost over one pound in just the prior few weeks. The vet prescribed something for the seizures, but I did not fill that script. After (b) (6) seizure, I reflected back on the prior weeks and realized that there was clear evidence that (b) (6) had had two additional seizures during that time.</p> <p>There is no other possible cause for my cats' illnesses but the Purina Healthy Weight food. I believe that this food is possibly deficient in Thiamine (just as some of the Purina Veterinary Overweight food was found to be), and/or that it is toxic, deficient, or contaminated in some other way. I am not sure which store I purchased this food from, but it was either Safeway in (b) (6) or the Giant Food, in either (b) (6), or (b) (6) I did save some of the food, and I would be happy to send you samples of this product for testing.</p>						
EON-108971	11/18/2012 2:12	Red Barn Bully Springs	I bought two boxes of Red Barn Bully Springs. I don't give (b) (6) every night one but one, though she loves them. Night one, I noticed the next morning that she had vomited in the night in her crate. Did not connect it to anything. I also gave a bully spring to my daughter's Chi-hua-hua, (b) (6). Next day my daughter mentioned that (b) (6) had thrown up. Still did not make a connection. Last night I gave (b) (6) a bully Spring and sure enough in the night she threw up in her crate. I am suspecting that it might be the bully springs. The paper around the bully spring states that they are made in Paraguay. The company that sold the boxes is Osbo or Ozbo through Amazon.com. I have not contacted the Company. I have the un used 2nd box and the loose ones in case you need them for your investigation. I would like to know if they have bacteria that caused these two dogs to vomit.	3	Hours	Terrier - Welsh	Dog	15	Pound
EON-108970	11/18/2012 1:12	Canyon Creen Chicken jerky treats	Owner came home to find (b) (6) dead in the garage, with evidence of a seizure: stool all over her, including in her collar buckle. She was over 105 degrees on admission, despite having been dead for over 1/2 hour at that point. The other dog was fine. With questioning, it was noted that she had increased frequency and number of chicken strips, made by Canyon Creek. Her owner had been feeding several per day over the past couple of months, intermittently.	7	Years	Dobermann	Dog	31.5	Kilogram
EON-108969	11/18/2012 0:06	Waggin' Train Chicken Jerky. Made in China	Re Dogs dying after ingestion of small amount of Waggin' Train Chicken Jerky. Death is directly, repetitively, after eating this product. Can you immediately recall with this unmistakable evidence, please? As owners of consequential, dead dogs, are still reporting seeing this product on shelves of Safeway & several other stores. I am particularly emailing you to please investigate this product by microscopic means, or investigation/revelation of all contained ingredients, performed by Analysts and NOT by poor unfortunate 'subject' animals, tested on and then euthanized. Please don't find the latter necessary when Food Analysts can identify offending ingredients with help of Science. This will provide proof without deaths.			Basset - Fawn Brittany	Dog		
EON-108961	11/17/2012 0:15	oinkies pig skin twists (original hartz)	both dogs were healthy before given the treat. within 2 days both of my dogs experienced uncontrollable diarrhea and one has blood in feces. never before have i had problems with any treats before. one more day and i am going to take them to vet.	6	Years	Dachshund (unspecified)	Dog	10	Pound

EON-108901	11/16/2012 15:00	New Zealand Brushtail & Vegetables Entree	<p>I gave two of my cats Addiction brand, New Zealand Brushtail & Vegetables flavor food on Wednesday morning (Nov 14, 2012). In fishing out some of the largish potato pieces to try to make the food more appealing to one of the cats, I felt bone pieces in the food. I hunted and found several bone fragments, two of which were about a third of an inch long, and too hard to break by squeezing them with my fingers. I went to the website for the company and they declare that their Brushtail flavor has "peasized" bones in it and they claim that this is fine. Still, I'm concerned that these bones are a) too large and hard to be bio-available -- but might be needed for sufficient calcium, and b) that some of the pieces are potentially sharp enough to cause harm to a cat's digestive system.</p> <p>The can I opened was marked: PFNZ2: NOT FOR HUMAN CONSUMPTION BBO3APR2015: 16: 17: 04: 2013: 2230</p> <p>I have an unopened can that I bought at the same time. I gave a third can to my mother, and when I described my problem, she finger squished and found bones of similar sizes to my description. Although she could not break the bones by squeezing them with her finger, she could shatter them by pressing on them with a fork. (I did not try this with mine.)</p> <p>I'm super disappointed to have found these bones because my allergy-prone (and picky) cat very much liked the flavor of it.</p>

Obviously, the claim in the list of ingredients of "deboned chicken" is not correct. The "Best by" date is 03 Aug 14. It is a 3.2 oz can. Numbers on the bottom (I don't know which is the lot number) are 12216 CL1 35203 1437.						

EON-108735	11/15/2012 0:45	RAID ANT KILLER, Various Pet food brands	On Nov. 14, 2012 I visited the Albertson grocery store # (b) (6) located at (b) (6), (b) (6). At the pet food aisle is also the insecticide aisle. However, both the insecticides such as RAID Ant Killer is stocked right next to and touching the bags of pet food on all the store shelves. I spoke with the morning store manager about this being a problem of storing a poison next to a food item, but she defended Albertson's decision of where to place items in that store since it opened in the year 2000. I told her that surely the insecticides would not be put next to people food or baby food and she agreed, but then I said that pet food is still considered a food too and shouldn't be next to the insecticides. This manager said she would call and ask someone in the Albertson's offices, but I didn't feel that she cared to make any changes. I told her I thought that this store's practice of placing insecticides with the pet food must be a violation of some kind and that I was going to try to find out. She had no response, and I said goodbye and left the store. I will stop in this store tomorrow, Nov. 15, 2012 and take a picture if there hasn't been any changes made.						
EON-108600	11/14/2012 0:12	Milo's Kitchen Home Style Treats Dog Treats Chicken Jerky	Have been feeding Milo's Kitchen Chicken Jerky treat for about 1 year prior then stopped feeding around April 2012. EON-108361	11/12/2012 14:27	Canyon Creek Ranch Brand chicken tenders	(b) (6) was having trouble walking. Her head was bobbing and she was very dizzy. I thought she was going to pass out. I rushed her to my vet. They gave her oxygen and fluids. The doctor was not there, but was on the phone. She told the tech to send us to the emergency. When I got to the emergency they thought she had a possible allergic reaction or toxicity. She was given an xray to see if she had any foreign body. That was negative. They thought she had gotten some oleander. i was sure that she hadn't. (b) (6) was released the next day. She was fine until the next morning when the symptoms reappeared. I rushed her to my vet. (b) (6) had read the report sent to her by the emergency and wanted to know what brand of chicken jerky she was eating. After checking on the internet it was the same brand that was making dogs sick and dying. My other dog refused the treat. In fact they ate the same food except for the chicken jerky. Basically I only used the jerky as a treat for paper training. These two visits cost me \$1577. The vet told me to freeze the remaining jerky treats.	17	Weeks	Terrier - Boston	Dog	11	Pound

EON-108354	11/11/2012 16:00	Milo's Kitchen home-style dog treats - Chicken Jerky	<p>I bought a bag of chicken jerky treats manufactured by Milo's kitchen home style dog treats about a week ago. After about 15-20 minutes of her ingesting, it, my dog started gagging & vomited. She was not previously ill at all. Two days ago, I gave her a chicken jerky treat from the same bag. The same thing happened-after about 15-20 minutes of ingestion, she started gagging & vomited. That is when I thought that I gave her the treat the week before & she had vomited after the treat. I became suspicious-again, she not ill & is a healthy dog. I checked the expiration date which was 11-13. I then googled the treats. I was shocked & appalled to find that they "were responsible for causing canine deaths & illnesses". I immediately sent a letter of complaint to the company. There are numerous negative articles regarding these products on the internet, including the one that I have included at the end of my letter. I am shocked & appalled that major stores-such as Walmart are still selling these products.A thorough investigation needs to be performed. My dog is very precious to me. She is fine now, but vomited twice that last time I gave her the treat. Then she was fine. It was not a coincidence that 2 times she ate it, 2 times she got sick after 15-20 minutes of ingesting the product. Please help us pet owners that cannot do what you can do for our precious pets. I am so grateful that my dog is fine, but what about the other dog owners & the helpless pets that are not? I thought I was giving her a HEALTHY snack. I could have harmed her irreparably. Thank you for your time & consideration regarding this matter. I look forward to hearing from you soon. Sincerely ^{(b) (6)}</p> <p style="text-align: center;">(b) (6)</p> <p style="text-align: center;">FDA: Nearly 1,000 Pets Sickened by China-Made Dog Treats By Terri PousMy 23, 2012Add a Comment</p> <p style="text-align: center;">inShare63</p> <p style="text-align: center;">Related</p> <p style="text-align: center;">Nearly 1,000 dogs now sick from jerky treats, FDA reports say MSNBC</p> <p style="text-align: center;">Follow @timenewsfeed</p> <p style="text-align: center;">Suddenly, ¿sick as a dog¿ isn¿t so colloquial.</p> <p>According to updated records kept by the Food and Drug Administration, chicken jerky pet treats from China have sickened nearly 1,000 dogs in the U.S. in recent months.</p>	4	Years	Poodle - Standard	Dog	19	Pound
----------------------------	------------------	--	--	---	-------	-------------------	-----	----	-------

			<p>The FDA has logged 900 reports of illnesses and deaths from vets and concerned pet owners since November, when it issued warnings about health problems associated with the products known variously as chicken jerky strips, treats and nuggets.</p> <p>Recorded problems stemming from the treats range from vomiting and diarrhea to kidney failure and death. The complaints have contributed to mounting pressure on the FDA to address the issue.</p> <p>Despite repeated tests, however, FDA scientists have been unable to detect any toxin responsible for the animal illnesses, officials said. And no results of a review conducted at Chinese treat manufacturing plants earlier this year are yet available, according to FDA spokeswoman Tamara Ward.</p> <p>China's spotty record on food safety only complicates the issue: in recent years the country has dealt with numerous food scandals, involving toxic baby formula, tainted pork products, rice contaminated with heavy metals and the reuse of discarded cooking grease nauseatingly known as "gutter oil". In 2007, more than 100 pets in North America reportedly died after eating pet food whose China-sourced ingredients were tainted with the plastic melamine, prompting a massive recall. No wonder folks are quick to worry.</p> <p>The three top brands of chicken jerky treats among those most recently cited in complaints included Waggin' Train and Canyon Creek Ranch brands, produced by Nestle Purina PetCare Co., and Milo's Kitchen Home-style Dog Treats, produced by the Del Monte Corp. According to the msnbc.com report, Waggin' Train and Canyon Creek Ranch are both produced and supplied by JOC Great Wall Corp. Ltd. of Nanjing, China.</p>						
EON-108353	11/11/2012 12:27	Whiskas Temptations Treat For Cats	Indoor pet cat vaccinated and parasite free. No other pets in household, no toxic compounds used in household, no history of trauma. Pet seen last month after owner believed she saw a small drop or two on floor but cat showed no major pathology. Owner started feeding Whiskas Temptations Treats for Cats three weeks ago as only thing different in cat's life. Cat presented on (b) (6) at emergency for acute collapse and bleeding from the rectum. Radiographs were unremarkable except for a possible enlargement of one kidney and some cavity effusion. Cat died twelve hours later of shock.	4	Years	Domestic (unspecified)	Cat	9.9	Pound

EON-108339	11/9/2012 19:42	Boots and Barley Chicken Rawhide Twists	(b) (6) began vomiting in the middle of the night 6-8 times. She was vomited bile until she could only dry heave. She was extremely lethargic and had a low temperature of 99 degrees. She started to shake and became extremely lethargic. She refused food or water for two days and continued to vomit 3-4 times each day. After two days she was interested in food again, so I gave her a rawhide chew for a treat. She drank profusely that evening. Late that evening she began to vomit thick yellow mucus profusely 6-8 times. For the next three days she refused to eat or drink, and was extremely lethargic with dilated eyes. I had to give her water with a syringe. She was extremely dehydrated, lost over three pounds, and became unresponsive and too weak to walk. Her gums were almost white and dry to the touch.	5	Years	Schnauzer - Miniature	Dog	15	Pound
EON-108243	11/9/2012 10:21	Waggin Train Chicken Jerky	After eating the waggin train chicken jerky treats both dogs developed GI upset. Both had vomiting and bloody stools. The male dog stopped eating. I thought the fault was the dogs not chewing the treats and gulping them. I gave the treats to my daughter for her mother in law's siberian husky. A few months later I purchased the treats again and they both were sick that evening again with vomiting and bloody stools. I recently found out the Siberian Husky was sick with GI symptoms after eating the treats. All dogs have recovered, thankfully I discontinued the treats immediately after the second episode and will never purchase them again.	9	Years	Spaniel - Cocker American	Dog	27	Pound

EON-108219	11/8/2012 21:12	Waggin' Trail Wholesome Chicken Jerky Tenders	<p>She has been getting Waggin' Tails chicken jerky a few times a week for the past year and pretty much every day starting in August 2012.</p> <p>September 18, 2012- She became extremely lethargic and stopped eating or drinking. She was taken to the vet the morning of September 19th and had a fever of 106.1. They did blood tests and x-rays and ultimately diagnosed her with pancreatitis. She was treated with IV fluids and IV antibiotics for 3 days. She was given 136 mg/day of Baytril for 3 days followed by 68 mg/day for 7 days to continue the antibiotic treatment at home. We put her on a restricted diet of boiled chicken, veggies, and rice for two weeks.</p> <p>The situation seemed to resolve itself and she was mostly back to normal by early October, so she went back to her regular diet (Nutro dog food) and started getting chicken jerky treats again.</p> <p>October 20, 2012- She didn't eat her dinner and seemed a little slow. Over the course of October 21, she started becoming lethargic again and wouldn't eat or drink. We returned to the vet the morning of October 22. After repeat x-rays, she was referred to a specialist for an ultrasound. IV fluids and IV antibiotics were given again for two days. Here are the vet's notes from that visit:</p> <p>"Abdominal ultrasound was done upon initial presentation. It was overall within normal limits for a dog (b) (6) age. The liver did appear coarse and needle aspirates were taken. The sample came back within normal limits - a possible elevation in the lymphocyte count was noted (this is a diagnosis made by biopsy). There was a scant amount of fluid around the gall bladder. Urine was obtained for USG (1.015) and bacterial culture and sensitivity. This test is pending. Changes in antibiotic treatment may be needed once culture is received. Blood was drawn and (b) (6) kidney enzymes were elevated. This combined with low USG indicated mild to moderate kidney failure. (b) (6) was hospitalized for supportive care and has improved during her stay - both in her demeanor and appetite as well as her kidney values. Her fever broke soon after treatment was begun."</p> <p>The result of her urine test was normal, so she was on put of 500mg/day of Clavamox and 170 mg/day Baytril for 7 days. The situation has again appeared to resolve itself.</p> <p>November 7, 2012- She had follow-up blood and urine tests. The urine test showed her urine was</p>	10	Years	Mixed (Dog)	Dog	37	Pound

EON-108151	11/8/2012 0:15	Waggin Tails Chicken Tenders	<p>I started feeding my dog Waggin Tails chicken tender treats which I purchased at PetSmart as a reward for potty and good behavior. About a month after feeding the treats she started having stomach issues and was throwing up foamy yellow/green stuff. At this time we had no idea the treats was what was making her sick and we took her to the vet. They said she had an upset tummy and gave her meds to coat the stomach and throat since the bile in the throw up had burnt her esophagus and stomach lining. It took several weeks to get her back to eating her dog food again since she was on Gerber Baby food for her stomach issues. Once she was better and started eating again, we gave her the treats again because she loved them and was using them as rewards again. After about another month she started the same thing over and yet again, we were back at the vet. This time she had severe hair loss on her back and was also throwing up again. This was an everyday event usually 1-2 times a day. At this time, the vet decided to run some test and found that her liver enzymes was elevated and she had a kidney infection. The vet also suggested she may have food allergies that was irritating her tummy/ gastro tract and could also be causing the hair loss. They put her on a perscription diet that was very expensive and more meds to coat her tummy to get her back to a regular diet again. We then asked about the treats and he did not seem concerned but the problem with these treats had not leaked to the media yet. After getting her well again, the hair loss got worse, her eyes became cloudy and she just was not herself and it was a fight to get her to eat. We once again gave the dog treats as rewards and this time she became deathly ill. She was throwing up bright green and uncontrollable diarrhea that was also green. We took her to our regular vet and he immediately called (b) (6) and said we had to get her there at once or she was not going to make it. We drove 30 min to the clinic and they took her out of my arms as we came in the door since they were expecting her and I did not see her again for 6 long days. She was on the brink of death. She was severely dehydrated from being sick that day while we were at work. Our house was covered in this green diarrhea and throw up from her being sick. They told us they had to get her stable in order to run test but the main goal was to just get her stable for now. She had around the clock care for 24 hrs and started to show signs of improvement but sill very sick. The gastrologist told us to prepare for the worst because she was so small and little dogs didn't have a good success rate when they were this sick. On the third day she was stable enough to run test and run a light down her little throat to look into her tummy. What we were told was that her esophagus and stomach lining was severely burnt from the acid from being sick and her kidneys were not functioning properly. They asked us to give them a list of all meds, foods, treats etc that she had taken so they could try to find out what caused her to be so ill and at that time, was only 2 years old. In the end and over \$2500 later, we were told they had other similar</p>	3	Years	Maltese	Dog	5.2	Pound

			<p>situations with other dogs and the cause was the dog treats. The damage that was caused to her stomach was so damaging that she is now on a perscription medicine everyday for the rest of her life. Her hairloss issue worsened and now she has very thin hair and you can see bare skin all over her trunk area. What fell out ,came back wirey and grey. Her skin on her back is a purplish color and stays dry and cracked. She is very sensitive on her back and is also on perscription dog food now that is a chore to get it forced down her everyday. (b) (6) is not the happy little dog we had before all of this happened and it breaks my heart that these treats are still on store shelves.</p>						
EON-107917	11/7/2012 15:06	Ol' Roy Dog Treats Grilled Chicken Strips, Ol'Roy PigZ N Blankets	<p>Her whole body lymph glands became swollen, respiratory distress and swollen stomach. (b) (6) was examined by her Vet. (b) (6) in (b) (6) Vet. submitted blood specimen to (b) (6) (b) (6). Lab results Lymphoma cancer.</p> <p>This is the second dog in the last 7 years now that has died. They both ate Wal-Mart Ol Roy Chicken Dog Treats. For extended amounts of years prior to their deaths. Neither animal had any other history of illness other than cancer. I believe from my college chemistry that of the listed ingredients that long term use of the ingredient: PROPYLENE GLYCOL is responsible for the cause of Cancer in my dogs.</p>	7	Years	Boxer (German Boxer)	Dog	75	Pound
EON-107873	11/7/2012 12:45	EXER-HIDES Rawhide Munchy Dumbells. Wrapped with chicken jerky.	<p>Dog had an ongoing history of mild gastritis (some mild vomiting, decreased appetite, diarrhea) beginning on 10-3-12. Dog never fully recovered per owners. On 11-2-12 dog had some vomiting, lethargy and on 11-5-12 owners returned with dog because of perceived pain. Dog was bright, alert, responsive with normal temperature during all exams. Dog would eat small chicken treats. Bloodwork was done on (b) (6) and showed increased BUN, creatinine, and phosphorus with a urine specific gravity of 1.010 and significant debris in sediment. Owners elected euthanasia based on prognosis.</p> <p>Necropsy showed small, lumpy kidneys with abnormal texture.</p> <p>Owners often reported that the preferred food was chicken with chicken jerky being a major part of the treats.</p>	5	Months	Mixed (Dog)	Dog	10.5	Pound

EON-107696	11/6/2012 15:06	Label not provided - product described as Vegecat, supplement	<p>This patient is one cat in a multi-cat, multi-dog household. This cat ate primarily a vegan diet, but has sporadically been supplemented with cooked duck egg. The owner has also used Vegecat supplement. Earlier this month the cat presented for a cough and voracious appetite, for which she was treated with antibiotics. Signs and clinical findings progressed to include lethargy, hypothermia, anemia, hypoalbuminemia, hypocholesterolemia, dehydration, vomiting with hematemesis, diarrhea. She was transfused. The cat subsequently died on (b) (6) and presented here at the (b) (6) (b) (6) at (b) (6) for a complete necropsy. The necropsy report can be provided, but I have not found a way to attach it here. There was a perforated gastric ulcer, an acquired diaphragmatic hernia, and severe peritonitis and pleuritis grossly.</p> <p>As part of the post-mortem work-up, our clinical nutritionist evaluated the diet, using the advertised analysis and instructions for the Vegecat product indicated as a supplement used, per label directions, and calculated the approximate diet contents. Those calculations can also be provided, but I can't figure out how to attach a report here. The concern of the nutritionist is that the selenium and iodine levels per the label analysis and directions for use, exceed the requirements excessively and if the analysis is correct, would pose a risk for toxicosis associated with either selenium or iodine. The NRC requirement for a 4 Kg cat is selenium 19.46 ug/day and for iodine is 98 ug/day. The amount supplied just by 5 grams of Vegecat supplement, per label analysis, would be 6940 ug of selenium and 2690 ug iodine. At this point, histopathology is pending on the tissues from this cat. Tissues have been retained that could be tested for mineral levels.</p>

EON-107196	11/2/2012 13:42	Canyon Creek Ranch Brand Duck Wrapped "Big Blast" pork skin with liver center	The incident happened several months ago but a recently saw a local news story regarding dog treats made in China. I read the FDA report and realized that my dog had a similar experience with a dog treat. I still have the product so I looked at the bag that I kept and realized they were treats made in China and wrapped in Duck Jerky. I purchased a chew bone type treat that is pork skin covering liver with Duck Jerky wrapped around the pork skin from a local PetSmart. I gave one to each of my dogs and within a couple hours the one dog began suffering from severe mucousy diarrhea with blood. Knowing that the only new food item introduced was the chew bone, I removed both and threw them away immediately. I fed the dog hamburger and rice until the diarrhea was resolved and she has been fine since. I have not given her or any other dog anymore of the treats however, I kept the remaining product for some reason. I didn't give the incident much thought since she has recovered without medical intervention until I saw the news story about treats imported from China. That is when I pulled the bag out of the back of my cabinet and saw what they were made of. The date below is approximate since I can't remember the exact date the incident occurred. I do still have the product.		3	Years	Crossbred Canine/dog	Dog	12	Pound

EON-107124	11/1/2012 20:12	Nature's Animals All Natural Dog Biscuits Big Bite Peanut Butter Treat	<p>On October 14, our neighbor brought our dog a peanut butter Big Bite Dog Biscuit made by Nature's Animals, Inc. On the 16th, (b) (6) wouldn't eat. On the 17th, he vomited 8 times in a couple of hours while we were gone for surgery on my hand. I made him rice and kept him quiet that day. He developed diarrhea. On the 19th he began to vomit blood and was kept over night and treated with IV fluids and Flagyl at the (b) (6) in (b) (6). He was very ill for a couple of weeks and is just now seeming to feel somewhat better. The hospital treatment that he required was quite expensive. The total bill, not including his prescription, was \$872.25. He is now back to eating his regular food. The only thing that he consumed that he not had since was that biscuit.</p>	6	Years	Spaniel - Springer English	Dog	71	Pound
EON-107123	11/1/2012 18:36	EvoraPet	<p>The incident occurred with my two dogs. (b) (6) is 24 lbs, a cocker-poo, and age 5 1/2 yrs. (b) (6) is 9 lbs, a chihuahua-mix, age 3 yrs. For about a year or so I was using Teddy's Pride, Probiotic Oral Care. I sprinkled it on the dogs food every morning per recommendation. On September 5, 2012, I ordered EvoraPet, Probiotic Oral Care, from Amazon.com. The product is manufactured by Oragenics, Inc. and is "Made in the USA." It notes the manufacturer is FDA-certified. I found out after the incident that EvoraPet IS the same as Teddy's Pride.</p> <p>I started using the product around October 1, 2012. Please note no new food or other parameters were changed in the dogs' routine. My two dogs started scratching. They both are treated for fleas so I wondered what the problem was. I started to notice an increase in scratching and became concerned. By October 19th, both dogs had pink inflamed skin and were scratching incessantly. Both were biting at their abdomen and feet. They were licking all over. (b) (6) had the worst reaction. He scratched sore all over his head and suffered bite marks on his underside. I gave both dogs Benadryl, which only slightly helped. (b) (6) was pulling his hair out and was in distress. I took (b) (6) to the vet on Monday (October 22nd) where he was treated with antibiotics, steroids, and blood was drawn. The next day I took (b) (6) to the vet and she was treated similarly. I had to buy a collar so (b) (6) wouldn't lick and special Royal Canin hypoallergenic food. The cause of the problem was unknown at that time. I had spent \$500 on the vet and special food by October 23rd. I started the new food that evening.</p> <p>I decided to stop giving them EvoraPet on Tuesday the 23rd (their last dose was the 22nd). By the 24th I noticed improvement. I notified (b) (6), Customer Representative, Oragenics, Tampa, FL on October 25th. We exchanged emails between the 24th and 25th. After I happened to sign my name with Ph.D., I received an email from (b) (6), Oragenics, Alachua. He asked for a sample of the product for analysis. I mailed it on Monday the 29th and it was received October 31st. I emailed him on November 1st asking if he analyzed the product yet. He said it was "under investigation."</p> <p>EvoraPet Probiotic Oral Care for Cats and Dogs--2 ounces--Lot. HO318, Best Buy 04/2013. Ingredients: soy protein isolate, silicon dioxide and various Strept. bacteria.</p> <p>No refrigeration required. I stored the product in the cupboard.</p>	5	Years	Other Canine/dog	Dog	24	Pound

			(b) (6) lab analysis: Indicated an allergic reaction--Basophils 182, Globulin 4.4, Total Protein 8.3 The dogs are fine now, however, the weekend of Oct. 19th was very stressful dealing w/the allergic reaction. I had to wait until Oct. 22nd to go to the vet.						
EON-107029	11/1/2012 9:06	Waggin Train Jerky tenders	On Oct. 24th gave both of my dogs waggin train duck jerky treat. While other dog got seriously ill, this dog, (b) (6) was only sick one day. The afternoon of the day he ate the jerky, he vomited on the couch and recliner. Laid around all day, but seemed better in the evening.	5	Years	Lhasa Apso	Dog	27	Pound
EON-107028	11/1/2012 8:51	Waggin Train Jerky Tenders	Gave Waggin Train duck jerky treat Wed. am, October 24th. the next day, Thursday, October 25th, she started vomiting and had diarrhea. Friday, October 26th, she would not eat, continued with diarrhea about 6 times that day. Dog slept all Thought she was better on Saturday, but late in day diarrhea and vomiting. Had not eaten since Thurs., Oct 25. Sunday brought her to emergency vet clinic. She was diagnosed with Pancreatitis from duck jerky treats! Vet kept bag of treats. Dog received fluids under skin, and sent home with antibiotics. Vet wanted to keep her overnight for an extra \$1000.00. I said no. I would bring her to her regular vet next day. I would do anything for my dogs....but I can not believe these treats caused her to be so sick I thought I was losing her! So one duck jerky treat from Waggin Train almost took the life of my dog plus cost me \$634.00	13	Years	Poodle - Medium size	Dog	24	Pound
EON-107026	10/31/2012 23:06	Waggin' Train Big Blast Pork Skin Twists with Chicken Liver	Dog started becoming lethargic, weak in the legs and drank excessive amounts of water. As time went on, he became more weak with excessive urination and finally couldn't walk or even hold his head up to eat or drink. Being new to the area, I attempted to locate a veterinarian who would make a house call without charging me an arm and a leg, all to no avail (I have severe Aorta Problems and can't lift more than 15 lbs myself). The dog continued to worsen, hanging on as best he could, until he died on the 22nd of September. I learned of the problem with Pet Treats after he started getting sick.	9	Years	Akita	Dog	80	Pound
EON-107025	10/31/2012 22:36	Waggin' Train Big Blast Pork Skin Twists with Chicken Liver	Dog started becoming lethargic and her legs seemed weak. Drank a tremendous amount of water, but ate her usual amount. As days progressed, she became weaker and weaker, still drinking large amounts of water, until finally was unable to walk. I spent the last week holding her head up to drink and eat her food. Her urination also became excessive. Finally, she died.	7	Years	Akita	Dog	50	Pound

EON-107024	10/31/2012 22:21	Beefeaters Chickentops rawhide roll with Chicken Meat	(b) (6) presented with a urinary tract infection with bloody urine beginning around Sept 21, 2012. She is being treated with Baytril and now has been diagnosed with Fanconi Syndrome with 4+protein and 4+sugar in her urine. Blood glucose is normal. She has a history of ingesting Beefeaters ChickenTops Rawhide (produced in China) It is a rawhide roll that has chicken wrapped on the outside. I FIRMLY believe that is is something with the Beefeaters product has induced the Fanconi Syndrome. Her doctor will be performing electrolyte blood levels to determine the degree of damage to her kidneys. Her prognosis is unknown at this time. Prior to this she was very healthy and active. These products SHOULD BE TAKEN OFF THE MARKET ALONG WITH ALL PET PRODUCTS FROM CHINA!	4	Years	Retriever - Labrador	Dog	104	Pound
EON-107016	10/31/2012 20:21	Purina Beneful Brand Original	My dog began vomiting last Sunday morning after eating his breakfast. It was just his undigested dog food so I didn't think much of it. He threw up again after eating his dinner on Tuesday, but again, just his undigested dog food and only once. However, by Thursday, he was vomiting uncontrollably immediately after eating both breakfast and dinner. By this point, he was looking ill and was starting to look like he was losing weight. It occurred to me at that point to check for a possible recall. While my internet search did not produce results for a recall, one of the first links in the list was to Consumer Affairs which showed a couple hundred complaints about Purina Beneful do food, many of them from the last couple of months, with people reporting symptoms of vomiting, diarrhea, seizures, kidney and liver failure, and sometimes death. I immediately discontinued using the dog good and took my dog to the vet the following day. He needed to be given medication and a bag of IV fluids for the vomiting and blood tests showed abnormal results with his liver. (Not sure what they test, but normal range is 10-100 and my dog's result was 194.) He had also lost a little weight from his previous visit. My dog stopped vomiting after I discontinued feeding him the Beneful. He's eaten this particular food most of his life, but this was a new bag that was recently opened. I have a number of co-workers who also have dogs so I mentioned to them about my dog and what I read about it making other dogs sick. Two of them said their parents feed their dogs Beneful. Each set of parents have 2 dogs. All 4 of those dogs have had vomiting and diarrhea in the last couple of weeks and one of the smaller dogs had a seizure. I do not think this is a coincidence.	5	Years	Mixed (Dog)	Dog	63	Pound

You would have to get a hold of him for further information. (b) (6), his clinic is the (b) (6) in (b) (6).	6.5	Years	Maltese	Dog	8	Pound

EON-107001	10/31/2012 16:21	Waggin' Train Wholesome Western Grill Assorted Dog Treats	Gave my 10 lb. female dog a Waggin' Train Chicken Drumette - after 2 hours and finishing it all, she seems fine. Gave my 20 lb. female dog a Waggin' Train Big Blast Pork Skin Twist. After about 15 minutes, I heard a thud in the living room (I was in the kitchen) - thought it was the wind blowing against the front door. Then I heard it again, and I went into the living room and (b) (6) was down on the floor shaking and drooling. I picked up the remainder of the twist (she probably ate no more than 1/3 of it). Gave (b) (6) some hydrogen peroxide so she would throw up, which she did after about 10 minutes. (The throw up was kind of gelatinous). She drank some water and moved to a sitting up position. I took her for a walk - she had some diarrheal issues. We got back - they are both up on the couch snoozing. Hope this will be it for both of them.	7	Years	Mixed (Dog)	Dog	20	Pound
EON-106969	10/31/2012 12:42	Rachel Ray Nutrish Chicken & Veggies Dog Food	I purchased a large bag of Nutrish dog food from (b) (6). The bag contained 4 crushed roaches. I notified the store as well as contacting the makers of Nutrish. The maker said it could not have come from them as there are no bugs in (b) (6). I returned my unopened bag. 1 month later I purchased another bag of Nutrish from a new Kroger store in town. The bag contained 6 large dead roaches. I called the maker again and was told they still don't have any bugs in the state of (b) (6) and this must be coming from the store. They then left me a voice mail message saying that they have investigated all of their warehouse facilities and trucks and found no roaches so the problem must be in the store or the stores warehouse.						
EON-106927	10/30/2012 20:51	Waggin Train Chicken Jerky Treats	Fed her Waggin Train Chicken Jerky Treats. She ate these for 2 years. When we heard of warning of health problems caused from them we stopped buying them. (b) (6) now has health problems caused from kidney failure. The vet says all her health problems are stemmed from her kidney problems. There seems to be no hope for her to live much longer. The vet is consulting specialist in hopes of finding something he can do.	4	Years	Terrier - Yorkshire	Dog	10	Pound
EON-106895	10/30/2012 14:12	Taste of the Wild Rocky Mountain Feline Formula with Roasted Venison & Smoked Salmon (SAMPLE PACK)	We have been feeding our cat Taste of the Wild Rocky Mt. Venison cat food for years, no problems. I ran out of the food, and all of the local distributors were out of it, so I got 4 sample bags to hold us over until they got the full bags in. Our cat is a 100% indoor cat, no other pets, she does not eat any human food or food other than this. We fed one bag of the sample (about 1.5 servings, then started on the 2nd bag of the sample.) The next day our cat had diarrhea, she could not even hold it in her body. In her entire life she has never experienced anything like this. The following day was the same. Today is day 3, so we will see. Again, this was the same kind of food she's been on for 3 years, so it was not a switch in food, just using the sample packs of the same brand. The sample packs do not have any coding or dating, but I called the pet store and the pet store owner said they were recently delivered (2 weeks prior to 10/26/12)	7	Years	Unknown	Cat	13	Pound
EON-106850	10/29/2012 10:57	Greenies Joint Care - Large	Note to Nutro (10/29): I just opened the Monday tab of the Greenies Joint Care - Large and found at least 3 live maggots, thousands of eggs and a silky web/nest material spun over the product. I had found similar issues with other cavities in the same box but didn't think it was an infestation issue until I saw the maggots. The seals appear to have had a complete closure so the infestation seems to have occurred during the manufacturing process. The box is from lot 210A2KANJ1 15:48. I have kept the batch as evidence and have documented the infestation contents if you want to review.						

EON-106845	10/28/2012 22:51	Wagon Train Chicken Jerky	After eating 2 maybe 3 Wagon Train Chicken Jerky treats over a 1 week period of time my dog became violently ill; he had insatiable thirst, severe vomiting, lethargy, absence of appetite and difficulty walking. I had to spoon feed him water to maintain his hydration as every time he drank he vomited. It was 5 days before he returned to eating and again I was spoon feeding him boiled chicken or beef to ease the stress on his system.	9	Years	Terrier - Boston	Dog	35	Pound
EON-106844	10/28/2012 14:21	Waggin Train	My dog ate chicken jerky purchased at Walmart and he only vomited once but he would not take any food or water for 14 hours. He constantly was licking his lips. We took him to our vet and his blood tests showed increased levels in the liver and pancreas. His liver number should have been 117 and his were 1784. He was on IV's for fluids and antibiotics for 24 hours. It was about two days before he would eat but he started taking water after about 48 hours. I am certain it was the treats because our dog is not a grazer and his food consists of science diet, meat which we also consumed, and Purina Healthy Pet. I give him the chix treats nightly but had never had a problem or heard of any. I don't know if it was just one treat, or the fact he eats them every night. But, this was a sudden attack because he was behaving normally the day before, and when we woke up, he was acting depressed. We didn't realize he was ill until that evening when he would not eat, or drink. We took him to the vet the next day.	10	Years	Unknown	Dog	105	Pound
EON-106842	10/27/2012 19:21	Milo's Kitchen homestyle dog treats beef jerky	Dog was given Milo's Kitchen beef jerky a few times and vomited the next morning. The dog also became very thirsty as a result of eating the jerky.	9	Months	Mixed (Dog)	Dog	7	Pound
EON-106841	10/27/2012 12:36	Milo's Kitchen home-style dog treats Chicken Grillers, Waggin Train Jerky Tenders	On Sunday 10/21/12 I fed ^{(b) (6)} several small bits of Waggin Train chicken jerky and one piece of Milo's Kitchen chicken grillers. She vomited at least 4 times that night, then was lethargic and avoided food and water on 10/22/12. On the evening of 10/22/12 and morning of 10/23/12 she had bloody diarrhea, and was obviously very sick and shaking with pain. I brought her to the vet on the morning of 10/23/12 and she received an IV antibiotic and pain meds. Then on 10/24/12 and 10/25/12 she stayed at the vet office and received IV fluids each day, along with antibiotics and pain meds. She was unwilling to eat anything until the evening of 10/25/12, and as of now (10/27/12 AM) she's only intermittently interested in food, but otherwise she seems normal and not in pain.	5	Years	Terrier (unspecified)	Dog	28	Pound
EON-106834	10/27/2012 11:36	Sweet Potato and Fish Formula Treats Natural Balance L.I.T. small breed., Salmon Jerky , Blue Buffalo Wilderness Trail Treats	Began intermittent vomiting with diarrhea over a 3 week period. Clinical signs worsened to vomiting after each meal. Laboratory blood panels and autoimmune tests were within normal limits. Radiographic studies including a barium series were wnl. Laparotomy was normal except for thickened bowel and small intestines and enlarged mesenteric lymph nodes. Clinical signs worsened after surgery and pancreatic enzymes spiked. Biopsy report did not establish a cause but the tissue changes were consistent with allergic reaction to food. Cause of death is considered to be from pancreatic changes from inflammation or duct blockage	13	Months	Terrier - West Highland White	Dog	5.9	Kilogram

EON-106817	10/27/2012 0:51	Waggin Train Chicken Jerky Tenders	My dog (b) (6) was fed Waggin Train Chicken Jerky purchased at Costco over a period of several years. He would periodically have diarrhea or vomit bile during this period. We attributed this to the sensitive nature of German Shepherds to diet and could not be certain any specific food had caused this. During the summer of 2012 he began to act lethargic and losing weight. In mid August we bought more Waggin Train chicken jerky because he normally enjoyed eating that. He was fed a few pieces of the chicken jerky during that week. By the end of that week he became severely ill and we had to take him to a night emergency clinic where they stated he had Kidney failure and his condition was guarded. We then had him examined at the (b) (6) in (b) (6), and the internal veterinary doctor said his Kidney function was below 4%, and he would likely only survive a brief period. Two days later he was continuously vomiting and we tried intravenous fluid treatment which briefly helped. He had to be euthanized after slightly after a week past the treatment when his symptoms got severe.	6	Years	Shepherd Dog - German	Dog	115	Pound
EON-106812	10/26/2012 18:36	Iams Smart Puppy Large Breed Proactive Health	After eating Iams Large Breed Proactive Puppy Food, (b) (6) began vomiting regularly. He also had extreme diarrhea. (b) (6) veterinarian took x-rays and tested his blood. The veterinarian found nothing wrong with him. After hearing of the food recall, she stated that his dog food was causing his sickness. He lost 4 pounds in 7 days and his vet bills totaled over \$400.	8	Months	Shepherd Dog - German	Dog	67	Pound

EON-106767	10/26/2012 9:39	Diamond Pet Foods Hi-Energy	<p>There were originally two dogs involved.</p> <p>Dog A (male intact, walker coon hound, 9 years old) presented on 10/13/12 for lethargy and weight loss of two weeks duration. 59.4# and on 5/27/11 was 70.4#. On PE, patient was bcs 2/5, temp 101.8, hr, rr wnl. Blood work -no major changes except for low wbc and low neu and high globs. dog was sent home on metronidazole 250mg bid for 7 days and given panacur 14ml sid for 3 days. Prostate was normal. Heartworm test (3dx) negative. Dog is kept on ivermectin PO every month and was vaccinated with a distemper vaccine as a puppy but not kept current. Is current on Rabies. Dog is used to hunt coons. Kept in a kennel at all times except when hunting. Another dog 3 months ago that was on the same property and had contact with dogs died 3 months ago and was neurological but tested negative for rabies. Dog A went home.</p> <p>On 10/16/12 I took over the case when dog A presented again for no improvement and dehydration. Dog is still not eating. Started the dog on iv fluids LRS and on baytril 5mg/kg parentally, given a convenia injection. Dog's stool and U/A wnl. No parasites seen on fecal. At the same time, Dog B presented (walker coon hound 3 years old, male intact). This dog is kept in a kennel next to dog A. Dog B presented for bloody diarrhea that had started today. It is also lethargic and not eating now. Dogs are on continuous feeders and waters so owner is unsure how much they are eating, but he doesn't think they are eating at all. Dog B on PE has extremely watery bloody diarrhea. 101.8 temp, 50.5#, fecal- no parasites seen, 3dx heartworm negative. Gave drontal plus and started dog on baytril 5 mg/kg parentally and convenia injection. Both dogs are on diamond dog food, however, the specific bag that the owner has, hasn't been recalled.</p> <p>10/17</p> <p>Dog B was tested for Parvo and that came back negative. He was started on IV fluids (LRS). Dog still not eating or drinking. Dog began to drool and was given cerenia sq. Continued baytril on both dogs every day. Dog seems very anxious. HR at rest is 120. Breathing abnormally hard. x-rays no sign findings. Gave buprenorphine and seemed to help some. Blood work ran on dog B- no significant findings. Ran blood work on Dog A. All WNL. Feces was still normal on this dog. Still not drinking but did eat a little a/d off and on throughout the day if hand fed.</p> <p>10/18</p> <p>Dog B not eating and drinking so ran bloodwork. No significant findings except for neutrophils slightly elevated, TP slightly low, Alb low. Diarrhea is less effusive and is started to look like soft served icecream. Continued cerenia injection and medications. Nose is becoming plugged with crusty material. Gave buprenorphine for pain. Did seem to improve slightly. Straining to defecate. Dogs seems to stare past me and not all there. plr normal. xrays of abdomen no sig findings, xrays</p>	3	Years	Coonhound - Treeing Walker	Dog	50	Pound
------------	-----------------	-----------------------------	--	---	-------	----------------------------	-----	----	-------

		<p>of skull wnl. did a saline flush. Dog A still eating some a/d but not drinking water. feces still normal. Both dogs still on fluids. 10/19 Tapered both dogs off fluids to see if they would drink on their own. Dog A begins to have softer stool. Ate in the morning but not at night. Still not drinking. Started drooling so gave cerenia injection. Dog B is eating great and looks a lot better today. 10/20 Put both dogs back on iv fluids. Did bloodwork on Dog A again- low wbc, low mono (platelets low but took a while to put in EDTA). Looked at cytology and saw some bands but not crazy stuff. Sent off chemistry since our IDEXX messed up- alb low, globulins high, ggt low, ck high. Continued medications and cerenia since drooling and eating grass. Dog B is still eating but not as much as yesterday. Continued medications and cerenia (started giving tabs). 10/21/12 Dog A ate some dry food (just a little). No longer wants a/d. Drank a little water for the first time today. feces is still soft. Dog is still drooling so gave cerenia and baytril, also started ketoconazole 10mg/kg bid po. Another veterinarian on duty gave the baytril in the morning instead of at night. (got a dose 12 hours sooner than normal to both dogs). That afternoon both dogs had fevers. (dog A-103 temp 57.1#, Dog B- 102.5 temp, 49.1#) Dog B Ate dry food and some wet food, still not drinking. continued baytril and cerenia. Dog A looks lethargic, added some dextrose to lrs. 10/22/12 Dog A didn't eat anything or drink today. 58.2# 100.2 temp. looks brighter than yesterday. PUt new catheter in and continued fluids. Drooling a lot and eating grass. Didn't eat or drink today. Dog B 48.7# and 101.6 temp. stool is still loose but formed. Ate a little dry food and drank some water. 10/23/12 Dog A 55.9#, 101.4 temp. started on famotidine so I could stop cerenia. Giving it twice a day po 40mg. Ate a lot of food in the evening (entire bowl of dry food when I mixed in some beef and gravy). Drank a little. Dog B- didn't eat at all or drink. Loose but formed stool. Started on famotidine 40mg bid. drooling still. 10/24/12 Dog A- Ate a little bit of cat food this am. didn't drink. BAR continuing on medications. Dog b- not eating or drinking, seems a little more lethargic, drooling. Continuing on medications but adding ketoconazole 10 mg/kg bid (shotgun theory). Dog b started vomiting water with bile (twice) on a walk Gave 60mg cerenia Also gave some activated charcoal</p>						
--	--	---	--	--	--	--	--	--

			<p>want gave some cerenia. also gave some activated charcoal.</p> <p>10/25/12</p> <p>Dog a- eating a lot of wet food and some dry. Drinking water and BAR. Continuing medications but increased to 10mg/kg baytril via advice from classmates. Almost normal feces, just a little soft. Dog b is still lethargic, had green mucous from nose this morning, not eating much, but did drink some. He ate part of a blanket in his cage today and then threw up. Dog b has been relinquished to me. Gave cerenia again since drooling a lot and vomited. Stool is still formed but soft.</p> <p>So throughout the entire process- xrays were taken of both dogs A and B- chest and abdomen and skull of the sneezing dog. I couldn't find anything significant on them. Another thing is both dogs seem very tender along the back. When I touch them, they hunch down. They seem to wax and wane as far as looking BAR and being lethargic. Dog A originally presented sick but looked ok when it was brought back in but dog b looked horrible. Dog b looked bad for a while, then they switch and the opposites looked worse. Redid a 4dx on Dog A since I originally did a 3dx to see if there was any difference. Dog A was negative on everything. I had sent in salmonella PCR on Dog B since he had the worst diarrhea. This came back negative. Sent in a Distemper PCR on Dog B since he had the most signs consistent with distemper. This came back negative. I have done rectal scrapes and am waiting for results on those and also sent in lepto serology for Dog A since that owner is still paying for things. I have the diamond dog food and plan on sending it in for testing but need to figure out what I want it tested for. Went to the property where dogs A and B were kept strictly in a kennel. They are on concrete in wire kennels. Nothing obvious stands out other than the cement was laid where they used to farrow pigs.</p>						
EON-106742	10/25/2012 21:15	Meow Mix Turkey and Giblets	<p>About once every 2 weeks, I feed a small portion of a tub of wet cat food as a special treat. This is the first time I have purchased Meow Mix. The first time I feed approx. 1/3 of the tub. Within about 20 min. she had projectile vomiting. When it was thrown up, she was ok. I refrigerated the rest. I thought it was an isolated incident because she never throws up. After several days, I fed another 1/3 of the tub to her again. Within 20 min. she did the same projectile vomiting and was ok after. I have fed another brand and she never has thrown it up. I never purchase anything that has any fish in it. The tub said Turkey and Giblets, but When I looked at the back label, the number 1 ingredient was fish broth followed by tuna and tuna by-products.</p>	12	Years	Domestic Shorthair	Cat	8	Pound

EON-106741	10/25/2012 20:00	Waggin Train Chicken Jerky Tenders	<p>We bought the treats on Wednesday (b) (6) at the Walgreens in (b) (6), (b) (6). We fed 1 treat to our dog on that same day early evening. Thursday morning the dog had diarrhea, we fed the dog plain white rice and boiled chicken, he threw it up 20 min after he ate it. He would throw up any water he drank. We did not give him any food, we gave him pedialyte as directed by the vet and he would also throw that up. Early Friday morning at 3 am the dog had diarrhea with blood. The bloody diarrhea happened every 2-3 hours. We took the dog to the vet on Friday at noon. He was given an anti vomiting shot and anti diarrhea shot and antibiotic shot. We were given medicine to give him for a week. Friday night at midnight he had continuous severe bloody diarrhea and he was extremely lethargic so we took him to the ER vet. His temp was down to 92 degrees. They put heating blankets on him and gave him an IV. We got a call from the vet at 7 am that he had stopped breathing and was dead.</p> <p>The Chicken Jerky treats were the last thing that he had eaten. We never fed him anything but Natural Balance. He had been eating that food for 2 years. He was a perfectly healthy and young dog that ate that treat and died 3 days later. He was current on all his vaccinations.</p>	3	Years	Dachshund - Miniature	Dog	14.5	Pound

EON-106727	10/25/2012 15:21	Canyon creek ranch brand trail chews wrapped with chicken	My dog died suddenly after eating Canyon creek ranch trail chews - wrapped with chicken. She had been given these for a 2-3 months as a treat. She had no symptoms except an occasional loose stool. She was fine the day before she died. I found her in the morning. I had heard nothing during the night and was taken totally by surprise. I had no idea what had happened to her until my daughter started doing research about the food and treats I was giving her. By the time I discovered that the treats were probably the cause she had already been buried.	8	Years	Schnauzer (unspecified)	Dog	30	Pound

EON-106719	10/25/2012 13:51	Smokehouse Chicken Chips	<p>Our little Yorkie was always finicky with food, but loved the Smokehouse Chicken Chips as a treat only. We probably gave her 1-2 of the chicken chips/day as a treat for telling us when she had to go out. We started noticing she had some diarrhea problems, so converted to a "grain free" diet, but continuing with the treats. We then noticed she was starting to slow down, but attributed this to age; however there were days when she had more energy. She started throwing up more frequently, which was mostly bile, but thought it was because she quit eating on a regular basis. Her normal schedule was to eat 1/2 c. 2x daily, then she went to 1/2 c. 1x daily and then to about every other day. We also noticed her drinking lots of water---much more than usual. We were scheduled to go back to (b) (6) with her on a trip, so tried to get her in to our vet, but couldn't on such short notice. Once back in (b) (6) we took her to a vet there. We were concerned with the extreme water she was drinking she might have diabetes. The vet did a blood test and said she didn't have diabetes, but was between Stage 3-4 of kidney failure. We cancelled the remainder of our trip and brought her back home to (b) (6) immediately as per our vet's recommendation. She looked at the tests done and confirmed kidney failure. We tried 2 treatments of laser to stimulate her kidney cells and appetite, but to no avail. At this point, (b) (6) had not eaten for 5 days and was getting very weak. We made the determination not to put her through any more procedures and since the vet determined she couldn't be cured at this stage, we had her put down. Our vet asked us if we had been giving her any chicken jerky treats from China. We checked and found that we had and threw the bag away; however, the pet supplier is still selling these treats through KV Supply over the internet and by catalog. When I checked the internet this morning about chicken jerky from China causing kidney failure, we were devastated to learn we may have caused our pet's problem. PLEASE ISSUE SOME RECALLS AND DO WHATEVER YOU CAN TO STOP THIS FROM HAPPENING TO OTHER PEOPLE! (b) (6) was a member of our family.</p>	13	Years	Terrier - Yorkshire	Dog	8	Pound
EON-106714	10/25/2012 13:21	Waggin' Train Jerky Tenders chicken	<p>every time I gave (b) (6) a piece of Waggin' Train chicken jerky tenders she had orange colored diarrhea. It took a couple of days for her stool to return to normal color and consistency. When I realized that the jerky was causing the problem above, I threw away multiple bags of the product so that there was no chance of further problems. Therefore, I do not have the specific package information.</p>	9	Years	Pug	Dog	13	Pound
EON-106670	10/25/2012 2:45	Milos Kitchen home style dog treats	<p>My dog was sleeping and all of a sudden went into shakes and struggled for air and looked like she was having a siesure with mouth wide open and shaking foaming at the mouth. She deficated on the rug laying down and came to and started breathing normaly again after about a minute. I have been feeding her Milos Kitchen home style dog treats and heard from a friend to stop for there was a story about jerky treats in china making dogs sick. She has neverhad an episode like that nor had an episode since. I had her in the vet for a full check up about a month earlier and everything was fine. The dog is 10 and I first thought it was a siesure but now not so sure. I thought she was going to pass away. Now she is fine. I called the 1 800 number on the bag to see if there were any recalls or problems and they said no. The only issue they ever had was about a year ago. After googling the product and it popped up I got angry that the manufacturer would not release that information that I read on line. I do think this treat made my dog violently ill. I still have the product.</p>	10	Years	Retriever - Labrador	Dog	180	Pound

EON-106637	10/24/2012 11:09	Waggin Train Wholesome Big Blast Pork Skin Twists with Chicken Liver	On Sat 10/13/12 I noticed that (b) (6) was trembling (in the rear) - he did not eat his dinner but was drinking a lot of water. On Sun 10/14/12 the trembling was All Over so I rushed him to the vets office. "(b) (6)" was put on fluids, antibiotics and pain meds - he was removed from ICU the next day and had started eating again. I picked him up on 10/16/12 and took him home - cause was not determined. Once home he seemed fine; however on Monday 10/22/12 the trembling started again and by morning had not stopped - back to the vet. "(b) (6)" is still there with an inflamed pancreas and possible "renal failure". The only thing in his life that has changed is these treats (my other dogs will not touch them). I purchased them several days before "(b) (6)" first episode and continued to give them to him until he was rushed back to the vet on 10/22/12.	2	Years	American Pit Bull Terrier	Dog	57	Pound
EON-106590	10/24/2012 8:54	Boots & Barkley Chicken Stuffed American Beef Femur Bone	On 10/23/2012, I purchased a Boots & Barkley Chicken stuffed American Beef Femur bone from a Target Store. Upon returning home, I unwrapped the bone from its packaging and noticed a greenish black substance came off on my hand. After further inspecting the bone, I noticed that a large portion of the bone has a mold growing on it. Thankfully, my pet never came into contact with the bone, and no harm has been done. I've put the bone in a ziploc bag in anticipation of returning it to the store.						
EON-106552	10/23/2012 15:51	Nutro Natural Choice Adult Small Bites - Lamb Meal and Rice Formula	About one month ago, we were running out of (b) (6) normal dog food and since it was not available, we tried Nutro Adult Small Bites Dog Food. During first week, we mixed it with his old/normal dog food without incident. Two weeks later, he was in severe abdominal distress - pacing, couldn't get comfortable for more than a minute. He vomited and was better within a couple hours. On Oct. 14, he had another occurrence of severe abdominal distress, had loose runny stools and threw up multiple times. Was lethargic and did not get any better. We took him to an emergency vet in (b) (6) at 4pm where they did blood work, x-rays and an ultrasound. They did not find any conclusive cause. He was given an anti-nausea medication and we were told to feed him a bland diet for the next few days. If he seemed better, we could gradually re-introduce normal dog food. After two days on the bland food (white rice and chicken), he had more energy and had his appetite back. Stools were still loose but starting to firm up. Over the weekend of 10/20-10/21, we gradually starting adding his old food back into his meals (not the Nutro). His energy is back, appetite is back and his stools are normal.	8	Years	Harrier	Dog	37	Pound

EON-106311	10/21/2012 10:24	Waggin Trails Chicken Biscuits, Kingdom Pets Chicken Jerky	She has been diagnosed with cronic kidney disease. After discussing her diet, I told the vet that I had been feeding her chicken jerky treats from Waggin Trails and the Costco brand(Pet Kingdom). Both where made in China. My vet on a recent visit informed me that these treats are being investigated for causing kidney failure.	14	Years	Mixed (Dog)	Dog	65	Pound
EON-106310	10/20/2012 22:15	Great Life Grain Free Wild Salmon	Bought a 25 pound bag of Great Llife Dog Food Salmon at (b) (6) in (b) (6) This was approximately on Oct 15, 2012. Upon arrival home, and opening the bag, a distinct rancid smell was noticed. My dog absolutely would not eat this food that she loved till now. I returned the food to the pet store, who advised me she had two bags of Great Llife Bison returned as rancid also.						
EON-106307	10/20/2012 13:15	Dogswell Vitality Chicken Breast with Flaxseed & Vitamins	On Monday, October 8, 2012, around mid-morning, I opened a new bag of dog treats which I purchased at a grocery store. I gave Flash one piece of chicken jerky. By about 1pm Flash was visibly in distress. He was shaking, and had a very high heart rate. I took him to the vet where his heart rate was found to be 200 bpm. Neither I nor the vet knew what was causing this. He was given fluids sub-cutaneously and returned home with me. By evening he seemed pretty much ok. Two days later, on Wednesday, October 10, again around mid-morning I gave Flash another piece of the chicken jerky. That afternoon I noticed him hovering around me and trembling again, with a very high heart rate. I thought to offer him a treat to comfort him but then I realized the chicken jerky might be part of the problem. I gave him a bowl of bland beef broth to get fluids in him to help flush his system. By evening he was pretty much fine again.	3.5	Years	Terrier - Rat	Dog	23	Pound

EON-106306	10/20/2012 3:09	Waggin Train Chicken Jerky Strips	(b) (6) loved the chicken strips, so I gave her a couple every day. She did not have a good appetite, and often I would have the Vet give her a B-12 shot for energy. She often had diahareea. She drank a lot of water. I was working out of town when my husband called me on (b) (6) and said he had found Page dead. I had heard about the chicken strips issue a while back and actually called the company who assured me this was unfounded. Recently my daughter was telling me about the issue with Waggin Train and dogs dying after eating this product from China. I have been wondering if this is what happened to (b) (6).	12	Years	Mixed (Dog)	Dog	15	Pound

EON-106195	10/19/2012 11:39	Waggin' Train Wholesome Chicken Jerky Tenders	(b) (6) was given a Waggin Train chicken jerky treat on October 18, 2012. At about 4:30 am on October 19th (b) (6) started to cry in her crate, so she was taken out, which was when she had very bad diarrhea. She had diarrhea again at 6:30am and then at 8:30am. She will not eat and is drinking very little on her own. The treats were the only thing that changed about her diet so they must be the culprit.		3	Years	Terrier - Yorkshire	Dog		10	Pound
EON-106152	10/19/2012 4:45	Special Kitty Chunky Chicken Dinner in Gravy	(b) (6) LOVES canned food and only gets it - because he is allergic to dry food. When I was opening the can, he was meowing and trying to get at it. However, he sniffed at the bowl and then refused to eat it. He has NEVER refused canned food before. I tried to feed it to my other 2 indoor cats - (b) (6) - age 12 - male, and (b) (6) - age 10 - male). They also LOVE canned food, and never get it. They also sniffed it and refused it. I thought maybe they didn't like it because it was chunky chicken. So I put it outside for the stray colony cats I feed, who only get dry food. Some of them ate it - (b) (6) - age 12 - female, and (b) (6) - age 1 - 7 lbs. - female) and I noticed they both immediately vomited it up. Then they came over and drank a lot of water and went over and ate grass and lie down in the grass for a long time. Then they vomited again and ate some of the grass, drank some more, vomited again, and drank some more. They seemed very tired and weak. I saw them later and they seemed alright. They are fine now and eating well. (I buried the vomit so none of the other animals could get to it.) I repacked the three cases of food that I purchased and put it into my car to return to the store. The next day, before I could return it, I noticed the smell of death coming from my car and realized it was coming from one of the cases of food. I have wrapped the case of food in a plastic bag and tied it shut to contain the odor.		17	Years	Domestic Shorthair	Cat		10	Pound

EON-106143	10/18/2012 21:30	Waggin Train Wholesome Chicken Jerky Tenders	<p>I bought the product two weeks ago from Sam's club (10/04/12). First time ever buying this brand/type (was my first time in a sam's club in years too). I gave my dog two treats a day (one in the morning and one in the evening). Within a week he started acting funny. He wasn't getting up, wasn't eating, wasn't drinking, and wasn't going to the bathroom. He started yelping like he was in pain. I kept feeding him the treats because it was the only thing I could get him to eat. I never thought they would be what was causing it.</p> <p>I saw the recall ad for the other chicken jerky treats and started researching what was going on. My dog has the same symptoms as the other dogs who were taking the recalled treats. I didn't think about it but he finally went poop today and it was YELLOW. I'm scared to death. I can't afford to take him to the vet. He's showing signs that he's in pain.</p> <p>Something is wrong with these treats and they need to be investigated and/or recalled.</p>	8	Years	Beagle	Dog		
EON-106141	10/18/2012 19:00	Purina Dog Chow complete and balanced total care nutrition	<p>My husband bought a new bag of dog food and gave the new food to our dog around noon on 10/17/2012. She was energetic and normal at the time. At 3 PM she was laying in floor unresponsive. Breathing was labored, she had thrown up and pooped. Her gums were gray and she was in bad shape. My husband rushed her to the vet. They gave her two litres of fluid and did blood work. Her hct, hgb, glu, and alt were high. The WBC, MONO, EOS and PLT were low. I have copies of the treatment and blood-work from the vet. In her opinion (b) (6) was exposed to a toxin or a substance that was toxic to her that sent her into anaphalactic shock. We have removed the suspect food and she is doing much better. This was the only environmental factor that changed and she had no opportunity to ingest chemicals. She is an inside dog and only goes out on a leash. We found no chewed up packaging and there is no way for her to get to the cleaning products in the home as they are stored outside in a laundry room.</p>	9	Years	Mixed (Dog)	Dog	52.6	Pound
EON-106137	10/18/2012 16:24	Milo's Kitchen Home-style Dog Treats; Chicken Jerky	<p>My dog developed GI distress in the form of vomiting after receiving Milo's Kitchen chicken jerky treats. We brought him to the veterinarian after 3 full days of vomiting and he underwent an exploratory laparotomy based on Xray imaging which showed a potential bowel obstruction. He was diagnosed with hemorrhagic gastroenteritis and put on IV and then oral antibiotics, to which he has responded well.</p>	14	Months	Retriever - Labrador	Dog	80	Pound
EON-106080	10/18/2012 11:39	Milos kitchen home style dog treats, milos kitchen home style dog treats	<p>starting 3 weeks ago, she started acting different than she has ever acted, constantly drinking water, not eating normally much less, throwing up water all over the house and urinating in the house. She is totally trained for 8 years and only barked when she had to go outside, not any problems ever, not even a vet visit in 8 years. Took her to the vet oct 13. 2012, 3 weeks after the 3 weeks of problems. They ran all the blood and urine test with no conclusion, gave me some antibiodics. As I was leaving, I brought up food, they than said what treats do you give her, I said 1 treat-2 treats aday and they said is it made in China, I said I wasn't sure. When we got home we went on line, was I surprised to see it was Milos kitchen home style, that was tainted, just what I had been feeding her for 3 weeks. I stopped giving them to her immediately and all problems disappeared right away. I never gave her any of the anti biodics they gave me, so I know it was the Milos.</p>	8	Years	Chihuahua	Dog	10	Pound

EON-106079	10/18/2012 11:30	Purina Beneful Original, Jerky Treats Tender Strips Dog Snacks	(b) (6) had eaten Purina Beneful Original dry dog food that I got from Target. EON-106058	10/17/2012 19:39	Milo's Kitchen	My dog's thirst level seemed to increase steadily over the course of a few weeks in which she consumed a bag of Milo's Kitchen Chicken treats. I thought maybe they were too salty and didn't give her as many and then finally threw the bag away with a couple still inside. This was their largest size bag that retails for 11.99. I noticed that her thirst didn't get better and she even started urinating in the house. Where she would normally drink one bowl of water a day (we would dump and give her fresh a couple of times but she would never finish), now she goes through 4-5 bowls of water. I took her to the vet today and they detected glucose in her urine. We are waiting the blood test results. After doing some online research, I found that Milo's treats are made in China and that they are part of a group of treats that have allegedly caused Fanconi-like symptoms (glucose in urine) in dogs.	5	Years	Crossbred Canine/dog	Dog	11	Pound
EON-106057	10/17/2012 19:36	Meijer Main Choice Chicken Jerky for dogs	I gave her a piece of the Chicken Jerky treat as I put her in her kennel. The next day she whined and cried a lot and didn't want to eat or drink. I gave her a small piece for bed . She vomited blood and had diarrhea , would not eat and took only a small amount of water upon rising. I called MedVets and described her symptoms, unfortunately her Dr. was out of the office. they called me back and said I should take her to my regular vet and not to wait. I took her to my regular vet office and they diagnosed her as having food poisoning. (sp	3	Years	Bichon Frise	Dog	10	Pound
EON-105938	10/17/2012 11:06	Merrick BG Tuna 3	Merrick BG Tuna 5.5 oz cat food (best by date Feb. 2013, other numbers on can are 12034 CL2 20470 1532) purchased from Petco in Decatur, GA on October 2 = found large amounts of green mold in food.						
EON-105855	10/16/2012 19:51	canyon creeek ranch brand	My dog vomitted after being given a chicken jerky on two different occassions	4	Months	Retriever - Curly-coated	Dog	32	Pound

EON-105807	10/16/2012 15:21	Kingdom Pets Chicken Jerky , Milo's Kitchen chicken Jerky Treats	I never buy dog treats, but on a whim, purchased a large bag of Kingdom Pets Chicken Jerky from Costco in (b) (6) about 2 months ago. I gave my dog about 1 treat a day for the next few months until they ran out. And then purchased a smaller bag of Milo's Kitchen Chicken Jerky from Target because I thought my dog had enjoyed the previous ones. During that time, he threw up a couple of times, but I didn't think much of it. That said, looking back, I can't remember the last time my dog threw up previous to this. Four days ago, I noticed he had a sore paw so I took him into the Vet to have it looked at. It was determined that he needed surgery to remove a small growth and as a matter of procedure had his blood work run. That's when I found out my dog was in severe kidney failure. The vet was shocked at his numbers and asked if he had gotten into any antifreeze or prescription pain medication. Knowing my dog (never a chewer and rarely a trash sneak) and knowing my house (I have three small children and anything toxic is behind a child lock) I knew this dog had not gotten into anything. He said the only possibilities for his kidney failure were old age or toxicity related, but with his shocking numbers, likely toxicity. I was devastated. I couldn't believe that my seemingly healthy dog was on death's door. After the first day of IV fluid treatment, the vet and I were talking and he said, "There's one more possibility... have you been giving your dog Chicken Jerky Treats?" I was shocked. I told him I had been giving him 1 a day for the last 2 months. He then proceeded to tell me about all the controversy related to these products. Four days of IV treatment and \$1500 later, my dog is doing much better. However, he will have to continue to be given IV (Sub Q) fluids at home indefinitely until we can stabilize his numbers and will be on a special diet for the rest of his life. FDA!!!! Please, get this stuff off the shelves. Do the study... do whatever it takes, but if a dog can eat one bag (and part of another) of these and almost die... there is a problem! I am a college educated responsible dog owner who had no idea this was an issue. My husband is an Assistant U.S. Attorney here in (b) (6). Please listen to our story and contact us anytime for more details.	10	Years	Shepherd Dog - German	Dog	55	Pound

EON-105679	10/16/2012 11:21	Simply Right Pet Care high performance dog food	As soon as my dog started eating this dog food, he became very ill with diarrhea and was vomiting. At first we thought he was sick just because it was a new food for him, but after a couple of weeks, he was still very ill. The vomiting and diarrhea were continuing along now with lethargy and significant hair loss. Since he continued to be so sick, we thought he had some other issue. After trying to eliminate other issues it could be, nothing was making him better. I finally decided it had to be the food we were feeding him, because that is when it all definitely started. I looked to see if the food had been recalled and it hadn't, but I came across a website that rated and reviewed dog foods. This site gave the food we were feeding him a 1 star and there were several complaints from other people who had used the food that it had made their pet terribly ill. We went out and bought him another brand of dry dog food and he started showing signs of improvement after eating the first bowl. He is no longer vomiting, having diarrhea, and his energy levels are back up.	4	Years	Shepherd Dog - German	Dog	100	Pound

EON-105632	10/16/2012 4:09	Milo's Kitchen homestyle chicken Jerky Milo's kitchen beef sausage slices with rice Milo's kitchen homestyle chicken grillers.	My dog became ill 2 months ago with severe vomiting and diarrhea. The vet thought she got into some kind of poison. Last Saturday, we fed her 3 Milo's kitchen treats before bed. One was the sausage, one was a grilled chicken, and the other was a chicken jerky. 1 hr after she ate these, she started vomiting profusely for 12 hours, there was blood in her vomit. That day, she started having bloody stools. 2 days later, she has now started eating and drinking again but stares off into space and is very lethargic. I googled her symptoms, and found that these treats ARE making animals ill. If I had known, I would NEVER have fed her these treats... I hope she comes out of this...	3	Years	Mixed (Dog)	Dog	24	Pound
EON-105631	10/16/2012 2:15	Feline Greenies -dental treats	after feeding my cat treats several times; i noticed that shortly after i fed her the greenies brand treats - she would vomit (green) and now she has diarrhea that is green. i never had a problem previously - but noticed that the greenies are no longer made in the usa, and include salt - which in cats -can cause the heart to pump irregularly; causing blood clots, which travel to the spin - and cause paralysis - or can lead to death! for now, she seems ok, but while i was feeding her the greenies; she also had mouth sores on her gums - which i also attribute to the addition of salt in the ingredients.	17	Years	Maine Coon	Cat	14	Pound
EON-105626	10/15/2012 19:51	Milo's Kitchen hom-style dog treats Chicken Jerky	Dog ate one Milo's Kitchen Chicken Jerky treat and vomited approximately 5 minutes later. I returned the product and went on-line to find the FDA had put out a warning about this product earlier this year and numerous reports of dog's sickened or fatal due to ingesting this product. Please consider issuing another warning or a recall before more dogs are killed by this product. I was lucky that my dog vomited it back up quickly. He has not vomited anything else prior to or since.	2	Years	Beagle	Dog	45	Pound
EON-105615	10/15/2012 17:21	Waggin train chicken jerky tender treats for dogs 2146T031-0101WG1 - owner observed darker color of the jerkies compared to previous packages	Musculoskeletal problem (chronic, progressively getting worse). Drinking and urinating excessively. CBC, chemistry and UA on 9/1/12. Deteriorated and was euthanized in (b) (6).	13	Years	Boxer (German Boxer)	Dog	89	Pound
EON-105347	10/13/2012 22:24	California Natural Chicken Meal & Rice Formula Adult Dog Food	(b) (6) and my other dog, (b) (6) both had bouts of vomiting and diarrhea over a period of two to three weeks. They would both get better when I took them off the California Natural Chicken Meal & Rice Adult Dog food, and fed them a homemade diet of boiled chicken and rice, and they would get sick again when I returned to feeding the California Natural Chicken Meal & Rice. It took me awhile to figure out that it was the food that was making them sick. On 9/29/12, I took (b) (6) to the veterinarian, where she had blood work done, X-rays, and a fecal exam done. She was given subcutaneous fluids, Flagyl antibiotics, a pepcid shot, and a prescription bland diet. At (b) (6) follow up appointment on 10/5/12, the veterinarian agreed with my belief that the dog food could be responsible for her sickness.	8.5	Years	Retriever - Labrador	Dog	60	Pound
EON-105343	10/13/2012 19:21	Kingdom Pets All Natural Ingredients Chicken Jerky	After giving the chicken jerky treats, 1 per day for about a week, the dog all of a sudden became lethargic and stopped eating and was barely drinking water. She would cry and whine like she was hurting.	2	Years	Boxer (German Boxer)	Dog	48	Pound

EON-105303	10/12/2012 19:24	Cat Cuisine Savory Salmon Dinner	I bought a few cans of Cat Cuisine cat food July 10 from my local Save-A-Lot Store((b) (6)). Upon opening a sealed can of Savory Salmon Dinner I found 3-4 large drops of "bright purple/pink neon liquid" on the meat, about a 1/4 inch deep in one spot and it looks like some type of colored dye(I have it saved in HD video). UPC# 5193359715. I reported it to Save-A-Lot foods and then was contacted by Sim Foods(I believe that the name) and was asked to FedEx the product to them which I did and never received any info back. I quit buying the food for a couple of months but I bought more yesterday thinking the problem may have been fixed by now but today(10/12/2012) I opened another can and found the same thing. I'm not sure if it's something harmful but I'm really worried about the product and especially my cats health being they ate from the same lot that this can came in the day before.								
EON-105301	10/12/2012 19:00	Snausages Snaw Somes! Beef & Cheese Flavor	Our female Beagle Mix with no known health issues unexpectedly died the day after eating one of the Snausages Snaw Somes Beef & Cheese Flavor treats. We are baffled at our loss and are looking for answers.		7	Years	Mixed (Dog)	Dog		40	Pound
EON-105294	10/12/2012 17:21	Waggin Train Wholesome Duck Jerky Tenders	A routine urinalysis revealed very dilute urine plus elevated levels of protein and glucose, despite normal serum glucose levels. Upon questioning, the owner reported using Waggin Train brand duck jerky-tenders treats for dogs; a food product that has been implicated in Fanconi-like disease. Diagnostic testing is proceeding to quantify the degree of renal damage, but at present the dog compensates for the kidney damage by drinking and urinating at a minimum of every three hours.		7	Years	Havanese	Dog		16.4	Pound
EON-104880	10/10/2012 21:45	Best-1 Instant Hummingbird Nectar	A new container of Best-1 Instant Hummingbird Nectar, Clear, 14 oz. was opened and mixed and placed into hummingbird feeder. We have used this same brand for years without issue. This particular container was purchased about 1 week ago but opened today. Upon drinking from the nectar, the 3 hummingbirds that initially approached the feeder instantly died and fell to the floor. The nectar was replaced with a different brand (same feeder) and the hummingbirds are now feeding without incident. The Best-1 container was taken to the store it was bought, H-E-B grocery store on (b) (6) in (b) (6). The manager there was given the container and informed of the incident. Best-1 Hummingbird Feeders, the store that manufactures the product in Poteet, TX, was informed of the incident.					Other Birds			
EON-104876	10/10/2012 20:24	Waggin Train Wholesome Chicken Jerky Tenders	She ate these treats for years. My daughter told us of the problem with them so we stopped giving them to her. She loved her one jerky tender as a treat for eating her dinner, so we resumed giving them to her. About two weeks later, she stopped eating, started vomiting and was very lethargic. She was diagnosed with kidney disease, has an enlarged kidney, protein and blood in her urine. I filed a claim with Ralston Purina (Sedgwick co. is representing them) Today they rejected the claim saying there is no confirmed link to their product.		8	Years	Unknown	Dog		30	Pound

EON-104846	10/10/2012 16:45	petshoppe chicken jerky premium dog treats	I purchased 2 bags of Walgreens Petshoppe Chicken Jerky dog treats Sunday, October 7, 2012. The first piece I gave (b) (6) was Monday morning. She refused to eat it, so I took it away and gave it to her later in the day. She ate it and vomited within minutes. I did notice that when I pulled it out of the bag it seemed sticky. I had purchased a total of 3 bags one each for the months July, August and September. Every piece I pulled from the first 3 bags was very dry (not sticky) as I would expect them to be. Not knowing it was the chicken treat I repeated giving them to her Tuesday and today Wednesday. She refused it early and just to check I cut off a small piece and gave it to her. Within minutes she vomited. I am convinced it is the treats. I called Walgreens and explained this to the customer service representative their 800 number. The woman was very polite and said someone would call me in 2 days. I asked her to pull the product off the shelf in the (b) (6) store where I bought them. I also gave her the UPC code and the Lot #Y107J28A12775.	6	Years	Maltese	Dog	11	Pound
EON-104770	10/10/2012 14:30	Milo's Kitchen home-style dog treats - beef sausage slices with rice	On 10-9-12 at about 3:00pm, (b) (6) was given "milo's kitchen beef dog treats", one treat, broken in half. By the next morning, he was very sick. He wouldn't eat or drink, wouldn't go potty, and was stiff and moving very slowly, as if he were in a lot of pain. I took him to the vet, (b) (6) at (b) (6) (b) (6) in (b) (6) at 7:30am. They ran blood tests, which were all normal, and did an xray of his belly, which was painful. The stomach look normal, but the vet luckily noticed that the bottom part of his esophagus did not look quite right, it looked dialated. She did an xray of the chest with barium which showed a large foreign body in the bottom of his esophagus, just above the opening to the stomach. (b) (6) was referred to (b) (6) at (b) (6) in (b) (6), as he was the closest vet with an endoscope. (b) (6) tried for 45 minutes to remove what was stuck in his esophagus, but the substance just broke apart in little pieces. He also tried to push the substance into the stomach, without success. (b) (6) had to open up (b) (6) stomach, and surgically go in through the stomach and esophagus. He was finally able to dislodge the substance, which turned out to be two undigested pieces of meat, that were essentially the same size as the dog treats he had been given some 27 hours prior. Apparently, they would not digest or pass on to the stomach. We were lucky that (b) (6) noticed that (b) (6) esophagus did not look quite right, and that she ordered the second xray with contrast. (b) (6) is doing fine today, just in pain and tired. We are hopeful that he makes a full recovery. I was very alarmed to find out that these same treats have been linked to hundreds of dog deaths. I hope that this information is helpful in your investigation, and that these "treats" will be taken off of the market to prevent further deaths and dog injuries.	2	Years	Maltese	Dog	6.5	Pound

EON-104309	10/9/2012 0:36	Milk-Bone Healthy Favorites Natural Granola Biscuits w/Real Beef.	Purchased Milk-Bone Healthy Favorites Granola Biscuits with Real Beef from Pet Smart this past Saturday, Oct. 6, 2012. This morning opened box to feed to my pets and a moth flew out of it!! In further inspection the interior of the box has evidence of mildew as there is something like web and humidity. there were moths sitting ON THE COOKIES and even on the flaps of the box. You can see this web like between the cookies in the outside display plastic window of the box. The box has an expiration date of 9/27/2013. How can they sell this to customers? Who is responsible for this? The store for wrongly storing the product or the manufacturer for not making a safe product? Please investigate this further as I understand this is not the first time this occurs. This is total irresponsibility and absolute negligence with our pet's health! Ludicrous! Please keep me abreast of the outcome of your investigation. Thank you for performing your job!						
EON-104307	10/8/2012 19:54	Mini Dingo...Meat in the middle 21 pack	8am gave (b) (6) a Mini Dingo treat like I have been for 7 years. He chewed it for about 1 minute and then came out of the room he sleeps in and was panting, shaking and could barely walk. He just laid on his side almost unresponsive to me. This lasted for about 30 min and then he started to return to normal. I wasn't sure what caused it and thought maybe he had some sort of gall bladder attack or a stone somewhere. 6pm same day after I got home from work I saw the barely eaten Dingo treason the floor and I gave it to him since I didn't think there was a issue with it since he never had a reaction to one. Two minutes later he came out of the room again with same symptoms and even worse. I though I was gonna lose him for a little while. He just laid on his side shaking with tongue out and his heart racing. I now obviously realized it was the treat I gave him. I'm not sure if they have been contaminated or sprayed with some chemical but he had a reaction as if he was almost poisoned. The 2nd time it lasted about 30 min and then back to normal. Very scary.	8	Years	Terrier - Jack Russell	Dog	16	Pound
EON-104298	10/8/2012 1:24	Royal Canin Feline Health Nutrition Special 33	(b) (6) was diagnosed with a urinary tract infection on May 12, 2012, although I believe she had symptoms prior to me realizing what was going on. She had frequent urination with straining, blood, and extreme discomfort. Her urine tested for positive for blood, 8.5 pH, and 4+ struvite crystals. Throughout antibiotic treatment in May, her severe symptoms returned on several occasions followed by additional antibiotic treatment. Today, she struggles with feline lower urinary tract disease.	11	Years	Domestic Shorthair	Cat	14.5	Pound

EON-104295	10/7/2012 20:24	Waggin Train Wholesome Chicken Jerky Treats	About an hour after eating the treat she started vomiting. Was sick for a day and a half, wouldn't eat anything during that time.	3	Years	Terrier - Rat	Dog	12	Pound	
EON-104252	10/7/2012 12:06	Oi Roy	I am very careful about Pet food & Pet product ingredients & where manufactured as my dog has seizures. His diet (and knowing what is in it) helps reduce his seizures notably. Recently I inquired to Walmart online where their Oi' Roy pet products are MADE. They only list where they are "Marketed" (In Arkansas) Today they responded and said they are all made in China! Isn't that suppose to be disclosed on their packaging?							
EON-104212	10/6/2012 11:39	Certifect for Dogs 45-88lbs	I applied Merial's Certifect to my dog following the manufacturer's recommendation provided on the box. 24 hrs later the dog was totally lethargic and his pulse was significantly reduced. He had coordination problems and was not able to walk. I had to rush the dog to a veterinary clinic for treatment.	1.5	Years	American Pit Bull Terrier	Dog	58	Pound	
EON-104210	10/6/2012 3:30	Hills Prescription Diet w/d Canine Low Fat - Diabetic Gastrointestinal	<p>On October 3, 2012 I purchased a sealed case (12 cans) of canine 'Hill's Prescription Diet W/D' from my Vet. I used one can on 10/4/2012 without incident. When I opened the second can of canine food today I noticed a small black object about 1/4 of the way down the can. I removed the object and placed it in a clear baggie. When I applied pressure the object oozed blood. I sealed the can and the object in another clear bag and placed both in the refrigerator.</p> <p>I notified the CDC, the manufacturer, and I will call my Vet tomorrow morning.</p> <p>Please advise.</p> <p>(b) (6)</p>							

EON-104209	10/5/2012 22:30	Doctors Foster and Smith Veggie Wraps low fat treats for dogs	<p>I received a new order on 09.08.12 of treats from DrsFosterSmith.com. There was one new treat in this order we'd never had before. It was their private label Veggie Wraps: Chicken & Carrot Item # 75910 CRT. These are dried carrot sticks with dried chicken (jerky) wrapped around them. I thought I was getting my girls good nutritious treats.</p> <p>During the next 2 weeks both my dogs got sick a couple of times. They had been given this treat (?) 6-8 times during that 2 week period. When (b) (6) got sick the first time, we quit giving them these since they were the only thing that was new. Then, everything seemed ok, so resumed a few days later. But, that wasn't the end of it. There was both vomiting and diarrhea. The second episode for (b) (6) I found in the hallway one morning, I couldn't tell for certain if it was vomit or diarrhea w/ undigested food, but there were chunks of carrot in it. I know this was from (b) (6) because she tends to not chew her food as well. My other one, chews everything very slowly and carefully and wouldn't have had any "chunks" this large. There had been another episode of vomiting a (?) - a week (+/-) earlier. If there was more diarrhea outside, I don't recall and may not have seen it if someone else had taken her out. On the 14th day after receiving these treats, and both dogs being sick... I stopped giving them to them, but hadn't thrown the bag away yet.</p> <p>We heard another news report on Tues., 10.02.12, about jerky treats from China making dogs sick. I went back to their website to see where these had come from. It didn't occur to me to simply look at the package .. duh! Finally, outside the description and ingredient boxes on the web page and below some other ads and links for social media sites, I found a link for Questions & Answers. There had been 1 previous question regarding this product. Where did it come from? The answer was China. I was livid! Had I known that, I never would have ordered these treats. I proceeded to write them a scathing email and sent it off via their website. That information should have been clearly visible and included with all the other information regarding this product! I also requested that if they wanted these back, they needed to let me know immediately, before I threw them away.</p> <p>I've received 2 phone messages from them- one the following day, on Wed, and another yesterday. Today I finally spoke to a Customer Service Supervisor. I'd suggested they pull these products, and all food products from China, from their website and quit selling them. I was so angry both my girls had been made sick. They could get their products manuf. here, in the USA -- with USA ingredients, creating jobs and helping the economy, as well as, providing safe treats for our pets. While speaking with her, I found out that their Sweet Potato Treats, I'd also bought a bag of, comes from China as</p>	5	Years	Havanese	Dog	12	Pound

EON-104196	10/5/2012 16:15	Waggin Train Wholesome Chicken Jerky Tenders	To begin, over the last 4 months, her diet has been unchanged, just kirkland puppy food with which she has had no problems. The only change has been the addition of these "Waggin Train LLC" Wholesome Chicken Jerky Tenders purchased from costco approximately 1 month ago. The batch number on the bag is 2147T021 and upc code 807020777482. since I purchased the product my puppy has received these treats daily, and according to the schedule chart on the product bag for her weight she has had no more than 3 pieces of jerky a day. After the first week I noticed decreased appetite in my dog, slightly less at first and now significantly less to the point she is losing weight. Now this week on oct 1 and since she has developed chronic diarrhea and vomiting within an hour after eating these treats. Needless to say she will receive no more of these ever, but I will be watching her condition over the next couple days to see if there is any improvement.	5	Months	Boxer (German Boxer)	Dog	26	Pound

EON-104161	10/5/2012 12:21	EverPet real chicken Chicken Chips DOG TREATS, EverPet Jerkey twists with Sweet Potato & Chicken TREATS FOR DOGS	Patient presented for boarding 9/27/12 for boarding. Owner brought treats but none were given in hospital (b) (6) vomited a about 1/8 - 1/4 cup of clear colorless vomit, then the same amount of vomit with blood flecks, then about 1/4 to 1/2 cup of foamy vomit with a large amount of fresh blood within 1 hour of initial vomiting episode. Famotidine 5 mg was given subcutaneously, and 300 mg Sucralfate was given by mouth. Cerenia 0.75 mg was given subcutaneously. No more vomiting occurred until water was offered at about 3:30 p.m.. Then about 1 cup of brown tinged fluid was vomited. Water was withheld again and 150mls 0.9% NaCl was given subcutaneously. The patient was painful in the abdomen so Torbugesic was given (1 mg) subcutaneously. along with repeated doses of Famotidine and Sucralfate. The respiration and heart rate were mildly elevated. Mucous membranes remained pink with a CRT of less than 2 seconds. When we returned in the morning, the patient was deceased with large amounts of bloody vomit and rusty diarrhea in cage. Tissues were sent to ARUP reference lab for histopath which revealed a large amount of rod shaped bacteria in the intestinal tract. Tissue samples were also frozen in 0.9% NaCl. Urine and Stomach contents were obtained and frozen. After informing owner that patient had died, owner stated that Bo had vomited the day before he came in one time but was acting normally. He had also applied Frontline that he purchased at the co-op. He had used that product without problems in the past.	4	Years	Mixed (Dog)	Dog	15.2	Pound

GI xray taken; looked OK.</p> <p>8/24/12 - Developed pain overnight, possibly from neck/ shoulder. another GI xray and neck/shoulder xray taken; all OK. Injection of Metacam and Robaxin, continue prior meds. Would not eat or take meds that day, but drank water often.</p> <p>(b) (6) - Overnight started pacing and drinking more water; later started vomiting bile. Stopped drinking water and continued vomiting. Few drops of blood in vomit, then increasing amounts. Hospitalized with high kidney numbers; given 1 liter of fluids and meds for vomiting; doing better at 4:30 p.m. Still vomiting at 7 p.m. Passed away around 10:30 p.m.</p>	9	Months	Shepherd Dog - German	Dog	74	Pound

EON-104079	10/4/2012 17:09	Del Monte "Meaty Bone" Dog Biscuits Canine Carry- Outs Beef Flavored	<p>I think you may need to put the Canine Carryouts Meaty Bone dog biscuits (made by Del Monte) on a recall list. I know treats containing chicken have been contaminated, and while these treats are beef flavored, the first ingredient listed on the bag is chicken. My dog became sick about 2 weeks after introducing these treats to her. I know there is not an official recall out, but I have read the symptom list of some of the contaminated treats out right now. This past week, I have spent over \$1200 in vet bills. According to the FDA website, the symptoms of the poisoning are decreased appetite; decreased activity; vomiting; diarrhea, sometimes with blood; increased water consumption and/or increased urination and can involve severe signs such as pancreatitis or gastrointestinal bleeding. Blood tests may indicate kidney failure (increased urea nitrogen and creatinine). Urine tests may indicate Fanconi syndrome (increased glucose). Although most pets appear to recover, some reports to the FDA have involved pets that have died.</p> <p>My dog first showed signs of the problem around September 24th, by eating less and less and then not eating anything for two days. After that, she had diarrhea everywhere. My dog was eventually experiencing ALL these symptoms, including severe bleeding in the vomit and diarrhea. I have missed days of work to take her to the vet to prevent her from dying. She is going back to the vet for the fourth time today to get another blood glucose check. Her glucose level was so high that the vet thought she was having pancreatitis or was diabetic. This leads me to believe that this problem was caused by the treats, as she has never shown high glucose on any previous blood tests. I later found out that having pancreatitis can lead to temporary or even permanent diabetes in dogs. She is still showing high glucose readings, drinking large amounts of water, and urinating frequently even inside the house since she can no longer hold her bladder. My dog has never done this before or shown any signs of diabetes and I'm afraid that these poisoned treats ended up giving her this disease. I will gladly send in a sample of the treats she was given, as I have kept the bag. I can also fax over her vet records that will show the symptoms, tests, medications, and the vet's concerns. I bought these treats to reward my dog and make her happy-- yet I spent more than my entire paycheck to save my pet. If these treats are the reason why so many dogs are becoming sick, I think a recall should be issued immediately and all affected pet owners NEED to be reimbursed for their expensive vet bills that were caused by these knowingly contaminated, yet still unrecalled treats. How much money has to be spent and dogs sicken and possibly die before a recall is ordered?</p>	4	Years	Retriever - Labrador	Dog	67	Pound

EON-103843	10/2/2012 16:30	President's Choice Nutrition First - Premiere for Skin and Coat chicken strips	Fed President's Choice Nutrition First Premiere (Chicken Jerky) for Skin&Coat to both dogs (b) (6), who got sick, and Fritz, a 30 pound Chihuahua mix who is diabetic, had no obvious immediate adverse reaction. (b) (6) ate the treat only twice and shortly afterwards vomited on both occasions. I assume that there was something wrong with those treats to which (b) (6) reacted, since I fed my dogs various kinds of Chicken Jerky and never observed such an immediate adverse reaction, and the feeding of these treats was directly followed by (b) (6) throwing up.	7	Years	Chihuahua	Dog	15	Pound
EON-103841	10/2/2012 15:54	Dingo chicken jerky	Last week I had to put my dog to sleep. He was suffering, couldn't eat, breathe or swallow. The vet said he would not last another 2 weeks and he would suffer. The next day a neighbor brought me an article she had received about dog treats being dangerous and even causing deaths to dogs. I had been guilty of giving my dog, (b) (6), 4 of the treats on the list of dangerous treats. The most recent one I gave him was Dingo brand Chicken jerky treats. That was about a week before he began to not seem to be himself. I'm sending this e-mail to those of you who may have dogs or have friends who do so they may be cautious. The treats I gave him on that list were Puperoni, Snausages, Beggin Strips and Dingo chicken Jerky. I asked my son to research the net and see what he could find out for me. His e-mail is below and it will astound you. I hope I have saved at least 1 dog.	7	Years	Unknown	Dog	49	Pound
EON-103838	10/2/2012 13:36	Waggin Train Wholesome Chicken Jerky Tenders	I bought the Waggin Train Jerky Tenders at Walmart and gave the dogs pcs of the treat that night. By the morning my older dog had vomited on my bed. During the day she and my male dog (b) (6) had each vomited again in my family room. (b) (6) lost her appetite and would not eat her dinner that night nor her breakfast the next day. Knowing that the only change to her and (b) (6) diet routine was the addition of this treat, I decided to check the bag and discovered this brand of treats was made in China. I had heard about problems being reported about Jerky treats made in China so I decided not to give any of my three dogs any more of these treats. In addition, I took (b) (6) in to the vet the next day and he agree that the treats could be the cause of the vomiting and he advised me to discontinue giving any of the dogs these treats. The vomiting stopped on the third day and both dogs appear to be fine now. I plan on returning the Waggin Train bag to Walmart for a refund this week.	9	Years	Chihuahua	Dog	6	Pound
EON-103834	10/2/2012 12:09	ANY dried chicken treats imported from CHINA	Nothing happened...I'm just trying to get an email to whomever regarding all the poison that we import from China. Why in the name of all that is holy are we importing CHICKEN from China? Are there not enough chickens in the United States to feed our pets? Why are ANY dried chicken jerky treats still on shelves in this country? I don't understand. Can you help me to understand? Why is money so much more important than people or pets in America? How many animals have to be sickened by asian garbage? I'm reading reports of upwards of 3000 dogs sick or dead from this garbage. How many more? Doesn't ANYONE at the FDA own animals? Aren't ANY of you outraged? I'm so tired of asian garbage in this country. SO tired. When is it going to change? When are we ever allowed to feel safe again?			Collie - Rough-haired	Dog

EON-103700	9/30/2012 15:09	Milo's Kitchen home-style dog treats. Chicken Grillers	Initial symptoms included profuse urination (large quantities of diluted urine very often), increase in drinking water, and a lack of bladder control. The dog became severely lethargic and was rushed to the veterinarian. Urinalysis and blood work was performed. The dog was stabilized with fluids and supportive therapy. Analysis showed large amount of glucose in urine (4+). The dog lost approximately 10% of its initial weight within a week and subsequently developed a urinary tract infection. Previous to symptoms, the pet had been consuming Milo's Kitchen home style dog treats (Chicken Grillers) on a more than usual basis (pet was undergoing obedience training and the treats were given as rewards often). After stopping giving the treats, the pet has slowly gotten better.	2	Years	Havanese	Dog	12.8	Pound
EON-103699	9/30/2012 12:51	Fromm Adult Salmon tuna	Dog began vomiting. Though had flu. A week later vomiting continued and we realized it was the food. Tested theory by feeding an alternate food. vomiting stopped. After well again. tried the food again and dog would not eat it. When he did the vomiting started again. This was Fromm Salmon adult food. (Our dog had been fine on their Surf and turf prior and only ingredients differing were caviar, more salmon, and eggplant - our dog has not reacted to eggplant ever). Require vet visit because entire health did not recover for 6 weeks. I feed this bad bag too long and he lacked nutrition due to vomiting. His coat was destroyed and he slept a lot for weeks.	1	Years	Schnauzer - Miniature	Dog	16	Pound
EON-103698	9/30/2012 12:15	Waggin Train Chicken Jerkey Treats, Canyon Creek	Decreased interest in food, vomiting, diarrhea, lethargy. Sudden onset of Kidney Failure followed by extremely rapid deterioration and onset of what we believed was a fast moving lymphoma - lymph nodes swollen to the point that the dog was in physical pain when his neck was touched. Dog had to be euthanized approximately 1 week after onset of kidney failure.	12	Years	Mixed (Dog)	Dog	43	Pound
EON-103693	9/30/2012 1:36	Kingdom Pets Wholesome Duck & Sweet Potato (above that it says "Premium Treats for Dogs")	He was fed one Kingdom Pets Duck and Sweet Potato treat on Friday, September 14th. The next day, Saturday, September 15th, he was fed five. He lost his appetite on Sunday, September 16th, and appeared to be in pain. Two days later (Tuesday, September 18th), he was urinating with blood in his urine. He was taken to the vet's on Wednesday, September 19th, who said he had a raging urinary tract infection with evidence of kidney involvement. He had e coli greater than 100,000 organisms per mil of urine. The veterinarian prescribed SMZ TMP 480 mg: four tablets per day for 10 days. He's still taking the medication. Our other three dogs got 2 treats each but have shown no symptoms.	14	Years	Retriever - Labrador	Dog	70	Pound
EON-103690	9/29/2012 16:24	Milo's Kitchen home-style dog treats chicken jerky no artificial flavors or colors	We have two dogs, one 5 yr old lab mix, one 8 yr old maltese/poodle mix. Both dogs are healthy. Noticed both had EXPLOSIVE diarrhea, increased thirst, increased urination, loss of appetite, dehydration, decrease energy. We thought it was the canine stew I cooked for them. Threw everything out, switched entirely to different meats/veggies from a different store. Didn't get better. Happened to read an article on chicken jerky coming out of China, checked the label, was very surprised that this California company imported their jerky from China. Stopped giving it to them, all the symptoms went away. Tried to give it to them again, all the symptoms came back. Stopped it again, all the symptoms went away. The FDA must do something about this. Issue a formal warning to pet owners to buy at own risk or stop allowing the import of pet foods/treats from China because our pets are becoming quite ill and some are dying.	5	Years	Mixed (Dog)	Dog	82	Pound

EON-103683	9/29/2012 9:45	Rice Select Texmati Rice	I had to euthanize my dog on (b) (6) after he suddenly became lethargic and could barely walk. Emergency vet did ultrasound and found tumor rupture on his spleen, indicative of hemangiosarcoma, a very aggressive cancer, which had likely already gone to his liver and/or lungs as well. He had significant blood loss from the rupture of the tumor. During the course of his life, he ate a lot of white "Texmati" basmati rice, which he really enjoyed. He has also had dog food and biscuits containing rice during his life as well. After he died, I did some research and saw that arsenic is a known cause of this cancer. Coincidentally, I also saw the recent Consumer Union study on arsenic in rice - especially rice from the south and Texas. I was wondering if anyone has looked into the levels of arsenic in dog food and treats made with rice and what guidelines there are now for feeding pets rice from the south and Texas? I would like to spare other dog owners the grief I am going through now.	11	Years	Retriever - Golden	Dog	79	Pound

EON-103667	9/28/2012 16:45	Milo's Kitchen home-style dog treats - Chicken Grillers - Chicken recipe with natural smoke flavor	<p>The owners report that (b) (6) appetite declined on 8/8/12 or 8/9/12. The (b) (6)'s were out of town from 7/31/12 to 8/25/12 and a pet sitter was watching (b) (6). She was fed Milo's Kitchen home-style dog treats on 8/10/12. She was evaluated by the primary veterinarian on 9/10/12 for a poor appetite and blood work was normal. She was placed on amoxicillin and an appetite stimulant at this time. She had an episode of vomiting on 9/21/12 and was rechecked by the primary veterinarian again. Blood work revealed increased kidney values (BUN >130mg/dL and creat 2.4mg/dL), low blood glucose (50) and a snap test for pancreatitis (snap PLI) was abnormal. Urinalysis showed casts. She was transferred to (b) (6) for further evaluation.</p> <p>On presentation to (b) (6) (9/21/12), she was mild to moderately dehydrated. Brief BW revealed BUN > 140, creat 2.4, K 2.3, BG 203 and a metabolic acidosis (pH 7.303, HCO3 12.2). Blood work submitted to Antech revealed azotemia (BUN 105, creat 1.7) and hypocalcemia. Urinalysis revealed dilute urine (USG 1.020) with glucose and trace protein in the urine. She was diagnosed with acute renal failure and probable Fanconi's syndrome. Her renal values have been waxing and waning and her blood glucose has been intermittently decreased. Her renal values have progressed over the last couple of days. She has been treated aggressively with IV fluids with potassium supplementation, ampicillin, an anti-emetic (cerenia), famotidine, and supportive care. The hypoglycemia may be secondary to liver disease. Leptosporosis titers, ACTH stimulation test to evaluate for Addison's, bile acids to evaluate for liver function, and urine culture were all unremarkable.</p> <p>(b) (6) was discharged from the hospital on 9/28/12. The owners will give SQ fluids daily and we will recheck a blood chemistry next week.</p> <p>NOTE: When I filled out the date that her clinical signs started and when the treats were fed, I was unable to submit the form because the decline in appetite started prior to the treats being fed. However, the decline in appetite initially was likely because the owners were out of town. I spoke with (b) (6) and she said to document that her appetite declined on the same day that the treats were fed, so that the form could be submitted.</p>	6	Years	Terrier - Yorkshire	Dog	2	Kilogram

EON-102612	9/24/2012 17:51	Dingo Munchy Stix Chicken in the Middle	(b) (6) was given 1 Dingo Munchy Stix last night. This morning (Monday, the 24th) he wouldn't eat his food. He walked normally on his walk to a vacant lot to run, but he didn't run around. A couple hours later, he was just lying around and wouldn't play with our other dog, who did not get that stix treat. It is 5 pm and (b) (6) still won't touch his food. He is just lying around. Have not seen vomiting. Do not know if he has had any diarrhea, but will be watching for it. When he was given a bit of bread, a favorite, he took it in his mouth for several seconds, then dropped it and walked away to lie down.	3	Months	Shepherd (unspecified)	Dog	13	Pound
EON-102610	9/24/2012 17:30	Waggin Train Chicken Jerky Tenders	Sunday Sept. 16, 2012 Had his regular breakfast then gave him a Waggin Train jerky treat. He grabbed our other dogs treat before she could get it so he ate 2 and she had 1. Diarrhea started that evening. Had to go out numerous times during night. Was drinking water.gave him a pepto tab and a small jerky treat.By morning diarrhea was still bad it was like explosive. Started him on rice with hamburger with little plain yogurt and half Pepcid tab. He was still eating and drinking but I have never seen him have diarrhea this bad. You could tell he had cramps because he kept laying down in different part of the yard. He never does that. He kept moving to different spots, going, than laying down than moving again. (b) (6) our other dog started with it on Monday evening but just not near as bad as (b) (6). This went on until Wednesday when it started to get a little better. Still diarrhea but less times. I did continue with rice yogurt and pepcid for both dogs the whole time as suggested by the vet on a previous unidentified diarrhea episode. Trying to figure out what may be causing the problem I checked the FDA site for any dog food recalls I found the chicken jerky warnings. I thought it was ok to give them the jerky because it was only chicken.I guess I was wrong. They were both back to normal by Friday the 21st.	8.5	Years	Mixed (Dog)	Dog	85	Pound

EON-102571	9/24/2012 15:27	Evanger's Organics Turkey & Butternut Squash Dinner	I fed my cats a can of Evanger's Organic Turkey & Butternut Squash. I have 4 cats, 3 of whom ate the food, one can divided into 4 bowls. The 3 cats who ate it became extremely ill with repeated vomiting, at first projectile, which continued long after the food was purged. I had purchased 2 cans of this food together at a local holistic pet food store earlier this month. This is not their regular food, but a treat that I have bought for them several times in the recent past, with no adverse reactions until this particular can was fed. The other can that I purchased along with the one that made them ill was identical, except that the batch/best by date was different, and it had not made them sick. The contents of this can had a different consistency, wetter than the other can. I noticed it, but didn't think it was significant because often small companies don't produce consistently identical batches. I did not notice that the food smelled different or off. Eventually they were vomiting bile, and then foam. I was worried that they would have to go to the emergency vet, and then they stabilized and started drinking water. By this time I had started Googling the product to find out if there was a recall. Although I did not find this information, I did find a whole lot of information about Evanger's that I found really disturbing. Consequently, Evanger's response to the situation has also been disturbing.	10	Years	Mixed (Cat)	Cat	9	Pound

EON-102461	9/24/2012 9:03	Nature's Variety Prairie Beef Meal & Barley Medley	<p>I have fed my dog Nature's Variety Prairie Chicken & Rice and Beef & Barley exclusively for the past 6 years. I ordered 2 15 lbs. bags (one of each) in May 2012 from MrChewy.com. When I opened the Beef & Barley variety, I detected an usual off odor, but thought that maybe the formulation had changed. When I fed the kibble to my dog, he eat gingerly and after finishing half a bowl, walked away. Highly unusual behavior for my dog (b) (6). I reported the problem to Nature's Variety and they told me that they were unaware of any problem, but to discard the bag (which I did) and offered to send me a coupon for a complimentary replacement bag. I purchased the replacement bag approximately 2 weeks later at my local Pet Supplies Plus, and this bag of Beef & Barley had the same distinct, off odor. I again called the company, that seemed to suggest it was my "nose" or misfortune for having a bag with an off scent. They strongly maintained there was nothing wrong with the product.</p> <p>About 2-3 weeks later in mid June 2012, (b) (6) would refuse to eat and started vomiting. This was accompanied by chronic diarrhea and an unusual listless disposition. After a few days, I took him to our vet. Xrays, blood & fecal tests taken were all negative, however based on presenting symptoms, my vet treated (b) (6) with antibiotics, on the assumption that his problem was gastrointestinal. Over the next 2 weeks, his symptoms remained unchanged despite being administered different antibiotics and his condition gradually worsened. He was seen 4X between (b) (6) and (b) (6), at which point he was eventually hospitalized for intravenous fluids and antibiotics. Over the weekend, a sonogram revealed enlarged lymph nodes and a fluid build up in his abdomen, and was diagnosed with lymphoma. He declined rapidly within the next 2 weeks before putting him down on (b) (6).</p> <p>By sheer coincidence, I came across online at petfoodindustry.com that Nature's Variety Beef Meal & Barley Medley was recalled by the company on 7/12/12. This is the same product I complained about in May 2012, just prior to my extremely active & healthy becoming ill 4 weeks later. Had I been made aware of a recall or problem with the product, maybe my vet would have explored another course of diagnosis and treatment for my dog. As a long term loyal consumer, I was signed up on Nature's Variety's website, as well as on record for complaining about their product; yet I was never notified that this product was recalled voluntarily. To date, it still has not reappeared on store shelves and my request for any testing done have been denied.</p>	7	Years	Havanese	Dog	23	Pound
EON-102460	9/23/2012 22:48	Canyon Creek Ranch - "Yam Good" (duck with sweet potatoes) "Yams" (sweet potato fries) "Duck Tenders" (duck jerky) "Cowboy Steak" (chicken with white fish)	<p>For the past month, following ingestion of the treat in question, noticed gastrointestinal upset, accelerated respiration (bordering on hyperventilation), acute thirst, and a propensity to release bladder during subsequent sleep (uncharacteristic of this dog); activity had been atypically lethargic. Since onset of symptoms & awareness of public notice to be wary of dog treats manufactured in China, we stopped administering the treats. Symptoms dissipated over 2 days since termination of the treats, and 7 days later, our dog has resumed normal activity and characteristic behaviors.</p>			Terrier - West Highland White	Dog

EON-102454	9/23/2012 3:15	Waggin' Train Wholesome Chicken Jerky Tenders	On 9/20/2012, I gave her a Waggin Train chicken jerky tender treat and during the night she urinated on the floor, which she never does, and also at the door when I was letting her out for the morning. I noticed that she was unusually thirsty. The next day she defecated on the floor and again urinated at the door. As the day progressed she became increasingly lethargic and listless; she didn't want to walk or move about, she just sat around. I noticed that her stomach was bloated and tight and she seemed to be in pain and didn't want to be touched; her anal area was swollen as well and she had a vaginal secretion with a very strong odor. I scheduled an appt. with her vet for the next morning. That evening she began vomiting constantly and when she drank water it came right back up; her breathing became labored, she began shivering and was glassy eyed. At bed time she defecated once again, without even any attempt to go outside. I took her out to see if she would urinate and she seemed to be wanting to squat but couldn't and she just stood still; so I carried her in and took her to the ER at approx. 3:00am (PT) on 9/22, and they ran a blood panel, did x-rays and an ultrasound of her abdomen. All test came back negative. The Dr. said she clearly was ill but he couldn't really determine the cause. However, he did detect traces of what appeared to be an abdominal and vaginal infection in her blood panel. She was diagnosed with and treated for a bacterial infection; she was administered an Ampicillin injection, fluids, anti-nausea medication and prescribed Clavamox drops for 7 days. When I got her home it was as if she had no strength at all. I put her to bed and she stayed in the same position the entire night; she urinated on herself but didn't move. I turned her over to clean her up and she yelped and vomited water but didn't even lift her head from that. She hasn't moved at all and when I lift her, her body seems totally limp. It is now 12:07am (PT) on 9/23/2012 and her state hasn't changed and she's beginning to convulse frequently.		9	Years	Terrier - Yorkshire	Dog	5.15	Pound

EON-102452	9/22/2012 21:06	Waggin Train Jerky Tenders	I gave (b) (6) one Waggin Train Jerky Tender chicken treat. The next day he was throwing up, lethargic, and putting his hind quarters up while the front legs were in the laying on the floor. We noticed he was drinking a lot. He was so sick I was worried about him surviving the night. I called the vet the next morning. They did an xray and bloodwork. His blood sugar was over 500. He was given antibiotics as the vet thought he had an infection in his digestive tract. We began treating him for diabetes, even though he had never had these symptoms before. He seemed to go from a healthy energetic dog to an old dog all of the sudden. We gave him about 5 more treats the next week (one a night) until we saw the Chinese Jerky Treat story online. (b) (6) illness began the day after his first treat. We also thought it was odd one night that he didn't finish his jerky treat. We have never known (b) (6) to not finish a treat. He is not the same dog he was before the treats. He is more lethargic, lays on the floor instead of on the couch, pants and breathes hard. He went from a dog who drank very little to a dog who drinks a lot. Even his eyes look different...more like an old dog. We are still giving him 2 insulin injections a day. He has gone from needing 6 units to 3 units twice a day. I don't know if he will ever fully recover. In addition to spending nearly \$1000 on his medical care, I suffer the guilt of knowing he got sick from something I gave him. We do not consider (b) (6) property...he is one of our family and didn't deserve this. It is an outrage that this product is still on the shelves. As consumers, we trust the manufacturers and stores to do the right thing. Neither has happened in this case.	8	Years	Poodle - Toy	Dog	13	Pound
EON-102451	9/22/2012 17:36	Waggin' Train Wholesome Chicken Jerky Tenders	On 9/20/2012, I gave her a Waggin Train chicken jerky tender treat and during the night she urinated on the floor, which she never does, and also at the door when I was letting her out for the morning. I noticed that she was unusually thirsty. The next day she defecated on the floor and again urinated at the door. As the day progressed she became increasingly lethargic and listless; she didn't want to walk or move about, she just sat around. I noticed that her stomach was bloated and tight and she seemed to be in pain and didn't want to be touched; her anal area was swollen as well and she had a vaginal secretion with a very strong odor. I scheduled an appt. with her vet for the next morning. That evening she began vomiting constantly and when she drank water it came right back up; her breathing became labored, she began shivering and was glassy eyed. At bed time she defecated once again, without even any attempt to go outside. I took her out to see if she would urinate and she seemed to be wanting to squat but couldn't and she just stood still; so I carried her in and took her to the ER at approx. 3:00am (PT) on 9/22, and they ran a blood panel, did x-rays and an ultrasound of her abdomen. All test came back negative. The Dr. said she clearly was ill but he couldn't really determine the cause. However, he did detect traces of what appeared to be an abdominal and vaginal infection in her blood panel. She was diagnosed with and treated for a bacterial infection; she was administered an Ampicillin injection, fluids, anti-nausea medication and prescribed Clavamox drops for 7 days. When I got her home it was as if she had no strength st all. I put her to bed ad she stayed in the same position the entire night; she urinated on herself but didn't move. I turned her over to clean her up and she yelped and vomited water but didn't even lift her head from that. She hasn't moved at all and when I lift her, her body seems totally limp. It is now 1:40pm (PT) and her state hasn't changed.	9	Years	Terrier - Yorkshire	Dog	5.15	Pound
EON-102450	9/22/2012 16:57	Waggin Train Wholesome Chicken Jerky Tenders	started vomiting, which lead us to the vet, who diagnosised him in kidney failure, didn't know what caused this, we tried the auto immune shot, which didn't help, lead to no eating and he died a week later	6	Minutes	Other Canine/dog	Dog	65	Pound

EON-102449	9/22/2012 1:45	wagon train	started giving chicken jerky strips and she loved then. gave her 1/2 the am and 1/2 in the pm. at about 2 weeks noticed decreased appetite, vomiting even when not having eaten anything,(just vomiting bile) then very loose stool. took her to the vet where blood tests were run. liver enzymes were greater than twice what was normal and severe pancreatitis. was treated with liver medication but vomited with each dose. was also given panceas med. Changed food to a 5 star recommended brand (was already feeding her a 4 star food) and started treating her aggressively for the pancreatitis. kept her home and in calm environment for several weeks to try and recover. It really seemed she was dying right before my eyes. before this she was energetic, playful and loved to travel. next blood test, about 6 weeks later and liver seemed to be recovering but the pancreatitis is still severe and she is on medication before each meal. vet says she will most likely be on this med for the rest of her life. she still vomits occasionally and doesn't eat sometimes. it has now been aprox 3 months and she is lethargic only having energy for a short walk twice daily which she loves. Traveling is out, just too stressful, even short trips of 30 miles. we used to go visit relatives in so calif (300 miles) with no problem. all products were made in china and you have to be very careful because label will say distributed in US but fine print says made in china. I will not be buying anything from china if I can help it. They care nothing about the well care of our citizens or our animals. please try to expedite the recall process for these products. too many broken hearts. THANK YOU	12	Weeks	Beagle	Dog	22	Pound

Over the last 3or so years Snickers started loosing his appetite, became lethargic, had bloody stools off and on and then this past March he passed away from Renal Failure. I thought I was doing the right thing by giving him an all natural chicken product for a daily treat.	9	Years	Chihuahua	Dog	6	Ounce
EON-102402	9/21/2012 13:00	Waggin Train Yam Good, Milo's Kitchen Jerky Treats	My 7 year old, HEALTHY dog was given both Milo's Kitchen Jerky treats, as well as Waggin Train jerky treats, and Waggin Train Yam Good treats over the past six months. The recommended feeding dose was NOT exceeded. Two weeks ago, he urinated in his sleep two times. I took him to the vet, and they did testing and determined he was in kidney failure. He deteriorated very quickly, and had to be euthanized on (b) (6). I do believe that I was sold a bag of one of these treats (definitely purchased at Target) that killed him.	7	Years	Poodle (unspecified)	Dog	25	Pound

EON-102401	9/21/2012 12:57	PetGuard Venison and Rice	<p>I purchased a case of PetGuard Venison and Rice canned cat food from an online store, Wag.com. (Wag.com P.O. Box 483 Jersey City, NJ 07303), as I have in the past. Upon opening a can of the venison and rice cat food, it was a different color, different texture, and different smell.. but it did contain rice bits. Code on bottom of can: X9S4 07:08 BEST BY 08/02/13. The usual color of the food is pink-gray and crumbly, and it smells like venison. I thought perhaps it was a new formula of venison and rice as an improvement, so I fed it to my cat. No problems. Then I ordered another case of PetGuard Venison and Rice. When the new case came, I opened a can and it was the usual pink-gray meat that smelled like venison like I had always gotten until the previous case of dark stuff. The date on the new case of cans showed it was manufactured after the *mystery meat* case I previously got.</p> <p>I still have a couple cans of the mis-labeled venison and rice. I emailed PetGuard many times in 2 weeks, at both of their email addresses, and I emailed Wag.com that I bought the mystery mis-labeled cat food from. Wag.com said to tell them what PetGuard says. In not getting any response from PetGuard, I tried to contact them on Facebook, but they took their page down. I tried Twitter, but they won't answer a twitter. I tried calling 2 separate times but each time, after the recorded message says the call will be monitored for quality, it transfers to another phone and continued to ring and ring. I've never gotten through to a real person in these 2 weeks.</p> <p>I took pictures, opening a can of the correct venison and rice cat food, and a can of the dark mystery meat that smells like fish. I sent these pictures to PetGuard, still with no replies from them. I sent them also to Wag.com. I wrote reviews for the food at different online stores, uploading the pictures to show the wrong food is in the Venison and Rice cans.</p> <p>I stopped feeding the mystery food in the venison and rice cans to my cat, so I have a can I can send you to test. My cat never got sick, fortunately she is not allergic to fish. People buy the venison and rice if their cat needs a limited protein diet. There is concern if someone buys the venison and rice because their cat is allergic to fish (or whatever food is in the can), and the cat's health is at risk.</p> <p>Summary: wrong food in PetGuard Venison and Rice canned cat food 5.5 oz. cans, with code X9S4 07:08 BEST BY 08/02/13 stamped on the bottom, purchased online at Wag.com located in New Jersey. PetGuard does not respond to emails or answer phones for these 2 weeks I've been trying to get a hold of them. Wag.com has been notified and saw pictures of the wrong food in cans and said to tell them what PetGuard responds.... but PetGuard is not responding.</p>						
			<p>Thank you!</p>						

EON-102395	9/21/2012 12:12	Waggin' Train Jerky Tenders	The patient started vomiting on a regular basis and became less active over about 2-3 weeks. At this time the owner had been feeding a lot of chicken jerky treats for several weeks time. The patient still had a good appetite and appeared to be normal on routine examination. The patient was sent home on an antiemetic for several days. The vomiting improved while on the medication, but returned as soon as they finished giving the meds. The patient returned and labwork was done. Azotemia was present with a normal phosphorous and hematuria was present on urinalysis. The alkaline phosphatase was normal on this labwork, but soon rose dramatically on the next serum chemistry 2 days later. The patient was hospitalized on IV fluids and was started on antibiotics and kept for 2 days. The patient responded to medical treatment and was sent home with dietary changes to a prescription kidney friendly diet. The owner had stopped feeding the jerky treats sometime between the first and second visit. The labwork was checked again about 2 weeks later. The azotemia was still around the same levels as it was when it went home.	9	Years	Terrier - Jack Russell	Dog	12.4	Pound
EON-102348	9/21/2012 9:36	Waggin' Train Chicken Jerky , Waggin' Train Yam Good	Our dogs developed severe diarrhea, lethargy, and started having urine "accidents" after being fed these treats for several days. Before the dogs were fed them their stool was normal, they were more active, and they rarely if ever had accidents. It took us awhile to decide what we changed that could have caused the change, and ultimately it was the Waggin Train treats. We decided to not giving the dogs Waggin Train treats for several days to see if they improved. As soon as we did that their symptoms were mostly gone in as little as a day.	5	Years	Dachshund - Miniature	Dog	13	Pound
EON-102342	9/21/2012 8:00	Milo's chicken jerky...pupperoni...waggin tail jerky treats	My beloved dog (b) (6), passed away last year. Since his passing I've read about the jerky treats and it is devastating to me..because I fed those treats to my Ollie everyday. I DID see symptoms of vomiting, listlessness, diarrhea full of mucous. It would happen on and off. One day he'd seem ill...the next he'd be ok. I never ever connected it with those jerky treats. He absolutely loved those...so I bought them all the time for him. Last year he suddenly started to strain to urinate...did seem to want to drink excessively...all of the symptoms described. I of course took him to his vet...who treated him as if he had a UTI...although he never did a culture. (b) (6) never seemed to fully recover. He went on to having severe breathing problems...and had to undergo a thorocentesis to remove fluid from around his lungs. When he did come home he stopped eating...had vomiting..and just did not come out of it. I had taken (b) (6) to 3 hospitals...and to 2 different vets besides his own within 10 days...trying to save him. I never learned for certain what killed (b) (6)...but after reading about the treats...I have to believe...from the symptoms that I saw...that they were the real cause of (b) (6) illness. (b) (6) was my best friend...and a year later...I still cry everyday for what I saw him go through. He was like a child to me. I spent thousands of dollars...trying to save him. I don't care about the money...but I do care that I thought I was giving my little buddy treats that were good for him...and I might have actually caused his death. I can't believe that they show commercials on t.v. showing these treats...making it look as if you're doing a good thing for your pet by giving them those treats. If I had ever known about this...I NEVER would have given those to (b) (6). I'd have made my own from scratch if I had to. I don't understand why the public wasn't made aware of the possible danger. I never saw anything saying there was a problem. And no one I knew had ever told me that they knew about it either.						

EON-102338	9/20/2012 18:45	milo chicken jerky	I have two shih-tzus. one is 10 and the other is 8. They both got deathly ill from eating milos chicken jerky treats. Diarrhea and vomiting.	10	Years	Shih Tzu	Dog	15	Pound
EON-102337	9/20/2012 18:15	Kingdom Pets Chicken Jerky	In the morning before leaving for work we would give our dog a chicken jerky treat. When we returned home on several occasions he had vometed or had direhea. Normally he never has a problem with going to the bathroom in the house. After many attempts to understand what is wrong with our dog we called the vet. The vet spoke to us and asked what do we give the dog to eat. When we mentioned the chicken jerky he asked us while he was on the phone to read the lable to him. He asked where were the treats made and at first it appears that they are made in Newport Beach California, that is just the distribution site. The vet asked us to turn the bag to the left and look under the UPC code and there is was MADE IN CHINA. We have stoped giving our dog these treats and since then he has been fine all day no messes in the house. He seems to feel better overall but it has only been a week since we stoped giving the treats.	1	Years	Spaniel - King Charles Cavalier	Dog	16	Pound

EON-101777	9/19/2012 16:42	EverPet Mini Dogs Dog Treats	<p>My husband has been giving our Pomeranian, dog treats purchased at Dollar General - Ever Pet Canine Carry Outs and Mini Dogs - for at least a year. I never considered the treats as a possibility for her illness. She started having digestive issues several months ago. We took her to the vet, where tests were done, and she was given special canned food and medications. She recovered from that bout. Then, over the next few months, she had digestive issues off and on, but they were occasional, and were either vomiting or diarrhea. A month ago, she started vomiting her food every time she ate. We changed her so the veterinary low residue digestive formula food, which helped for a couple of days. Then she started vomiting even the special food. Because of her age, we decided not to invest the hundreds of dollars in tests that the doctor was recommending to try to diagnose her problem. We decided to euthanize her on (b) (6). She had lost a total of 3 pounds from her high weight of 9 pounds, and was 6 pounds at her death. Just a few days ago, a friend put a post on FaceBook about warnings concerning dog treats. I started researching and found the FDA warning, which included the treats we were giving our dog. Before our dog started getting these treats, she was completely healthy and had no problems at all. Now, we believe that our dogs death is directly related to eating the treats from Dollar Genera.</p>	11	Years	Spitz - German Pomeranian	Dog	6	Pound
EON-101775	9/19/2012 16:30	Meaty Bone dog biscuits	<p>Gave my miniature Pomeranian a treat, Meaty Bone dog biscuits, on a Friday and Saturday. By Sunday morning she was vomiting and as the day wore on she started having bloody diarrhea. She wouldn't eat anything, just layed around, only drank water. This went on for a few days. At first thought she just wasn't feeling well, but my other dog was having similar problems at the same time! Traced it back to the only new food in their diet, Meaty Bone dog biscuits that I had just bought.</p>	5	Years	Other Canine/dog	Dog	6	Pound

EON-101774	9/19/2012 16:27	Canyon Creek Ranch Brand Natural Chicken Tenders	On Sept 4, 2012, I purchased a 30 oz. bag of Canyon Creek Ranch Chicken Tenders from Petsmart in (b) (6). Over the next ten days, our dog consumed maybe three to four treats a day. On Sun, (b) (6) we had to seek emergency vet care for our dog. She was extremely lethargic and no appetite. Most concerning were the repeated attacks of bloody diarrhea and vomiting bile. We were shocked to discover that what we had fed her could have caused this. We had no idea that this product was from China, let alone that this treat could be harmful. Five days into this and she is slowly becoming more active, however she has only eaten maybe one cup of boiled chicken and rice.	10	Months	Siberian Husky	Dog	64	Pound
EON-101771	9/19/2012 15:57	Canyon Creek Ranch Brand Duck Tenders	On August 14, 2012, I purchased several bags of Canyon Creek Ranch Brand Duck Tenders, 30 oz bag, at Petsmart on (b) (6) in (b) (6). When I brought them home, I noted that one bag had EXTRAORDINARY HEAT radiating from the deoxidizer pack inside the unopened bag. Assuming this to be a safety issue, I saved the bag and the deoxidizer pack, with the intention of contacting FDA . . . but got distracted! Then on September 16, 2012, I purchased two more bags. Upon bringing them home, I experienced the identical event with one of those bags. I saved that bag unopened. These treats indicate on the bag that they were treated by irradiation.						

EON-101770	9/19/2012 15:51	By Nature Organics	<p>We ordered "By Nature Organics - Organic Turkey" Canned food as part of our last order (number (b) (6)). The food was ordered from www.wag.com from the below link. http://www.wag.com/dog/p/by-nature-organics-canned-food-12x13-oz-117876</p> <p>This food was fed by me to our dog, (b) (6) on Saturday (09/15/12) morning for the first time, (b) (6) seemed to eat it well and did not show any signs of concern. However, little did we know that the same food that we purchased as an Organic alternative (better option?) to the food we typically order from you would be the cause of an immense amount of pain and suffering to the poor dog and an immense amount of anxiety to us, his parents. Later the same day, when we took (b) (6) out to defecate, he had severe diarrhea, still we did not get very concerned as we expected him to take time to adapt to his food. Next, 30minutes later, (b) (6) needed to go out again, at this point, when we took him out, he attempted to defecate multiple times, with only raw blood coming out of his anus. This continued for about 5 times; when he continued to defecate blood. Ofcourse, at this point we were concerned and took him to an emergency vet hospital (diagnosis and invoice attached); please note that it was roughly 8pm by this time; the Vet at the hospital diagnosed (b) (6) condition as "Hematochezia and Lyphoplasmocytic Colitis secondary to dietary Intolerance"; after multiple X rays, blood test/screening and immense amount of injections/medication it was determined, as afore mentioned that (b) (6) was suffering from this severe condition due to a dietary intake. The xrays did not show that he had swallowed any external objects (toys) that may cause this issue, but just something he ate. The fact that the attached diagnosis states that (b) (6) was suffering from Dietary Intolerance; shows the Doctors confirmation that his condition was due to something he had eaten. The ONLY thing (b) (6) had eaten all day was "By Nature Organics - Organic Turkey".</p> <p>Later that night, we brought (b) (6) home, only to be woken up at 3am to find that (b) (6) had bled all over our Bedroom carpet, carpet stairs and various other spots in our house. He was now unable to control the outflow of blood from his anus. This now showed that (b) (6) was in a much worse condition than before; again concerned we contacted the hospital around 4am and stayed awake with (b) (6) to monitor him. (b) (6) became worse and in his weakness and suffering fell asleep. We continue to take care of our dog to make sure he gets better. Please note that (b) (6) is a healthy dog with a clean medical record and no history of such severe dietary issues. (detailed medical record can be provided upon request)</p>	7	Years	Terrier - Rat	Dog	25	Pound

EON-101740	9/19/2012 14:00	Waggin Train Chicken Jerkey Tenders	Started giving the dogs Waggin Train Chicken Jerky Tenders from Sam's Club, and/or Walmart about 2 years ago. They became more lethargic all the time. Both started drinking more water and urinating more often, and sleeping most of the day. Yesterday we had a blood test done, and the youngest dog is suffering from kidney failure and liver problems. The older dog's blood picture is OK, but has the same symptoms. They were both started on medication and a special diet dog food KD kidney supporting food, canned and dry. We don't know if we will be able to save the younger dog.	12	Years	Terrier - Scottish	Dog	22	Pound

EON-101739	9/19/2012 14:00	Wagon Train Chicken Jerky Treats	(b) (6) has had two Grand Mal seizures. The first one after eating Wagon Train chicken jerky treats, and the second six months later after she had eaten Milos' chicken jerky treats. The second time I rushed her to the Vet and he suggested that it may have been the result of the treats. I threw out the whole package both times, and wish now that I hadn't so they could be tested. Both packages were bought at Walmart in (b) (6). They should be taken off the shelves of all stores carrying these products. I am so LUCKY to still have my dog. She has never had another seizure.	3	Years	Terrier - Jack Russell	Dog		
EON-101736	9/19/2012 13:12	Waggin Tails Chicken Jerky	Well it took a while to figure out that this product was the cause of my dog's death. This happened in 2008. She was in perfect health and my mother started feeding her the waggin tail chicken strip treats. (b) (6) loved them. She was given the treats on a daily basis for over a month when all of a sudden she started acting strange and lethargic, So we took her to the Vet and we were told that she was dehydrated. So we made sure we were giving her plenty of water. She still did not improve. My mother noticed the only thing she really enjoyed getting up to eat were the chicken strips. But it still did not occur to us these were the problem. A few days later (b) (6) would not get up, on our way up to the vet she died in the car. We were all baffled. Then the last couple years I started seeing articles about people's pets getting sick or dying from this product. It dawned on us that this is the most likely cause as she was perfectly healthy until this treat took its affect.	7	Months	Rottweiler	Dog	60	Pound
EON-101735	9/19/2012 12:51	Sorry I do not know	Bought a bag of chicken beef jerky at our local Sams Club in (b) (6), I apologize I threw the bag away, shortly thereafter we noticed my dog would vomit - we did not put it together right away, he started not wanting to eat, not moving his bowels properly, no motivation as normal- however he still wanted the treats. We even changed the dog food to a better brand thinking maybe that was the issue, not knowing about the beef jerky issue/ when we found out we threw the bag out right away. I just saw the headline on website and decided to write in to notify as another person who's dog had been affected to the beef jerky as well. He seems to be back to normal now thank God !! :) It did take a bit though honestly..	3	Years	Retriever - Labrador	Dog	135	Pound
EON-101734	9/19/2012 12:45	Milo's Kitchen Chicken Grillers	Our 3 dogs, (b) (6) a 6 year old Bichon, (b) (6), a 6 year old Pomeranian, and (b) (6), and 11 year old Pomeranian ate 2-3 (apiece) of the Milo's Kitchen Chicken Grillers on 9/16/12. On 9/17/12, all 3 dogs were lethargic, no appetite, and (b) (6) was vomiting. We pulled apart a piece of what she had vomited and discovered it was the chicken. None of the 3 dogs ate all day. On 9/18/12, we consulted with the vet, and they were put on a hamburger/rice diet and Pepto Bismol. (b) (6) has recovered, and (b) (6) and (b) (6) are slowly coming back around. (b) (6) suffered the most, and still does not have a full appetite. Her stomach is still upset. On 9/18/12, our daughter found an article about the chicken imported from China had caused dogs to become ill. The product was made in China. We do have the bag of treats if samples are needed.	6	Years	Bichon Frise	Dog	10	Pound

EON-101711	9/19/2012 10:06	Waggin Train Wholesome Chicken Jerky Tenders	I began buying him "Waggin Train" chicken Jerky Tenders for dogs from Pet Smart about 5 years ago and gave him one about each day. I did not realize that I was doing him any harm at all. And I did not get any notification about the dangers involved with the product by email or the postal department. I slowly saw my dog changing his eating and drinking habits and he was having accidents in the house, which he never did before. Then he started to eat less and he drpped from 47 pounds to lees than 30 pounds, and I had taken him to his vet and he took a complete blood analysis. He called me and said his kidneys are failing and are nearly shut down. He did a blood transfusion for 2 days, and now I have him at home , but he is continually getting worse. He is so weak I have to carry him up and down the stairs or he will fall down. and he looses his balance sometimes when he walks. his urine is completely clear and he is constantly drinking and peeing. But not eating, only a little of what I feed him. He is supposed to eat the KD food I had to buy but he refuses to eat it in any fashion, so I jsust give him healthy food what he likes, just to get something in his stomach and stay alive for as long as possible. Usually boiled chicken and rice. I had him for 15 years and he is all I have. I live alone, and he is by besy friend. I am devistated over this. Now I feel so guilty over what I have done to hime. I cry every day over it, and I will never forgive myself for what I did to him. I love my dog so much. This poison must be removed from the market. Why is Pet Smart still selling this garbage? Why haven't they removed it from their stores? I don't understand? They are killing the poor animals. I am filing a report with my state's FDA Consumer Complaint Coordinators Department. This is what I have been going through the past several months, and it has severely has depressed me. I don't know where to go from here? Please help me with whatever you can do for my loving dog. He is all I have. (b) (6)	15	Years	Retriever - Labrador	Dog	30	Pound
EON-101702	9/19/2012 9:27	wagon train western grill	(b) (6) ate Wagon Train Jerky chicken treats and with in 24 hours he became sick with vomiting and diarrhea this lasted for 3 days he is just now starting to recover.	1	Years	Shih Tzu	Dog	22	Pound
EON-101695	9/19/2012 7:57	hartz flavored beef	on 09-01-2012 purchased a HARTZ chew bone at a local store called (b) (6). Arrived home and found the female chihuahua at a point of near death. Took dog the my local vet on a emergency situation. Doctor performed blood work and performed physical. No problems noted. Appears that the female had a severe reaction to the chemicals used in china to make this product. Severe neurological disorder during this incident. The FDA needs to pass very strict laws for these animal food makers. Everything is made in china and packaged in the united states.	9	Months	Chihuahua	Dog	4.5	Pound

EON-101554	9/18/2012 18:00	Waggin Train Chicken Jerky Dog Treats	I have 2 dogs. On the evening of (b) (6), my older dog who is a 45 lb. mixed breed, was found ill at our home. We arrived home to find that she had vomited a foamy white substance multiple times and had appeared to possibly have convulsions based on items that had been knocked over in the house. She was leaning against a recliner and was unable to move at all. Her breathing was labored and she was drooling heavily. We took her to the emergency vet where they were unable to determine what was wrong, but did discover that she was dehydrated and they suspected some type of neurological condition. By the time we left her for overnight observation, she had begun to be able to use her front legs again. The next morning, our 3 year old Yorkie was let outside for his normal morning bathroom trip. When I went out to let him back in the house 20 minutes later, I found him laying flat on the ground with foamy vomit next to him. He was unable to move and his breathing was labored. I called our vet and took him in to be evaluated. By the time that I had gotten him to the vet, he was in shock and his blood pressure had started to drop. They started an IV and gave him some medicine which did help him to improve. He started moving again, but then started to have bloody diarrhea. They decided that they would need to keep him for observation as well. While our older dog improved and recovered, our Yorkie did not survive the night and passed away. The only change that had been made in their diet was that I had bought a pouch of Waggin Train Chicken Jerky dog treats earlier in the week as a special treat for my dogs.	3	Years	Terrier - Yorkshire	Dog	12	Pound

EON-101552	9/18/2012 17:36	Waggin Train Chicken Jerky Treats & Canyon Creek Chicken Jerky Treats	We got (b) (6) as a rescue in August 2009. She got a clean bill of health from our veterinarian. After exploring various kinds of dog food and treats for her, we found she LOVED chicken jerky treats. Soon after she started consuming the chicken jerky (specifically Waggin' Train first, then Canyon Creek brands), she started urinating in the house. This went on for about 6-8 mos. We finally had her urine tested Oct/10 and realized she had developed a urinary tract infection. She would get antibiotics, it would clear up, but infection would soon return. She also had multiple episodes of diarrhea and vomiting during this time. She had been consuming these treats for approximately 2 years when we heard reports of possible health problems related to the treats. When we discontinued these specific treats, her chronic urinary tract infections ceased & her health is now good (other than the allergies).	3	Years	Unknown	Dog	14	Pound

EON-101263	9/18/2012 15:42	Beefeaters Natural Chicken Fillets	(b) (6) loved these chicken jerky treats. Every evening he would consume 2 to 3 strips. After a few months of eating these items, (b) (6) became deathly ill. He stopped eating everything and was rushed to the vet. The vet treated (b) (6) for pranciatitis but the diagnosis was not totally conclusive. (b) (6) was hospitalized for 2 days and had to be given intravenous fluids. Thankfully (b) (6) recovered but we are quite convinced his illness was directly related to all these chicken strips -- Beefeaters Natural Chicken Fillets.	8	Years	Beagle	Dog	135	Pound
EON-101045	9/18/2012 14:21	Canyon Creek Ranch Natural Duck Tenders	First my dog is on a strict diet only eating high quality dog food (inovia), organic treats, and no human food. So when we were given FREE Sample Treats from our PetCo representative that look healthy I thought nothing of it. I fed my dog on Sunday these treats and by Monday afternoon he started having Diarrhea. We simple thought he lick or smell something from his regular walk. By Monday night he diarrhea became liquid and very watery. By Tuesday he started to vomit bile. We were not sure what this was so we carefully watched him. By Tuesday night his diarrhea became full of BLOOD and his vomit started to also carry blood. We rushed him to the doctor where they gave us stool medication and also took a stool sample. By Wednesday early morning at 5:00 AM he started panting very heavily. By 7:00 AM a sniff of food made him vomit bile and more blood. We rushed him to the Vet once again where they ran more test. All test came back Negative. All X-Ray's came back negative. The doctor asked if he ate anything unusual I said no because my dog has NEVER had a reaction to food like this before. It was not until i did some research at home on pet treats that I was made aware of Canyon Creek Ranch dog treats(duck tenders) the recall. These are made from in China and I am positive that they made my dog sick and almost die. My vet bill is over \$1000 and I needed to let the FDA know.	8	Years	Ridgeback - Rhodesian	Dog	115	Pound

EON-100382	9/17/2012 12:06	Smokehouse Brand Pet Products Duck & Sweet Potato Combo	In June, I was giving these treats to my dogs. Allie suddenly became very listless and lethargic, with no appetite and appeared to be running fever. Took her to the vet, where it was determined that she was having kidney issues and that her red blood cells were lysing. We put her on an intense regimen of steroids, antibiotics and fluid flush, but the vet was unsure what the cause could be. I quit using the treats for a period because one of our other dogs would have REALLY bad gas from the treats. Two days ago, I needed treats to entice my Golden Retriever, (b) (6) back in the house and grabbed the Smokehouse Duck & Sweet Potato Combo, as they were close by. I gave her a couple of treats and then again gave her some yesterday. Again, (b) (6) is showing the EXACT symptoms of the episode in June. She won't even drink chicken broth, has no appetite (keep in mind, this is a young golden, she is usually HIGH activity level) and is extremely listless and lethargic. I have thrown the treats away (but kept the bag) and have started the regimen from last time to see if she gets any better, before spending another \$400 at the vet, again (last time's bill). I'm optimistic that I caught the issue soon enough, but can't help but believe that the timing and consumption of the treats are connected. I made sure I had no chicken treats (one of my other dogs is allergic to chicken, so I do NOT purchase chicken treats) after hearing about chicken recalls, but never saw anything until now on the duck treats. :(I'll just be sick if something I did caused my baby to be sick. :(1	Years	Retriever - Golden	Dog	65	Pound
EON-100343	9/17/2012 10:45	Waggin Train Chik'n Biscuits Recipe	I gave my shih tzu 2 of the treats at 6:00 PM on 9/16/2012 and by 9:00 PM the same day, my dog started having diarrhea and vomiting. The diarrhea continued through the night and seems to be subsiding as of 11:00 AM on 9/17/2012. I contacted Waggin Train LLC at 866-283-2923 to report the sudden onset of illness and asked if there were any known issues with that product. I gave the bar code: 07020 99517, and the manufacturing codes from the bag: 2090T027 0102WH8, Best Before: Sep 2013 and another code: CA6210 Mar 2012. The representative denied any product problems and offered to send me a coupon for additional products. I purchased the treats from WalMart (b) (6) (b) (6) at 4:07 PM on 9/16/2012.	11	Years	Shih Tzu	Dog	7	Pound
EON-100312	9/16/2012 22:36	Canyon Creek Ranch Brand Chicken Breast Treats made in China	Pet was in good physical condition. Normal Friday evening routine included going out with friends and then brought home. Have been giving her Caynon Creek chicken treats. Reently switched to This brand from another brand. Have been giving her less than 1 treat each evening for a week-10 days. Within 2 hours she was vomiting repeatedly all food in stomach and then Water/bile, including brownish yellow foamy vomit and mucus. Very lethargic Took to emergency vet. Stomach and intestines were bloated, gassy, distended, tender and very inflamed. \$300 vet bill for IV fluids, anti-nausea medicine and other treatments. Diaharrea started, very watery, and constant for 24 hours. Became bloody. Pet recovered after about 48 hours of Distress and began eating bland food and baby food. Regained some energy.	9	Years	Terrier - Yorkshire	Dog	5.5	Pound
EON-100311	9/16/2012 22:00	Waggin Train Jerky Treats	Very healthy almost 1 year old Golden Retriever went into incessant vomiting and cough for over a week. Vet could not identify culprit. EON-100292	9/15/2012 23:00	Canyon Creek Ranch Natural Duck Tenders	<p>(b) (6) (8 yr old Staffordshire Terrier) began having diarrhea after purchasing a new bag of Canyon Creek Ranch Duck Jerky Treats. (b) (6) had allergies to alot of things & one being Chicken. This is why he ate Holistic Select Duck Dog food & I gave him these duck treats. Was packaged as being 98% duck. Was not aware they were made in China (when 1st purchased read larger print that they were manufactured in Anderson South Carolina). A few days after diarrhea began, he became excessively thirsty & was urinating more. In addition his abdomen was swelling like a pot belly pig. Never told any of his vets about eating treats made in China, as was not aware. Took him to (b) (6) & xrays, kidney & liver function tests & urinalysis were done. All test results came back within normal range except a few things. His Platelet count, hematocrit, hemoglobin, and a few liver results (ALT & TBIL) were high. Vet was not concerned about the levels that were high, as his kidney tests were all in normal limits. Was refered to a internist who did a ultrasound & aspirated the fluid building up. Fluid came back as inflammatory fluid, but no abnormal cells. Ultrasound normal, no tumors & heart normal size. No diabetes. Tests done on thyroid , all normal. His appetite remained the same. Continued to give him the duck tenders not knowing any better. Ascitis getting worse & had to be aspirated. Took him for CT scan which gave inaccurate results showing obstruction ocotal vena cava. More fluid aspirated. (b) (6) was restless at night - up/down & wanting to go outside to urinate & drink water. Appetite still good & still giving treats. Took him to (b) (6) to see a cardiologist (b) (6). Was going for consult for noninvasive cardiac cath w/stent placement. Another extensive ultrasound done & was determined circulatory system completely clear & no obstruction. Dr. said he could do an angiogram, but he was 80-90% sure no obstruction at all (false reading on CT scan due to delay of contrast material). His feeling was that (b) (6) had cellular cancer in his omentum as he had a dog recently with same symptoms & test results. Said (b) (6) omentum "looked thick". He had diagnosed this with the other dog during the dogs autopsy. Abdominal surgery w/biopsy's was an option, but was told very risky due to the ascites (plus very expensive). All along (b) (6) continued to eat his dog food & the duck strips for treats. Decided to go with the treatment option of lasix with close monitoring w/blood work & periodic removal of fluid building up (b) (6) @ (b) (6) said the other dog he had like (b) (6) lived an additional 9 months with lasix. The next day (b) (6) started not eating dog food, but ate over the normal 3-5 duck strips he typically had per day. Since he acted like he was craving them & would eat them, I think I gave him 12 or so that day. BIG MISTAKE! That night he started vomiting and became lethargic. Still drinking alot of water & urinating though. Still having diarrhea & abdomen continued to fill up. Offered him rice w/boiled hamburger, would not eat. But begged for the duck tenders. (b) (6) deteriorated quickly and the next day we had to make the painful decision to put</p>	8	Years	Terrier - Bull - Staffordshire	Dog	102	Pound
------------	-----------------	--	---	---	-------	-----------------------------------	-----	-----	-------

			<p>him to sleep on (b) (6). Was offered an autopsy, but declined. Now, after the fact It was brought to my attention that his treats were made in China and that other pet had become ill & some died from these same treats. I wish we would have followed through with the autopsy. I am so angry that these treats are still being sold in the USA after all the complaints of illness & death with our pets. (b) (6) was a very special dog to us as my son had brought him home when he was 16 yrs old. (b) (6) & (b) (6) were inseparable. Then, right after my son turned 18 yrs old, he was killed by a drunk driver. (b) (6) was there with me through my sons viewing (which he attended & believe it or not he actually understood what had happened to (b) (6) as afterwards, he quit looking for him when he heard someone come thru the door), the grieving, the drivers trial & sentencing, etc..... (b) (6) & I had a bond & I do not know how I would have made it without him. I feel so responsible for giving him those treats! He was a healthy dog & was walked, played with & very well taken care of. How dare the FDA not have these treats removed from the shelf! After watching this hit (b) (6) so quickly and him deteriorate like he did, and go through all that extensive testing with nothing showing absolutely wrong, my gut & heart tell me it was those jerky treats! Sure do wish I could prove it! In addition, I still have that bag of treats. Wish I could get them tested somewhere to!</p>

EON-100289	9/15/2012 15:21	Waggin Train (Purina) SHEP Woof Woof Wow! Baconz, Purina Busy Bone, Mighty Dog, Kibbles and Bits, Milk Bones	<p>She loved chicken jerky treats. I had been feeding them to her for about 5 years. In that time she had thyroid issues first, then she had problems growing her fur back after she was clipped, then she became incontinent. I had started noticing a pattern in the past year or so that when I gave her jerky treats she would be sick a couple of days later. Then for no apparent reason her health seemed to take a turn. We took her to the vet who kept her overnight because her sugar was high, she had a fever, and he kept her overnight. We had her home for one week but she was throwing up outside but we didn't notice it for a way. Glycosuria is what he said she had.</p> <p>He was always thirsty, loss of appetite; which for her was notable... she never has loss of appetite. We took her back to the vet and he had us take her to the (b) (6) because he said it seemed she had gotten something toxic. She lost 10 pounds in the week or so before and at the hospital she had respiratory problems, fever, and her kidneys shut down. This all seemed to happen overnight. She passed away at the end of (b) (6). Just two weeks before she was good. We had given her Waggin Train jerky treats. We had bought other brands too but these were the last things she had. We are sure that is what took her from us so quickly. She should have lived a few more years.</p>	11	Years	Collie - Border	Dog	50	Pound

EON-100286	9/15/2012 14:51	Waggin Train Chicken and Biscuits. Milos Kitchen chicken jerky.	My dogs had been vomiting and having diarrhea occasionally. On 9/2/12 one of my dogs became very ill within a few hours. This included diarrhea, vomiting, lethargy, no desire to eat, refusing water, and unresponsive. I took her to emergency where they gave her fluids and medicine. They said the signs were indicative of kidney problems or bacteria related. Earlier this week I came across several news articles stating that jerky treats made in China have been linked to illness and even death in animals. Both of my dogs have been eating Waggin Train and Milos kitchen treats. Unfortunately I did not know this issue has been ongoing since 2007. I assumed that since the products are still on the shelves that they are safe but this is obviously not the case. I am thankful my dog recovered on 9/2/12 and I have stopped giving them these treats. I pray that there will not be any long term damage. Something needs to be done, this problem has been known for years yet the poisonous treats are still being sold.	4	Years	Terrier - Boston	Dog	25	Pound
EON-100287	9/15/2012 14:42	waggin' tails jerky tenders	had been giving approximately 3-5 pieces of waggin' tail chicken jerky treats bought from Costco almost everyday as reward about 2-3 months ago. my dog started to lose control of one hind leg a month later and then both several weeks later. brought him to vet thinking he had severe hip dysplasia. vet said the problem was with the spine. it was a progressive paralysis. my dog never went home - had to have him put to sleep that day.	9	Years	Shepherd (unspecified)	Dog	95	Pound
EON-100286	9/15/2012 14:21	Natural Chicken Fillets Waggin' Train Wholesome chicken Jerky Tenders	NOTE: treats are rarely given. Noticed a change in typical drinking and onset of grass eating about 24 hours after treat Waited a few days between each treat and noticed similar changes. Decided to break off small bits to see if product was "too rich" or too much change in diet. In July noticed a sudden development of black spots on belly which cleared in 3 weeks. In late August there was a sudden development of 15 large indurated crusted non-painful lesions on chest and forelegs noticeable increase in drinking and unusual thirst and onset of grass eating change in stool consistency lethargy Takes preventive Trifexis for heartworm prevention/tick and flea control	2	Years	Spaniel - Cocker American	Dog	38	Pound
EON-100275	9/15/2012 12:30	Waggin Train Chicken Jerky Treats	Have been giving my 3 dogs Waggin Train Chicken Jerky Treats for years. Occasionally have given them Waggin Train Yam Chicken treats as well as other types of Waggin Train chicken treats. Took Buster in for yearly check up. A growth was discovered on his gum. He needed to have it removed so they gave him a full blood test to make sure he could tolerate the anesthesia. The blood test came back indicating one of his kidneys was not functioning correctly. The blood test was taken on 6/12/12. After I received the results I stopped feeding my dogs the jerky treats. Not sure if kidney function has anything to do with treats, but now I only buy treats made in USA. P.S. The growth on the gum was benign and they put him on an IV during anesthesia as a precaution. I believe those treats are addicting. Those dogs would do anything for those treats. Ten years ago, you couldn't have told me I would have spent the money I did on those treats, but the dogs love them so much better than anything out there that I did. I will probably ask that another blood test be done next year during his checkup to see if kidney function has gotten better.	8	Years	Mixed (Dog)	Dog	22	Pound

EON-100274	9/15/2012 12:06	Waggin Train Wholesome Chicken Jerky Tenders, Waggin Train Peanut Butter Flavored Biscuit	Our dog (b) (6) was found laying in the yard few weeks ago. He was panting heavily and could not lift himself up. We took him to an emergency vet, where he was treated for the symptoms of anaphylactic shock. His blood pressure was extremely low, and he required several IVs, steroids, and anti-inflammatories. No reason for his sickness could be found by the vet or ourselves. A few days after the incident he started vomiting several times every day and could not eat or drink water. Our vet told us the likely cause is a stomach ulcer. He is now on a stomach acid neutralizer and a special food, but he still vomits occasionally. He has now also developed joint pain and he cannot walk on his right rear leg. The start of the symptoms coincide with the purchase of Waggin Train Chicken Jerky Tenders Lot # B1CA6102A and Waggin Train PBJ Treats Lot # G2CA6212A. We are concerned from recent reports that our dog could have been sickened and eventually die from the treats. We stopped feeding the treats since 9/03/2012, but we have retained the bags and remaining treats. A few of the treats were also given to a 3 month old American Bulldog (b) (6), but we have not seen any symptoms in that dog.	5	Years	Boxer (German Boxer)	Dog	70	Pound
EON-100273	9/15/2012 12:00	Waggin Train Wholesome Chicken Jerky Tenders	We have been giving our pet the Nestle Purina Waggin Train Chicken Jerky. We have been giving her the product for a couple of months. A few weeks ago she developed severe diarrhea and vomiting as well as being disinterested in her normal activities as well as eating. We took her to the vet and they diagnosed Enteritis and Colitis. She was given a week's supply of antibiotics and she began to feel better. At the same time we (by sheer luck) we stopped giving her treats. We gradually started giving her treats this week and she started vomiting again along with very loose bowels. I stopped giving her the jerky treats and she has returned to normal within 24 hours. I had no idea what the problem was until I read the article on the Internet about the deaths of several dogs.	7	Months	Alaskan Malamute	Dog	68	Pound
EON-100272	9/15/2012 11:42	Wardley Goldfish Flake Food	I purchased a new fish food called Wardley Goldfish Flake Food. I have been feeding the food for about a week. I have not changed the way that I have fed. I was feeding the same amount at the same times every day. I had one fish die on Wednesday (b) (6), two died on Thursday (b) (6) and the other four died Friday (b) (6). This is the worst rap that I have ever fed. I had the fish for three years.				Fish		
EON-100271	9/15/2012 10:51	Waggin Train Chicken Jerky	(b) (6) began to lose control of her bladder. She was put on medication. She occasionally had diarrhea and vomiting. She stopped eating and drinking. She was put on more medication, but within a couple weeks completely stopped eating and drinking and could not stand or walk. I was shocked to learn that she had kidney and liver failure, pancreatitis and fluid in her abdomen. She had to be put down. I had fed her Waggin brand chicken jerky because she loved it and I thought giving her 100% chicken was the best I could feed her. Her sickness was so sudden I was completely taken by surprise. This dog was well cared for by me and our vet.	9	Years	Akita	Dog	80	Pound
EON-100269	9/15/2012 10:00	Waggin Train Wholesome Chicken Jerky Tenders	Her composure totally changed and she wanted to withdraw from us. Her appetite changed and would not eat or drink water. Her body appeared to be shaped like contorted. She threw up and had diarrhea. She appeared lifeless not wanting to play or even be held.	4	Years	Maltese	Dog	7	Pound

EON-100268	9/15/2012 9:45	Milo Chicken Meatballs	My jack russell started throwing up slightly after becoming heavier and what I will call a little slower. We started continual vet care and completed tests ranging from blood work to spinal tap, MRIs to muscle biopsy's. I am positive the problem started with the chicken meatballs from Del Monte the Milo brand. I just read the FDA findings and symptoms today and I was speechless. These tests were conducted by three different facilities and approximately 12 different DVMs. I would like to touch base with you on any newer information and to share our experience with you, we tried everything possible to save her and nothing worked, the last tests were for hormone levels and they were no where close to explainable.	6	Years	Terrier - Jack Russell	Dog	8.8	Pound

EON-100266	9/15/2012 1:21	Purina ONE SMARTBLEND Healthy Puppy Formula	I bought a bag of Purina Smart Blend Puppy Food as I usually do. I noticed a web lie substance in it but didnt see any animals so ignored it. My dog started vomiting a day later and didnt want the food. I just thought he was sick so I kept on giving him the food. A week later I found moths and larvae in the food. I was disgusting!!! The web I saw in the beginning wasnt web it was caccoons from the moths!!!	2	Years	Chihuahua	Dog	4.7	Pound
EON-100265	9/15/2012 0:51	Natural Choice Sensitive Skin and Stomach Adult Fish & Sweet Potato Formula Premium Ground	My daughter has been using Nutro dry dog food for her little Maltese for approx. 6 months. Over that period of time we could not figure out why this little dog was losing weight (lost 1 pound over that 6 months) that's alot of weight for a 7 lb dog. He started to get diarrreh then started throwing up constantly. He was taken to the vet and all kinds of tests were run on him and all came back negative. But the dog was still throwing up going on 1 week. Hes had to have IV fluids and now a feeding tube. We couln't figure out the problem until we came upon the consumer affairs site about 1227 compalints about other dogs getting sick on NUTRO dog food. Then we realized that her dog started to get sick since starting to eat NUTRO food. He progressively got sicker over the 6 months that he was eating this food. When his stomach and esophugus was scoped red crystals (burns) were found inside his little stomach and throat! Since this food has been discontinued the dog seems to be getting better but is still on a feeding tube for now (3 weeks). Up to this point close to \$5k has been spent to get this dog well and he is still on meds and we still don't know if he's going to be alright. Please look into what is in the NUTRO DOG FOOD to be making all of these animals sick. It's not a coincidence that there are 1227 complaints from pet owners about their pets getting sick on this food. From dogs dying to liver failure. Please investigate this dog food. Thank you!						
EON-100263	9/14/2012 23:49	chicken jerky and chicken on a stick	I had started buying some chicken on a stick, and chicken jerky. I noticed Moxie not wanting to go run and she would just lay around, so not like her. Then she lost her appetite. Then the main thing, she started walking around the house bumping into things and getting caught behind a door, and unable to jump on the bed. So I took her to a vet and he did not do anything but told me to put her on a diet with little protien and more fiber, said she might just be toxic and needs to flush it out. In 2 days she was worse, and acted in pain. I called a different vet and he took some blood and said she was poisoned and asked if I had ever given her treats and what kind. I told him the kind she has been having lately and he said they there are cases of sever illness and death from said treats. Moxie's kidneys had failed and her eyes were fully dialated, that's why she was walking into things. She was put to sleep that day.	6	Years	Boxer (German Boxer)	Dog	30	Pound

EON-100260	9/14/2012 23:49	Waggin Trian wholesome Chicken Jerky Tenders	we started giving our dog (b) (6) the treats. She started getting very tired all the time, her stomach swelled up. We took her to the doctor and he put her on antibiotics. she was still not feeling much better. we then had to take her for an ultrasound. that is when the doctor told us that she is at the beginning of kidney failure. now she is on a special diet and will need to be for the rest of her life. EON-100251	9/14/2012 22:32	Waggin' Train Wholesome Chicken Jerky Tenders, Waggin' Train Yam Good Wholesome Chicken Wrapped Yams	My dog used to enjoy the Waggin Train Chicken Jerky Treats and Yam Good Treats. She was diagnosed with failed kidneys in February 2012 at a young age for her breed. She has been receiving treatment at the vet and the animal hospital, but she is declining and may not last long. She receives medications twice daily and subcutaneous fluids regularly, usually every other day. Her bloodwork indicates high values for BUN and Creatine and she is also getting a supplement for calcium due to the kidney malfunction. We have spent considerable money on her since she is like family to us. She had seizures earlier this week which required 3 regular vet visits, plus two daytime stays at the vet and two night stays at the animal emergency center. Her condition is still unstable. She had lost weight before the February diagnosis, so I'm not exactly sure what to use for Date Problem Started, so I will use the diagnosis date. The problem would have actually begun before that because I had stopped giving her the treats before February due the adverse information on the Internet. The Waggin Train Treats were stopped first because the articles I had seen seemed to implicate them.	11	Years	Terrier - Yorkshire	Dog	8	Pound

EON-100249	9/14/2012 22:31	Tail Waggin Chicken Jerky Treats	Pet was given the tail waggin chicken jerky treats a few times then she started showing signs of illness. Took her to the vet to treat her for gi upset and seem to relieve symptoms briefly then problem just kept re occurring with gi upset vomiting diarrhea lethargy and not acting normally or wanting to eat. Treated her symptomatically while trying to find out what the issue was. After weeks of occurring problems and being hospitalized off and on during this time. All labwork showed up normally at first then changes in labwork values showed that she had kidney and liver issues. Pet was treated daily to determine cause of illness and to treat symptoms to make pet feel better, but pet continued to decline over the next few months then had to be euthanized as a result of all the problems since she had been given these treats. Pet was healthy and doing great up until she was given the tail waggin chicken jerky treats. Sent a few of pieces of the product to FDA in original package with some info in August 2012, but not sure if they received it or not .	13	Years	Schnauzer - Miniature	Dog	14	Pound
EON-100248	9/14/2012 22:31	Wagontrain Chicken Jerky Treats	I had been feeding (b) (6) Wagon Train Chicken Jerky treats and noticed he seemed off. He later began to throw up, wanted to go outside far more often and began licking and scratching. Upon taking him to the vet I learned about the reported issues with the Chicken treats being shipped from China. I threw away the remaining treats and kept (b) (6) on Cephalexin for 2 weeks and the problems subsided. I don't understand why these products are still being imported and sold in the US.	6	Years	Retriever - Labrador	Dog	95	Pound
EON-100247	9/14/2012 22:31	Priority Dog Food: Lamb Meal and Rice	One our pets showed food allergy signs to a food product, so we fed her a bland diet. Then, we went to buy another brand of food however she refused to eat it. Then, we bought a Safeway Brand Priority Dry Dog Food (Lamb Meal and Rice). I have fed another dog canned versions of Priority and they have never had any issues. She was fed this food, seemed to like it as she ate it, but got sick. She got sick right after eating it and then hours later. There was food chunks and the food seemed not to digest. The food was not expired as Safeway has been tending to sell expired products, and it was a just opened bag.	7	Years	Dachshund - Miniature	Dog	11	Pound
EON-100245	9/14/2012 22:31	Vitalife duck tenders large bags and small , Chewmasters Chicken Jerky	Went to the vet because she had collapsed 2x and to my shock she had renal and heart failure. Now 2 weeks later she is dead! Before that I had fed my pack except (b) (6) Chewmasters chicken tenders, they instantly had diarrhea and I stopped, threw out the bag. I did not know till i started researching what made my dogs sick!! Vitalife duck tenders were deemed to be safe and (b) (6) loved the duck. It has killed her..	4	Years	Saint Bernard Dog	Dog	120	Pound
EON-100232	9/14/2012 15:06	Canyon Creek Ranch brands	We had a 10 year old yellow lab that was diagnosed with kidney disease and had to be put to sleep in June of 2012. Now our 4 year old Chihuahua, (b) (6), has been diagnosed with kidney disease and we suspect our, second, 5 year old Chihuahua, (b) (6), is also sick with kidney disease. We had the vet pull blood from (b) (6) for testing today, Friday September 14th 2012. The main "common" food item between all our pets is chicken treats from china.	4	Years	Chihuahua	Dog	8	Pound

EON-100213	9/13/2012 18:54	Kingdom Pets Wholesom Duck and Sweet Potato	All three dogs were given a couple of duck and sweet potato treats. One dog refused them, one dog developed explosive diarrhea (separate report filed for (b) (6)), third dog vomitted throughout the day and then developed diarrhea. Two and a half weeks later he is still having diarrhea despite prescribed meds and a bland diet.	3.5	Months	Akita	Dog	45	Pound
EON-100212	9/13/2012 18:36	Kingdom Pets Wholesome Duck & Sweet Potato	All three dogs were given a couple of the duck and sweet potato treats. 2/3 dogs ate their treats, both had diarrhea. This dog, (b) (6), never has intestinal upsets so explosive diarrhea in the middle of the night is VERY unusual for him. It lasted about 24 hrs along with lack of appetite and overall just not feeling good.	8	Years	Akita	Dog	110	Pound
EON-100210	9/13/2012 17:54	Pedigree Little Champions	I fed both of my inside dogs on 9/4/12, Pedigree dogfood in a pouch. (b) (6) was throwing up within 2 hours and continued until I got him to the vet the next morning. The treated his symptoms and I picked him back up that evening. He was still very sick and had to take him back and he was treated again and various tests were run. The vet it had to be the food that he ate, because all of his bloodwork was fine. He spent friday and saturday at the vets because he was extremely dehydrated and almost in shock. We almost lost him. I spent over \$1,300 on him in vet cost and he has recovered. Both of my dogs were extremely ill and that is the only food they were given. The do not go outdoors unsupervised.	10	Months	Terrier (unspecified)	Dog	14	Pound
EON-100139	9/13/2012 13:09	Milo's Kitchen Chicken Grillers, waggin Train Duck Jerkey Tenders	(b) (6) was in very good health, running, playing, chasing rabbits, etc on Sunday, August 26, 2012 on Thursday, (b) (6) I had to put him down. I was giving him Milo's Kitchen home-style dog treats, I was also giving him Canyon Creek Ranch Cowboy Steak Drumettes. It began with vomiting, dia then lethargy, he wouldn't eat or drink water. I had to physically carry him to the car and into the vet (this is a dog that absolutely did not like to be carried). The vet kept asking me if he got into anti-freeze or how he was poisoned. He was tested for Addison's Disease - test results came back negative. It only took three days (3 days) for him to be healthy, poisoned and euthanized. (b) (6) is an inside pet with a fenced in yard with other pet owners around us. I do not have anti-freeze at my residence and I get along well with my neighbors. There was no poison! The only difference in his food was these treats! (b) (6) died from acute kidney failure caused by poisoning. I had him at the vet for a complete physical on July 20, 2012 and he was in excellent health. This should have never happened. It wasn't after he become sick that I started researching these treats and found that I am not the only pet parent that has lost a pet due to acute kidney failure from these treats. I didn't know that they were manufactured in China - I would NEVER have bought them. Who would ever think that pet treats would be made in China!	8	Years	Mixed (Dog)	Dog	48	Pound

EON-100137	9/13/2012 12:00	Milo's Klitchen home-style dog treats Chicken Jerky	I purchased and fed my dog, (b) (6), Milo's Chicken Jerky Treats for the first time approximately 1 1/2 weeks ago. I had purchased them from the local Walmart in (b) (6). I had only given her 3 of them over a 3 day period when on the 4th day she vomited and had a speck of blood in her vomit. I was concerned that she was not digesting them so I save the rest but did not feed her anymore. Since the first sign of vomiting she has had loss of appetite, some additional vomiting, both normal bowels and diarrhea over the course of the past 1 1/2 weeks. She has also been drinking large amounts of water. I took her to her vet today and they proceeded to do blood work on her to rule out kidney infection. The lab results confirmed no infection present however her Creatinine and BUN were extremely HIGH and I was told she is in kidney failure. The vet told me that the Milo Chicken Jerky Treats have been causing similiar reactions in other dogs and that there was a recall on them. My dog, (b) (6), has to stay in the vet hospital and receive IV fluids overnite.	6	Years	Beagle	Dog	34.1	Pound

EON-99920	9/10/2012 16:51	Waggin' Train chicken jerky	In Feb 2012 after being given a Waggin Train chicken jerky treat, (b) (6) started shaking. I rushed her to the vet and by the time I got her there she had to be carried in. They immediately started working on her and sent me home to see if there was something poisonous she could have gotten into. While my husband and I searched the house and yard to not avail, the Vet called and said I needed to get her to the hospital. As I drove her to the hospital, her breathing was extremely fast ans hard and her whole body was shaking uncontrollably. Just after arriving, she started having seizures and they started treating herewith charcoal for poisoning. They worked with her all night and released her the next day and sent her home with medication. She was still suffering and did get energy back for about two weeks. She had been perfectly healthy prior and has not been sick or had seizures since. Nothing was found that could have poisoned her, but she presented with and was treated for poisoning because of the symptoms she presented. Then about two to three months ago we saw a news piece about Waggin Train chicken jerky poisoning dogs. That explained what had happened to (b) (6) I e-mailed them to let know that our dog obviously had been sickened by that product. They were very quick to respond and opened a claim with the claims firm they have hired. They requested and received the vet info and then denied the claim stating that (b) (6) didn't have the symptoms they claim she would have had. (The vets clearly treated her for poisoning.). They also stated that she could have a seizure disorder (which she doesn't) and that they don't know what I might have around my house or if someone could have sprayed something poisonous in my (fenced) yard. They also said people see the news and "jump on the bandwagon" wanting reimbursement for the bills. I find it very disturbing that they don't want to take responsibility that their product has made animals sick. (b) (6) almost died. I had not made contact with them to get money, but to let them know of another case that is most likely related to the product. That is the only thing that could have made her sick. Thank you.	2	Years	Mixed (Dog)	Dog	67	Pound

EON-99842	9/9/2012 22:15	Waggin Train Wholesome Chicken Jerky tenders Low Fat	I fed my dog a Waggin Trail chicken jerky treat on Monday around noon - by early afternoon she had very bad diarrhea, going about every 30 minutes , very liquid stool. she was up going outside most of the night. She drank a lot of water - I started feeding her white rice only - she continued with diarrhea , no energy and really thirsty for four days. Her stools are more formed now and she has started eating regular dog food again after almost a week.	8	Years	Retriever - Labrador	Dog	70	Pound
EON-99841	9/9/2012 10:51	waggin train wholesome chicken jerky tenders	I have been giving my dogs these treats for a year with no problem then just this week I noticed that they were not eating or drinking water like they used too. Then Friday the 7th of september, I woke up to several diahera piles in my house and then they started to vomit. This continued the rest of the day and into Saturday and today Sunday the 9th I woke up to another pile of diahera this time with blood in it. I will be making an appointment with my vet on Monday to get this problem treated. Please help me. I can not afford a large vet bill. I live in a small town and we are suffering with the economy worse than larger towns. I am on a limited budget and can not afford large vet bills.	7	Years	Unknown	Dog	70	Pound
EON-99834	9/8/2012 21:30	Waggin Train Chicken Jerky Tenders	Aug 30 - (b) (6) started to vomit and show signs of intestinal pain/cramps, after the 5th time vomiting took him the emergency hospital for X-rays, Sonogram, full blood work. All test results showed normal, but while at hospital vomited twice more. Left him there overnight for IV fluids and monitoring. We initially thought the vomiting was due to eating grass or mushrooms in the yard. But event on the 9/6 changed our minds. Aug 31 - Returned home weak and without appetite. On meds to control vomiting and diarrhea. Sept 1st - Sm amount of bland food and water Sept 2st - Sm amount of bland food and water Sept 3rd - Continue with bland food diet Sept 4th - Back to normal diet Sept 5th - Normal diet and energy level Sept 6th - Same as above, gave (b) (6) jerky treat (Waggin Train name brand from Costco) Sept 7th - Started vomiting in early morning thick paste, vomited twice more before seeing vet mid-morning. (b) (6) rec'd injection of anti-vomit meds. No food or water all day. Low energy level Sept 8th - Refused food and only small amounts of water. Low energy level, very weak. Spiting green phlegm, no vomiting.	5	Years	Retriever - Flat-coated	Dog	80	Pound

EON-99830	9/8/2012 10:06	Milo's Kitchen home-style dog treats. Chicken Jerky.	<p>I purchased a 20 oz. package of Milo's Kitchen home-style dog treats, Chicken Jerky at my local WalMart. The expiration date is 11/03/13 and the lot number is 2132HV B. Over a two week period I gave my dog, (b) (6) (an 18 pound four and a half year old miniature American Eskimo Dog), no more than 1/2 a strip each day as a treat when I arrived home from work. The packaging recommends 2-3 full strips per day for his weight class. Besides this product there were no other variants to his diet.</p> <p>My dog started vomiting and suffering from non-stop diarrhea throughout the house. He stopped eating and was not drinking normally. He seemed depressed and a bit mortified that he had made messes in the house. He was extremely anxious and kept needing to go outside to strain and squirt liquid. I rushed him to the emergency Vet clinic. They did a full blood panel and exam, but could find no blood levels out of the norm except one indicating he was under stress. The Vet gave him an anti-nausea injection and prescribed an antibiotic and bland diet. (chicken and rice, low-fat cottage cheese) and told me to bring him back if his condition hadn't improved in three days.</p> <p>His vomiting stopped immediately and his stool remained very soft and runny for three days, but he seemed much less stressed and hungry. As I slowly added his regular food (Blue organic brand and Beneful) over the next few days his stool got more firm, but is still not "normal" or as before. He still refuses to go out in the yard by himself as if he's afraid of something and will only defecate when I take him on his two daily walks. His appetite and thirst have returned to normal and his energy and personality are nearly normal.</p>	4	Years	Spitz - American Eskimo Dog	Dog	18	Pound
EON-99829	9/8/2012 0:33	Milos Kitchen home-style dog treats - Chicken Grillers - Chicken Recipe with Natural Smoke Flavor - No artificial flavors or colors - 100% REAL - wholesome and delicious	Dog was perfectly healthy, going in for routine blood work to monitor medication levels for epileptic seizures. Suddenly started having a decreased appetite, increased water consumption, more frequent urination, very watery and dark diarrhea. Took to vet who did additional blood work and requested he be brought back in for immediate hospitalization as the dog for some reason had gone into sudden onset advanced kidney disease and was in kidney failure. He was hospitalized for a couple of days, given IV fluid therapy and antibiotics, which helped for a short period of time. After about eight weeks, his condition again started deteriorating and it became evident that he was not going to survive.	6	Years	Spaniel - King Charles Cavalier	Dog	20	Pound

EON-99701	9/6/2012 15:36	Waggin' Train Wholesome Chicken Jerky Tenders Treats for Dogs	Dog presented after having vomiting and being ADR for 5 days duration. Dog had history of being out in back yard unattended 5 days prior, but owner could not find anything specific that dog had gotten into. Dog initially vomited some black, unidentified object, but subsequent vomitus was bile and/or food. Dog seemed like she wanted to eat and drink, but could not keep down. Dog was vaccinated 1 month prior to event, vaccines included DHPP, bordetella, leptospirosis, lyme, and 1 year rabies. Dog eats Purina Beniful food and was given Waggin' Train Chicken Jerky treats daily. Routine bloodwork, urinalysis, and radiographs were performed. Significant findings included elevated kidney enzymes at BUN 79 and CRE at 5.8. CBC was wnl. Urine showed a dilute urine with glucoseuria, proteinuria, and ketonuria. Many tubular casts were noted on the urine sediment exam, no crystals, white blood cells or bacteria. Urine culture preliminary results are negative for bacterial growth. Abdominal radiographs revealed no significant findings. Fanconi-like syndrome and acute renal failure diagnosed and hospitalized dog. Dog is currently hospitalized on IV fluids, anti-emetics, and antibiotics.	5	Years	Retriever - Golden	Dog	37	Kilogram
EON-99664	9/6/2012 13:36	EverPet real chicken Chicken Chips	Bought EVERPET brand Chicken Chips to give to both my Chihuahua and Dachund. Have been giving them this treat for the last year about 3 times a week. This last batch had white circles on the Chips that I had never seen before. About a week ago my Chihuahua started to yipe when I went to pick her up. Checked her over and no injuries, lumps etc. Then she stopped eating. Then she wouldn't go for a walk with me which she loves to do. Now she wont drink anything. She had a bowel movement yesterday but still will not drink any water. I bought a plastic syringe today to push water into her mouth and she seems to be doing a bit better. She hasn't had any treat for a few days and the Dachund is 18 and off her water too.	2	Days	Chihuahua	Dog	6	Pound

EON-99480	9/5/2012 3:42	WAGGIN TRAIN JERKY TENDERS	I had been feeding my dog this treat and did not realize it had been recalled/ FDA had put warnings on it until i researched it myself. My dog loves this treat and is addicted to it which is surprising because he is such a picky eater. He does not eat all treats, yet he loves this one. However I realized after a long time of feeding him this treat that it is making him very very sick. He has intense diarrhea constantly when i feed him this treat. His stool is very very fluid and liquidy. It is so unhealthy for dogs to have intense diarrhea for such long periods of time. I am surprised this product is still on the shelves. This will cause many law suits I'm sure. These poor dogs did not do anything to deserve this. I blame the FDA for not putting a national recall on this product. I had to do my own research to find out there was even a question regarding the safety of this product that is sold EVERYWHERE. My dog is very sick from this product. Please take action!	3	Years	Terrier - Jack Russell	Dog	20	Pound

EON-99476	9/4/2012 20:42	Kingdom Pets Jerky treats	I had been giving (b) (6) chicken jerky treats from the companies Kingdom Pets, and Waggin' Train for months. I had purchased these products from our local Costco. She was given approximately a half a jerky treat a day. All of the sudden in March of 2012 I noticed her vomiting a lot, not wanting to eat anything, and acting unusual (Chewing on herself because she was so nauseated). I took her to my local veterinarian where I had worked for 5 years. They ran some blood tests and an x-ray. Her liver enzyme levels were extremely high and I was told that she was in extreme kidney/liver failure. It was recommended that I get an ultrasound done to see if the cause was cancerous, (which we later found out it was not). She was put on multiple medications to help her liver enzymes come down, and she is still on some of the medications today. I was told that she is lucky to be alive by my vet due to her extremely high blood count. She is recovering slowly, but it has been a long and hard 6 months of recovering for my beloved pet. I hope that these treats are taken off the shelves so that nobody has to go through this kind of pain with their dog.	5	Years	Chihuahua	Dog	5	Pound
EON-99466	9/4/2012 18:36	milos kitchen home-style dog treats	i gave my (b) (6) the milos chicken treats every day, i would buy two bags, not knowing that it's on recall but yet the stores is still stocking them on the shelves, for the reason of this i lost my (b) (6) last thursday on (b) (6), i am so upset and heart broken, i miss my (b) (6) but yet no one is doing anything about this, my (b) (6) was my baby, i have no kids of my own she was my baby, to come home to see her dieing is not a happy or joyful thing, i want some answers, why would you let stores stock them on the shelves, i can't believe i lost my baby that i had for five years. i just dont understand, why?	12	Years	Other Canine/dog	Dog	10	Pound

EON-99428	9/4/2012 10:33	Canyon Creek Ranch	After having a treat in the evening, later that night he had both acute/violent vomiting and diarrhea at the same time. There was some blood in the diarrhea in the morning which prompted me to take him to the vet. His exam was otherwise normal and he wasn't acting sick so he thought it was maybe something he ate. (i didn't make the connection with the treat then) the diarrhea lasted for almost four days, but he was eating and drinking normal and did not act sick otherwise. Two days after he recovered I again gave my dogs the chicken jerky and that same night my OTHER dog got sick with the same symptoms. This is what finally made me suspect the treats.	6	Years	Poodle - Miniature	Dog	20	Pound

EON-99398	9/3/2012 10:36	Waggin' Train Yam Good Duck-wrapped yam, Waggin' Train Wrapples, Waggin' Train Lassos Pork Skin Chews Wrapped with Chicken Jerky, Waggin' Train Happy Trails to Chew, Waggin' Train Cowboy Steaks Steak-Shaped Treats	<p>I purchased one bag of Waggin' Train Yam Good with duck, Happy Trails to Chew, Chicken and Apples, and 2 bags of Lassos on August 23rd, 2012 from the York Galleria Target Store in (b) (6). This is the only time I have ever bought the yam with duck dog treats; my dogs enjoyed them and no more treats remain in the bag. The empty bag was thrown out (b) (6), as well as my other healthy miniature dachshund (b) (6), were boarded at a local kennel (b) (6) in (b) (6) from the morning of August 24 through the evening of the 26, 2012. (b) (6), my mother's dog who also resides in the same household, was kept at a friend's home during this same time period.</p> <p>Approximately 0300 Tuesday, August 28, 2012, (b) (6) woke up and produced 2 episodes of diarrhea and again at approximately 0530. He, as well as (b) (6) and (b) (6), were crated during the workday. (b) (6) again produced multiple episodes of diarrhea through the evening. At approximately 2000 Tuesday evening, (b) (6) was noted with chills/shaking followed by one episode of projectile vomit of a frothy-like liquid. Later that same evening, his behavior seemed to have improved slightly and was drinking water without coaxing. That evening, I spoke with the kennel owner regarding this new onset illness. He had stated no one else had reported such a illness. He stated he has recently experienced some occurrence of kennel cough, but what I was reporting did not appear to be kennel cough. The owner mentioned the possibility of some separation anxiety from the weekend in the kennel. He had suggested to put (b) (6) on a bland diet (rice and hamburger) and encouraged liquids to avoid dehydration and would follow up with me the following evening. (b) (6) continued with diarrhea (yellowish, extremely foul-smelling, watery, and gritty) Wednesday with 1 episode in his crate during the workday and multiple episodes Wednesday evening. However, at this point no other dogs had become ill and his behavior was normal, aside from the loose stools. Thursday evening, I spoke with a receptionist at my vet's office (b) (6) (b) (6) in (b) (6) regarding (b) (6)'s diarrhea and asked if I could bring a stool sample in to be tested for parasites, worms, bacteria, etc. He suggested bringing (b) (6) in, so I scheduled an appointment for Friday, August 31, 2012 at 1900. (b) (6) continued with diarrhea and low appetite. Friday afternoon, at approximately 1800, (b) (6) had 2 episodes of explosive and watery diarrhea. At the vet's office, no observable illness was noted and a stool sample was sent away for testing. Test results are still pending. However, upon weighing, (b) (6) had lost 2 lbs since his last yearly exam in July 2012. The vet prescribed DiaGel and Metronidazole. Also at that time, I had reported (b) (6)'s diarrhea. The DiaGel was given Friday evening with more formed stools Saturday morning. By Saturday morning, (b) (6)'s diarrhea continued with new onset explosive diarrhea from (b) (6). I contacted my vet's office and explained this new situation and the vet provided me with 2 additional doses of DiaGel, one for (b) (6) and one for (b) (6). (b) (6) nor (b) (6) has not had any further episodes</p>	2	Years	Dachshund - Miniature	Dog	14.2	Pound
-----------	----------------	---	---	---	-------	-----------------------	-----	------	-------

			of watery diarrhea since been given the DiaGel. (b) (6) vomited after her dose of DiaGel on Saturday afternoon at approximately 1400. (b) (6) diarrhea continued with multiple episodes Saturday and Sunday. She also displays low appetite and lethargy. Monday, September 3, 2012 at approximately 0900 had an episode of projectile vomit and another episode at approximately 0930. She continues with extremely foul-smelling, watery, yellowish with a red tinge at this time. We have tried to determine the exact reason why all three dogs have displayed similar symptoms including the canine influenza, parasites, bad food, etc. All three dogs have been on the rice-hamburger diet since Wednesday with no treats being given. I became concerned regarding the Waggin' Train products when a friend on Facebook posted a picture of a petition to remove Waggin' Train products from pet stores.						
EON-99397	9/3/2012 1:51	Special Kitty	Cat was examined 8-10-12 appeared healthy presented 9-2-12 with history of 1 day anorexia, lethargy, and diarrhea. Diagnostics performed revealed: increased bilirubin, pancreatitis, urinary tract infection, and azotemia. Treatment has been initiated but cats prognosis is currently guarded. Three other animals also have eaten the food. A dog that ate the food died 2 days later, one cat that ate the food was just diagnosed with a urinary tract infection, and final cat who ate the food currently appears healthy.	9	Years	Domestic Shorthair	Cat	6	Pound

EON-99380	9/2/2012 10:06	Waggin' Train	<p>This is absolutely ridiculous. There are over 1000 confirmed cases of Waggin' Tails treats causing harm and death to dogs and nothing happens about it. Multiple people have filed reports and the FDA decides this isn't something they need to concern themselves with. News flash, it is. This is one of the worst side effects of a product available on the market, and instead of doing a recall or having the FDA do some research on the origin on the product (China, did your homework for you) they let our pets suffer. This is completely unacceptable and this will be escalating rather quickly if nothing is done. I know I'm not alone when I say I am more than willing to file a lawsuit against not only the company, but against the organization that is responsible for protecting my family, which includes my pets. You best believe that if this happened to my pet I wouldn't rest until someone opened their eyes and actually did something about this situation. This is more than unacceptable. It shows how corrupt of an organization is really in charge of anything and how they aren't worried about repercussions. This is sick and everyone involved should be ashamed. Something that is intended to make a pet happy ends up being the cause of their death because some greedy person decides they would rather keep stuffing their pockets instead of doing what they are responsible for. The FDA has done some stupid stuff before, biased studies and unproven data being published just for a few examples, but never in my life have I ever seen something as morally wrong as this. To anyone that is involved with this, be ashamed. You deserve no better than what you are subjecting our pets to.</p>			Spitz (unspecified)	Dog

MURRAY Book I The gods in council Athena's visit to Ithaca The challenge from Telemachus to the suitors</p> <p>TELL ME, O MUSE, of that ingenious hero who traveled far and wide after he had sacked the famous town of Troy. Many cities did he visit, and many were the nations with whose manners and customs he was acquainted; moreover he suffered much by sea while trying to save his own life and bring his men safely home; but do what he might he could not save his men, for they perished through their own sheer folly in eating the cattle of the Sun-god Apollo; so the god prevented them from ever reaching home. Tell me, too, about all these things, oh daughter of Zeus, from whatsoever source you may know them.</p> <p>So now all who escaped death in battle or by shipwreck had got safely home except Odysseus, and he, though he was longing to return to his wife and country, was detained by the goddess Calypso, who had got him into a large cave and wanted to marry him. But as years went by, there came a time when the gods settled that he should go back to Ithaca; even then, however, when he was among his own people, his troubles were not yet over; nevertheless all the gods had now begun to pity him except Poseidon, who still persecuted him without ceasing and would not let him get home. Now Poseidon had gone off to the Ethiopians, who are at the world's end, and lie in two halves, the one looking West and the other East. He had gone there to accept a hecatomb of sheep and oxen, and was enjoying himself at his festival; but the other gods met in the house of Olympian Zeus, and the sire of gods and men spoke first. At that moment he was thinking of Aegisthus, who had been killed by Agamemnon's son Orestes; so he said to the other gods:</p> <p>¿See now, how men lay blame upon us gods for what is after all nothing but their own folly. Look at Aegisthus; he must needs make love to Agamemnon's wife unrighteously and then kill Agamemnon, though he knew it would be the death of him; for I sent Hermes to warn him not to do either of these things, inasmuch as Orestes would be sure to take his revenge when he grew up and wanted to return home. Hermes told him this in all good will but he would not listen, and now he has paid for everything in full.¿</p> <p>Then Athena said, ¿Father, son of Cronus, King of kings, it served Aegisthus right, and so it would anyone else who does as he did; but Aegisthus is neither here nor there; it is for Odysseus that my heart bleeds, when I think of his sufferings in that lonely sea-girt island, far away, poor man, from all his friends. It is an island covered with forest, in the very middle of the sea, and a goddess lives there, daughter of the magician Atlas, who looks after the bottom of the ocean, and carries the great columns that keep heaven and earth asunder. This daughter of Atlas has got hold of poor unhappy Odysseus, and keeps trying by every kind of blandishment to make him forget his home, so that he is tired of life, and thinks of nothing but how he may once more see the smoke of his own chimneys. You, sir, take no heed of this, and yet when Odysseus was before Troy did he not propitiate you with many a burnt sacrifice? Why then should you keep on being so angry with him?¿</p> <p>And Zeus said, ¿My child, what are you talking about? How can I forget Odysseus than whom there is no more capable man on earth, nor more liberal in his offerings to the immortal gods that live in heaven? Bear in mind, however, that Poseidon is still furious with Odysseus for having blinded an eye of Polyphemus king of the Cyclopes. Polyphemus is son to Poseidon by the nymph Thoosa, daughter to the sea-king Phorcys; therefore though he will not kill Odysseus outright, he torments</p>	2.5	Years	Domestic Shorthair	Cat	9.5	Pound

EON-98536	8/31/2012 20:57	Dogswell Mellow Mut Chicken Breast Natural with Added Vitamin E	My Jack Russell terrier (b) (6) has been vomiting in the morning for the past two days and not eating much. I noticed two of his stools were very dark, almost black. I took him to the Banfield Veterinary Clinic at PetSmart in (b) (6) on 8/30/12. The veterinarian did some blood tests and found elevated pancreatic enzymes, lipase and amylase. He was also suffering from an infection in his left eye and a swollen lymph node that was biopsied. The vet gave (b) (6) an antibiotic injection, prescribed a low fat dog food, and Sucralfate and Pepcid AC, gave us Neopolydex ointment for his eyes. We have take him back to the vet for a follow-up visit in a week to test his pancreatic enzymes again. I told the vet that Jacob has been given chicken jerky treats on daily basis, a small piece every morning as a reward for going into his enclosure area while my husband and I are at work all day. We have been giving him the chicken jerky treats for atleast 1 year now, today I googled "chicken jerky treats for dogs" and learned about the recall and current FDA investigation regarding chicken jerky treats made in China. The brand we have been buying is Dogswell, Mellow Mut Chicken Breast, Natural with Added Vitamin E, purchased from MudBay Pet Stores in Federal Way, Washington.	2	Years	Terrier - Jack Russell	Dog	17.8	Pound

EON-98405	8/30/2012 22:33	Waggin Train Chicken Jerky Tenders	After eating the Waggin Train jerky treats she became lethargic and stopped eating. When taken to the vet she was found to be in kidney failure and near death. Through a week of veterinary care, and flushing her kidney's with large amounts of fluids, she began to get better and her BUN and creatinine levels began to fall.	3	Years	Siberian Husky	Dog	45	Pound
EON-98393	8/30/2012 22:27	Purina One Smartblend Large Breed Puppy Formula	(b) (6) was diagnosed with pancreatitis after being fed several 16 pound bags of Purina Smartblend Large Breed Puppy formula over a 2 month period stretching from December through March 2012. The food was purchased at Wal-Mart and was in a large plastic tote at room temperature. She was fed only the recommended amount for her weight. She was diagnosed as having pancreatitis after extremely high levels of libase and adibase were found in her blood. After closely examining her diet over the period prior to her sickness, the vet concluded that the Purina One Smartblend caused it.	10	Months	Siberian Husky	Dog	45	Pound
EON-98366	8/30/2012 22:12	Waggin Train Wholesome Chicken Jerky Tenders	Taking my dog to the Vet for her shots I asked for a blood test. The test shows abnormal liver and kidney CO2 results. She gets only the very best food except for Waggin Train Jerky Tenders 48 oz code 070207748 about 2 day per her weight I got this from Cosco the best before date is oct 2013 --I would have bought this in the month of Aug 2012. Sadly she has been getting these treats for about 2 years now. I have not given her any more. And I will not. Something is wrong here and I know what the only cause could be. Lucky for me I have gotten this caught early and now under the Vets care she will be getting better. But only because she is young and because this has been found out soon enough to do something about it.	3	Years	Bichon Frise	Dog	18	Pound

EON-98206	8/30/2012 13:48	SHEP CHICKEN STRIPS SHEP WOW STICKS	<p>We had a family emergency and had to travel by car to (b) (6) in June 2012. We stopped at an Aldi grocery store in (b) (6) for some other things and saw that they also carried dog food and treats like the chicken strips and biscuit treats. We purchased a bag of SHEP WOW, the SHEP Chicken treats and a box of SHEP dog biscuits. Since our dog up to that point was only given homemade food and Milkbone dog biscuits we had no idea there was a possible problem with the new treats. After eating the Aldi brand Shep Wow and Shep chicken strips/treats with chicken from china once a day for a few weeks she began to refuse her regular, non commercial, homemade food that she loved and started drinking 3-4 times the amount of water she previously did, urinating more frequently and seemed to be slowing down which we attributed to her advancing age and previous health problems. At several times she would revert back to her usual eating habits and self and we didnt make the connection between the food and her refusal to eat her regular food. In the past she would get sick and go off her food every once in a while if she had eaten some thing outside on her walks and usually recovered within 24 hours. In July of 2012 she began to continuously refuse her homemade food and started drinking 3-4 times her usual amount regularly and would only prefer the SHEP treats over any other food we tried to give her. She also started vomiting periodically and pooping in the house. Even through her other previous health problems she had never urinated or defecated in the house before. We started doing some internet research to try and determine what was making our dog sick. We stopped giving her any type of store bought treats after finding an article about chicken from china making dogs sick. We looked at the Aldi packaging and sure enough the chicken treats were made from chicken from china. The SHEP WOW sticks list chicken as an ingredient but not that the chicken was from china. The SHEP Chicken Strips do say chicken from china. It was at this point we started ruling out other factors like her ingesting lizards or toads etc and started watching her more closely as far as eating and outside habits. She seemed to get much better and returned to her usual goofy self after we stopped giving her the SHEP products and then 2 weeks ago started refusing all food again and started to get sick again even though she hasnt had any SHEP products recently. We brought her to the vet last week and she was diagnosed with a severe UTI infection and a very high white blood cell count (116,000). At the time we took her to the vet after she had become lethargic and seemed to be failing. she weighed 51lbs, she has now lost another 2 lbs. (12 lbs overall since January 2012 at her last complete check up). She had a clean bill of health at her last regular check up in January 2012. She is now in critical condition with little hope of recovery. I firmly believe it was the SHEP products since she was a healthy older dog before she ate the products. Please help get these tainted treats off the market before more dogs like my (b) (6) get sick and or die. If the medicines - 136mg Baytril (antibiotic) for 14 days and 15mg Mirtazapine (to stimulate appetite) she is currently on dont work we will be forced to euthanize her. We do not have the resources for more invasive testings or treatments.</p>	11	Years	Other Canine/dog	Dog	58	Pound

EON-97606	8/25/2012 15:12	SHEP CHICKEN Breast Fillets Premium Dog Snack	<p>(b) (6) had her last health check-up on 04/12/2012. At that time she was in excellent health and weighed 6.2 pounds. (b) (6) started getting the SHEP Chicken Breast Fillets (Chicken Jerky) in June, 2012. We noticed that she began vomiting shortly afterwards. Then she progressed to the symptoms listed in the FDA warning, "decreased appetite, although some may continue to consume the treats to the exclusion of other foods; decreased activity; vomiting; diarrhea, sometimes with blood; and increased water consumption and/or increased urination." (b) (6) was also listless and slept a lot. This week we took her to the vet where she was described with kidney failure and her weight was 3.77 pounds. She was hospitalized and given iv infusions, antibiotics, azodyl along with a special renal low protein diet. She will continue on treatment and will be retested after labor day. The Vet did not find evidence of Fanconi syndrome but did find that her kidneys are not concentrating her urine.</p>	5	Years	Terrier - Yorkshire	Dog	3.77	Pound

EON-97604	8/25/2012 11:42	Kingdom Pets Chicken Jerky	Vomiting, listlessness, bloated stomach			Poodle (unspecified)	Dog		
EON-97603	8/25/2012 11:36	Fancy Feast	<p>Last year, I fed my cat Fancy Feast (variety of flavors) like I always did and this particular batch seemed to cause a severe reaction (diarrhea and vomiting). I stopped feeding him the food and waited a few days thinking he was just ill perhaps and then resumed feeding him the food (he is picky and he liked this brand).</p> <p>He had severe reactions again only worse. I took him to the vet and his kidney function showed a decline. He was still in overall good health and so I decided to stop feeding him the food and to send the food in for analysis. I stored the food away forgetting to send it out to be tested and I wasn't sure who to send it to. We moved recently, and my brother unpacked the bag of cat food and unknowingly feed my cat the same food that had made him sick last year. The expiration date is for November of 2012 so there was no reason for him to believe the food was no longer any good. He fed him the food on the evening of 08/23/12, and on the morning of 08/24/12 I received a call on my way to work. My brother told me that my cat had severe vomiting and uncontrollable diarrhea. Both the vomit and diarrhea had blood in it. I was on a company bus so I could not turn around and go back.</p> <p>Outwardly, my cat appears to be recovering, but I am concerned because of the blood in his vomit and feces. When I initially called Purina last year to complain the representative told me that their food is safe, but warned me NOT to feed my cat any more food from the batch I had bought from Target. I was supposed to have received a box to send the food back, but never did.</p> <p>This time, the representative told me she would certainly send the box and would get back to me with the results. I want to send an additional can to a non-involved party because I do not trust that Purina will tell me what is truly wrong with the food. I want to know what made my cat so sick. I also want to know where the food and ingredients were manufactured.</p>	15	Years	Mixed (Cat)	Cat	8.5	Pound

EON-97559	8/24/2012 17:51	Kingdom Pets Chicken Jerky	<p>My dog ate a Kingdom Pet Chicken Jerky treat on Tuesday evening (8/21), around 7-7:30. The only other thing she had to eat that day was some fresh meat, around 2-3 in the afternoon. I generally feed her fresh food and she likes salad. She ate the jerky treat and about an hour later, she started vomiting. The first thing she vomited was the treat and from that point, it was liquid and dry heaves when there was no more liquid. She then started having bloody diarrhea. I was up with her all night. She vomited/heaved and had diarrhea all night. The next day was not as bad but she was listless and would not eat. Her diarrhea became black. I do not have money for a vet bill so there was not much I could do. Yesterday, Thursday, she appeared a little better. She would wag her tail. I thought she was going to be okay and then today, she started vomiting again and is listless, again, though the diarrhea has not come back. She will not eat. I am devastated. I googled the symptoms and that is how I found out about the chicken jerky. I am guessing that she probably has liver damage and renal failure/damage. I don't know what to do to help her. I can only pray that the body will heal itself, with time. I bought some Pedialyte and I try to get some of that in her. My dog is like my child and if I lose her, I don't know what I am going to do. It was my fault for feeding her the treats. She only eats a half of jerky at a time. It has been more than 48 hours and she is still with me, but I don't know if the damage in her body progresses or gets better, the longer she survives. Please do what you can to get this product off of the market. It is a shame that people are letting you know what is happening and nothing is being do to get rid of the source of the problem. It could be happening to human food, too. We just don't know. We need to stop allowing food from China to enter our borders. We need to keep ourselves safe. All they care about is the dollar. How many tainted products from China do we have to find before we say enough is enough. Please help us.</p> <p>PS...I don't know the exact date the product was purchased or first date given, so I had to guess. There is a half bag left. I am suspecting the toxicity built up in her system and once it got to the damaging point, that is when the symptoms occurred.</p>	3	Years	Chihuahua	Dog	14	Pound

EON-97532	8/24/2012 15:27	Waggin Train Duck Jerky	<p>(b) (6) had become more lethargic during my other dog, (b) (6) illness. (b) (6) I thought she was sensing her companion was sick. After (b) (6) was gone, (b) (6) her energy levels seemed to wane even more. I took her to the vet August 15th, 2012 - full blood panel done. Chronic Renal Failure. SHer BUN/Creatinine/Phos were all very high. Because we had not had good luck with (b) (6) fluid treatment, we were more aggressive with (b) (6). She stayed on IV fluids for five days. On Monday Aug 20th, her vet said her levels were back up and that she had done what she could with fluid therapy. We brought her home and she had stopped eating. We tried to administer sub Q fluids, but she continued to decline, refusing to eat, but drinking a lot of water.</p> <p>By Wednesday night, (b) (6), she was disoriented, and didn't seem to know her way around the house. I took her to the (b) (6) in (b) (6). They looked at the work done by her regular vet, said they could run other diagnostic tests and perform their treatments based on those test. However, they cautioned that they might end up at the same conclusion - fluid therapy. She was worse by then, and had started to have small jerks and twitches. By afternoon, she couldn't stand well, and her jerks/twitches were violent enough they would knock her off her feet.</p> <p>We made the trip back to the (b) (6) to have her put to sleep.</p>	11	Years	Terrier - Yorkshire	Dog	10.14	Pound

EON-97490	8/24/2012 10:42	Nature's Variety Prairie Beef Meal and Barley Medley	<p>Approximately 24- 36 hours after opening a new bag of Nature's Variety Prairie Beef Meal & Barley Medley dog food, all 3 of my 3 dogs started vomiting profusely, and continued for about 48 hours around the clock. I noticed a strong odor when I opened the bag. I have bought this and other varieties of Nature's Variety dog foods several times in the past, 2 @ 30 lb bags per month, and none have ever smelled like this. It didn't even occur to me at that point that something could be wrong with the food, so I put it in their bowls for breakfast & dinner, & they ate it as usual. I noticed a small amount of vomit on the floor the next morning, & just made a point to keep my eyes open to find out which one of the 3 dogs was sick. When I returned home from work that evening, there was vomit EVERYWHERE! I sent a message to NV on their website, and they called me back and advised me that there have been no issues reported. I also contacted the store I bought the food from. I saw all three of them get sick around the clock for 2 days. I called off from work for 2 days at a very critical time during a project implementation. My managers were already very critical of my performance, and declined my request for a day off about 8 weeks earlier, even though I was exhausted & extremely stressed. Two days off to stay home with sick dogs didn't go over very well. I took all 3 of them to the vet on my 2nd day off. Since NV told me there were no issues with the food, we could only guess at the cause. Two of the 3 dogs were severely dehydrated and required subcutaneous IV fluids. They were all given anti-nausea medication, and I fed them boiled beef & rice for 3 days & weaned them back on the NV food. I continued to feed them the "bad" food intermittently since I was advised that there was nothing wrong with it. 4 months later when I went to the store to buy more dog food, I saw the recall notice. The food I reported was on the list & I was very upset that I wasn't contacted about the issues with the food, and that they claim the food was not contaminated. It made my dogs too sick for it not to be contaminated. I believe NV handled the situation unscrupulously, and should be sanctioned for not properly responding to reports of issues. I contacted them after I saw the recall notice with all of the detail I provided before, plus the vet bill & emails about the hardship being out of work to care for my sick dogs caused me. I tried to attach the emails but the upload keeps failing. Here's the text of the email chain: "---- On Fri, 8/10/12, Customer Service <sales@naresvariety.com> wrote: From: Customer Service <sales@naresvariety.com> Subject: RE: Nature's Variety: Prairie Beef Kibble Recall To: '(b) (6)'"</p>	3	Years	Mixed (Dog)	Dog	69.1	Pound

EON-97460	8/24/2012 9:42	Western Family Chicken Jerky Treats	On August 19/12, i rushed my mini dachshund to emergency for severe vomiting & diarrhea. He actually had dark blood literally spewing out of his bottom. This started about 1 hr after I had given him chicken jerky treats made by western family, purchased at (b) (6). He was admitted, treated and then diagnosed with pancreatitis and is still recovering. He has been eating the same brand of dog food for almost 10 yrs, (royal Canine) and has never had any problems EVER. The treats were taken back to the store where the manager agreed to send to lab for testing. Now my new puppy, (b) (6), has been admitted to emergency with the same kinds of symptoms & the vet saying it looks as though she might also have pancreatitis. There is no doubt at all that it is these chicken jerky treats have made both of my dogs severely ill. Just last week i filled this out for my (b) (6), now for my baby (b) (6). It baffles me that you people are allowing poison to be sold to our family members. How many pets have to die before you people do something?????	12	Months	Chihuahua	Dog	4	Pound
EON-97452	8/23/2012 21:12	Waggin Train Wholesome Chicken Jerky Tenders	(b) (6) would throw up or have diarrhea every time she ate the treat.	7	Years	Dachshund - Miniature	Dog	8	Pound
EON-97446	8/23/2012 10:33	Special Kitty (Savory Sliced Turkey Dinner in Gravy)	I bought the Special Kitty (Savory Sliced Turkey Dinner in Gravy) brand of canned wet cat food from Walmart. I fed my cat the food. It started meowing and then crying with a horrible screech. Then it violently threw up at least 4 times during the night while in agonizing pain. Expiration Date of Cat Food: 8-1-2014. UPC Code: 605388002778. Cat is ok now but I'm sure this Special Kitty Cat Food is what made her sick. It needs to be recalled.	1	Years	Domestic Shorthair	Cat	8	Pound
EON-97437	8/22/2012 23:06	Dogswell Vitality Chicken Breast with Flaxseed & Vitamins	Both dachshunds were fed approximately 3 strips of the treats each over a period of 3 days, both have become violently ill, one with vomiting and lethargy and the other with diarrhea.	3	Years	Dachshund - Miniature	Dog	13	Pound
EON-97436	8/22/2012 21:48	Canyon Creek Ranch Brand YAMS	Day following being given 1 Canyon Creek Yam treat our dog developed vomiting (3 - 4 times for one day) and diarrhea for 1 week. We immediately began a bland diet until we talked to the vet. We saw our vet 5 days 4 days later and diagnosed as a "sensitivity" to the treat. We began Flagyl (antibiotic) and Imodal (pet imodium). Symptoms seem to have abated now and bowels seem to be working well. I believe we are past our issues at this point.	4	Years	Retriever - Labrador	Dog	104	Pound

EON-97432	8/22/2012 18:12	Waggin'Train Wholesome Chicken Jerky Tenders	<p>(b) (6) started to have very soft stools on 8/15/12 by next day she has full blown diarrhea. We stopped giving her, and her brother (b) (6), any treats and fed only rice and boiled ground beef / chicken breast. Since (b) (6) had diarrhea before at first we were not very concerned. Our vet had previously suggested to give her small dosage of Immodium that would help to control the problem. However, on 8/18, Saturday (b) (6) also started to have soft stools and then diarrhea. We still were thinking they must ate something in the backyard that caused the problem. On Sunday, 8/19 when I talked to (b) (6) he mentioned that (b) (6) is starting to have soft stools, we were very concerned and went to pick up (b) (6) from (b) (6). (Our friend (b) (6) is paraplegic and has a service dog name (b) (6). Since (b) (6) is on a very limited income, we are assisting (b) (6) to take care of (b) (6) for all medical cares) Now we have three dogs that were lethargy, two have full blown diarrhea and mild symptom of vomitting, one had very soft stools. We took sample of the stool to our vet, (b) (6) of (b) (6), on Monday morning, 8/20, and the result was negative for any worms. Our vet then prescribed Fori-Flora Canine Falsh Packet and metrdnidazole 250 mg for all three dogs. As today, 8/22, the diarrhea appeared to have stopped, the stools are still a little soft and the color still a little light but looks healthy enough. Dogs' energy level is coming back. A few more days should be back to normal.</p> <p>Prior to the visit to the vet, we were contemplating what could have happened that would lead to all three dogs being sick the same time, particularly (b) (6) and (b) (6) lives with us while (b) (6) is living with (b) (6). The only item that they have shared is the treat -- Waggin'Train wholesome chicken Jerky tenders. (When (b) (6) and (b) (6) come visit me at work, I will give (b) (6) a few strips of the chickn jerky that came from the same bag as (b) (6) and (b) (6) have at our home).</p> <p>During our visit to the vet, we saw a warning from your office in regards to the chicken jerky. Although we have no solid prove that this IS the cause but everything fits. Also, our vet has told us so far the reported symptoms are mostly related to kidney failures but may be most of the dog owners, such as us, will NOT think vomit and diarrhe were related to this type of treat. We would never have suspected the possibility if not becuase this chicken jerky treat IS the only common tie among three dogs for the past whole month.</p> <p>A final note. (b) (6) and (b) (6) have been having Chicken Jerky as treats for the past 1.5 years. Since the lable indicated as real chicken, no additive, we presumed this is a better alternative than some other product on the market. As we think back, (b) (6) and (b) (6) had had minor problem with soft stools and small throw up, but not at the same time, since we started to give them the chicken jerky as treats. Because it was minor we did not pay much attention to find out what was the cause. We are just very lucky, or unlucky, to have this most recent episod to make us aware of the problem with the Chicken Jerky.</p>	10	Years	Mixed (Dog)	Dog	92	Pound
EON-97415	8/22/2012 14:18	Waggin'Train Chicken Jerky Tenders - 40oz.	Started drinking water excessively...pet said she had started developing kidney problems...she passed away November 2010	13	Years	Puli	Dog	18	Pound

EON-97411	8/22/2012 13:33	Milo's Kitchen Chicken Jerky Treats	My dog was active, healthy until I gave her Milo's Kitchen dog treats. She developed diarrhea so I stopped giving her the treats. I thought they didn't agree with her so I threw the bag out. The diarrhea continued and then she started vomiting and not eating but drinking lots of water. Took to the vet on 8/13/12 for an exam. She was given a shot to bring back her appetite. Took her home and she declined from there. Brought her back to the vet on 8/20/12 where she still is 3 days later. My vet bills have now surpassed \$1,000 and she's still very sick. We may have to put her down if she doesn't improve. She has kidney & liver problems.	6	Years	Terrier (unspecified)	Dog	13	Pound
EON-97404	8/22/2012 11:51	VitaLife chicken tenders	The dog was just fine and we decided to buy these chicken jerky treats as a change. We gave him one a day for about 3 days. The dog started to have diarrhea and vomited/regurgitated a few times. It was very odd. We stopped giving the treats to him after reading about them online. He has been "ok" lately.	23	Months	Mixed (Dog)	Dog	18	Pound
EON-97402	8/21/2012 23:21	Milo's Chicken Jerky	I gave (b) (6) a Milo's Chicken Jerky treat. The next day she had severe Diarrhea and Vomiting. She had this for approx. 2 days. She had been fine prior to this. My thought was it must be the treats. I did not give her anymore and threw them away. I was on facebook last night and someone had posted about the treats. I can't believe that there has NOT been a recall on this. I got online and saw all the complaints regarding these treats. Please recall these treats. (b) (6) is my baby and I am appalled that there has not been anything done about this.	4	Years	Retriever - Labrador	Dog	82	Pound

EON-97364	8/21/2012 1:33	Kingdom Pets All Natural Ingredients Chicken Jerky	I have taken my dog as usual everyday at the park (b) (6) was a very energetic, fun, young, very healthy and all of a sudden he collapsed on the grass. I took him home right away to take him to his bed. After a while he started throwing up. Soon he started to have trouble breathing and was shaking very hard. So I took him to the emergency vet. He couldn't even walk by himself. I held on to him carrying to rush in as fast as I can. The vet tech's started the procedure and trying to put a I.V. shot but couldn't find a vein after 30 minutes. (b) (6) temperature dropped immediately. Lower than its supposed to be for a normal temperature. The Veterinarian ran test on (b) (6) that most likely he ate something poison, he got kidney and liver failure. After 3 hours of being in the emergency, the Veterinarian told us he was not going to make it. (b) (6)'s state was too critical that he was having seizures. I walked in the room with my family seeing him barely breathing his last bits of air. After saying good bye to him on the table, petting his head that its going to be okay, (b) (6) passed away.	2	Years	Schnauzer - Miniature	Dog	35	Pound
EON-97356	8/20/2012 17:21	Waggin' Train Wholesome chicken Jerky Treats	My greyhounds have been on Waggin' Trail Jerky (chicken) Tenders, for a treat, for about 6 months. In this time I noticed them start refusing their regular dog food. Then came n/v/d and very dark urine. They became very dehydrated and weak ! I thought our 12 yo Greyhound, (b) (6), was going to die !! (b) (6), a 6 yo greyhound, was also seriously ill ! After fluids and IV's and nutritious small meals they are recovering, but still crave these, in my opinion, poisonous ?treats? !! Please help dogs, who do not have a VOICE, and have these ?treats? pulled from store shelves.	12	Years	Greyhound	Dog	70	Pound

EON-97329	8/20/2012 13:57	Waggon Train	My greyhound eats a slice of chicken Jerky 2 X a day. We noticed that he started drinking and urinating an unusal amount. At first we took him to the vet and thought maybe diabetes. He was tested and does not have that. We have since taken him off the jerky. We had our vet test him and he does not appear to have kidney problems. He seems to have gotten better and does not drink or urinate as much.	11	Years	Greyhound - Italian	Dog	23	Pound
EON-97320	8/20/2012 10:57	Waggin' Train Wholesome Chicken Jerky Tenders	Our dog has had four bouts of mucous stool, bloody sometimes, which I am concerned my be tied to this product. Have taken to the vet twice. They prescribed antibiotics, but culture of the stool was negative for bacteria. Most recent was 8/13. Did NOT take to vet this time. We have tried to pay attention to what proceeds the illness. It always seems to follow a period where we have given him jerky treats. We give him one treat, torn into smaller pieces to entice him into his crate. He does not like the crate. He does not get sick each time he is crated, and I've noticed a connection with this treat as opposed to others. The date in the box below is for the most recent incident. Did not go to the vet for this. I am having difficulty with this form. I saved to look for receipt, because I remember I bought it at same time as something else. The form is no longer showing me that part of the entry. I am positive I bought this on June 18th at KMart in (b) (6). I will save the product in case you want it for testing.	22	Months	Terrier (unspecified)	Dog	24	Pound
EON-97309	8/19/2012 22:12	Taste of the Wild Wetlands Canine Formula with roasted fowl	Taste of the Wild Canine Wetlands Formula, 5 pound bag of dry dog food with exp of 6/27/13 has off odor, smells sour. This is the second bag of this product with this exp. date that has had the bad smell. The other bag was a larger size, I returned it to the store, the owners said it was the 2nd bag she'd taken back at that time. This occurred several weeks ago. I did not report the problem then. I unwittingly bought a small bag 2 days ago without checking dates.						
EON-97306	8/19/2012 6:51	Waggin Tail Chicken Jerky treats	I gave 2 peices of waggin tail chicken jerky and he threw up all day and night. I didn't give him any more and the vomiting stopped, i took product and returned it. I lost a dog in the dogfood mess a few years ago. So I am very sensitive to foods that make pets sick.	4	Months	Retriever (unspecified)	Dog	17	Pound
EON-97304	8/18/2012 13:36	Canyon Creek Ranch Chicken Tenders	Norwegian Elkhound purebred dog was a normal healthy pet, weight was 45- 50 pounds, ate well, slept well with no issues. Within a period of 2- 3 weeks he began regurgitating food, had diahrea and went from 45 - 50 pounds to 35-38 pounds very quickly. Dog was diagnosed with severe, acute kidney failure and had to be put to sleep on (b) (6). Three days later I was told of an investigation on several treats which included the ONLY treat I had fed my dog: Canyon Creek Ranch jerky treats purchased at PetSmart in (b) (6). No other changes in diet or circumstances were observed or instituted.	6	Years	Elkhound - Norwegian Grey	Dog	45	Pound
EON-97302	8/18/2012 9:36	Kingdom Pets Chicken Jerky	Previously very energetic and food motivated dog became first tired and then lost appetite. This period took about four weeks from the time that we had changed the dogs treats to Kingdom Pets Chicken Jerky. Then we noticed diarrhea and even more tiredness. Then came violent vomiting and the dog stopped eating altogether. At this point the dog stopped getting chicken jerky. This period of extreme weakness and vomiting took two weeks. Dog lost 30 pounds of weight. Now the dog is a little better and has started to eat but still urinates and drinks more than usually.	5	Years	Hovawart	Dog	55	Pound

EON-97299	8/17/2012 21:06	Waggin Train PBJ Biscuits peanut butter flavored biscuits wrapped in chicken jerky.	(b) (6) started vomiting, then had diarrhea which turned to blood. She had a fever, was lethargic, wouldn't eat anything or drink anything and constantly shivering. It started quickly, was brought to the Vet, given meds to calm her vomiting. Next day was brought back in, had IV given, x-rays, stayed overnight. She's still there today, she was brought back in this morning. She has anemia per blood work. She's never had a reaction such as this ever. We' praying and hoping she'll recover.	4	Years	Beagle	Dog	19	Pound
EON-97295	8/17/2012 16:51	Pedigree Meaty Ground Dinner with Chunky chicken, Pedigree Choice cuts in gravy with chicken and rice	I'm concerned that Pedigree is manufacturing canned dog food with onion powder in it. I know onion is very toxic for dogs. In the last few months my (b) (6)'s skin has become very itchy and red. I started looking at ingredients of food and snacks I give him. That's when I noticed the canned Pedigree Chunky chicken has onion powder(and Bay leaves) in it. I also have the Pedigree canned Choice cuts in gravy with chicken and rice which has onion powder(and Bay leaves). I usually buy the regular Pedigree canned Chopped chicken but it was no available. I believe there is onion powder in it also--since it is my regular canned dog food. My (b) (6) eats a 22oz can everyday so that is a lot of onion powder. Since the problem is with a questionable ingredient I have not provided any specific details. Any dog food I have pruchased since may has had 2013 and 2014 expiry. Not sure if this is a lot number: 226BKKCE 0000MG.						
EON-97244	8/16/2012 21:45	Blue Buffalo Wilderness Small Breed	I have been feeding my 4 year old female puggle the Blue Buffalo Small Breed Wilderness blend for about a year. She has always loved it and begged for it when it was time to eat. With the last bag I bought in late July 2012, she started refusing the food. This is unusual since she is very food motivated. I thought that it may just be a bad bag and decided to buy a new bag to try. The same thing happened - she is refusing to eat the food. I've also noticed that she has become more lethargic over the last couple of weeks. I've offered her different brands of food now and she has scarfed all of those up, which leads me to believe that something has happened with the Blue Buffalo food. When going online, consumer complaints started showing up in July 2012 with the same issue - dogs that previously liked Blue Buffalo are now suddenly refusing the food. Many of these dogs also show symptoms of lethargy and some have become very ill. I have contacted the manufacturer about this issue, but have not gotten a response. I would like the FDA to be aware that this appears to be a common problem and I hope it will lead to an investigation before more our our pets fall ill. Thank you.	4	Years	Mixed (Dog)	Dog	30	Pound
EON-97121	8/16/2012 14:36	Weruva presents Cats in the Kitchen Love me tender chicken and duck in gravy recipe	7/20/12 Patient presented for vomiting, anorexia, and lethargy. Owner reports pet is drinking normally and has not eaten in 2 days.. Normal urinations. No other reported problems. Current diet-weruva- Cats in the kitchen. This was a new diet for the cat. Bloodwork revealed acute pancreatitis. Patient hospitalized and treated, appeared to respond to treatment initially, but has gradually developed renal failure since the presentation.	11	Years	Domestic Longhair	Cat	10.5	Pound
EON-97118	8/16/2012 14:12	Waggin' Train Wholesome Chicken Jerky Tenders	On August 14th, 2012, I fed my dog (b) (6) two chicken jerky treats, as stated as the recommended daily feeding amount on the back of the package [Waggin' Train]. Later that night, I found that her stool was runny, like diarrhea, and contained blood. The next two, to three stools were also bloody diarrhea. I thought of the last thing that she ate, and remembered that I had given her the chicken jerky treats. She had never before had this problem prior to eating the treats. I immediately threw away the package of treats. I am continuing to monitor her. She does not appear to be lethargic or in any other way affected, but I am continuing to keep an eye on her for fear that her condition may worsen. Hopefully her bloody stools go back to normal soon.	2	Years	Chow Chow	Dog		

EON-97108	8/16/2012 11:15	WAGIN TRAIN JERKI TENDERS	LIMP; LISTLESS; DEHYDRATED; DOES NOT WANT TO EAT OR DRINK;NO ENERGY;PAIN CAUSED BY LIGHT TOUCHING.	10	Years	Hound - Italian	Dog	21	Pound
EON-97097	8/16/2012 10:21	Wellness Grain Free CORE Chicken Turkey & Chicken Liver Formula	This is the third time that I have found a foreign object in my pet food (I have a photo). I have recently gotten into the habit of emptying the entire can of pet food into a bowl so that I can stir it around and look for foreign pieces that should not be in it. This time I found a tiny (about the size of the head of a pin) piece of black rubber in the food. I examined the rest of the food and served it to my cats. I am in the process of finding a suitable replace brand of pet food. I have 3 cases (24 cans) of the pet food on hand that I don't want to throw away.						
EON-97089	8/16/2012 8:00	Waggin Train DUCK Jerky	I started giving (b) (6) and (b) (6) Waggin Train DUCK Jerky treats (not chicken because of their allergies). They consumed these treats daily - for about a year. I started giving them this new treat in 2010 when (b) (6) was approx 10 and (b) (6) was approx 9. Then, my sister-in-law sent me a link about the treats from China last year in Sept or Oct 2011 - stating it could cause kidney failure. I had noticed both dogs had started to consume a lot more water. I stopped giving them the treats. Early spring I began to notice (b) (6) was staggering on her back legs - seemed unsteady. I noticed her urine was very clear compared to (b) (6) Then in July, (2012) she went off her food. She was throwing up. I took her to the vet July 18th - blood work indicated Chronic Renal Failure (CRF) and she had lost a pound since February. She was already a small dog (smaller than (b) (6)). She weighed 6.0 lbs approx and her normal weight was 7.0 to 7.5. Subcutaneous fluids were administered for six days - blood work indicated her levels were still going up, her eating was sporadic at best. IV fluids for two days - levels still climbing, ate a little, not much. Vet indicated end stage renal failure. I administered subcutaneous fluids at home for two days (July 31-Aug 1 2012) On (b) (6) her breathing became labored, she couldn't stand. We had to put her to sleep. 2nd dog (to date) (b) (6) had become more lethargic during (b) (6)'s illness. I thought she was sensing her companion was sick. After (b) (6) was gone, her energy levels seemed to wane even more. I took her to the vet yesterday, August 15th, 2012 - full blood panel done. Chronic Renal Failure - less than a month after (b) (6)'s diagnosis!! She is currently at the vet on an IV. Her BUN/Creatinine/Phos were all very high. Her prognosis may be a tad better for at least some time left as she is still eating. (b) (6) wasn't eating much when we took her to the vet...	12	Years	Terrier - Yorkshire	Dog	6	Pound
EON-97086	8/15/2012 20:36	Kingdom Pets Chicken Jerky	dog given chicken jerky treats for occasional snacks for last 2 weeks. Dog began vomiting, diarrhea with blood. Symptoms continued for 4 days, took dog to vet for treatment. Dog in excellent health, does not associate with other dogs and lives in house and backyard and did not encounter anything that would have caused symptoms. Vet believes Kingdom Pets Chicken Jerky treats were the culprit. Dog receiving medication and appears to be doing better at this point.	2	Years	Retriever - Labrador	Dog	85	Pound
EON-97078	8/15/2012 13:18	bulk load lambs meal	My husband drive a truck and while picking up a load of lambs meal we noticed that it had pieces of metal in it. when we asked about it, they said it was surpouse to be in there and that the magnets would get most of it out. This product was delivered to (b) (6) in (b) (6).						

EON-97070	8/15/2012 10:00	Beefeaters Sweet potato Dog Treats	(b) (6) was given "Beefeater Sweet Potato Treats" and absolutely loved them. We bought them in June. In late June, he started to be a little less energetic but nothing severe so we thought he was just starting to get older. By early July, he was vomiting and having trouble walking. He was diagnosed with full blown kidney disease. (In Decemeber he had blood work done and his kidney function was perfect). Buddy also tested positive for Lyme Disease. Two vets said that although kidney disease can be related to Lyme, the onset is more gradual. On (b) (6), (b) (6) was euthanized.	6	Years	Retriever - Labrador	Dog	55	Pound

EON-97011	8/13/2012 18:42	Waggin Trail Ham It Up Delicious Ham Slices	On August 9, 2012, I gave (b) (6) one piece of Waggin Trail Ham It Up. On August 10, 2012, I noticed that he had not eaten his breakfast and he was very still and legathic. Again he did not touch a bite of his dinner food. This is a dog that is filled with energy and loves to eat. That night, on the internet, I found a site where a lady had warned everyone not to use the product, that it could make the dogs sick or even death. I immedately discontinued the Waggin Trail Ham It Up treats.	20	Months	Chinese Crested Dog & Powder Puff with veil coat	Dog	12	Pound
EON-97010	8/13/2012 17:36	Canyon Creek Ranch Natural Duck Tenders, Waggon Train LLC. Jerky Tenders Duck	She has been getting 1 to 2 pieces of originally chicken jerky and now duck jerky (Canyon Creek Ranch brand and Waggon Train) for at least 2 years. (She is diabetic, but she was diagnosed with this well after she had been eating these treats.) The last three days I have been noticing mainly towards the evening hours loose stools with blood, to the point that I have had to wipe her bottom. I was going to be calling the vet to make an appointment when I noticed posted on their Facebook page a notice about jerky products made in China and adverse reactions that have been occurring. I thought it best I submit a report.	12	Years	Terrier - Yorkshire	Dog	7	Pound

EON-97004	8/13/2012 16:36	Waggin Train Wholesome Chicken Jerky Tenders	Gave single Waggin Train Wholesome Chicken Jerky Tenders treat in the evening. The next morning, (b) (6) did not want to eat or drink or barely move. We immediately took her to the vet where they began immediate IV and told us she was deathly sick and in a lot of abdominal pain. If she did not eat or still had severe pain, the vet assumed she had ingested something. She had fluid in the stomach on x-ray and no gas which is unusual and usually indicates some sort of blockage. The next morning since she was not better, they did surgery, but could not find anything. Thankfully, (b) (6) has recovered (she has staples on her little belly from top to bottom). The vet has concluded in his medical opinion that it was absolutely the treat she was given the night before that made her deathly sick. If we had not taken her to the vet that morning, the vet feels she would have died.	5	Minute s	Rottweiler	Dog	33	Pound

EON-96995	8/13/2012 15:27	Waggin Train - Wholesome Big Blast Pork Skins with Chicken Liver	I opened a sealed package of pork skin dog treats filled with Chicken liver, and was about to hand them to my Dogs, when 2 - 3inch long, by 1 inch wide cockroaches fell out of the center of two of the treats. I threw a plate on one of them, and it was smushed beyond saving, but I did manage to spray the other one to save it. It landed on my foot, I have not been able to eat, drink, or sleep since this incident, and I am extremely unsettled by this company. It does come from China, but the main office is in the states. What condition is that plant in to have bugs like THAT? I want that product OFF the shelves and inspected. When you research this company, Waggin Train, they are related to over 100K complaints online, and in forums about their products and causing dog deaths. I am willing to send you what I have, and work with you in anyway that I can. Please let me know how I can help. I will be contacting the Health Department, WalMart, and will try to find an attorney again before I contact the company. Unless you tell me otherwise. I spoke to one attorney, and they told me that they see Dogs as "property"... and not living things, so they were not able to help with consumer law. I will be contacting the ASPCA, HS, and the Any animal rights advocate that I can get a hold of. Please let me know what all you need from me. Thank you!	5	Years	Retriever - Labrador	Dog	120	Pound
EON-96994	8/13/2012 14:00	purina alpo come n get it cookout classic	6 yr old (b) (6) threw up with 1 hr of ingesting food. 12 yr old (b) (6) had same symptoms. 12 yr old (b) (6) passed away following day. all dogs refused food after initial feeding.	6	Years	Retriever (unspecified)	Dog	80	Pound
EON-96945	8/13/2012 8:42	Beneful Healthy Radience	(b) (6) was a very active, athletic dog. I have always feed him Beneful, but this was the 1st time I purchased the larger bag and the first time I purchased from Walmart. After eating the food for several days, (b) (6) refused to eat the dry food and he experienced bloody diarrhea, vomitting. He lost so much weight in one week I could see his bones and spine. I was hoping he would improve but after several days he did not & I took him to the vet. (b) (6) had unusually high white blood cell count and high liver enxymes. He was put on an IV overnight and initially show improvement, but still refused to eat. He returned to the vet for another IV but did not improve. This healthy, active dog just basically dropped dead within 8 days of digesting this food. He was wasting away so I did the humane thing and had him put to sleep. I found a website: consumeraffairs.com/pets/beneful where 113 complaints have been made on this product and all these dogs had the same syptoms. There is obviously a problem with this pet food and it needs to be addressed.	7	Years	Boxer (German Boxer)	Dog	70	Pound

EON-96943	8/12/2012 16:42	Healty Hide triple-flavor chews	Owner purchaed Healty Hide triple-flavor chews (pork, beef and chicken) from Costco Wholestore in (b) (6) about a month ago. (b) (6), started having syptoms but owner didn't know what it was caused from. She had no appetite, not normal energy. Se would eat little if owner gave her a new flavor of food. Owner took (b) (6) to vet on August 7 because she stopped eating completely. We noticed a swelling in (b) (6) neck and vet was going to do surgery to see what was going on. Upon doing the pre-op blood work vet found something goinq on with kidney. She immediately started (b) (6) on antibiotics but she was not responding. (b) (6) kidney numbers were extremely high and vet thought she must have gotten into something toxic. Owner was do a search on internet on kidney failure for dogs and saw the recall information on chicken jerky. At that time owner realized that the treats purchased three weeks prior had this chicken jerky in it made from China. Vet confirmed that this was what was causing (b) (6)'s symptoms (b) (6) is currently at home on fluid IV's twice a day by owner and being hand fed by owner so she will eat something. Owner and vet still don't know at this point if (b) (6) will pull through or if she will have to be put to sleep. Tests will be run end of week of August 13	7	Years	Chihuahua	Dog	14	Pound
EON-96942	8/12/2012 13:36	Biotene Veterinarian Bio-active Enzyme Therapy Therapeutic Mouthwash with Plaque Removing Enzymes	A recent recall on a pet treat containing propylene glycol brought to my attention that the Biotene Therapeutic Mouthwash sold to me by my veterinarian for my cat contained propylene glycol. Further investigation informed me that the FDA prohibited this substance for use with cats way back in 1996 and that it could lead to a disease called Heinz Body anemia. My cat had been on the product for about 48 days when I discovered this. I contacted my veterinarian. The vet clinic contacted the manufacturer who claimed "we have not had any reports of cats becoming ill etc." They also stated that they knew about a "recent" article stating there was a problem with the ingredient for cats and that they would be removing the substance in future production. 1996 is certainly not recent and since they claim this product has been in production for 13 years, they should certainly know that this product should NEVER be ingested by cats due to long standing studies and prohibition by the FDA for use in cats. This product should be recalled as there is no telling how many cats are currently being treated with this product on an ongoing basis. I am still awaiting further news from my veterinarian who has been waiting for further contact from the manufacturer PKB Inc.						
EON-96941	8/12/2012 13:27	Waggin Train Jerky Tenders	He developed liver desease that the Vet said was most likely a result of the Chicken Jerky Treats. He had 2 sonar scans, on pain meds, antibiotics, and probotics. Food was given by syrenge. He did drink water. His state of health was so poor that we all expected him to die. We cared for him, gave him love and nourishment and he started to improve. He is still not 100% but is much better.	10	Years	Shih Tzu	Dog	22	Pound

EON-96927	8/10/2012 18:06	Dentley's rawhide sticks wrapped in chicken jerky, Mini Dingo Meat in the Middle! Grill House Bac'n Crisps, Canyon Creek Ranch PBJ peanut butter and chicken jerky	Presented 3/13/12 with 3 day history of vomiting, lethargy and inappetance. Labwork revealed proteinuria and glucosuria, normal BG of 130 and USG of 1.059. On consultation with internist, was asked to question owner about jerky chicken treats from China which the owner had been feeding on a daily basis for months. Patient improved for a few days on supportive care (anti-emetic, antibiotics, fluids, bland diet) then rechecked for recurrence of inappetance and development of PU/PD. She was referred to a specialty hospital where a recheck UA revealed a USG of 1.013, ketonuria, glucosuria, and proteinuria, UPC was 2.4, abdominal ultrasound was unremarkable, and blood pH was 7.2. Patient was diagnosed with proximal renal tubular acidosis following ingestion of jerky treats and hospitalized for two nights for supportive care. Discharged on Cerenia, mirtazapine and potassium supplementation. Recheck a few days later revealed continued isosthenuria and glucosuria. Clinically she was doing better and we discontinued Cerenia and mirtazapine and instituted subcutaneous fluids for the owners to do at home. Recheck a week later revealed the patient to be doing well at home, owners had discontinued all treatments other than bland diet. Bloodwork was unremarkable. UA revealed a USG of 1.048, continued glucosuria and the remainder unremarkable. Urine culture was negative.	1.5	Years	Chihuahua	Dog	5.1	Pound
EON-96924	8/10/2012 17:12	Waggin Train Wholesome Chicken Jerky Treats	(b) (6) a 6 year old English Bulldog became sick November 2011 and took her to (b) (6) (b) (6) with what vet said was kidney failure and possible pancreatitis. She was admitted to the hospital for 3 days and then also developed seizures during her hospitalization. She was treated and came home. She never seemed herself after that hospitalization, very listless, decreased appetite and some nausea and vomiting at intervals, but became very ill again in January 2012 with again renal failure and seizures. She stayed in the (b) (6) hospital for 3 days again and was sent home where we gave her intravenous fluids to help her kidneys. She never recovered and we had to have her put to sleep after being home 2 days as she got much worse. I then read about the Waggin Train Chicken Jerky treat concerns after she had already died. Sure enough, I checked my cupboard and there they were. I bought them at I believe Giant Eagle or Walmart and she went through 1 and 1/2 bags between Oct 2011 and January when she died. I still have part of the second bag.	6	Years	Bulldog	Dog	49	Pound

EON-96695	8/7/2012 22:30	Waggin Trail Chicken Jerky	Given Waggin Trail Chicken Jerky "treats" has had diarrhea, vomiting and lethargy. Will be having kidney and liver blood panels tomorrow morning. This is a HEALTHY, wonderful rescue baby. She normally has carrots, apples and ONE "Begg'n Strip" treat a day. These jerky "treats" were bought as a SPECIAL treat, because of (b) (6) love for her Daddy's beef jerky. Thinking this was a product I could TRUST, since it was bought from the shelf last week, and I checked expiration date, etc. as always, to keep my pet safe; my question is WHY? WHY was I able to buy POISON for my precious animal, off of a store shelf, in AMERICA? Exactly what IS the role of the FDA, if not to protect us? Why is the COMPANY the only one authorized to pull their product from the shelf, when they are KNOWINGLY KILLING PETS? Why exactly do we have an FDA? This is an outrage that this has happened in the USA.	1		Spaniel - Springer (unspecified)	Dog	33	
EON-96692	8/7/2012 20:42	Canyon Creek Ranch Brand Natural Duck Tenders	On Mother's Day evening we took our dog to the emergency vet because he was very ill. Our regular veterinarian later concluded that our dog had ingested some type of poison due to liver enzyme levels, but we could not determine where the poison came from. It was during this time that I had purchased Canyon Creek Ranch Natural Duck Tenders from our local Petsmart and giving them to my beloved dog. After a few weeks, (b) (6) seemed to improve but never back to his frisky self. A few weeks ago I repurchased the treats and began giving them to him again. Yesterday I rushed him to the vet because he was so lethargic, would not eat or drink and had diarrhea for 4-5 days. They gave him a physical exam and could not determine what would cause his symptoms, but concluded he was dehydrated and pale. Because of our climate in (b) (6) we thought he was affected by the heat since he goes outside a lot. He came home and 24 hours later does not look any better than he did before. I am VERY convinced that the Canyon Creek dog treats has caused him to be so sick. I strenuously suggest that this matter be looked into.	9	Years	Retriever - Labrador	Dog	80	Pound
EON-96538	8/6/2012 8:42	Waggin Train Chicken Jerky Treat	Blood work was done for neutering. Liver enzymes elevated to a dangerous level. Pet also suffering diarrhea, extreme thirst, moodiness, timidity. Took animal to specialist in (b) (6). Vet said not to feed anything from China. Discovered treat I was feeding pets was "Waggin Train Chicken Jerky treats" made in China. Stopped treats. Three weeks later blood level returned to near normal levels. Bowel movements returned to normal.	8	Months	Maltese	Dog	8	Pound

EON-96536	8/6/2012 2:12	Iams Lamb and Rice Formula	<p>After using the most current bag of dog food, our dog started itching severely, scratching her chest and armpits until they bled and chewing on her legs and feet. We have been taking away everything trying to figure out what she was allergic to. Today after eating a full meal of the dog food, she broke out in hives all over her body. We have since taken up the dog food and will no longer feed her Iams. Tonight, after 2 rounds of Benadryl, she is mostly clear of the hives.</p>	2	Years	Unknown	Dog	38	Pound
EON-96534	8/5/2012 11:12	Nature's Recipe Training Treats made exclusively for PetSmart lot #L509370.1	<p>On 7/16, (b) (6) (daughter, dog owner) returned from a funeral in (b) (6). The dog food had run out so she fed her dog a handful of chicken treats. By the next day, (b) (6) had begun urinating more frequently. This continued all week. I had the dog 7/18-9 (W and Th) when (b) (6) was at work. It was strange and disturbing to see the dog that thirsty and urinating so often. (b) (6) hadn't been completely house trained yet, but this was a serious regression. My wife and I began to wonder what happened, e.g. is he sick, was he mistreated for the 4 days of the funeral, etc. We also had the dog 7/21-22 (Sat, S) so (b) (6) could go to a wedding.</p> <p>On the 22nd (S), (b) (6) seems to get better, thirst and urination were receding. He was OK until the 24th (T) when (b) (6) returned home from work and fed him another handful of the treats. She estimates that he urinated 13x in the next 3 hours that evening.</p> <p>My wife took the dog to the Vet the next day and tests were done on the 25 and 26th. Diabetes was mostly ruled out, most indicators were OK, but phosphorus was high. He put (b) (6) on a kidney problem canned dog food and Baytril. My wife and I had (b) (6) again from the 7/29-31 (S, M, T) and there was constant thirst and urinating. When we tried to restrict his water intake, he would lap up his own urine if we didn't get to it first. A few times, he just urinated in place without standing up. On Sunday 7/29, we watched him in the yard from 1-7. He drank 120 ounces of water and urinated 47 times!</p> <p>He was taken to the Vet again on 7/30 (M) and more tests were run. The Vet advised us that at some point, testing for tumors, Cushings disease, and other causes of kidney failure could become expensive. The problems continued through the week, and on Thursday I stumbled onto a website that mentioned the FDA warning about chicken treats from China. Unfortunately, there is no identified agent or treatment. He saw the Vet again on 8/3, but our Vet is still puzzled.</p> <p style="text-align: center;">phosphorus high white blood count slightly low albumin low glucose slightly high lyme disease negative</p> <p>The problem remains. It is now 6 days, 2 days better, and 12 more days of extreme urination and thirst.</p>	4	Months	Boxer (German Boxer)	Dog	24	Pound

EON-96533	8/5/2012 10:36	Purina Cat Chow Complete Formula	At first, food consumption gradually decreased for the 3 cats we have. However, (b) (6) suddenly became very thin, had dingy fur, and was very lethargic. We noticed he had no problem eating treats and was also very ravenous for a can of canned cat food (normally don't feed canned food, but were trying to get hom to eat). At this poin, we suspected the dry cat food could be a problem (8/4/12), so we bought a new bag (another brand) of cat food. All 3 cats began eating imediately	8	Years	Maine Coon	Cat	14	Pound
EON-96532	8/5/2012 6:15	Waggin Train Jerky Tenders	I would give (b) (6) Waggin' Trains Chicken Jerky Strips as treats. At first there was no problem and she really enjoyed them! Eventually, I started noticing loose stools and she would poop IN the house...I was not aware at that time of what was causing her problem. Eventually, she began vomiting. I was then able to determine what it was that was causing the problem, since one particular night I had to pick up the vomit five different times all over the house off the floor...I immediately stopped feeding her the chicken treats. Her health went back to normal. Normal stools and no more vomiting. I just went to Walmart tonight to pick up some milk bone treats for (b) (6). I just cannot get over all the chicken treats for dogs. These treats are SOOOO dangerous for our pets. Our pets are getting seriously ill and dieing from these treats. These treats need to be pulled off the shelves. They are poisoning our pets. (b) (6) I love her like my child. If she would of died from my ignorance for feeding her the poison... There are others like me that weren't so lucky. They have lost their beloved pets...Please, intervene and save these animals lives. We only want to make our pets happy when we give them treats...They don't deserve a death sentence from a treat! And my (b) (6) would vomit from just being fed ONE treat. She would not have eat a lot of them BEFORE she got sick. So, no, it is not from not following the directions of feeding on the package. These treats are truly dangerous to a dogs health...	2	Months	Terrier - Yorkshire	Dog	9	Pound
EON-96531	8/4/2012 22:51	Waggin Train Chicken jerkey	My dog is a Pomeranian but you don't list that type. I have been feeding him Waggin Train chicken jerky bits as a treat. He has been throwing up and has had high liver numbers. Has spent \$1000's of vet bills. Never thought it was from the treats. Since I have taken him off this treat brand - 2 weeks ago - he is feeling and acting 75% better. I hate it when he is sick! Oh sad is it that I had to continue taking him to the Vets and not finding out why he was sick. If he had died from Waggin Train and the Government knew about China - I would have hated my Government!!! Thank God there are people willing to stick their necks out to tell other fellow Americans, since our very own Government won't protect us or our pets.	8	Years	Other Canine/dog	Dog	11	Pound
EON-96530	8/4/2012 12:00	Waggin Train Ham it up Delicious Ham Slices	We gave the dogs a treat on Sat morning. I gave the smallest dog just a nickle sized portion the other 2 a whole piece. (b) (6) is the middle dog . The other is a Black and tan Coon Hound who weighs about 75 pounds he was not noticeably sick but (b) (6) went into the living room and got sick 2 times with quite large areas it was yellowish liquid with jerky treats in it. He then threw up on the bed. He has a very good appetite and has not touched his food. I do not know if this is from the treats but heard about warnings on the news. My treats were Waggin Train Ham it up lot #1ca6032a exp. 9/26/13.	1	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	50	Pound

EON-96529	8/4/2012 1:06	Canyon creek ranch YAM GOOD duck and yam treats	I fed my dogs Canyon Creek Ranch YAM GOOD duck and yam jerky treats on (b) (6). I gave each dog one treat and went to work. When I returned home there were over 20 vomits all over the house. I immediately threw out the treats knowing that was the ONLY NEW FOOD I HAD INTRODUCED. (b) (6) grew lethargic and sicker. We put her in the vets for a few days where she was observed and xrayed. They found no obstructions. We fed her rice and chicken but her appetite was minimal. Two weeks later she was eating nothing and drinking nothing and vomiting blood. Her lab tests came back with massive kidney failure. Having only one kidney we had to make the decision to put her down. She was a vital member of our family. This is a crime that a food source we trusted can KILL!	12		Terrier - Australian	Dog	18	
EON-96516	8/3/2012 17:06	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dogs Treats	I purchased Waggin Train Chicken Jerky Tenders, chicken dog treats, at my local Walmart. I fed my dog 1/2 of a jerky on 5 out of 7 days. After 2 consecutive days of eating the treats, he began vomiting each day. After a week my husband and I discussed the vomiting, we determined that these treats were the only thing that had changed in his diet or life. I discontinued feeding the treats to the dog and the vomiting stopped. We also noticed that during the period he was having the treats he often looked as if he were in a daze (a distant stare). This strange behavior also stopped when we discontinued the jerky treats.	4	Years	Crossbred Canine/dog	Dog	15.8	Pound
EON-96502	8/3/2012 15:30	Waggin Train Chick Jerky Treats	Waggin Train chick treats had just come out and (b) (6) loved his jerky treats. I gave him two or three a day. The day after (b) (6) I came home and took him for a walk as usual. We were in the park and I noticed that his pee was very dark. Upon looking closer I saw blood. I brought him home and called the vet. We brought him in the next morning. I received a call that they had given him blood, and he seems to be doing better, but he needed to go to a specialist vet. I took him to the specialist. they kept him overnight. We went to see him the next day. The vet said he hadn't really improved and that with aggressive treatment he had a 20% chance of surviving the week. My husband and I both loved (b) (6) very dearly, and did not want him to suffer, so we chose to put him down.	9.5	Years	Unknown	Dog	21	Pound

He collapsed on his side and defecated. I called him to me and once again he fell onto his side. When I picked him up, he couldn't hold his head up and started to lose consciousness. After that he began vomiting.	3	Years	Mixed (Dog)	Dog	10	Pound
EON-96279	8/2/2012 14:36	Milo's Kitchen Chicken Jerky treats	I have been giving (b) (6) Milo's Chicken Jerky Treats for the past few months, thinking they were healthy, not realizing they were Chinese made. Since giving her these treats, her BMU and Creatine has increase substantially and she has lost seven pounds in the last five weeks. From five weeks ago when it was last checked, her numbers dupbled and she is now in end stage renal failure. We currently have her in the hospital receiving IV fluids to see if this will pull her through.	9	Years	Boxer (German Boxer)	Dog	63	Pound

EON-96265	8/2/2012 13:36	Waggin Train Cowboy steaks	I gave my dog waggin train chicken treats while on a trip to L.A. her health began to decline. Lethargy, loss of appetite, looked depressed, etc. soon dizziness, diarrhea and vomiting-(over all health decline) I feed my dog as usual and then gave her the waggin train chicken treats again when I took them out of my suitcase. Dog began rapid health decline and required immediate emergency hospitalization for days to flush her system, toxins were building up in her body because she was in renal failure and kidneys were shutting down.	17	Years	Mixed (Dog)	Dog	14	Pound
EON-96160	8/2/2012 1:15	waggin train dog biscuits wrapped with chicken	Took to vet and had normal blood tests run and found out there was a liver problem. Vet asked if he was taking any medication or if he had any kind of dog treats. He was not at the time on any kind of medication. Told him that he had Waggin Train dog treats. He let me know then that those were on a recall for liver and other problems. He is saying the treats have caused his liver problem. This was found on 8/1/12.	9	Years	Terrier - Jack Russell	Dog	12	Pound
EON-96134	8/1/2012 20:21	Purina Beneful Healthy Radiance	I bought a bag of Beneful Healthy Radiance because they did not have our regular dog food. The dog food was given to my dog on 07/19/2012. I came home on (b) (6) to find that the dog had bright yellow diarrhea. I watched her for a few days but she seemed to be fine except for the occasional diarrhea. On the morning of the (b) (6) she acted really different. She seemed to be stumbling around and still had the diarrhea and she also had pale gums and tongue. I took her to the vet immediately that day. She was given an IV and told us to force water into her that evening and call him in the morning. The evening of the (b) (6) she started to stumble around majorly and sometimes acted as if her legs were paralyzed. She also began to vomit. The morning of the (b) (6) I took her to the vet as soon as he opened. He quickly took over and said it did not look good. At this point her skin and whites of her eyes were yellow. I checked on her through out the day but there was no change. He kept her overnight. I called the morning of the (b) (6) to check on her and was informed she was dead. I have done tons of research and I am not the only case that this has happened to most recently. After talking to the vet about the Beneful he was convinced it was the dog food. The dog food ingredients are causing dogs to get pancreatitis and in some cases die. The vet tested my dog and confirmed that she had pancreatitis due to Beneful. There are so many more cases. Please look at http://www.consumeraffairs.com/pets/beneful.html . It is happening over and over again.	4	Years	Schnauzer - Miniature	Dog	15	Pound
EON-96133	8/1/2012 19:12	Milos Kitchen home-style dog treats	(b) (6) started to develop a lot of gas and she looked depressed and uncomfortable. Her excrement got liquidy and very dark and she could not contain it, she also presented episodes of vomit and got very weak to the point that she could hardly walk. I never associated any of this symptoms to the consumption of the chicken jerk since she would only get one every day if so and I kept buying the product for months, all the time I thought everything was related to her age. I stopped giving her the chicken jerk when I watch the report on channel 7 news about it, incredibly my dog has recover a lot since she is not eating this product (Milos Kitchen Chicken Jerk). So sad that by trying to show my dog love I made her suffer.	13	Years	Terrier - Boston	Dog	35	Pound
EON-96132	8/1/2012 19:00	Milo Kitchen chicken jerky/chicken grillers	(b) (6) gets the runs everytime he eats Milo Kitchen chicken treats. He has always been healthy even at twelve years. Even the vet is suprised at how healthy he was. He hs recently started a hacking cough and having slimmy stool with blood. He is completely fine the weeks I dont buy those treats. I never put two and two together until I heard the news. I even tried my own experiment. I stopped giving him the Milo treats for a few months. His hacking stopped no digestion issues. Once I tried the treats again same symptoms started up again.	12	Years	Terrier - Yorkshire	Dog	12	Pound

EON-96119	8/1/2012 17:06	Purina Beneful Original Dog Food	One day after buying a new bag of Beneful dog food and feeding my dog with it. He started having diarrhea with mucus in it, something which has never occurred before. For two days the diarrhea persisted and the dog seemed generally distressed; constant panting, whining and lethargic. Concerned, I started researching the potential cause of his symptoms. Various sources stated that if a dog didn't have worms and had diarrhea with mucus, it implies irritation to the gastrointestinal tract, which is likely the result of a food allergy. The articles I read stated that it would be wise to check that manufacturers of the dog food you use hasn't changed their formula or ingredients. When I went to do research about a potential manufacturing change to Beneful dog food, I discovered that many dog owners had reported identical symptoms to my dog. Some dogs even died due to liver and kidney failure. I even discovered that there was a class-action lawsuit against Purina for poisonous dog treats that killed a slew of animals. I immediately stopped feeding my dog the Beneful I had bought and he appears to be on the mend.	5	Years	Rottweiler	Dog	65	Pound

EON-96032	8/1/2012 11:21	Natural Balance LID. Green Pea and Duck	<p>I had bought a new bag of Natural Balance Green Pea and Duck formula for my cat (The large bag, I believe was 15lbs.) She had been on this food for at least two years and had never had a problem in the past. Being one of the only chicken free formulas on the market I always went back to it. When I had bought this new bag and poured it into her bowl I noticed it was slightly darker, but at the time thought nothing of it. Over the next few weeks or so I noticed she was a little lethargic and her balance seemed off, again thinking nothing of it, it was mid winter and everyone in the house was a little on the lazy side, she was also 9-10 years old, cats can get a little less playful as they age. Then her 'meow' started cracking, which was unusual. Again though I thought nothing of it at first and never thought to put together the symptoms. Even when she started vomiting (not just hairballs, or retching, she's had both in the past) but true violent vomit, at first it was spaced apart a bit, we would pick up her dry food for a few days and stick to wet as it seemed easier on her stomach, but it started getting closer and closer together. I also noticed she started feeling lighter to me. I had decided to take her to the vet when I got back from my next business trip out of town. Unfortunately that's when things got a whole lot worse. My parents had been looking after her while I was gone on a two week trip, she was vomiting multiple times a day, she stopped eating and drinking, and my dad took her to the vet for me. Blood tests showed high enzyme levels in multiple areas but nothing specifically wrong with her, after a few more test, still nothing. They gave her fluids and said to keep an eye on her, it was all we could do. She continued to go down hill. My dad had mentioned to me, over the phone, that everything had started about the time I started her on this new bag of food... we immediately took the bag back to petco (in (b) (6) and got a full refund, as well as let them know what was going on. After a hard week where she was at least 1.5 pounds under weight, not wanting to eat or drink, two trips to the regular vet, and two to the emergency vet. All while I was half way across the country thinking my cat was going to die while I was gone, because she was on the brink, weak with little muscle mass, unable to get to the little box to urinate... even my parents thought she was a goner... We had no true answers as to what was wrong. This was about the time Diamond pet foods was having their recalls. I was assured by Natural Balance that there was no possibility that it was the food problem. I also contacted Diamond and all they gave me were number to the products that were already re-called. Nobody wanted to admit that there was a possibility that there could be a problem. We changed her food to anything she would eat at that point that was not Natural Balance or any other Diamond product. After finally getting her to eat and drink again she slowly regained her usual demeanor, as well as health. There was one more check up visit to the vet, and though she was still under-weight at the time she hadn't lost any more which was a good sign. As of today she is back to her spunky self and hasn't had to go back to the vet. The only think</p>	9	Years	Domestic Mediumhair	Cat	10	Pound
---------------------------	----------------	---	---	---	-------	---------------------	-----	----	-------

			<p>we changed was the food she was eating. I am not sure on the specific date that this all started but looking back the minor symptoms where early January, and the point she started to deteriorate quickly was about April 9th, roughly half way through the bag of food. I can get vet records if you so wish to see them, she was at (b) (6) in (b) (6) as well as (b) (6) (b) (6) in (b) (6). I hadn't reported to the FDA as I thought that since I couldn't get the company to believe me that I wasn't going to be able to get through to anyone. Till recently when I saw an article that came out late may about the Diamond recall, when they finally admitted that cats could be affected as well. It just keeps making me believe more and more that it was the food, and somebody should be aware of what happened to my (b) (6) so that no other pet owner has to go through that horror.</p>						
EON-96028	8/1/2012 10:42	Happy Hips Duck Breast, Happy Hips chicken breast	<p>My dog began showing symptoms of what seemed to be allergies last year. He began sneezing, excreting ever increasing amounts of mucous from both nostrils, coughing and making what seemed to choking sounds in his throat. The symptoms began last July/Aug 2011 and slowly increased over the past year. We took him to several vets and performed several tests which concluded that he was in good overall health, no viruses, no bacterial infections. Even put a scope camera in his snout. Found nothing.</p> <p>About 2 weeks ago we decided to stop giving him the chicken jerky treats and the change in his health is dramatically improved. It is the only diet change that we have made and can only conclude that the poor health was directly connected.</p>	5	Years	Dachshund - Miniature	Dog	12	Pound
EON-96024	8/1/2012 10:06	MILO's Chicken Jerky	<p>After eating the chicken jerky for few days the dog stopped eating and did not want to drink water or eat. Was dehydrated and letargic, with nausea and vomiting. Stopped giving the chicken jerky and took him to the emergency room where he was hydrated. No disease found, besides dehydration. Dog started feeling better 8-12 hours after stopping chicken jerky and IV fluids administration.</p> <p>Please, do something with these chicken jerky from China.</p>	8	Years	Maltese	Dog	6	Pound

EON-96018	8/1/2012 8:42	Pedigree Choice Cuts in gravy with beef	<p>On about 25Jul2012 (b) (6) exhibited diarrhea, bloody diarrhea and vomiting after being given a small amount of the Pedigree canned food along with white rice and dry IAMS food. As soon as this event began, (b) (6) was given only white rice mixed with fluids (water and/or Walgreen brand pedia-lyte). After a few days of this regimen (b) (6) improved. We have since been giving her canned Science Diet with white rice and water with no recurrence of symptoms.</p> <p>As it was unknown what the cause of her illness was, the small remaining amount of Pedigree left in the can was given to our other dog, (b) (6)--along with his dry IAMS food on the morning of 30Aug2012. Between evening of 30Aug and morning of 31Aug (b) (6) had at least 4 vomiting events and 1 diarrhea event. (b) (6) has since been given only white rice and water and appears to be improving.</p> <p>Unless a virus could be involved, the only common factor is the Pedigree canned dog food.</p>	2	Years	Chihuahua	Dog	10	Pound
EON-96010	8/1/2012 0:12	Milo's Kitchen Chicken Jerky	<p>I purchase Milo's Kitchen Chicken Jerky 7/29/2012 From Publix near my home. I gave one piece to my dog that evening. The next day I gave about 3 of these treats to her throughout the day. The following morning today 7/31/2012, she acted alittle strange, but I put her in her kennel as I was leaving for work, when I came home from work for my lunch break at 1:30pm, I came home to a horrid site, there was diarrhea looking like black tar all over the entire house (she had broken out of her kennel) which was also full of diarrhea and vomit. She was lying on the floor looking very ill and continuing to vomit. There were about 5 puke spots all over the living room and she continued to vomit 3 times while I was there frantically calling into work to ask for the rest of the day off so I could take her to the vet as this was an emergency she would not stop puking. I rushed her to my vet and they check her vitals which seemed okay they gave her nausea shot, bacteria food supplements and recommended only boiled chicken and rice or their canned food until friday, and if she did not get better to contact them asap. I let the veterinary know the exact product that caused this so hopefully they will get the word out. the vet cost was \$126, also had to immediately rent a rug doctor and disinfectants for all our health totally to about \$100. I'm very upset this one treat caused all this pain to my dog, I have to watch her for the next few days worrying if she will even recovery! but I now see after researching this product online that it has killed dogs with kidney failure, why is this horrible product still on the market! I don't want my family to be hurt anymore my dog is my baby!</p>						
EON-96009	7/31/2012 23:30	Waggin train jerky tenders	<p>Started having weight loss/decreased muscle mass, thought secondary to aging. Had decreased activity. Elevated creatinine (2.6) found on routine annual exam in March 2012. Creatinine continued to rise (3.7) despite prophylactic antibiotic therapy for pyelonephritis then despite renal diet (4.6). Ultrasounds negative. Workup consistent with protein losing nephropathy of unknown source. Creatinine elevated to 7.7 despite daily infusions of subcutaneous fluid. Continued weight loss, nausea, and lethargy until he refused to eat anything. Euthanized at 86lbs. (b) (6).</p>	7.5	Years	Rottweiler	Dog	98	Pound

EON-95997	7/31/2012 16:42	Waggin' Train Wholesome Chicken Jerky tenders	I purchased Waggin' Train Chicken Jerky treats for my dog on a Friday, July 20, 2012 from CVS Pharmacy on (b) (6). By Saturday morning, he was having a mix of diarrhea and solid bowel movements with blood present. He needed to go out constantly to relieve himself. Sometimes he would only poop out blood. His eyes were dull looking and he was very sluggish and slept. But he still wanted the treats because he was obsessed with them. I fed him on average 2 treats per day which was the recommended amount for his weight of 28 lbs. After 5 days of excessive bowel movements, blood and abnormal behavior I took him to the emergency hospital. They confirmed that they had seen many cases of chicken jerky from China illnesses all exhibiting the same symptoms. They told me to stop giving him the treatments immediately. He received fluids, Metronidazole medication, and dog food. His bill total was \$228.28. I am looking for reimbursement for this amount. After a few days of medication and bland dog food he is beginning to seem more like himself and the excessive tiredness and bleeding have stopped.	10	Years	Spaniel (unspecified)	Dog	28	Pound
EON-95996	7/31/2012 16:27	Waggin Train Jerky Tenders Dog Treats Chicken, Pet Shoppe Jerky Premium Dog Treats	In May 2012, (b) (6) was being treated for a urinary infection and was on antibiotics. He stopped eating over the course of two weeks altogether. He was dehydrated and hydrated for 24 hours at our vet. He came home and two days later was again not eating and lethargic. I took took him to an emergency animal hospital and was told his was in renal failure. He was in the emergency hospital for 3 days and came home having lost ten pounds.	8	Years	Poodle - Standard	Dog	70	Pound

EON-95985	7/31/2012 15:12	Nutro Natural Choice Lite	<p>(b) (6) has been on Nutro Natural Choice for a few years. In the past two years on the LITE formula. He intermittently vomited bile for years, but I did not connect it to his food. Yesterday we opened a new 33 lb tan colored bag of Nutro Natural Choice Lite kibble purchased at PetSmart (b) (6) June, 2012.</p> <p>To be stored at room temperature.</p> <p>Identifying codes on bag: UPC= 0 79105 10987 1 Best before 24 Apr 13 28 2 Other code = 217C2VIC01 16:37 CAPFD 0024</p> <p>It was a new bag, that we opened, and scooped into his bowl.</p> <p>Shortly after he ate, he started panting excessively, and his eyes bugged out if his head. He then voided his bowels in the house, as though he was not even aware it was happening. Then he lay down in his bed and started to yip, and pant excessively. He could not get comfortable, and then he went limp. Anaphylactic shock. His tougue and gums were grayish, and he drooled some bile.</p> <p>We rushed him to the emergency vet. He lives close to us, we were there in five minutes. He tried to get him to breathe by pumping his ribcage, but his lungs had shut down. The vet said his heart was still beating regularly and strong.</p> <p>My otherwise healthy dog died last night, and the only thing that was different was the new bag of food.</p> <p>Trying to find some reason, I researched the Nutro line of dog food online today, and found MANY people reporting similar symptoms, if not ending in death.</p> <p>I would like to be contacted. I would like to know something is being done to prevent this from happening to other dogs / people.</p> <p>Thank you</p>	11	Years	Dachshund (unspecified)	Dog	20	Pound

EON-95947	7/31/2012 1:00	Dingo DentaSticks (the actual sticks that have chicken in them - red)	<p>My dog, (b) (6), started to act very tired, wouldn't eat, drank a lot of water, panted excessively, and was very non-energetic. She would even lay down in the street during a walk because she was too exhausted to finish it. She is very young and I was very worried. She then started to eat grass and have spouts of diarrhea. She slept all the time and was very depressed and lethargic. She then stopped eating completely and didn't even want to go out. I started researching online the treats and food I give her and I came across all of these complaints regarding chicken treats made in China. I have always specifically given her DentaSticks made by Dingo, the red and green kinds, and I found out that it is one of the few brands actually MADE in China - NOT DISTRIBUTED.</p> <p>I then found out that I had unknowingly been POISONING MY DOG WITH SALMONELLA BECAUSE OF CHINESE CHICKEN PRODUCTS. It is atrocious that this is happening and that there is no recall. This information is easily accessible and everywhere and all the consumers are told are that the tests were "inconclusive". LET ME SPEAK FOR THOUSANDS OF PEOPLE - THERE IS ABSOLUTELY CONCRETE, CONCLUSIVE PROOF THAT THIS IS A DEADLY ISSUE AND IT SHOULD BE TAKEN AS SUCH.</p> <p>There needs to be a recall IMMEDIATELY for all DINGO Chicken products at the least, if not ALL CHINESE CHICKEN PRODUCTS for DOGS. You are allowing the suffering of these dogs, many DYING, by not putting more attention to this issue and not recalling it. Plausible deniability is UNACCEPTABLE.</p> <p>Please let consumers know of this horrible problem and protect our animals from suffering and death! That is a fiduciary duty that you have for this country, it's consumers, and their pets. Thank you and I hope to see action taken expeditiously.</p> <p>(b) (6)</p>	3	Years	Shepherd Dog - Australian	Dog	32	Pound
EON-95945	7/31/2012 0:21	Kirkland Signature Nature's Domain Salmon and Sweet Potato Formula For Dogs	<p>Within 5 days of eating from a new bag of Kirkland Signature Nature's Domain Salmon and Sweet Potato formula my dog (a 2 year old German Shepherd, Siberian Husky mix) has become very ill with symptoms consistent with Salmonella enterocolitis. He was eating on average 4 cups of food a day. He has been lethargic, vomiting, and having diarrhea several times a day for the past 2 days. He was brought to a veterinarian this morning and was given subcutaneous fluid and an anti-diarrheal to treat dehydration. His symptoms persist and he is very uncomfortable. The bag from which the food came is not on a current recall list. I am concerned that it may be infected with salmonella because of recent recalls from Diamond Pet Foods. The production code is NDS0703A1NLPN. The expiration date is 09/JUL/2013.</p>	2	Years	Shepherd Dog - German	Dog	75	Pound

EON-95944	7/30/2012 23:51	Milo's Kitchen Home-Style Dog Treats Chicken Jerky	(b) (6) was given two pieces of Milo's Kitchen Chicken Jerky as a treat the night of June 27, 2012. On the morning of June 28, 2012, (b) (6) had a pool of vomit next to her bed. She refused to eat or drink and had a noticeable decrease in energy and engagement. She also had continuous diarrhea throughout the day and wanted to be held (she is 40lbs.). I took her a bath on June 30th and blotches of her golden fur came out in my hand. When I was done rinsing and towel drying, (b) (6) had bold spots on the left side of her body and on her behind. Also her fur turned from golden blond to a sandy blonde color. Her behaviors continued in this pattern over the next several days. I discontinued the jerky treat after the first administration knowing that it was the only new food item that had been introduced to her in the last 6months. To this day, her fur color has not changed back nor has the fur breakage fully repaired itself.	1	Years	American Pit Bull Terrier	Dog

EON-95939	7/30/2012 20:21	Merrick duck and rice	I had to buy a new dogfood because Petco was out of my normal brand. My kitty sometimes munches on my dog's food. My kitty began to throw up green fluid very frequently and was meowing in pain when she threw up. Her gums became very pale and she appeared to be in significant pain. My dog is younger and vibrant and he only threw up a few times. He had diariah on a couple of occasions as well. I returned the food and was able to buy my normal brand. I am going back to preparing my own pet food and intend on not buying anymore commercial petfood.	12	Years	Crossbred Feline/cat	Cat	18	Pound
EON-95938	7/30/2012 20:15	Waggin Train Yam Good Wholesome Chicken Wrapped yams	Started to loose weight and then developed breathing problems. Took to vet the first time on (b) (6) and following a thorough exam it was determined that he had "fluid" in his thoracic cavity. A thoracentesis was performed that was grossly bloody with removal of approximately 200mL. He was treated appropriately for poisoning as a precaution with vitamin K1 and started on antibiotics as well. On (b) (6) he was taken back to the vet due to no improvement. Again chest x-rays were performed that showed no improvement and once again underwent a thoracentesis with removal of approximately the same amount of "bloody fluid" from his thoracic cavity. He was continued on antibiotics, vitamin K1 and now started on Lasix with the hopes of improving his breathing. The following wee, on (b) (6), he was seen by a second vet who performed an ultrasound of his chest. At this visit it was determined that (b) (6) did not have pericarditis as the pericardium was not dilated and compressing the heart (b) (6) underwent a third thoracentesis to remove some of the fluid. At this time it was determined that he was no longer actively bleeding in his chest but the "bloody fluid" was clotting and/or clotted. This fluid was sent for cytologic examination; results are pending.	4	Years	Mixed (Dog)	Dog	20	Pound

EON-95934	7/30/2012 16:57	Canyon Creek Ranch Brand Dog Treats	I purchased Canyon Creek Ranch, 4 variety dog treats from PetSmart not quite two weeks ago. Last week, I noted that the dog developed intermittent diarrhea which lasted 3-4 days. Subsequently, all treats were withheld and diarrhea began to decrease. He was then given two or three treats on Saturday, July 28 and developed significant diarrhea within four hours. I also noted that the dog was drinking and urinating excessively. The following day, the dog obedience trainer noted that my puppy had only gained one pound the previous week (his normal weight gain had been around 4 pounds). I told her it was diarrhea caused by some treats that didn't agree with him. With no way of knowing what kind of treats they were, she asked "were they Canyon Creek Ranch brand?" The trainer then informed me that the product was from China and were under FDA investigation. She stated she knew personally of seven dogs in the (b) (6) area that had died of kidney failure after consuming these treats. I have not given my puppy any treats since 7/28 and his symptoms have resolved; and I have no doubt that these treats caused his illness. Further, I certain he would either be hospitalized or dead by now if I had continued to give him this tainted product. The product Lot # is 62CA4743A, expiration date 060613	4	Months	Great Dane	Dog	48.9	Pound
EON-95900	7/30/2012 14:06	Waggin' Train Dog Treats	After feeding one Waggin' Train chicken dog treat to my pug per day, after just a few days I started to notice extreme changes in her. Diarrhea, vomiting, extreme lethargy, and a suppressed appetite. I immediately started evaluating what might be wrong. She has had a clean bill of health her entire life and has eaten the same brand of wholesome dog food for most of her life. The ONLY thing we started adding to her diet was one dog treat a day from Waggin' Train. We rushed her to the vet ER once we learned about Waggin' Train and that it could be poisonous and was causing extreme harm and even death in other dogs. We also took a sample of the treat with us. They checked her out and thankfully she was well enough to return home to us later that night. She had only consumed a total of about 6 or 7 treats but I fear what may have happened if she continued to eat these treats. We stopped giving these treats to her immediately and she has been much better ever since.	6	Years	Pug	Dog	20	Pound
EON-95860	7/30/2012 13:00	Kingdom Pets Chicken Jerky	W were going camping and my wife just purchased the chicken jerry for Costco. We gave him one piece of jerky that day. with in 4 hours he started he wasn't acting himself. The night before we had just given him Frontline flea & Tick control. So we thought he was have a reaction to that. The next day he seem a little down but he ate his meals. The next day we gave him another treat and he still seemed sluggish and slept a lot. That night he didn't run for his dinner so to perk him up a bit I gave him haff a treat. He did finally eat his dinner. The following morning he didn't eat breakfast. He didn't get any treats except a chew and that evening he ate dinner. He still was sluggish and not acting normaml this went on for aout a week. When we arrived home I gave him a bath and he seemed to be acting a little better. I gave him another half a treat and within an hour he vomitted. After that I stopped giving him any treats and just fed him his regular dog food. He has showed signs of improvement but this AM he didn't eat his morning meal.	4	Years	Poodle (unspecified)	Dog	21	Pound

EON-95858	7/30/2012 12:57	Milos Chicken Jerkey	Purchased Milos Chicken Jerkey at Petsmart the weekend of April 14. During the next three days (b) (6) ingested 3-4 jerkeys. On the third day (b) (6) began non-stop vomiting. First he vomited food that he had eaten but eventually there was nothing left in his stomach and he began vomiting white foamy liquid. He was very lethargic and would not eat anything we placed in front of him. We took him to the (b) (6) in our city of residence. There he was tested and x-rayed (the vet bill was a total of \$382) for intestinal blockage and parvo virus.	15	Months	Crossbred Canine/dog	Dog	8.6	Pound

EON-95827	7/30/2012 10:00	Wellness Turkey Formula	<p>I have a can of cat food that upon arrival home I noticed was bulging from both ends. On July 8, 2012 I purchased a can of Wellness Turkey Formula, 12.5 oz can, "Best By :03 APR 15 7WTKS1 10:13" from the retailer Petco at (b) (6). Upon arrival home I noticed the can was bulging from both ends. I left a voicemail with Wellness at the consumer phone number on the can, and spoke to a rep the following Monday who took their report # (b) (6). I also notified the store but was brushed off by a staff member. I called Petco during the week (the purchase was on a weekend) and they took the complaint # (b) (6). I followed up with Wellness requesting they send me a mailer to obtain and test the can and its content but they have declined to do so. Their rep (b) (6) has told me there is no problem since mine was the only report. I do not agree. The can is still sealed and in my possession.</p>						
EON-95822	7/30/2012 5:45	Kingdom Pets Chicken Jerky Premium Dog Treats	<p>In March of this year a friend of mine gave me a bag of Kingdom Pets chicken jerky dog treats. My dog (b) (6) loved them and usually ate one strip a day as a treat. On April 30, after eating a Kingdom Pets chicken jerky dog treat, (b) (6) became very ill. Within 3-4 hours after consuming the treat she began vomiting multiple times with blood in her vomit. That night she was taken to the vet, had x-rays, and because no obstruction was seen she was given an anti-nausea injection of Cerenia. The days following I returned to the vet for another shot of Cerenia due to her discomfort. She had bloody diarrhea, refused to eat even plain cooked chicken, became extremely lethargic to the point where I had to carry her outside to go to the bathroom and she would have to sit in the grass until she relieved herself because she was too weak to stand. I cannot explain the panic I felt during this time and the distress I felt because the vet couldn't find a cause or explanation. I had never had a pet this sick before and I feared that she was so small she would die. (b) (6) would have bloody diarrhea every hour which lasted for days and all over my home while I was at work. I even took days off of work because I was afraid to leave her alone. Again on May 3, I became extremely alarmed due to her declining health, and took her to an emergency vet again for more x-rays and another injection of Cerenia. She had discomfort for multiple days and had to be treated with Cerenia again on May 6, which at that time I was given multiple doses for her for the following week. During this time she was on a strict diet of boiled chicken and rice(which she did not eat) plain sweet potato (which she did not eat) and even chicken baby food(which she did finally start eating small bites of). Bloody diarrhea and lethargy lasted until May 11. Finally on May 14, two weeks after her initial onset of symptoms, she began to be herself again. I could find nothing around the house or outside to explain what had caused the problem. After slowly getting her back on her regular diet I began treating her with the Kingdom Pets Chicken Jerky dog treats again and have been regularly treating her since that time. After watching the NBC Bay Area News report on Chicken Jerky treats for dogs I have stopped treating her with these treats and decided to file a complaint. All the symptoms indicated were the same as (b) (6) 's. I still have the bag of treats, but will no longer be giving her any kind of jerky treats.</p>	3	Years	Chihuahua	Dog	11.76	Pound

EON-95821	7/29/2012 23:36	Waggin' Train Country Style Drummettes, Waggin' Train Chik'n Biscuits	(b) (6) was being given Waggin Train Chik'n Biscuits and Waggin Train Country Style Drummettes. On January 24, 2012 he fell ill(vomitting, lethargic, tremmors, and frequent urination) was taken to the vet and given meds to settle stomach. Was taken to the vet 3 more times after that and recieved more meds for stomach, shot for stomach, meds to increase his appetite, 2 B12 shots in 2 weeks. The whole time he was sick he was still getting these treats because I wasn't aware. The first week in March my son came home from work, said that they recieved a fax at work to pull all (b) (6) treats off the shelf because of sick or dieing dogs due to kidney failure and/or liver failure. I stopped giving them right then. On March 20 he was at deaths door so sick and frail. He was in renal failure. He wasn't able to take medication of any sort because he wasn't even eating. He lost 6.8 lbs in 3 weeks. I started feeding him baby food from my fingrers and Pedialyte in his water. I then started adding baby food with his food. He is recovering with 9 medications some 2x a day. Will be on them for the rest of his life. And has had numerous vet visits, testing and will have for the rest of his life.	5	Years	Maltese	Dog	13	Pound
EON-95820	7/29/2012 21:42	Dogswell Happy Hips Chicken Breast	(b) (6) became very sick on 7/22/12. She began having diarrhea and vomiting, which quickly progressed from vomiting food, to vomiting foam, to having vomit and diarrhea containing blood. I had to take her to the emergency veterinarian, where she required intravenous fluids for 24 hours. A definite cause of the illness was not discovered and she was treated symptomatically with dewormer and an antibiotic/anti-diarrheal medication. She is improving and is nearly fully recovered now (7/29/12).	4	Minutes	Dachshund (unspecified)	Dog	11.5	Pound
EON-95819	7/29/2012 19:27	Kirkland Signature Natures Domain TURKEY and sweet potato formula for dogs	My dog threw up the dog food on Wednesday night, Thursday was acting lethargic and Friday he was throwing up and drinking a lot of water. Saturday morning I woke up at 6 am and there was bloody vomit and stool all over the floor. We took him immediatly to the vet and he was shutting down and almost lifeless. We had to euthanize him =[... I am heart broken.. This dog was in excellent health with no health issues whatsoever.. He was being fed Kirkland Natures Domain Turkey and sweet potato. EON-95818	7/29/2012 12:42	Waggin Train Chicken jerky treats	After feeding the treats for some time, one night she became extremely ill. She was vomiting, diarrhea, urinating, very lethargic, drinking alot and just staring into space. In the morning, she was fine and a week later, these symptoms came back. First thing in the a.m. I called the vet and got her an appt. ASAP. She was diagnosed with high liver enzymes and has been on meds. since. Her #'s keep fluctuating and has to have liver panels checked often.	20	Months	Dachshund - Standard Smooth-haired	Dog	19	Pound
EON-95817	7/29/2012 12:21	Waggin Train chicken jerky tenders	(b) (6) developed kidney failure after several months of consuming Walmart's Wagon Train jerky treats. She subsequently perished due to the kidney failure. The vet could find no explanation concerning her development of the disease until we discovered other dogs had had similiar experiences after consuming these products made in China. We strongly believe the FDA is NOT doing enough to warn pet owners of this potential.	11	Weeks	Finnish Lapphund	Dog	20	Pound
EON-95816	7/29/2012 12:00	Waggin Train Chicken Jerky treats	After feeding Waggin Train jerky treats for several months, one day out of nowhere. she started vomiting, diarrhea, urinating everywhere..mostly in the house. She started drinking heavily, was lethargic, and was eating very little. After about a week of these symptoms, one night she went into seizures and never did come out of them. Before we could get out of the house to the emergency vet, she passed away in my girlfriend's arms.	15	Years	Dachshund - Standard Smooth-haired	Dog	18	Pound

EON-95815	7/29/2012 11:30	Canyon Creek Ranch Chicken Breast Tenders Snack	My puppy was given 1/3 of a small chicken snack treat to chew on for no longer than 1 hour, once per day. Within a couple of hours of getting the jerky treat he would stop eating or playing and only want to sleep. He would urinated almost continuously even while walking or playing or while he was sleeping & started vomiting and having problems with low blood sugar and UTIs. These symptoms have continued even though we stopped giving the treats after we realized they were causing him to act sick whenever he ate them. His health has gotten worse & worse since that first treat was eaten.	10	Weeks	Bolognese	Dog	3	Pound
EON-95814	7/29/2012 8:36	Blue Buffalo Wilderness Salmon Recipe	I bought a brand new bag of Blue Buffalo Wilderness Salmon and fed it to my dogs. This first dog had diarrhea in the middle of the night (about 5 hours after feeding) I thought nothing of it because occasionally (b) (6) had bouts of diarrhea due to Irritable Bowel Disease. When I woke up the next morning my other dog had diarrhea, (b) (6) NEVER gets sick. He is the healthiest dog I ever met. After the diarrhea, (b) (6) started vomiting. Even though he has the IBD, he never vomits. was also refusing water. SO that is when I decided to take him to the vet. They tried to get a fecal sample and all that came out was blood. They were only able to draw a small amount of blood. They ran some tests and discovered that Baxter had Hemorrhagic Gastroenteritis (HGE). I asked if the vet thought it was the food and she thought that it most likely was since both dogs were experiencing it and only after eating the Blue Buffalo. It had been about 24 hours since (b) (6) has been at the vet and both he and (b) (6) still have diarrhea and are refusing to drink water.	4	Years	Collie - Rough-haired	Dog	65	Pound
EON-95813	7/28/2012 22:45	Milo's Kitchen Chicken Jerky Treats	Our dog only like one dog treat. Unfortunately, as an owner I have never seen any warnings about the jerky treats. They sell them in large bulk at Costco and Target and most common stores that the typical dog owner shops at. We gave our dog these jerky treats daily as they are marketed to be good for joints, etc. It wasn't until we had to put our dog down due to kidney failure that I began to research what might have caused her health problem. She had been very healthy until recently. I thought I was giving my dog something healthy. How is the average dog owner suppose to know this is not a good product for dogs?	11	Years	Collie - Border	Dog	40	Pound
EON-95812	7/28/2012 15:30	Canyo Creek Ranch Brand Chicken Tenders	(b) (6) stopped eating for two days last April and was experiencing diarrhea. I took her to my veterinarian. (b) (6) ordered a blood panel, gave her an injection of Diphenoxatate, and prescribed Mometamax. (b) (6) recovered, but we really didn't know what had caused her symptoms. This week I was in the veterinarian's office again to have (b) (6) groomed and read a notice on his bulletin board about jerky treats made in China that were causing dogs to sicken. As it happens, I've been walking every day with (b) (6) for about a week. When we get home, I give her a treat. She's been experiencing diarrhea again, although her appetite hasn't been affected. Today it discovered that the jerky treats I've been giving (b) (6) are made in China - Canyon Creek Ranch Brand from PetSmart. I suspect that they may be causing (b) (6) symptoms. Of course, I will not give her any more of them.	12	Years	Spaniel - Springer (unspecified)	Dog	38	Pound

EON-95811	7/28/2012 15:12	Seconds/USA Retrievers 8-12" 10lb	Purchased another shipment of rawhide rolls (10" - this was the 2nd or 3rd purchase) - my dogs refused the product each time - all six dogs. I informed the company, i-pets.com, a new shipment was received. Some of the rawhide rolls looked ok and the dogs took them but other did not look nor smell very good. After a few weeks we noticed a foul odor from the new shipment and the previous shipment; we noticed a liquid as well. After about 3 weeks we started noticing color changes so we took a closer look and discovered mold - black mold. When we cut open a few we noticed dampness with a nasty odor and a great deal of mold. I have sent another email to the company asking for a review - the first email was answered with more rawhides. I need this issue to be reviewed and investigated.

EON-95806	7/28/2012 10:30	Milo's Kitchen Chicken Jerky	I have 2 healthy pitbulls. After giving them Milo's Kitchen Chicken Jerky treats they both became ill. Vomiting and diarrhea. I brought them to the vet and discovered there was and FDA warning about the treats I gave them. Their symptoms have improved since I stopped giving them the treats. I am awaiting their bloodwork results testing their kidney and liver.	7	Years	Pit Bull	Dog	75	Pound
EON-95801	7/28/2012 4:36	Waggin Train Jerky Tenders	I gave (b) (6) one chicken jerky (Waggin Train from Costco) on a Thursday, he was fine. I gave him two more on Saturday (he was fine). Sunday he had two more and he started to get really sick. He had yellow liquid projectile diarrhea, vomiting, no energy, no interest in food (he's usually a total pig where food is concerned) and just seemed really sick. I didn't know it was the treats, I thought maybe he'd eaten something bad out in the woods. but he just stayed that way for four days (didn't eat, yellow diarrhea, vomiting, lethargy). I was getting ready to take him to the vet when it just cleared up and he went back to normal. I never gave him any more of the treats...Then I saw something posted at the grocery store about the jerky treats and it sounded exactly like what happened to (b) (6) I threw them away and will never ever buy any chicken jerky again. I thought he was going to die. He doesn't seem to have any long term adverse effects, thankfully.	2	Years	Rottweiler	Dog	58	Pound
EON-95798	7/28/2012 0:12	Milo's Kitchen Chicken Jerky Treats	(b) (6) was given one chicken jerky strip from a new bag of Milo's Kitchen chicken jerky treats one evening. We had bought the bag at Walmart. The next day around 2:00 I returned home from work to find (b) (6) in his kennel filled with diarrhea and vomit. I opened his kennel door and he ran directly outside to vomit and have more diarrhea for the next hour or so. This chicken jerky was the only thing outside of his normal diet that he was given. He is NEVER fed anything but dog food.	11	Years	Mixed (Dog)	Dog	30	Pound

EON-95774	7/27/2012 15:21	Apex Holistic Adult Chicken and Rice - 40lb	<p>We purchased Apex Chicken and Rice food for our dogs on February 22, 2012. After we started feeding (b) (6) this particular bag of food, she became violently ill for two weeks straight. Symptoms included diarrhea, vomiting, lethargic, decreased appetite and fevers. We stopped feeding her the food after about a week and switched her to a bland home cooked diet of rice and ground turkey to help settle her stomach. Initially, we thought it was just a virus that she had picked up after consulting with our vet by phone. Once she seemed to be feeling better, we reintroduced the Apex food and the symptoms came right back within 48 hours. We then took her off of the food completely and put her back on the home cooked diet for a couple weeks to settle her stomach and threw away the food and switched to another brand entirely.</p> <p>We had checked with Diamond foods to see if there were any issues posted on their website with the food. During the month of March, there was nothing posted about Apex foods - however we did notice that another brand they made, Canidae, had been recalled. Over the next couple of months up to now, (b) (6) has had a more sensitive stomach and we have noticed her having far more gas than ever before this episode started back in February.</p> <p>(b) (6)</p> <p>(b) (6), we decided to have our dog (b) (6) tested on Wednesday, July 11, 2012 to see if she could have been a carrier after we had found out that Apex food had also been recalled effective May 4, 2012. In addition, I have opened a case with Diamond Foods (Case ID 34795 - Opened 7/11/12 at 1pm EST) to document the complaint and have notified the location where we purchased the food originally - (b) (6) in (b) (6)</p> <p>(b) (6) has been put on antibiotics (Ampacillian) by our vet to fight the bacteria in his system.</p>						
EON-95654	7/27/2012 0:57	Milo's Kitchen Home-Style Dog Treats Chicken Jerky	<p>Twelve hours after feeding (b) (6) the Milo's Kitchen Chicken Jerky I noticed that he had urinated on the floor. This is not usual at all. He is completely housetrained. He was not his energetic self. Was having more BMs then usual and they were more soft formed. Also had a minor shake. The following day when I got up he had a loose BM on the floor. Again this is not usual. He is not eating his regular dog food. This is about 32 hours after feeding him the treat. I then called my vet's office, I was unable to talk to my vet due to her being out of the office for the day, but who's vet tech informed me that they have had a "couple dogs come to them with this problem" who had eaten the Milo's Kitchen Chicken Jerky. She told me to monitor him and to bring him in immediately if his condition worsens or changes in anyway. Throughout the day he has been very lethargic and the shakes continue. He also continues to have very loose BMs, and the only food he will eat is a rice and hamburger meal the vet's tech told me to feed him.</p>	3	Years	Corgi - Welsh Pembroke	Dog	23	Pound
EON-95653	7/27/2012 0:42	Waggin Train - Western Grill	<p>My dog was in perfect health and has always had healthy bowel movements, until I purchased these treats for her. I had purchased similar trats with yam sticks wrapped in a dried jerky. I purchased this product form Wal-Mart as the ingredients appears to be natural with natural preservatives. There was also no indication that anything in this package was manufactured in China. If there was any indication, I would not have fed it to my pet.</p>	2	Years	Schnauzer - Miniature	Dog	10	Pound
EON-95632	7/26/2012 17:12	waggin train	<p>About two months ago purchased Murph the Waggin Train Canyon Creek Yams with chicken jerky wrap. He had some diarrhea and a bit mellow, but he loved them and I didn't think anything of it. I would normally give him baby carrots so for a change on 7/24/12 I picked up more of the Yam Jerky Wrap from Pet Co. Normally I give him half of one once day but yesterday I gave him a hole one which they recommend for his size. The next morning He was vomiting all day. I looked online and found numerous complaints about this is brand from China. I discontinued use and discarded the product. Tonight He did eat his normal food after a while Blue Buffalo which is usually gone instantly. I will keep an eye on him. I hope this helps in your investigation.</p> <p>Regards, (b) (6)</p>	3	Years	Dachshund - Miniature	Dog	10	Pound

EON-95630	7/26/2012 16:51	Roundy's Pet Care Seafood Dinner cat food	About half a day after eating some of this canned moist food, my cat (b) (6) started exhibiting symptoms: sluggish, vomiting, not eating, almost not drinking. After 3 days of these symptoms, I took him to my vet (b) (6) in (b) (6), where he received hydration treatment, but the vet could not find the reason for the problem. I suspected the cat food, because of the timing. As an experiment, I gave a very small amount of that same cat food to my other cat (b) (6). As I anticipated (b) (6) experienced the exact same symptoms, but was sick only two days, whereas Chris, who had eaten more of the food (about a third of the can), remained sick a full week. I purchased the canned moist food at a (b) (6) grocery store, probably the (b) (6) location on (b) (6), but I'm not positive (could have been another grocery store). The can label reads: Roundy's Pet Care, Seafood Dinner cat food, 5.5 oz, UM01-KGSF002. The bar code is: 0 11150 78533 4. There was nothing unusual about the appearance of the can and of the food within it.	3	Years	Mixed (Cat)	Cat	11	Pound

EON-95600	7/26/2012 12:27	Purina One Special Care: Urinary Tract Health Formula	My oldest cat, (b) (6) " who was 15 and our second oldest cat (b) (6) " began throwing up a lot.... the two younger ones (ages 2 & 3)... threw up a couple of times - (b) (6) became disoriented, nauseated, lethargic, and drank a lot of water. By the time we took (b) (6) to the vet and they did blood tests all his vital signs were so low that he was not going to make it.. he had lost 1.5 lbs since his last vet visit for a nail trim in May. They tried injecting fluids to no avail and he passed away. (b) (6) was getting worse and stopped eating... we were able to feed her liquids and she got better.. but when we gave her the hard cat food again (Purina) she started to throw up instantly. Stopped feeding the Purina and she is getting better. (b) (6) died - (b) (6) appears to be getting better.	15	Years	Domestic Shorthair	Cat	8	Pound
EON-95580	7/26/2012 10:06	Busy Bone Small / Medium Dog Purina Dog Treats 7oz	I have one 70lb 2 year old akita/lab mix who is about 2 years old. I bought the busy bone for him from the grocery store and gave it to him when I got home from work around 5:30. Around 7-7:30pm he starting acting funny and sure enough he just dropped in front of me and started seizing! I was terrified! I called the vet and had an emergency consultation, he ended up being okay and it has been his only seizure to date (that months ago). The only thing in his diet that changed was his busy bone. Well they came in a 2 pack and I figured maybe it was just an allergic reaction to the bone. Back up to last night. We recently adopted a new golden retriever/ Pyrenees mix and I decided (Stupidly) to give the busy bone another try with our new girl. She is not a puppy, she is about a year old, and is about 60lbs. She has been throwing up all night and all morning! I am very worried about her and may be taking her to the vet later today if she does not stop.	2	Years	Mixed (Dog)	Dog	70	Pound

EON-95567	7/25/2012 23:57	4health salmon and potato	<p>On July 24, 2012, I purchased a 35 lb bag of 4 Health Brand, Fish and Potato dog dry food from Tractor Supply Store in (b) (6)</p> <p>(b) (6) I went directly home and placed the bag on the kitchen floor. There was a noise coming from inside the sealed bag. It sounded like an animal was scratching on the bag from inside (a mouse maybe?). I immediately took the bag back to the store and returned it, letting the store manager know why. I did not get any information off the bag because I was so shocked that something was scratching from inside the sealed bag. I know you need more information, but I'm hoping that knowing when and where it was purchased can help you determine where it was produced. It appears that Diamond has not cleaned up their act when it comes to cleanliness or a live creature would not be inside a sealed bag of dog food. Please feel free to contact me if I can be of further help. Thank you.</p>							
EON-95559	7/25/2012 20:21	Mellow Mutt	<p>(b) (6) was diagnosed with kidney failure in May 2012. He was lethargic, not eating, had mucous blood in his stool - always diagnosed as "stress". In May he was diagnosed as having kidney failure. He has been eating these treats for at least four years - started by a friend - He is unable to eat most food - but still eats these treats. A friend was told by her vet that the Vita Kitty treats also made of chicken from China were causing renal problems in her kitten. I immediately informed my vet ((b) (6)).</p>			Dachshund (unspecified)	Dog	14.5	Pound

EON-95239	7/21/2012 8:36	Diamond, Waggin Train Jerkey Tenders	My dogs became sick, throwing up, diarrhea, lethargic, no interest in eating, and dehydration. Came on fast and my oldest dog, (b) (6), was affected fast! He passed away soon after we got him to the vet!! Our vet ran the blood work and tests confirmed kidney failure most likely from ingesting something he ate and because symptoms were from all the animals, highly suggesting it was dog food or treats. We bought a brand new bag of Diamond Pet Foods, chicken & rice, a few days prior to dogs getting sick. The treats they also ate within that time was the Waggin' Train Jerky Tenders! Not sure which one is the possible source of getting all my dogs sick and killing one of them but I'm very upset that my best bud is gone and hopefully I don't lose my other dogs!	10	Years	Retriever (unspecified)	Dog	70	Pound

EON-95238	7/20/2012 22:00	Chicken Soup for the Dog Lover's Soul Dry Dog Food for Adult Dog Chicken Flavor 18 Pound Bag	(b) (6) developed profusely bloody diarrhea with fecal incontinence after consuming Chicken Soup for the Dog Lover's Soul dog food. She has been on this food for about a year, but we had recently opened a new bag that was purchased online from Amazon.com. This began on a Thursday, and I stopped giving her the food and switched her to home-cooked rice and chicken. She did better for a few days, and then when I put her on the dog food again, I came home to find that she had bloody diarrhea again in her kennel. She, and the kennel, were both covered with it. Due to the incontinence and large amounts of blood she was having with this episode, I put a diaper on her and took her to the vet. He felt that this was likely some unknown infection, gave her antidiarrheals and antibiotics and some canned food for a bland diet. She was better within a couple of days, we finished the antibiotics, transitioned her to Chicken Soup dog food again about a week and a half later, and the bloody diarrhea came back, worse than before. I finally realized that it must be the food. I switched her back to rice and chicken, and now have her eating another brand of dog food for the past week with no further problems.	2	Years	Spaniel (unspecified)	Dog	27	Pound

EON-95149	7/20/2012 1:45	Waggin' Train Wholesome Big Blast Pork Skin Twists with Chicken Liver Center	We were giving our dog one 'Waggin' Train Wholesome Big Blast Pork Skin Twists with Chicken Liver Center' every evening. During the next day he would vomit in the house on our carpet and sometimes we noticed that he had diahrea and we could not figure out why. The color of the vomit would be about the same color as the chicken center in the pork twists. I came across some information on the internet about Waggin' Train Chicken Jerky treats that were making dogs sick. We stopped giving the Pork Twists to our dog and he has stopped vomiting and has not had diahrea since. We did not change anything else in his diet so we believe the Twists were the reason he was getting sick. The dates I entered below are only estimates as I am not sure when he started getting sick.	5	Years	American Pit Bull Terrier	Dog	80	Pound

EON-95148	7/20/2012 1:30	Cesar Canine Cuisine Grilled Chicken Flavor in Meaty Juices	I sent two flats of Cesar Grilled Chicken Flavor Canine Cuisine Dog Food to day care with my dog. He ate one for lunch and one for dinner. This is the same food he has eaten many times in the past and the same flavor, but they were from a different case that I had just opened. The next morning at 5 am he woke up with severe bloody diarrhea and had more than 15 bowel movements that day that contained blood and mucus. He also began vomiting. We stopped all food & started kaopectate. It took 4 days before he finally stopped passing bloody diarrhea. He was slowly started back onto his regular diet and the severe diarrhea began once again. We finally stopped feeding the Cesar food completely and have not had diarrhea since, but now has abnormal liver lab work.	1	Years	Bolognese	Dog	6	Pound
EON-95143	7/19/2012 22:36	Waggin Train Chicken Jerky	started giving him Waggin train jerky treats that I bought at WalMart and he started losing weight....vomiting and not eating anything. I took him to the vet to see what was wrong with him. Its the only thing new I introduced into his diet. She took a blood sample and said his kidneys were failing. She gave him a shot to stop the vomiting and said to feed him hamburger and rice. Later that week I had to take him to the vet ER to be put on IV because he started vomiting again. It got so bad he was shaking and I was feeding him baby food. As he felt better I gave him another treat that he threw up. I wondered if that was what wasnt making him sick. Then 3 days later I see all this in the papers on chicken jerky treats. I went back to the vet and he is still in kidney failure and Im pissed. Why are these things on the sheleves??	5	Years	Dachshund (unspecified)	Dog	22	Pound
EON-95140	7/19/2012 22:00	Milo's Kitchen Home Style dog treats Chicken Jerky	Feeding "Milo's Kitchen Chicken Jerky" in the morning as a morning treat. The dog started to be not as active as usual. Four days ago he started to have uncontrollable loose stool. Today he had uncontrollable loose stool several times and was throwing up the jerky. He also has not been eating as good as he usually does for the last four days and is very inactive. I just put together what was making him sick this morning when he threw up the jerky. Product number is 2 080HV C, best used by 09/12/13.	18	Months	Terrier - Jack Russell	Dog	12	Pound
EON-95139	7/19/2012 22:00	Waggin Train Wholesome Chicken Jerky Tenders , Canyon Creek Ranch Brand Natural Chicken Tenders	Dog passed away (b) (6) due to multiple organ failures, including kidneys. Onset was sudden and had no previous health issues. Dog had been fed routinely WAGON TRAIN WHOLESOME CHICKEN JERKEY, and CANYON CREEK RANCH NATURAL CHICKEN TENDERS.	11	Years	Retriever - Labrador	Dog	75	Pound

EON-95137	7/19/2012 21:42	Waggin Train Fiddlestix	(b) (6) loves to chew on rawhides. She particularly loves the Waggin Traim Fiddlestix rawhides wrapped with chicken. Unfortunately after eating these over an extended periof of time she developed a mystery illness. She began eating grass almost on a daily basis. She then became lethargic and depressed. She eventually began displying symptoms of nasal discharge, vomiting, diarrhea, increased water consumption, and loss of urine. We took her to the vet and they thought maybe she had parasites. They put her on dewormer. After the deworming she still ate grass on a daily basis and then began a downward spiral. When she began running a fever with chills we took her back to the vet. The vet admitted her and began giving her an IV and treating her with doxycycline. They ran all kinds of tests and they all came back negative. They were stumped as to what caused the illness. They said they might never know but that as long as she improved with the doxycycline we should continue to monitor her and to hope for the best. We took her home and continued the antibiotics. She finished those yesterday, July 18th. She seems to be improving so we though it was just a fever of unknown origin....until I saw an article that said Waggin Trail treats have been making dogs sick. I called my husband and asked him if the treats (b) (6) was eating were manufactured by Waggin Train out of China and he said, "yes." I was shocked and dismayed to learn that this brand is still being sold in this country after making so many dogs sick and that even worse some dogs have died. Fortunately I saw the article and we've stopped the treats. I feel lucky that she is alive, but nervous that she could get sick again and not too happy about the \$1300 vet bill that I incurred because the FDA and this company failed to adequately warn the public about the dangers of these tainted treats manufactured in China.	5	Years	Dachshund - Standard Smooth-haired	Dog	23	Pound

EON-95131	7/19/2012 19:00	Waggin Train Jerky Treats	I'm sorry maybe I am posting a question to the wrong place. We do feed our animal the snack, however, knowing the problems now we will stop. I saw on MSN that you had conducted a lot of testing on the product and could not find why the animals were getting ill. I am no expert and not even in the medical field. However, I had just read about BPA's being banned in baby bottles and I was wondering if there are BPA's in the plastic packaging that the dog treats come in. I know in my area that the excessive heat could definitely cause problems if the treats were to stay in the packaging in the heat. I do not know the travelling route that the items take going from where they are made to all the destination they are sold, but I was curious if this was a possibility and if this was something that was already tested. I only considered this, as the snack itself was being tested, but if the treat is tested before its put in the packaging or if the treats tested have not been exposed to the heat in the packaging, then maybe the tests would not show this problem. The only other thing I could think of would be the little freshness packets. I don't know if they put them in the treat packaging or not, but sometimes those could contain chemicals. Again, I apologize if this was the wrong place to ask this question or offer this help. Thank you for your time. Warmly, (b) (6)	4	Years	Chihuahua	Dog	13	Pound

EON-95130	7/19/2012 19:00	Waggin' Train Jerky Tenders Freshies Supreme Green dental bones	My dog was given treats of various kind that were manufactured by WAGGIN' TRAIN. She had started to lose weight and was no longer able to hold down food or water, she became listless and no longer wanted to go for walks. The vet did the necessary blood work and like he had expected her Kidney's were failing and gave her 3-5 days to live. So I put her down. I own two other dogs, one her mother and the other her sibling, both of which have never received these treats as that is the only difference in diet and they are both in perfect health.	10	Years	American Pit Bull Terrier	Dog	75	Pound
EON-95129	7/19/2012 18:45	Wagon Train Chicken Jerky Treats	We had a wonderful healthy male dog that moved with us last May from (b) (6) to (b) (6). We had him checked for his health and well being to make a move from our veterinarian in (b) (6). He checked out healthy and had all shots up to date. We arrived in (b) (6) and in just a couple days he became very ill. Vomiting, diahhera, coughing and made loud sounds of pain. We had been giving him Wagon Train chicken jerky treats that he had been eating for a length of time. I rushed him to the emergency veterinarian facility and when we arrived, it was too late to save him. He had went downhill that fast. No one could imagine or believe knowing (b) (6) that he died that fast. To this day, I still cannot get over my losing him. I cry thinking about it. He had not a chance and it wasn't fair that he was taken from us. I know by reading all the fatalities of other dogs who have died from eating the chicken jerky treats, that is what took my (b) (6).						
EON-95128	7/19/2012 18:42	Waggin Trail Jerky tenders	i am not sure how soon after he started to present symptoms but i noticed it within a day with his stool. it was soft and with mucus. it progresed to vomit and he became lethargic. i became alarmed when his stool presented blood. 6/28 stool watery mucos and blood. vomit took to vet. 6/29 doctor changed to soft food diet only and meds. all is normal. 6/30 meds normal one poop. 7/1 meds poop 1 normal 2 big and normal 3 mucus with a bit of blood. 7/2 food meds poop ok 7/3 meds and poop ok . last day of treatment. 7/4 all ok normal 7/5 all ok gave treat 7/6 all ok gave treat 7/7 pooped yellow mucus with grass and later mucus with blood no treat 7/8 no treat all ok 7/9 no treat all ok 7/10-13 no treats traces of blood in stool hard stool 7/14 no more blood in stool food undigested being thrown up 7/15 all ok 7/16 all ok 7/17 threw up food undigested 7/18-19 al is well.	6	Years	Chihuahua	Dog	7.5	Pound

EON-95125	7/19/2012 17:00	waggin trail chicken jerky treats	At approximately 4 years of age our dog was given the waggin trail jerky treats daily for approximately 3 years, perhaps longer however it was at least three years. The dog began having bloody stool and was immediately taken to the vet. An X-ray of his liver revealed his liver was twice the normal size it was supposed to be. His diet was changed to a special medicated diet and his treats were terminated. He has not shown the symptoms since the treats were stopped. His records are maintained at the vet in (b) (6) and would welcome any investigative agency to view the records. I am hoping we caught this in time.	7	Years	Terrier - Yorkshire	Dog	18	Pound
EON-95120	7/19/2012 16:45	milos jerky, waggin tails jerky	all 5 of my dogs had vomiting and bloody stools excessive thirst and fevers loss of appetite apathy my dogs are 13 yr old chihuahua 14 lbs, 8 yr old snauzcher 22 lbs, 7 yr old german shepard 144 lbs, 3 yr old mixed breed 49 lbs, and a 2 yr old boston terrier 16 lbs i bought 2 packs per week of various sizes mainly large ones products were waggin tails jerky, milos jerky and one other brand of jerky plus organic dog biscuits now all they get is the dog biscuits and carrots or green beans they had problems with dry purina dog food so now they eat only pedigree dry foods plus pedigree canned foods as a weekly treat	138732	Years	Chihuahua	Dog	14	Pound
EON-95119	7/19/2012 16:30	Waggin Train Jerky Tenders	(b) (6) stated acting like she could not get settled at bedtime she pottied on the floor and prowled all night took her to vet that morning and they told me she had eaten something toxic maybe antifreeze. We have no antifreeze anywhere around our house. Blood work showed her kidneys and liver were shutting down. They started IV's to flush them out and about 5hrs later she was gone. (b) (6) was my baby and this has upset me so bad not knowing what killed her now to think it might have been the treats she loved every morning kills my soul.	5	Years	Dachshund - Standard Wire-haired	Dog	22	Pound
EON-95118	7/19/2012 16:21	Dingo Chicken Wraps	(b) (6) started vomiting and became very listless. I took him to his vet. They started him on IVs. Said he was having a pancreatic attack. He stayed in hospital 3 days and I would visit. 1st day he did look better, second day not. On the third day they called me to come say goodbye. His kidneys were failing and he died within the hour. He had the chicken treat products. The vet said he had gotten too much protein in his diet and that is what caused the pancreatic attack. But he was on his regular diet except for the treats.	7	Years	Terrier - Yorkshire	Dog	12	Pound
EON-95117	7/19/2012 16:15	Waggin Train Chicken Jerky Tenders	In early spring 2011, (b) (6) developed a sore on his lip and gum region. It progressed and we took him to a vet on reference in March 2011. After a biopsy, it was diagnosed as oral cancer. It progressed and we went to our long-time vet in (b) (6) She examined him, did biopsies and when the results came back, the cancer was into the jaw bone and the aggressive surgery recommended would have left him with half a jaw and very debilitated. In (b) (6), we had to put him to sleep. I struggled with what could have been the cause of this; he and our other dog were healthy, happy and well-cared for. When I heard about the complaints of dogs being sick and some dying from the chicken treats by Waggin Train chicken jerky treats, I was totally convinced that was the cause of Chip's cancer. That was his favorite treat - usually 2 in the morning and 2 in the evening. Would hope the FDA looks long and hard at the greed that promotes profit over any consideration for safety when it comes to these products. My prayer would be no dog suffer like our Chip, and those responsible for such lax practices lose trade privileges....CHINA!	10	Years	Collie - Rough-haired	Dog	109	Pound

EON-95116	7/19/2012 16:06	Waggin Train Jerky Tenders	Waggin Train chicken jerky was her primary treat. Started to see blood in her urine. Took her to (b) (6) for urinalysis and ultra sound. She had numerous kidney stones. Too many to dissolve. She had to have surgery to remove them all. I attribute this kidney problem to the chicken jerky.	3		Griffon - Brussels	Dog	25	Pound
EON-95113	7/19/2012 15:36	WAGGIN TRAIN	I had been giving (b) (6) treats from China on a daily basis as she loved them, i.e., the waggin tail stuff, and she went from well to organ failure(vet said kidney failure) and she never recovered though I had her treated, and she died within 90 days. She was not a young pup but she was healthy and went down fast. I knew something had happened, but did not know what. I recommend no treats at all unless one can know exactly what is in them, and I never will buy anything that comes from China EVER AGAIN!!		Months	Collie - Border	Dog		
EON-95112	7/19/2012 15:30	Waggin Trains	I had given my dog Waggin Train duck jerky in this past with no problems. I gave him chicken jerky and within minutes he starting throwing it up then for several hours continued with dry heaves. So I'm thinking...I'll give him Waggin Train duck jerky, no problems with it but ...same thing happened with the duck jerky. To this day, he will no longer eat any thing poultry and it's been 6 months since his upset stomach issues. He's a hearty eater and not picky. I thought he may have developed some type of allergy or problem digesting poultry until I saw reports about Waggin Trains about 4 months ago. I do believe (b) (6) issues are related to Waggin Trails. I now only feed him Blue Buffalo products and hope they are safe.	11	Years	Shih Tzu	Dog	17	Pound
EON-95111	7/19/2012 15:15	Waggin, Train chicken jerky tenders	After eating the dried chicken jerky made by wagon trail-purchased from walmart or (b) (6), he became extreemly listless, diareaha and did not want to eat; lower abdomen tender. this lasted approx. 1.5wks to 2.5wks. He had only a couple of pieces and had had this item before without any problem. I immed. stopped any further treats, started treating for the diaherria.	3	Years	Mixed (Dog)	Dog	35	Pound

EON-95109	7/19/2012 15:15	Waggin' Train Jerky Tenders	I believe this product contributed to the decline of health (and death) of my Italian Greyhound. He was healthy prior to eating these treats. After he ate these treats for a number of years, he developed cancerous cysts and cancer throughout his body to include: prostate, liver, and bladder. He eventually was euthanized because the cancerous tumors in his bladder and prostate blocked his urethra, prohibiting his ability to urinate. I still have an unopened pack of the treats that I quit giving him when I found out about the issues with the jerky.	13	Years	Greyhound - Italian	Dog	21	Pound
EON-95107	7/19/2012 15:06	Waggin' Train Jerky Tenders	(b) (6) had received chicken jerky treats as a treat periodically up until his unexpected death. Over the period of one day he started acting sick. I took him to the vet and he had to be euthanized because he was in acute kidney failure. Up until this time he had been extremely healthy. His tissue was sent away to rule out antifreeze poisoning since this happened in the winter. The test results came back negative for antifreeze. This occurred in early 2010.	6	Years	American Pit Bull Terrier	Dog	70	Pound
EON-95106	7/19/2012 14:51	Waggin' Train Jerky Tenders	After giving (b) (6) about 3 bags of Chicken and Duck jerky teats (16 oz size) he began shedding hair a lot and his poop was runny and frequent and he vomited a few times. His energy level was down.	8	Years	Terrier - Rat	Dog	10	Pound
EON-95104	7/19/2012 14:36	Waggin' Train Chicken Jerky Tenders	Drinking alot of water, bloated at times, decrease in activity, vomitting, diarrhea off and on. Was put on antibiotics for 30 days became weaker, loss hair to her skin over her complete back area. Went to second vet decided to euthanize.	13	Years	Dachshund (unspecified)	Dog	20	Pound

EON-95101	7/19/2012 14:21	Waggin Trails	(b) (6) was a rescue. He was found with almost no teeth and what he had were abscessed, his hair was thin, and he was definitely malnutrition. I got him in February 2008 and brought him back to health. All teeth were removed, he was neutered, and hair growing back in. His hair was shiny and eyes were bright. Very energetic dog with lots of life. Shortly before getting married he started to loose appetite. I gave him a bland chicken and rice diet, but maintained allowing him to have Waggin Jerky since they were soft and he would eat that. I woke up on (b) (6) to him having bloody stools and vomited all over the house. I took him to vet and later found out that he had kidney failure. I opted to have him euthanized. Prior to that he had just had a check up 3 months prior to giving him those treats and was in good health. I wish I knew these treats could have possibly been the cause... I now cook for my dogs.	8	Years	Terrier - Yorkshire	Dog	6	Pound

EON-95098	7/19/2012 14:15	Waggin Train Jerky Tenders	I am convinced that the Chicken jerky strips from China caused the illness and subsequent death of my 11 year old pit mix, (b) (6). She experienced bloody diarrhea, vomiting and in then end kidney/heart failure. She died (b) (6). Of course I no longer buy them for my other dogs...but she was my baby and she suffered terribly. I know the report says they can't find anything significant...but please keep on looking....maybe too many causes something or the way they're processed...						
EON-95097	7/19/2012 14:15	Chuck Wagon Chicken Jerky Treats	She began having blood in her urine, increased urgency to urinate, loose bowel movements with a mucas consistancy and very weak. Vet would give antibiotics - problem would clear up for a couple of weeks and then come back. Did tests on urine samples - came back with numerous types of bacteria. After this occurring several times over a 6-8 month period vet sent her to the University of Illinois for further testing. They placed her on antibiotics for 8 weeks thinking she was just not on them for a long enough period of time. This also did not work, as soon as she was off of them for about three weeks smyptons came back. Began reading articles about the chicken jerky treats causing deaths and illness in other dogs. (b) (6) had been given the Chuck Wagon brand chicken jerky treats for about 9 months. We stopped the treats in February and the difference in her was amazing. She began being more alert and active after the first two days. She had mild smyptons at the end of March and was given antibiotics for 10 days. She has not had any more problems since.	14	Years	Retriever - Golden	Dog	85	Pound

EON-95096	7/19/2012 14:06	Waggin Train Jerky Tenders	Our dog seemed fine although she had been slowing down as she was getting older. We had purchased and given her the Waggin Trail Jerky Treats often and then stopped because she didn't seem to enjoy them like she had in the past. Approximately the beginning of May of 2012 we purchased a bag of the jerky treats from Sam's Club in (b) (6) started giving her the treats again. A couple days before we left on vacation (May 16th) she didn't seem like herself. After we left our son called us and was very concerned about her. We told him to make an appointment and take her to the Vet. He took her I believe it was on Friday (b) (6) - she was diagnosed kidney failure, problems with her liver and thyroid and they claimed she had a mass in her abdomen. She completely stopped eating on Thursday (b) (6) and we had to have her put to sleep on (b) (6), (b) (6). I believe the treats could have had everything to do with her sudden illness and early death.	10	Years	Coonhound - Black and Tan	Dog	85	Pound

EON-95089	7/19/2012 13:36	Waggin' Train chicken jerky tenders	I have given my dog small amounts of Waggin' Train chicken jerky tenders, sold by Nestle Purina Pet Care on several occasions over the past year and on each occasion the next day she developed severe diarrhea and became very lethargic for a couple days thereafter. I have since stopped giving these treats to my dog and have discarded all the packages.	10	Years	Other Canine/dog	Dog	14	Pound

EON-95088	7/19/2012 13:30	Waggin Train Jerky Tenders	<p>(b) (6) started becoming lethargic and drinking more and then he had diarrhea and began to vomit. He was in extreme abdominal pain and could not lay or sit. This all happened in a matter of days. When we got him in the vet the following morning, he lived through the night but died the next day, Sept of 2011. He had all the signs of bening poisoned. Our vet said he bled to death. My husband and I were always with him. He could not of gotten into anything. I bought the Waggin Train Chicke Jerky Treats at Sam's Club and he really liked them. When I opened the bag he was eating at the time of death I noticed a more potent odor coming from the bag. Those treats don't smell good to start with so I didn't give it much thought. It wasn't until I heard the FDA report in November 2011 that I put 2 and 2 together. We had just gotten a rescue dog and he was eating these treats also. We noticed some diarrhea starting and that day my husband say the article and we stopped feeding the new dog these treats. We now even suspect that our black lab (b) (6) who died in Feb 2010 might have been sickened by these treats. He was allergic to beef, so I he loved the chicken jerky. He has the same symptoms as (b) (6) when he died. Vomiting, Diarrhea and almost stroke like symptoms in about 3 days. (b) (6) was 10 years old and 150 lbs. We just thought it was his time even though he appeared to be very healthy for his age.</p> <p>My husband and I love out pets and treat them like family. (b) (6) s death so soon after losing (b) (6) was devastating to both of us. If it was something we fed them that killed our babies, I want to be able to prevent others from going through this pain.</p> <p>It is too much of a coincidence that this happened to both our dogs like this and after reading the reports of others- ours is too similar to the others. Something in the treats has to be causing this.</p>	3	Years	Terrier - Irish Soft-coated Wheaten	Dog	60	Pound
EON-95087	7/19/2012 13:30	Waggin' Train Wholesome Chicken Jerky Tenders	Used as treats for dog. After several days dog became listless and stopped eating. We took him to the vet and his temperature was 105 degrees. Vet put him on antibiotics and steroids. He seemed slightly better the next evening but by the following morning he couldn't hardly walk. We left him for a couple of hours planning to take him back to vet that afternoon. When we returned the dog had died.	9	Years	Shepherd Dog - German	Dog	88	Pound
EON-95086	7/19/2012 13:30	Waggin' Trails Jerky Treats/Chicken	A few days after giving (b) (6) one treat daily he started to have severe diahrea and vomiting.	3	Years	Shepherd Dog - German	Dog	110	Pound
EON-95085	7/19/2012 13:30	DINGO ORIGINAL RAWHIDE BONE MINIS - 7PK	Our dog (b) (6) has been throwing up for two days (started 7/18/12). She is lethagic and will not eat. I purchased a pack of 7 Dingo brand bones at our local (b) (6) store on 7/15/12. (b) (6) eats a Dingo bone every night (not 7/18/12 as she was too sick). She went to the vet on 7/10/12 and was given a clean bill of health.	1	Years	Bichon Frise	Dog	12	Pound
EON-95084	7/19/2012 13:30	Waggin Train Wholesome Chicken Jerky Tenders	My dogs were fed these treats for the past 2-3 years (b) (6) my oldest dog out of the blue developed a severe kidney infection when she had been in previous excellent health. Every attempt and every medication given to her by my long time vet failed. Even hospitalization and kidney hydration. It resulted in her death 12 days later, (b) (6) (b) (6)			Poodle - Miniature	Dog		
EON-95083	7/19/2012 13:30	Waggin Train Chicken Jerky Strips	I had been giving (b) (6) Waggin Train Chicken treats for years. In February of 2012 he suddenly became ill. He had sudden onset diabetes. I do not know if the treats are what caused this but I have read that there are many reports of kidney failure. Maybe that led to his diabetes and ultimate death. I think further investigations should be conducted. I think that vets should have to report what animals die from so that this sort of thing can be tracked. RIP (b) (6).	12	Years	Spaniel - Cocker American	Dog	44	Pound

EON-95082	7/19/2012 13:21	Waggon Train Chicken Jerky Treats	I noticed that my dog began drinking unusual amounts of water. I thought perhaps she was showing signs of diabetes. I began to closely observe her and discovered over a period of three days that whenever she was given Waggon Train chicken jerky treats, she would drink an entire bowl of water at various times during the day. I stopped giving her the jerky treats and within one day she began consuming a normal amount of water. I have another dog, her brother, and he didn't display any signs of excessive thirst. They were both given treats in the same amount and same time. I sent a note to the company to state my observation and returned the bag to Costco, the place of purchase. This occurred early November, 2011.	8	Years	Dachshund - Miniature	Dog	20	Pound
EON-95080	7/19/2012 13:15	Waggin Train Wholesome Chicken Jerky Tenders	Each time I gave him a chicken Jerky treat, which I purchased at Sam's Wholesale, he would vomit and/or have diarrhea.	3	Years	Pointing Dog - Italian	Dog	85	Pound

EON-95077	7/19/2012 13:06	Waggin Train chicken jerky treats	(b) (6) had become very lethargic, would not play or eat and did not want her favorite treat. We took her to the vet for them to run test on her to be told she was in kidney failure and would probably not survive. We were asked if she had been given grapes the answer was no.	5	Years	Chihuahua	Dog	6	Pound
EON-95076	7/19/2012 13:06	Waggin' Trail Jerky Strips	October of 2011 our Dog, (b) (6) had a seizure, it was approx 10:15 pm. He had never had a seizure before. We thought he was choking on something. We rushed him to the animal hospital. They took tests. The outcome showed his liver enzymes are too high. He had 2 more seizures within 3 to 4 hrs apart. It was devastating to see our pet go thru this. We bought a "Household veterinary book" and spent hours looking for a possible cause to why his enzymes are too high. We can seem to control his seizures mostly with P. Bromide.	8	Years	Pointing Dog - German Short-haired	Dog	180	Pound
EON-95074	7/19/2012 13:00	Waggin Train Chicken Jerky Tenders.	On November, 2011, I had purchased Waggin Train Chicken Jerky Tenders at Walmart. Had given the treat to my Pomeranian, on November 6, 2011. After that day the dog started to have diarrhea, nausea, shaky, dizziness will not eat or drink anything. On November 7, 2011, I had took the the dog to the Veteterinary Hospital. The Vet have ordered and done X-Rays and Blood test on the dog. The results came back showing both kidneys had shut down and the blood test shown there he was porsined .	9	Years	Spitz - German Pomeranian	Dog	11	Pound

She was very weak and lethargic. She always had a good appetite but now started leaving her food and would eat very little.	12	Years	Mixed (Dog)	Dog	113	Pound
EON-95072	7/19/2012 12:57	Waggin Train Chicken Treats Waggin Train Chicken Biscuits	Our Jack Russell terrier has been given the Wagon Train Chicken treats for about two years. Over the past six months the dog has had a very bad cough along with trying to "hack" up nothing. He also is very much lithargic and doesnt want to do anything. These treats have always been purchased at WalMart or Sam's Club.						

EON-95070	7/19/2012 12:51	Wagon treats chicken jerky treats	bought wagon train chicken jerky for my great dane. He had been eating them for about a year. suddenly one day he couldn't get up. A vet came to my home, did tests, lab work, x-rays and a checkup of my dog. The next day she called me saying that his blood level was off the charts, and that his kidneys had failed. He was 7 years old, very healthy, and no physical problems. We had read on the package that these jerky treats were made in china. My wife and I discussed if we should continue feeding our dog these treats. We continued feeding my dog these treats up until he got very very sick. After we put him down, I did some research on the internet about dogs who have suddenly died from kidney failure. I was shocked to find out that many dogs had died feeding their dogs wagon train chicken jerky made in china. I went to Sams Club and told them of the many problems with wagon train chicken jerky treats. I was given a courteous thank you and they are still selling these treats. In my heart, I believe that these treats were the main reason my Great Dane died. These treats need to be removed from the stores until the FDA has found the problem to these treats. They're a ticking time bomb waiting to happen to pet owners who know nothing about this problem until it's too late and their dog(s) die from these treats.								
EON-95069	7/19/2012 12:45	Waggin Train Chicken Jerky Treats	I was "dog-sitting" 2 frequent-staying dogs, and gave them Waggin Train chicken jerky treats. Each of the dogs had varying degrees of diarrhea and vomiting, for about 24-36 hours. No other symptoms were noted. My own dog, the Jack Russell Terrier, had the jerky treats on 2 occasions. She had similar symptoms, plus lethargy for 2-3 days. I immediately discarded the treats upon hearing the information, but thought it important to record this info and pass it along.		8	Years	Terrier - Jack Russell	Dog		20	Pound
EON-95068	7/19/2012 12:45	Waggin Train Chicken Jerky Treats	I gave my dog a Waggin Train Chicken Jerky Treat and she threw up. She threw up a lot! She was subdued and quiet after. I didn't know about the warning at that time or I would have taken her to the vet. I did some research, found out about all the other dogs getting sickened and went back to WalMart in (b) (6) where I bought these treats. They are still being sold there. I spoke with the manager of the store and let him know that dogs are getting sick from the Waggin Train Chicken Jerky Treats and they should not be sold anymore. He said he would look into it. I just don't want any other dogs to get sick or to die.		9	Years	Mixed (Dog)	Dog		55	Pound
EON-95067	7/19/2012 12:42	Waggin Train Chicken Jerky Treats	About 2 years ago I have switched from all other treats to what I thought would be more healthy for both of my dogs, the chicken tenders, which were bought at Costco & Sam's Club (I still have receipts of said purchases.) (b) (6) started having kidney problems and was being tested every half a year but could never find anything more conclusive and the vet costs and the hospital admission/analysis were cost prohibitive. (b) (6) started losing weight and started having seizures so bad that he had to be put down. Vet said it would take about 2 weeks for anti-seizure meds to work and that he would not make it that long. (b) (6) was put down on (b) (6). (b) (6), who's was 10 years old, and (b) (6) brother, started losing weight and developed severe nosebleeds. He's lost so much blood, that the ER vet said he would need a transfusion before the testing, during testing and after. Had to be put down.		13	Years	Mixed (Dog)	Dog		160	Pound

EON-95066	7/19/2012 12:42	Waggin Train Chicken Jerky Tenders	3 evenings in a row, and after our nightly walk, we gave (b) (6), 2 apiece, Wagon Train Chicken tenders treat for a good walk. On the 3rd night (b) (6) began throwing up and had a massive potty accident in the house. (in 4yrs, she's never done that) At that point she became disoriented, drooling uncontrollably, unable to walk without help, no food or water intake for 8 days. We had to force feed water, rice and her meds. She has lost 20 pounds. Blood in her urine and she also lost her voice. 3 emergency trips to the vet, 4 medications, continue to force feed, and just wait and hope for the best. Vet said she was most likely poisoned by something she ate. Our yard is enclosed and (b) (6) only leaves the yard with us, on a leash. She went downhill fast after eating the Wagon Train Chicken treats. Vet says, if she had been smaller, she would of already been dead! Can't these products be pulled from shelves until testing is complete? This issue is certainly not over, far from it. My first concern is, keeping my dog alive, and hopefully with no long term damage to her body or her brain. My second concern, what's going to be done about this? I am fighting mad and hurt for all those pet owners who have already lost their pets or, like myself, struggling to keep mine alive.	4	Years	Great Dane	Dog	150	Pound

EON-95051	7/19/2012 12:00	Waggin' train Jerky tenders	Two days after giving the dog "Waggin" jerky treats, she became violently ill. She had severe black diahrea and was constantly vomiting. She was so weak that could not get up on her feet. She was examined and ex-rayed by the vet and found to have one enlarged kidney. The vet prescribed antibiotics and special canned health food. She would not (or could not) eat the vet supplied food. In fact, she ate absolutely nothing for seven days. All she would do was drink water.	15	Years	Mixed (Dog)	Dog	45	Pound
EON-95048	7/19/2012 11:42	Milo's Kitchen Chicken Jerky Strips Dog Treats	My wife purchased Milo's Chicken Jerky Treats as she felt it was a more natural, healthy treat given our Dog's age (17). Our Dog was VERY healthy for 17 years old. She had just had a full Blood Screening prior to our going on vacation a week back in April. When we returned our Daughter told us our Dog had been vomiting all week. She had lost 20% of her body weight (3 pounds) in one week. Her diet was the same except she had been eating the Jerky Treats for about a month. Her breath was very bad so we took her to the Vet. As she had Dental issues qwe thought it was that. The Vet pulled 4 "questionable" teeth and did another Blood Screening. Her Kidneys had totally shut down. 3 months prior there were no issues. I googled the issue and saw the FDA warning. The Vet and I decided to give her Kidney Medication (Pills and Powder in her food), Change her Diet to Special KD Food and, of course, stop the Jerky Treats. Within 3 weeks her health, weight and energy improved. The Vet did another Blood Screening and was shocked that, although slightly higher than normal, her Kidneys had recovered 90%. (b) (6) is now a very healthy and happy dog again. I contacted Milo's and sent them the treats, medical reports, Blood Test Results and a report from my Vet stating (b) (6) was in perfect health prior to this incident. Milo's sent me a letter stating they could find no contaminate in the treats and blamed the Kidney Failure on the Dental Issue and Age. My Vet disagreed stating if that were the issue she would not have fully recovered Kidney function so quickly after the treats were removed from her diet. Also she showed no signs of Kidney issues, or any other issues, in the Blood Screening taken weeks before the treats were introduced into her diet. Milo's offered me reimbursement for the first Vet visit and Blood Screening (\$130.00) if I signed a waiver. They also, at my insistence, reimbursed me \$5.99 for the treats I mailed them.	17	Years	Mixed (Dog)	Dog	14	Pound

EON-94962	7/18/2012 16:21	by Nature Organics - Organic Turkey with Sweet Potato & Peas	<p>by Nature Organics...Organic Turkey with Sweet Potato & PEAS -</p> <p>I began using this product because my pup has a sensitive digestive system. After an initial trial period, I determined that this product was working well for him. So I began buying the canned food by the case. I began noticing a sever lack of peas in all the cans from the case. I began to worry about a balanced nutritional intake for him....but when then I bought a few cans from the local store the cans were chalk full of peas again....probably got a case from a bad batch. So I ordered 3 more cases online and I'm back to finding zero, one or 2 peas per can.</p> <p>I called the company and their response is "it's a production issue where we cannot determine the quantity of peas that will be in the product you receive". I've been thru many cans where peas are plentiful, however when I started buying by the case it seems certain 'batches or production codes' are missing a VERY KEY ingredient. It says "PEAS" in right there on the front of the can...this is my dog we are talking about....a company has to have control over their production to ensure they are providing a complete and balanced nutritional diet for an important living being!</p> <p>I think they should be held accountable for the recipe they promote for this product, and for providing the nutritional content that they claim it contains.</p>						
EON-94960	7/18/2012 15:21	Milk Bone -Trail Mix (Free Sample)	Dog was given two treats on Friday the 6th , and then the next day noticed dog had diarrhea and vomitting and wouldn't eat. Dog was given another treat in his food to try and get him to eat. We stopped giving the dog the treats but unfortunately he found one treat that had fallen out of the bag. Todate the dog has had only 4 treats from the milk bone -trail mix made by Del - Monte. The dog is still laying around and acting lethargic 5days later. We are planning to take the dog for blood work at the vet hopefully today.	2	Years	Maltese	Dog	6	Pound
EON-94959	7/18/2012 14:36	Fresh pet Select Roasted Meals	The product is called Fresh Pet Select Roasted Meals. I purchased the product and when I got home I removed the extra plastic so i could open the zip lock bag and discovered that the chicken and the brown chucks were cover with mold. So the next day I called the company and a woman called me back and after I told her the problem that happen she dismissed it to just packaging I told her there were no leaks or rips in the package and she told me that there was probably someplace where I can't see it. Either way she didn't seem concerned. These three pound containers with this food cost me 11.00 dollars every time I get one. That is more than I pay for most of the stuff I eat. What bothers me the most is her lack of concern even when I told her of the mold I was a chef for over 20 years and i would have a great concern if I found mold even near food that i was going to serve. So with that experience that I have gotten over the years tells me that people that are producing this are mishandling it in someway to cause this. The lack of concern worries me as well what are we getting and paying for does matter to me and should matter to the Manufacturer. If this is the case then maybe they should not be allowed to sell anything without have safety methods in place						

EON-94955	7/18/2012 13:06	Kingdom Pets All Natural Ingredients CHICKEN JERKY	Nine year old sheltie was given Kingdom Pets All Natural Chciken Jerky treats, purchased at Costco in (b) (6). Within a few days, he developed diahrrea on July 5, 2012. Was seen by vet on July 6, returned July 7 for two night stay with IV fluids and antibiotics and released on Monday, (b) (6). He died that night at home. Eleven year old sheltie developed diahrrea July 12 and was hospitalized for two days with IV fluids and Antibiotics. EON-94842	7/17/2012 10:15	Purina Friskees Ocean Whitefish Dinner Special Diet Classic Pate	I bought the Purina Friskees Special Diet canned food for my cat. It promotes on the cat "Helps maintain urinary tract health by reducing urinary ph. Low magnesium." I thought it would help "maintain" my cats urinary tract health as stated on the can, only to find out from my vet that it can cause other crystals to form. The information on the can is misleading promoting health when in fact it can cause a problem. My cat was healthy when I started feeding him this food. Six months later he had blockage with so much grit/crystals in his bladder, the emergency doctor gave him a prognosis of not much hope for survival, could be a coincidence, but the cat food perhaps should not be on the market or have a better disclaimer stating it's use.	5	Years	Domestic Mediumhair	Cat	15	Pound
EON-94832	7/17/2012 9:57	Waggin tales chicken jerky treats	(b) (6) began vomiting, some of the vomit was bloody and he was very lethargic . I did not feed him for 24 hours and introduced him back to his food but did not give him anymore of the chicken jerky treats.	5	Years	Akita	Dog	100	Pound
EON-94821	7/17/2012 3:27	Purina One Weight Control	I recently had to take my dog to the vet because she got salmonella from the purina one weight dog food,she is still sick and now my other dog is sick and i was told salmonella can be spread to my other animals.						
EON-94820	7/17/2012 1:30	waggin tails jerky treats	When (b) (6) first started eating these jerky treats its like she craved them. She stopped eating her own food or wouldnt eat as much. She would beg for these treats. I began to notice that she was having constipation problems and that she was urinating in her sleep, or just sitting. I thought this was odd because We always let her outside to go potty. I also noticed she was throwing up a foam like substance. I just figured maybe she got into something or ate to much. She became excessively thirsty. I took her to the vet office and didnt think of telling them about these treats because at the time I didnt know. They really didnt do much other than say well it could be a bladder infection or from her spay. She never had these issues before these treats. They put her on pills that she will be on for the rest of her life and she will have to have lab work done evrey few months to check her kidney levels. A few weeks after she stopped eating these treats her urinating in her sleep did cut back. She doesnt get sick like she did. I can only imagine what could of happened if I kept feeding her this crap. My cat have had pieces of this and now has seizures.	4		Shepherd Dog - German	Dog	80	
EON-94818	7/16/2012 21:42	Purina One Smartblend Chicken & Rice, Milo's Kitchen home-style dog treats	I purchased and fed my dog Milo Jerky dog treats (chicken and beef) which we have never used before. He also ate Purina One dog chicken and rice food. He had never been sick before, but after a few weeks he became really sick with diarrhea and yelping in pain, to the point he was pooping bloody stool that stunk. (Ill for about a week before it got that bad). Took him to the doctors and he had an infection in his stomach that required several medications and I had to make homemade food for him. When he finished his meds after 2 weeks, I tried giving him his treats and regular food again and he got sick...AGAIN with the same problems and ended up on another round of medication. This time I have not given him either the dog food or treats and he has remained well. I STILL HAVE SAMPLES OF BOTH THE DOG FOOD AND THE MILO DOG TREATS.	2	Years	Spaniel - Cocker American	Dog	29	Pound

EON-94811	7/16/2012 20:42	Canyon Creek Ranch Natural Duck Tenders	(b) (6) (black lab mix) became less active, drank large amounts of water, urinated copiously (inside and out) and died the end of May, 2010 from kidney failure. Recently saw online reports of similar deaths related to consumption of Canyon Creek Ranch jerky treats. (b) (6) loved them and received several a day during the period of his illness.	10	Years	Other Canine/dog	Dog	75	Pound
EON-94810	7/16/2012 19:12	Waggin' Train Jerky Tenders	Many people have complained to you about the Waggin Train Jerky Tenders. First off, I have no connection with the manufacturers, importers, or resellers of these products. My views are my own personal views. I have been feeding these to my dog for several years. She loves them, and has never had a problem with them. From the reports that I have read, the problem is with the stupid owners who do not know anything about dogs. When they first got the treats, they probably gave the dogs too much at once. They should have given a small amount to see if the dogs had a reaction to it. They probably gave them several of the treats, and it was too much for the dogs. One owner said that when her dog was hurting, she gave it more treats to try and make it happy. If a dog is hurting, the owner should find out what is wrong. Giving the dog more treats was an incredibly stupid thing to do. Those owners killed their own dog, not the food. I read that someone claimed that the treats gave their dog fanconi. NO! Fanconi is generic. A dog gets a susceptibility to it at conception. My own breed, Basenjis, are particularly susceptible to it. The Basenji Club has taken the trouble to identify the DNA marker so that they can test dogs being used for breeding to reduce the likelihood of the disease. You can not catch a DNA marker from eating treats. People should be more careful. Dogs, like people, may be allergic to something, but this does not mean it has to be recalled. I am allergic to eggs. Does this mean that all eggs have to be banned? I urge you to ignore these bleatings of people who know nothing about dogs, and let sensible dog owners continue to give the treats that their dogs love. When I first heard of this stupidity, I bought a very large package of the Jerky Treats to ensure that my dog would continue to be able to enjoy them. Now I realize that more people are complaining, I intend to buy several more large packages to keep my dog happy and healthy.						
EON-94809	7/16/2012 19:00	Waggin' Train Chicken Drumettes	Waggin Train Chicken Drumettes were my pomeranian's favorite treat and I gave them to him frequently. (b) (6) became seriously ill about 10 days ago with pancreatitis and liver failure and has been hospitalized where he is receiving IV fluids, antibiotics, pain medicine and antacids. I just read about the poison treats from China and I seriously believe this is what has made my little dog ill.	9	Years	Other Canine/dog	Dog	20	Pound

EON-94803	7/16/2012 16:30	Waggin Train Wholesome Chicken Jerky StripsTenders	<p>We began feeding out dogs the Waggin Train chicken strips as a treat, because they were low in fat content, this was the only treat we gave our dogs. Our little (b) (6), a 3 year old female long coat chihuahua, started getting lethargic in January. By February she was completely ill and not eating. She was rushed to the vet on a Saturday morning. The vet, (b) (6) in (b) (6) (b) (6) found a bowel obstruction and preformed surgery. During surgery they also found a white plaque on her pancreas and took a sample. She died on Wednesday. She was in perfect health prior to this and was vet checked, including blood tests all the time. She died of severe pancreatitis, our believe it is from the chicken jerky strips.</p> <p>Also it sickened out 2 year (b) (6), a Yorkie Terrier. (b) (6) also died several weeks ago from cancer, which we also believe was related to the Waggin Train chicken jerky strips.</p>	3.4	Years	Chihuahua	Dog	5.5	Pound	
EON-94802	7/16/2012 15:57	Waggin' Train Jerky Tenders Made from chicken Made in China	Fed (b) (6) Waggin' Train Jerky Tenders made from chicken in China. Within a span of 1 1/2 hours she was totally paralyzed and unable to lift her head.	3	Years	Poodle - Medium size	Dog	27	Pound	

EON-94801	7/16/2012 15:51	Waggin' Tails Chicken Strips	<p>On the morning of (b) (6) owner called in to report dog was refusing to eat and was unable to get thyroid meds in the dog, said the dog would drink water but then vomit it back up. Owner was advised to NPO dog for 12 hrs and then call in the following day with an update.</p> <p>(b) (6) owner called in to report no real change in dogs status said has with held food and water. Owner is not going to be home much today so will offer food and water when gets home. When owner did return home offered dog a "hotdog" (dog eats mostly human food not regular dog food) to which she "turned her nose up at" dog also was refusing again to take thyroid meds. Owner states will try to crush thyroid meds and mix with water and syringe it into the dog. Owner called again around 6pm and found dog on the porch just laying there not moving owner thought dog was deceased, when picked up the dog was breathing then about 1/2 hr later dog started vomiting had blood in it and then passed away.</p>	7	Years	Spitz - German Pomeranian	Dog	10.6	Pound
EON-94799	7/16/2012 15:27	Waggin' Train Wholesome Chicken Jerky Tenders	<p>(b) (6) stopped eating normally, and acted like everything smelled bad (stomach ache?) and mentioned to vet at check up (shots) and he said he will eat when he gets hungry it could just be a growing thing. Month later, still fighting to get him to eat, occasional diarrhea, then had explosive diarrhea. Took him to the vet again, thought it was something he ate or he ate something poisonous and vet gave some pills for diarrhea and stomach pain along with antibiotics in case it was an infection. Diarrhea subsided with pills, but still no appetite and lethargic. He normally had a few treats a day for the last several months, but this increased when we were doing anything we could to get something in him. Went back to vet, and tried several different types of food. Still won't eat so went to a different vet for second opinion. This vet went through EVERYTHING (b) (6) ate for last few weeks, x-rays and blood tests. He has a poor developed liver (small) and platelets were low, but as soon as she saw the jerky treats she said to stop IMMEDIATELY. Vet had had previous owners with problems and deaths I believe from suspect treats. Treated (b) (6) with more medications, put on prescription food and two weeks later he is just starting to eat again. Over the course of this problem we have spent over a thousand dollars and stressed out over trying to get him to eat daily because he has lost over 10 pounds since it began. Being just a puppy, this stage of development is crucial and to have this affect him and possibly caused liver damage during development, I am extremely upset. We hope stopping the treats was enough and he has eaten the last couple days so hopefully he will get better.</p>	1.5	Years	Dobermann	Dog	68	Pound

I was broke.</p>	7	Years	Griffon - Brussels	Dog	24	Pound

EON-94790	7/16/2012 14:36	Waggin Train Chicken Jerky	<p>We own the Mother (b) (6) and Son (b) (6). Costco sold Waggin Train chicken jerky which looked like a great treat to use as a "good bye we are going to work, see you latter in the afternoon!". The bag said once a day was sufficient and that is what we did from the time we saw Costco selling the product until they stopped selling the product. We were upset that it was eliminated from our choice of treats because it worked so well. We had NO idea why it was pulled from the shelves. We had not heard any word at all. As time went on, we had to find another treat. Within some time latter we inherited one of the Sons back. His name is (b) (6). At this time, we were living in (b) (6), but in the process of moving to (b) (6). After we finally settled in, we noticed (b) (6) doing some strange things with a new rug we had bought. Her vulva was enlarged so we brought her to the Vets. They thought she might have an allergy but found an infection in her toe which they wanted to treat with some type of antibiotic but it had to be a specific type. So they did a blood test first. Because of her vulva being enlarged, the Vet thought it would be a good idea to take a urine sample also. When we got the results back we were in shock to find out that (b) (6) had Kidney disease. We immediately put her on medications and Kidney disease food. We had a hard time believing that this was true so we went to another Vet here in (b) (6) to get a second opinion. He tested (b) (6) and (b) (6) because we had no reason to believe (b) (6) had this problem. (b) (6) reading came back extremely higher than we expected and (b) (6) did have it too. That was a tear jerker because he was my baby. I have no children and we have had him since he was born. (b) (6) procreatenine ratio was 13 and (b) (6) was 4. This Vet suggested we take them to a clinic testing in (b) (6) and tried to get us connected to the doctors there. We went back to our Vet and explained what we did and she had no problem with it and knew the doctors doing the clinic testing in (b) (6). She got on the phone and talked with them immediately. In the meantime we suggested testing (b) (6) to make sure it was not hereditary. We also called my husband's son who had one of (b) (6) Daughter's to see if she had kidney disease. They had her tested and she was fine. (They did NOT give her chicken jerkey as treats.) Our Vet tested (b) (6) and he did not have Kidney Disease so we knew it was not hereditary. That is when our Vet said it could be from chicken jerky. We said what are you talking about? She told us about other people have problems with their dogs and chicken jerky. I never really looked it up or anything until two or three weeks ago when a friend of mine sent me an email about his german shephard. I was going through the whole email and there was a bunch of stuff and then I saw this article about Waggin Train and I remembered that was the product we used to feed the dogs!!!! I tried to contact the people putting in a complaint with Walmart but we didn't buy from Walmart we bought from Costco. Then just this past weekend we were in Costco and low and behold, there was a bag of Waggin Train duck jerky at Costco and I said to my</p>	10.5	Years	Pinscher - Miniature	Dog	20	Pound

EON-94745	7/16/2012 12:51	Waggin' Train Chicken Jerky Treat	<p>My three Jack Russell terriers (all of which are six years of age) were in perfect health and had no medical record of illness.</p> <p>All of them became violently ill shortly after consuming Waggin' Train chicken jerky treats produced by Nestle Purina.</p> <p>This was the first time any of my three Jack Russell terriers had EVER been sick. None of them had any medical history of EVER being ill before.</p> <p>And just a short time after eating the Waggin Train chicken jerky treats by Nestle Purina they were violently ill. Fortunately I gave them a lot of water and they recovered. I threw out the remainder of the bag of chicken jerky treats. I think the only reason they didn't require emergency medical treatment or die is because I split a single chicken jerky treat between all three dogs so they only consumed a small bit. But the chicken jerky treats must have been poisoned.</p> <p>Let me stress again my dogs have never been sick including one I owned for a full six years (the others for four and three years) and became violently ill for the first time after eating the chicken jerky treats.</p> <p>These treats should be banned from the market. Nestle Purina should cut off its supplier of chicken meat.</p> <p>What if a young child or baby had accidentally handled or eaten the chicken jerky treat? That child or baby would have died.</p>	6	Years	Terrier - Jack Russell	Dog		

EON-94676	7/15/2012 17:45	Waggin Train Chicken Jerky tenders Canyon Creek Ranch Chicken Tenders Milo's Kitchen Chicken Jerky treats	I have been giving my dogs these treats (Waggin Train, Milo's kitchen, Canyon Creek) for about 2 years until June 12, 2012. I only gave my dog the recommended amount, (i.e., 1 treat per day based on the size of my dog). Until recently, my dog didn't exhibit obvious signs to me that something was wrong with him. But about 2 months ago, May 7, 2012, my dog suddenly started having diarrhea and wasn't eating or drinking water. It went away after 3 or 4 days (I believe, only because he wasn't eating anything, not the treats or his dog food). About 2 weeks later, after he had resumed eating his dog food and these dog treats, the same thing happened again, but it was worse this time. This time he needed to go relieve himself due to the diarrhea, 5 times in one day. This bout of diarrhea again last 3-4 days. I stayed home with him and was going to take him to the vet if he didn't begin to feel better after 5 days. He did get better. By this time (right around Memorial Day), I had run out of treats and hadn't had the chance to buy more yet. I bought another bag of Waggin train chicken jerky treats on/around June 9, as I had done about every month to every month and a half for the past 2 years. I began giving him a treat/day again, until June 12, 2012. On June 12, 2012, I received an email from a friend of mine (also a dog lover/owner). This email was a video clip from a local news program in Atlanta, GA regarding the death of dogs due to dog jerky treats manufactured in China. I quickly determined that I had been feeding these same treats to my dog and immediately threw out the relatively new bag of treats. I also came to your website and did further research. My research yielded many symptoms that I didn't associate with any one thing at the time, but now I have concluded that those symptoms were directly related to these dog treats that are made in China. The frequent urination, diarrhea, vomiting, some blood in his stool. My dog has experienced all of this. I am thankful and feel quite blessed that my dog has not suffered any more serious health problems as a result of these treats. I also feel guilty that I fed my dog treats that were harming him, although I wasn't aware. Warnings need to be placed on the packaging, or the treats should be recalled. At the very least, people should be made aware of what is going on. Many people still don't use the internet or read all their emails. If it weren't for a close dog lover friend of mine sending me the video and told me to view it, I can't help but wonder if the last part of my story would have turned out drastically different and upsetting. I now feed him either home made chicken jerky treats or treats that are truly all natural and made in America (TriPom Chews) and he is happy, healthy & thriving and I'm so thankful.	11.5	Years	Havanese	Dog	11	Pound

EON-94578	7/12/2012 14:36	Cadet Gourmet Duck Breast	Since we started feeding these treats to our dog (2-4 a day), she has been wetting the bed a few times a day. We took her to the vet and, after her urine was testing, it was discovered that her kidneys are functioning at below 30%. I saw a posting that Waggin' Train Duck Breast treats were suspected of causing renal failure and I've seen other reports that Cadet treats have been linked to renal failure in dogs.	13	Years	Harrier	Dog	39	Pound

EON-94577	7/12/2012 14:27	Purina Pro Plan Urinary Tract Health Formula	I recently purchased Purina Pro Plan Urinary Tract for my cats, I have had my cats on the regular purina one for over a year but thought I should trade to this one because it had more nutritional value. My cat (b) (6) ate a little of it and a few hrs later wasn't acting the same he was lethargic and sluggish, a day later her started to urinate blood. I thought that maybe he was getting a UTI after doing some research. He refused to touch the food after only trying it one time. My other cat (b) (6) also refused to eat it but finally ate it last night (07-11-12) later and within a few minutes threw it up. I decided to check the food because (b) (6) has always been the one who isn't picky about his food. In the food I found dead and dried up maggots and nats. I quickly figured out why the cats were snubbing the food, I had to look very close to find them. I then decided to go through the 16lb bag of food and the further I dug the more I found. I immediately threw out the food, bowl and took the bag outsid for fear that their might be eggs in the food. I have also taken pictures. I sent an email late last night to Purina about this issue (b) (6) is still having issues of being lethargic and cries when you pick him up. I am taking him to see a Vet today. (b) (6) seems to be stable.	4	Years	Mixed (Cat)	Cat	6	Pound

EON-94554	7/11/2012 23:27	Chewmasters Chicken strips	Our dog has been given Chewmasters Chicken strip product (Costco) for many years, on average one strip feed per day. Just recently, she had developed her illness. She showed signs or Hypothyroidism, and low level Renal failure in April during an annual blood test/check-up. She was given Thyroid hormone pills to stabilize her levels. On follow up checks, she showed high levels of creatinine in her blood, high protein levels in her urine (tested for bladder infection, which came back negative). The levels did drop down, but then she began tired and rested. Her urination was normal, but then started to become finicky eater, not wanting her normal dog food. She was hospitalized for 3 days, with IV hook-up to flush kidneys, again, she recovered her levels somewaht. When brought back home, she just worsened. She began to vomit, and have diarrhea, was unable to eat, only drinking water. on her last days, she only wanted water, and then she wasn't drinking at all. Our Vet: (b) (6)	7.5	Years	Sheepdog - Shetland	Dog	37	Pound

EON-94546	7/11/2012 21:15	Blue Buffalo Chicken and Brown Rice	We decided to switch our 9yr rotti/shepard mix to Blue Buffalo Chicken and Brown Rice because it is supposed to be natural. She did very well on her first bag of food. she had no problems at all. We decided to buy a second bag. After the 2nd day of food from the new bag she became seriously ill with watery, bloody diarrhea and vomiting, she had very high respirations and could hardly catch her breath at rest. The diarrhea continued for about a day and a half. I put her on a 24hr fast, then a bland diet. today (2 weeks later) she feels better and stools returning to normal. I did not think she was going to make it through the night. By the time her doctor's appt came she was feeling better but still had soft stools. I contacted Blue Buffalo and reported the incident. They told me that there had been no other complaints or recalls regarding this food. She told me to exchange the food for another bag(Blue Buffalo) with a different expiration date. I Exchanged the food for my previous brand of food and reported the incident to Pet Supplies Plus where I purchased the food. I will never buy another Blue Buffalo product.	9	Years	Mixed (Dog)	Dog	130	Pound

EON-94445	7/9/2012 15:36	Waggin Train Big Blast Chicken Jerky Wrapped Pork Skin Twists with Chicken Liver Center	(b) (6) was her normal self on Saturday (June 30, 2012). When we got up on Sunday morning (b) (6), she wouldn't eat. Later that morning she started vomiting. She even vomited water! I called the vet first thing Monday morning (b) (6) and got her in. Vet thought at first it was pancreatitis. (b) (6) didn't get any better, so on (b) (6), my vet asked me if she could xray (b) (6). Xray showed that (b) (6) was full of fluid. The vet got some of the fluid out and said it had blood mixed in and then the vet asked me if she could open (b) (6) up to see what was wrong. When she opened her up, the vet said (b) (6) liver was copper colored and had slotches all over it and that her gall bladder was full of a black tar like substance. The vet asked me what kind of treats I had been feeding (b) (6) and where the treats were made. When I told her I had a bag of Waggin Train chicken wraps that were made in China - she said she couldn't be 100% sure, but she thinks that is what killed my dog. She (the vet) sent off some biopsies she took from my little dogs liver. We are waiting on the results.	4	Years	Mixed (Dog)	Dog	15	Pound
EON-94443	7/9/2012 14:30	Hills Veterinary Prescription Diet i/d feline Gastrointestinal Health , Hills Veterinary Prescription Diet y/d Feline Thyroid Health	Indoor only cat began losing weight in 2006 (peak weight was 8 pounds). From 2004 to 2011 she exclusively ate premium Purina wet and dry food. In 2011 she weighed 5 pounds and was diagnosed as hyperthyroid. In March 2011 she was prescribed and began exclusively eating Hills Veterinary Prescription Diet i/d wet and dry food and was prescribed one 2.5 mg methimazole compounded tuna chewable a day for hyperthyroidism. Corn gluten is an ingredient in Hills i/d food. In March 2012 she began eating Hills dry y/d food in place of the Hills dry i/d food -- and continued to also eat the wet Hills i/d food. Her March 2012 weight was 5 pounds and her thyroid levels were reported to be 1.1 (normal range). On (b) (6) she was weak and ill and was diagnosed in complete kidney failure, weighed 3.01 pounds and was very ill in a pre-coma. She passed away (b) (6) (b) (6) Corn gluten is the first ingredient listed in Hills Veterinary Prescription diet dry y/d food. This cat was very well cared for at home and received regular veterinary care. Can the FDA please examine the corn gluten that is used in Hills cat food, and in other brands of pet food. In the last few days, this little cat would not eat any dry or wet food and just layed around her water bowl, weak and sick.	10	Years	Domestic Shorthair	Cat	3	Pound
EON-94437	7/8/2012 16:36	Waggin Train Wholesome Chicken Jerky Tenders	Softer stools began to occur during the first few days of ingesting Waggin Train chicken jerky tenders. Then stools became looser (diarrhea like) until my dog began to void very thin liquidy stools numerous times during the day on 7-1-12. The stools would blast out of him uncontrollably. He also vomited 4 times in a span of 3 hours and was extremely lethargic on 7-2-12 and was taken to the vet. He was given sodium chloride 0.9% 1000cc, Famotidine 20mg/2cc (injectable), Ondansetron (Zofran) injectable 2mg/cc, and Metronidazole (Flagyl) 500mg 30 tablets. The Waggin Train package had a net weight of 3.5 oz. My dog was given 2 ozs. over the span of a few days. We still have the original package with @ 1.5 ozs. left of the jerky.	11	Years	Retriever - Labrador	Dog	110	Pound

EON-94432	7/7/2012 12:54	Waggin Train chicken jerky treats	I gave my American Eskimo and my Doberman Waggin Train chicken jerky treats I had purchased from Sams club. Within hours of receiving the treats both animals became listless and began have massive diarrhea with bright red blood in it. They both had to be treated for the diarrhea and it was only after talking to friends about how sick my dogs were and they asked me if I had given them anything did I find out about the treats causing many animals to become sick and die from renal failure etc. I am thankful my 2 had an immediate reaction and I had not been giving them the treats for weeks. I returned the product to Sams and printed off information about the problems they were causing and showed the info to the customer service rep at Sams who said she would notify mgmt. My 2 dogs are long dead from cancer..both died within 3 mos of each other and I wonder what other products may have caused problems with them to die so suddenly and within months of each other. There really needs to be something done about treats being manufactured in China and if you can't stop them from being sold, then at least make them come with a warning on their label. These pets are part of our family and should be protected. And btw, Sams still carries waggin train and are causing other animals to become sick and die. Guess all that matters is bottom line to them which is why I no longer buy any dog products from them or Walmart. PLEASE consider banning these products or at least make them have a warning label. Thank you!	11	Years	Dobermann	Dog	70	Pound

EON-94426	7/6/2012 21:15	Milo's Kitchen home-style dog treats: Chicken Jerky	Dog is consistently offered dry food and clean water along with a variety of "treats" including rawhide chews, Milk Bones, Beggin' Strips, and Milo's Chicken Jerky. With no obvious change in diet/exposure, dog had bloody diarrhea inside house overnight. Dog showed lethargy and progressed to not eating within 24 hours along with frequent (every 2-3 hours) diarrhea and infrequent (once or twice) vomiting. Dog regained energy and began eating again approximately 24 hours later. Chicken Jerky was given as a treat to entice dog to eat - no other treats were given but dry dog food was offered. Diarrhea persisted. 48 hours after first symptoms inside soiling happened again and dog vomited, progressing rapidly to not eating and extreme lethargy. Took dog to vet -- no parasites in stool and no fever. Given broad spectrum antibiotic (orally) and put on diet of rice and bland wet dog food; no other treatment given. Dog regained energy within 2-4 hours of vet visit and began eating. Diarrhea resolved completely within 48 hours after vet visit. No more chicken jerky has been given (all other treats and food have) and symptoms have not recurred.	3	Years	Mixed (Dog)	Dog	65	Pound	

EON-94412	7/6/2012 14:00	Waggin'Train Wholesome Chicken Jerky Tenders	<p>Purchased a container (plastic bag) of Waggin' Train "Wholesome" Chicken Jerky Tenders, Lot # P1CA3568A, BBD of 061612 (and this was prior to that date), and found an unidentified object in one of the tenders. Ut was a 16 oz (453g) bag with a product code of 8 07020 44416 2. Manufactured for & distribed by Waggin'Train, LLC. of Anderson, South Carolina 29623.</p> <p>They claim to be passionate about dogs, but they failed to respond to my complaint about this issue. I emailed them at www.waggintrainbrand.com right after I found this object. This was prior to my learning that this was a repeated offense by them, and that animals were dying due to this.</p> <p>The object appears to be a black and tan piece of matter, about 1/4th of an inch long and 1/8th of an inch wide. I have photographs of this object saved, and still have the actual treat and bag it was in.</p>						
EON-94393	7/6/2012 11:00	Canyon Creek Chicken Tenders Dog Treats	<p>(b) (6) experienced increased urination and thirst. I took him to the vet after seeing his increased thirst and after his being unable to control his bladder, even though he was a housebroken dog. The vet ran a series of tests to determine if he had diabetes, cushings disease and/or urinary tract infections. He also ran ultrasounds All tests proved negative. He ultimately had surgery on a cyst which the vet thought may have been causing the problem but it turned out not to be the case. While undergoing the testing and many trips to the vet I had noticed someone placed a little handwritten notice on the bulletin board at the vet's office about chicken jerky treats being dangerous to pets. I had not heard of any other recall notice or warnings about the treats and offered two or three to each of my dogs each day. I shopped at PetCo and PetSmart on a biweekly basis, and no warning was ever issued, although at PetSmart the tenders were always out of stock. I thought they were popular - not a health hazard to my beloved pet and had to look for alternative treats. It was upon doing this that I noticed my pet no longer had any sign of problem. I hope other families and dogs don't have to go through this. Something should be done. These treats cost almost \$30 per 30 oz bag, and I don't believe they are safe. Furthermore, I know they were the cause of my dog's problems. Thousands of dollars later, I know the reason. How many dogs must lose their lives before something is done about this?</p>	6	Years	Schnauzer - Miniature	Dog	15	Pound
EON-94371	7/5/2012 16:00	Purina Friskies Meaty Bits Variety Pack Chicken Dinner in Gravy With Beef In Gravy Gourmet Grill	<p>Our male cat got diarrhea and was in and out of the litter box and at times would just go and sit in the litter box. He has never done this before. Then he vomited, this being all in the same day. We had feed him cat food the night before but had started using the Meaty Bits with Beef in Gravy. We had been using the chicken dinner. His vomit was not like his normal hair ball or when he eats to fast and I can still see whole cat food in his vomit. Sorry for being so descriptive. His vomit was had substance to it but was watery as well and smell really bad. I figured he had got into something outside and or a combination of the heat. The next day he was better and we feed him same catfood the next night. We skipped the morning feeding just because we knew he hadn't been feeling well on his stomach so we stuck to his dry food. Once again he got sick just like before. We waited a few days and decided to use the Gourmet Grill blend. This time my female cat got sick same way my male cat did. They had not been outside since the first episode started. My cats do how hairballls often and do eat their food to fast and vomit up full pieces of cat food. But this was not either of these. They never get diarrhea.</p>	14	Years	Domestic Longhair	Cat	12	Pound

EON-94360	7/5/2012 13:54	Meow Mix Tender Favorites Wet Food	<p>I have used meow mix products for YEARS. My cat is 6 years old, she eats the meow mix dry food and wet food. The cat I had before her was 15 and she used the same as long as I can remember. I have always loved meow mix because I felt I could trust the food that was made by Meow Mix. Today I found a bone in my cats wet food. It was 1.5 inches long and it was very sharp on one end. It was about half and inch wide. If my cat tried to eat this, it would have tore her insides up! I am so disgusted and appalled with Meow Mix. I am informing all my fellow cat lovers out there to discontinue Meow Mix use immediately. My local store will also be contacted as well. I will be doing whatever I can to make sure something is done because our animals are our pets but they are our family as well! We would never allow a bone to be found in our food, so why would it be okay for your animals??</p>						
EON-94356	7/5/2012 13:24	Fancy Feast Tender Beef Feast Classic Gourmet Cat Food	<p>This has now happened twice with this same type of food, which is what is prompting me to report it. My cat has been eating Fancy Feast for years (the same flavors) and has never had a problem. Since I purchase the food regularly, I utilize Amazon's "subscribe & save" program, where they send regular shipments. I received a new shipment of "Tender Beef Feast" a couple days ago, and gave my cat a can from the new shipment this morning. He ate some, and within the hour he started to vomit violently. He threw up three times. Granted, cats are known to throw up from time to time, so I gave it the benefit of the doubt. A few hours later, he went back and had a little more food. Again, within an hour he was throwing up again (twice this time). The exact same thing happened once before (again with the Tender Beef Feast) 2-3 months ago (end of April). I'm concerned that there might be a problem with this food. My cat has been eating this food for years and has NEVER had a problem until now.</p> <p>I reported the problem to both Amazon and to Purina. I searched online and found some similar reports / postings -- i.e. people reporting their cats throwing up after eating Fancy Feast beef food (but only the beef)....but I have not seen any specific recalls for Fancy Feast.</p>	10	Years	Mixed (Cat)	Cat	18	Pound

EON-94347	7/5/2012 11:09	Beneful Healthy Weight	<p>I purchased new bag of Beneful Healthy Weight and began feeding 5 of my 6 dogs. The sixth eats Royal Canin. The first day of feeding was strange because none of the 5 dogs finished their usual 1 cup of dog food. The following day, they also left food in the bowls which was strange. The 3rd day of feeding Beneful Healthy Weight was the same but all 5 were seen eating grass in my fenced-in backyard. I don't use any pesticides, fertilizers or any other chemicals in the backyard so I wasn't concerned about the grass but began to be concerned because I had never seen all 5 eating grass before this day. In fact, I can't remember the last time any of them did this. The dogs were belching and experiencing gas during that evening. The 4th day was when (b) (6) began vomiting. By midafternoon, the other 4 dogs also vomited once or twice. The vomit was foamy on top with a thick liquid underneath that was bloody. (b) (6) vomited 7-8 times and showed signs of pain and distress. I rushed him to the animal hospital at midnight. He was admitted for 4 days and treated for acute pancreatitis. The blood panel indicated that his liver had experienced a toxin but the enzyme counts did not support a diabetic related issue. The doctors said that they would expect an enzyme level near 6,600 for a diabetic related pancreatic condition but his count was 3,300. Based on the vomit I had collected, his level of dehydration, his general conditions over those 4 days and the results of his blood work, they indicated that he had consumed a toxin.</p> <p>I began searching the web to see if anyone else was experiencing the same symptoms and found over a 100 reports of dogs eating Beneful brands (all kinds under this name) who had experienced the exact same type of vomiting with blood and foam. Those who had their pets examined all indicated a pancreatic-like condition. More than half died.</p>	5	Years	Terrier - Jack Russell	Dog	23	Pound
EON-94344	7/4/2012 16:39	Waggin' Train Jerky Tenders	<p>Waggin' Train Jerky Tenders were supposed to be pulled from shelves months ago, but I just purchased a bag from the walmart in (b) (6) on (b) (6). Here's the link to the article:</p> <p>http://vitals.msnbc.msn.com/_news/2012/03/13/10657635-3-big-brands-may-be-tied-to-chicken-jerky-illness-in-dogs-fda-records-show?lite</p> <p>I just adopted a puppy 2 months ago, and purchased this treat thinking it would be a nice new thing for her. EON-94335	7/3/2012 20:30	Waggin Train Wholesome Chicken Jerky Tenders	We boarded our lab during a family vacation. The kennel we use is the only kennel he has ever been boarded at. This is the 6th time we have boarded and have had no prior incidents of any illness whatsoever. The only difference this time is that we bought a package of Waggin Train chicken jerky treats to be given during the stay. 2 days prior to our return the kennel called to notify us of loose, bloody stool. This continued on our return. We have since taken (b) (6) to the vet who is concerned but cannot cite a specific cause. The vet gave me an article describing all the issues with jerky treats that I was unaware of prior to the purchase of the Waggin Train product.	4	Years	Retriever - Labrador	Dog	70	Pound

EON-94330	7/3/2012 15:15	Waggin Wheel Chicken Jerky Treats	Back in October our dog was given Waggin Train Chicken Jerky treats and got severely sick. He was taken to the animal ER and vet on several occasions and they could not figure out what was wrong with him. We thought he was going to die. After weeks of him suffering with stomach pain, vomiting, not eating or sleeping he finally did improve. Then a few days ago he was given the same jerky treat by my husband and immediately got sick with the same symptoms the very next day. After reading on line several complaints about these treats I believe that he has gotten sick and suffered simply from eating a dog treat. We have spent thousands of dollars to get him well the first time only to have him get sick again. Something needs to be done about this before more animals suffer and die from this so called "healthy" treats.	4	Years	Terrier - Yorkshire	Dog	11	Pound
EON-94329	7/3/2012 15:09	Dogswell Happy Hip Chicken Breast Glucosamine & Chondroitin	Dog vomited about 6 hours after giving him a Happy Hips treat, he had diarrhea, would not eat, and drank excessive amounts of water. EON-94281	7/1/2012 14:15	Natural Balance Ocean Fish	<p>After being sold a can of pet food that I didn't notice was expired by 2 years, I fed it to my pet and his health changed over night from excellent to lethargic. He then developed a fever so we took him to an emergency clinic (b) (6) where they noticed tenderness of the kidneys, the fever and dehydration. After giving him something to reduce the fever and fluids we took (b) (6) home and he seemed to be recovering, but we still took him to our regular vet the next morning just to make sure everything was ok. The vet ran some blood work that showed his kidneys were a bit off from the infection but nothing that was life threatening and easily fixed with antibiotics. After a few days (June 29th 2012) we took him back to the vet because the fever had returned and he was not eating and was losing weight rapidly. After being given a new antibiotic we took (b) (6) back home where he seemed to have no energy at all and could not support weight on his back legs. That is when we learned of the recall on the Natural Balance Ocean Fish for Melamine contamination and gave him the medication as indicated. The next day I woke up to him laying in his own urine so I attempted to give him a bath to clean off the urine and he began to have what seemed like short convulsions and began salivating heavily from his mouth. I took him to the vet right after that and the doctor did blood work relieving his kidneys, liver, and bladder were failing. All his symptoms were lethargic, loss of appetite, constant drinking, dehydration, weakness through out the body and tenderness in the kidneys. The vet felt he was in a lot of pain so we decided to euthanize so he did not have to suffer anymore.</p> <p>Natural Balance is a company that advertises its food as something design for the pets over all health but they buy ingredients from China containing Melamine just to save a few bucks at the expense of the animals life. (b) (6) was not just my cat but my best friend for the past 18 years, the amount of pain I am in right now is unbearable and its all thanks to the Natural Balance company.</p>	17	Years	Domestic Longhair	Cat	8	Pound
EON-94268	6/30/2012 18:21	Purina Fancy Feast Classic Chicken Feast	<p>Have been feeding two indoor cats Fancy Feast Classic Chicken wet cat food for at least a year. One cat (b) (6) developed symptoms of lethargy, vomiting and stopped eating completely. Required vet visit which cost \$175. Required antibiotic, anti nausea vaccine, special wet food diet. After this cat visited the vet, the other cat walked away from the food bowl and would not eat it on several occasions. Both cats started walking away from the food without even trying it which is highly unusual. I opened a can from a box i purchased at a different time and the cats began to eat it. I am of the opinion that something is wrong with a certain batch of this wet classic chicken flavored canned food. It is the weekend, and i sent an e mail to the manufacturer, purina.</p>	1	Years	Ragdoll	Cat	6	Pound

EON-94267	6/30/2012 13:30	Canyon Creek Ranch Brand Chicken Breast Hip & Joint with Glucosamine and Chondroitin Sulfate Flavored with Ginger Root & Alfalfa Extracts For Adult Dogs Only	I was running out of Happy Hips, and purchased Canyon Creek Ranch chicken strips for hip & joint with glucosamine and chondroitin sulfate at Petsmart on June 11. I didn't start feeding the dog this product until later in the week. I didn't make the connection with this product until she had experienced two days of loose bowel movements, which I attributed to having given her Meloxicam twice within a 24-hour period on June 15 (at 6 a.m. and 7 p.m.). My son came home for lunch on June 18 and called me to say that our dog had diarrhea, which he partially cleaned up. When I got home, she had relieved herself on her bed and several spots in the house. This is very unusual, even though she's an older dog. The feces were the consistency of yogurt. I didn't give her Meloxicam that evening because I thought her system was reacting to the double dose of Meloxicam. I did give her chicken strips that evening. Overnight, she had two accidents in the house. During the day on June 19, she also relieved herself in the house, despite being let out at midday. I decided that it might be the chicken strips, since that was the only new food I had introduced since she started getting sick. She woke me up four times in early morning on June 20. I called my vet's office and described her symptoms. The diarrhea had worsened but there didn't appear to be any blood or dark stools. She also was eating fairly well. I took a stool sample in that morning. On the morning of June 21, (b) (6), my vet, called to tell me that the test results came back negative for parasites. She suggested some dietary changes and prescribed Diawin to give her for three days. Since she didn't appear to be listless and had an appetite, she recommended that we wait to do further tests. I started the medication on Thursday evening and finished it Sunday morning (dosage was every 12 hours). The dog seemed to at least be able to control her urge to squat on Friday, June 22. Overnight, though, she had very watery diarrhea and soiled much of my carpet upstairs. I kept her downstairs where it's easier to clean up (wood floor) and steam-cleaned the carpet. She continued to have accidents over the weekend (June 23-24) and through midday on June 25. I dropped off another stool sample at my vet's office the morning of June 25. Later that evening, though, she had no further accidents and didn't have the constant discharge she had for the prior 2-3 days. She appeared to be back to normal by Tuesday, but continued to have loose stools. She had an accident in the house on Thursday, June 28, but seems to feel normal. PLEASE NOTE: My vet had a stool sample tested and consulted with me on the phone. She didn't, however, examine my dog.	13	Years	Shepherd Dog - Australian	Dog	60	Pound
EON-94262	6/29/2012 18:15	Waggin'train wholesome chicken jerky tenders	(b) (6) had diarrhea that got worse. I took him to the vet. They asked what type of food/treats we were giving him. I told them chicken jerky strips. They said it was probably the jerky strips and to stop feeding them to him. They were unable to take a stool sample as he had no solid feces. They prescribed antibiotics. If he does not improve within the next few days I will take him back for blood tests.	12	Years	Shepherd Dog - German	Dog	66	Pound
EON-94254	6/29/2012 2:45	Ol roy Kibbles and chunks	After eating from a new bag of Ol roy dog food purchased at Walmart in (b) (6), my dog developed sudden Kidney failure and died in little over a week. My two other dogs are now experiencing Kidney failure and I will have to put these pets down as there is no cure for kidney failure. I am just heart sick over this sudden loss!	10	Years	Sheepdog - Shetland	Dog	17	Pound

EON-94253	6/28/2012 21:45	Milo's Homestyle Chicken Jerky Treats	<p>We lost our dog (b) (6), (b) (6). However, we did not know the reason she died until I saw a news story, on Channel 4 (b) (6) in March 2012. I would have never bought these treats if I would have been aware of the warning. They shouldn't be on store shelves. I thought they were okay because they are on our store shelves.</p> <p>I had actually contacted Del Monte before she died asking if something was wrong with the product. They told me several things can made a dog sick and never revealed they already had hundreds of complaints. I had no idea and we didn't make the connection until I saw the news story several months later.</p> <p>(b) (6) ate Milo's treats in late September/Early October 2011. She died (b) (6)</p> <p>I contacted Del Monte twice in October 2011 asking them to check the treats. I thought something was wrong. They responded once telling me "Several things can make a dog sick like her food." I contacted them again explaining she was on "Nature's Recipe" also made by their company. Del Monte never replied to my second email. We did not know the reason she died. She started to drink more water after eating the treats. That is why I questioned them. Her appetite decreased and she had a couple "accidents" in our home. We took her to the vet. They treated her as if it was a Urinary Tract Infection. A few weeks later she died in my arms in our living room. We had no idea the treats were under investigation until I saw a news story, on Channel 4 (b) (6), in March 2012. I would have never bought these if I had known but honestly they shouldn't be on store shelves. I thought they were okay because they are on our store shelves.</p> <p>After seeing the news story in March I contacted Del Monte. Basically, they do not believe me. Said I seemed satisfied with their response back in October and claimed they tried calling me. They did not call my house. They did not respond to my second email. I trusted them. I have since made several complaints to their "consumers affairs" dept. I am finally contacting you because I was hoping this company would do the right thing and voluntarily recall the product. I am fed up and I am very upset the public sees a product on the shelf believing it is safe. This is wrong.</p> <p>I asked Del Monte why they are not making the treats in the USA and not using chickens from the USA? Their answer? "The United States doesn't have enough chickens." Just unbelievable.</p> <p>Filling out this questionnaire you ask if a Vet was consulted. Yes, but we did not have the reason of our visit being the treats. I did not know they were being investigated. So, I am answering the question as Unknown. We did not have accurate information to give our Vet. So, it was treated as a UTI.</p>	12	Years	Mixed (Dog)	Dog	40	Pound

EON-94222	6/27/2012 17:30	Milo's Kitchen Chicken Jerky	Dog had been fed approximately 1 to 2 chicken jerky strips per day for 2 or 3 days. (b) (6) started having severe diarrhea. Her stools were completely liquid explosive stools. She had increased thirst and urination. Both dogs had the same symptoms. Because I had previously purchased this product, I thought perhaps my pets, despite being house dogs, had eaten some cat or possum feces in the backyard. I gave (b) (6) some Metronidazole, thinking she had perhaps contracted giardia. I also stopped giving her any more dog treats and supplemented her food with some rice and plain yogurt. Symptoms resolved after approx. three days. Because I had purchased this product before, I was reticent to blame the chicken jerky treats. Therefore, I again resumed feeding the treats to my two labs this past weekend (June 24/2012). Last night, (b) (6) woke me up. She never defecates inside the house, but she again has come down with severe diarrhea. I noticed her bowel movement yesterday had been very small in size compared to usual. The amount of diarrhea last night was HUGE: likely two cups of pudding-consistency feces in the house. I emailed Milo's Kitchen (Del Monte) this morning and they phoned me back requesting I ship them any remaining product for analysis. My reference number with them is # (b) (6).	8	Years	Retriever - Labrador	Dog	70	Pound

EON-94219	6/27/2012 15:39	Purina Beneful Healthy Weight Dog Kibble	We purchased a new bag of Purina Beneful Healthy Weight, the same food we have fed our dogs for the past two years. Over the next week, (b) (6) began throwing up every time he ate kibble and having diarrhea. He also became lethargic and started sleeping all the time. Our other dog (b) (6) ate the food once, threw it up and then refused to eat it again. Doing research online, there are numerous reports of people having similar issues with recent bags of Beneful food. We stopped feeding (b) (6) Beneful and he has stopped vomiting and having diarrhea. He also is starting to regain his vigor.	3		Unknown	Dog	30	Pound
EON-94176	6/27/2012 1:54	Wellness Healthy Indulgence Turkey and Chicken Recipe, Wellness Healthy Indulgence Chicken and Chicken Liver Recipe	(b) (6) eats Wellness brand pouch food. I always purchase this food at Petsmart retail locations. Recently I purchased the same brand of food from Petsmart.com The food was received on XXJun2012. I began feeding (b) (6) from this new food. She was hesitant to eat it (first warning sign) but eventually did eat some. She was subsequently fed this batch of food for 2 more meals. After eating these meals she back to exhibit lethargy as well as began to suffer from diarrhea. I has since stopped feeding her this food and have prepared home cooked for her so that she could get over whatever has caused her issues. After removing her from the mail ordered food she began to show some more energy but is still suffering from intermittent diarrhea (she normally does not have this issue. The only change to her food was the purchase source so I have to wonder if it was a bad batch, if it was stored improperly before shipping, or if was somehow corrupted during shipping (left in heat too long, etc.).	17.5	Years	Domestic Mediumhair	Cat	5.3	Pound

EON-94097	6/26/2012 12:30	Waggin' Train Pbj Dog Treats , Waggin' Train Apple & Chicken Wraps Dog Treats	<p>I bought Waggin Train brand apple and chicken wraps and the PBJ. This is what I sent to the manufacturer but it describes EXACTLY what happened.</p> <p>Hello. I have recently purchased your PBJ product and apple chicken wraps. Both times my dog has vomited them up and remained sick all day. All she wants to do is drink water and crap in the back yard. Ive fed my dog every treat in the store and I though your treats looked good. My dog has never gotten sick before and is the picture of health. I had given her ONE treat. At first I thought she might be eating them to fast so I broke them into halves and gave them to her. Same results. Vomiting and diarrhea. The symptoms went away after a day of not feeding her these snacks. Your product made my dog sick and I noticed MANY other similar complaints. You say your product is good for dogs but for one second look at what is happening and try to find out what the exact reason for this problem is! Try making you product in the USA. Its companies like your that are the reason why people dislike corporations so much. I have never dealt with such an illness ever in my 30 years of dealing with animals. And the moment my poor beloved Boston Terrier ate your snack she became violently ill. I will never buy ANY of your products again. Human or animal. Sorry if I am coming across as rude but my dog is my LIFE and is a member of this family! I hold companies to high standards and would feed my dog the same qualityu I would feed my son! Same on waggin train!</p>	2	Years	Terrier - Boston	Dog	20	Pound
EON-94093	6/26/2012 0:03	Canyon Creek Ranch Brand Natural Chicken Tenders	<p>I gave the dog a canyon creek jerky treat Saturday night. Sunday morning he had thrown most of it up. Then he started with diarrhea. Fed in bland diet for breakfast. By the afternoon he was having bloody diarrhea and continuing to vomit. Gave him sucrulafate for an upset tummy, again fed a bland diet. By Monday am he was still vomiting, not interested in eating and pooping out straight blood that looked like it had raspberry type gel like mucous. Took him to the vet where he got IV fluids and a cerenea injection.'</p>	8	Years	Chihuahua	Dog	4	Pound

EON-94091	6/25/2012 23:00	Various formulas of Blue Buffalo dry dog food.	<p>Around February I switched the dogs I buy food for to Blue Buffalo dry dog food. 3 of the dogs live with me, the forth lives with my partner. (b) (6) my partners dog, was fed only the chicken formula, the other dogs had the formula varied, but never ate the chicken formula as one of my dogs is allergic to chicken. A couple of months ago (b) (6), a Border Collie mix, developed cellulitous in her hind legs. The left legs was by far the worse, but both legs were effected. I had the vet perform all kinds of test including an ultrasound. No cause could be identified. (b) (6) has been taking both prednisone and a water pill since that time to slow down the progression of the swelling that was taking place, but it was being only moderately successful. There was not a place to list the age of both dogs above. (b) (6) is 13.</p> <p>About a month ago, (b) (6), an 11 1/2 Y.O. lab mix started being fussy with his food. Shortly after that I noticed that he was having severe diarrhea. I took him to the vet. An ultrasound and blood work were done and it showed that his liver levels were literally off of the chart. Again, no cause could be immediately found. The vet was recommending exploratory surgery. In the mean time, I decided to feed him the food he had been on previously to see if he would be more interested in eating that. Within just a few days his appetite returned and he was acting like he was feeling better. I had the blood work repeated and while his liver levels were still high, they had dropped significantly. The only thing that changed during that time was the food he was eating.</p> <p>After (b) (6)s turn around, I switched (b) (6) back to the brand of food she had been eating previously. Her right back leg has returned to normal and the left back leg has dramatically gone down. Again, the only thing that was being done differently was the change in food.</p> <p>My other two dogs did not show any outward signs of any problems on the food. One is 9 and the other is 13.</p>	11	Years	Mixed (Dog)	Dog		
EON-94089	6/25/2012 19:30	canyon creek ranch chicken stix (chicken & rawhide chew)	<p>I purchased a bag of canyon creek ranch "chicken six" from the (b) (6) pet-smart store. I feed my dog three of this chicken & rawhide chews in a period of three days (thurs,fri,sat) saturday afternoon my dog started acting weird. 1. his energy level dropped, he did not wanted to play or do anything, his breath started smelling really bad, saliva started to come out of his mouth (that never happened before) and he just just looked weak and sick. when I say "he" im refering to my puppy (b) (6). this morning (06/25/2012) I have to rush him to the vet because he wouldnt even move from his bed, after blood and urine testing the vet told me he has kidney and liver problems. now my 8th month puppy is fighting for his life at the "our pet's vet urgent care" facility because of this product. i do not understand how this product is still sitting on the shelves of pets store such as pet-smart and petco. today i spend \$1063.00 dls just to get him all the exams so i could know whats wrong with him. if my dog dies because of this products i will file a lawsuit against all the involved parties.</p>	8	Months	Sheepdog - Shetland	Dog	24	Pound

EON-94088	6/25/2012 17:30	Waggin Train Chik'nBiscuits	<p>3-12-12 I had bought 5 bags of Waggin Train chik'n Biscuits from our local Wal Mart. I noticed the edges of the biscuits appeared a little "browned on the edges" but thinking it happened in the cooking process, it was not enough to raise any concerns. My dogs eventually completed that bag and I had begun to notice that their stools were loose. Also, my girl was a little more clingy than normal and my boy had gotten a sore on his chin. I went on thinking I would keep an eye on them and hope it would pass. I went to break up the next bag for them to eat and this black powder exploded in the bag after the first hit with a meat tenderizer. I looked at the rest of the bags and they were all in varying conditions of the same. (all from the same lot #/upc: 8 07020 99506 0). I called Waggin train thinking that they would have already gotten complaints from this "lot" and might know what is going on. (I also called PETA to see what I should do but they never returned my calls). The company said that they would send out a postage prepaid envelope for me to send the treats back to them for testing and that I should take the dogs to the Vet to be checked. She said their insurance company would take it from there.</p> <p>Took the dogs to the Vet and she checked their stools and did not find any parasites. She gave me antibiotics, and anti-diarhea medications for both dogs. She said she could test the treats but it would be expensive. I do not have that kind of money and could only afford to get them treated. Slowly, they improved after 2 weeks. Their insurance company rejected the claim as they said it was black sand (as per only a visual inspection) and that my dogs may have eaten something in the yard.</p> <p>My dogs have been feeling and acting better since I have gotten them totally away from ALL of this companies products. I had no idea that they had such a horrible track record until this event led me to google them. Why they are still allowed to sell ANY dog treats in the US amazes me. I have talk to so many vets and pet owners since this event and all of them had stories of the jerky getting stuck in dogs intestines and such. Their insurance company is arrogant and led me to believe that they are untouchable. When I told them all I was asking was for the \$101.16 the Vet visit cost and that I would sue for it if need be, because even the company thought it was worth me taking them to the Vet. They just told me to go ahead and that many have tried and they got them all squashed. I wrote the company and told them that they are getting their monies worth with this company, but are losing a hell of a lot more by losing a customer. Again, I don't know why these people are allowed to poison our animals without any recourse. If you go to their website, they advertise about how important the health of our animals are and how high of a quality their product is. I saved some of their treats if you need them and hope you can help me get this poison off the shelves.</p>	7	Years	Coton de Tuléar	Dog	15	Pound
EON-94087	6/25/2012 16:39	Canyon Creek Ranch Brand Tasty and Delicious Chicken and Apples	I gave my dogs Canyon Creek Chicken wrapped apple treats. My dog became violently ill with in 2 days of giving him the treat. I took him to the vet 4 straight days in a row and every day he was getting worse. My dog was diagnosed with a fever, diharrea, vomiting, and what we originally thought was a GI issue.	3	Years	Mixed (Dog)	Dog	30	Pound

EON-94086	6/25/2012 15:39	Canyon Creek Ranch brand Yam Good Chicken Fillet Wrapped Yams	My dog got horrible diarrhea that persisted about 2 days following giving him 1 or 2 Canyon Creek Ranch brand Yam Good Chicken Fillet Wrapped Yams. After he got better, and a couple weeks later, I tried another one of the same treats (since I wasn't sure what had caused the diarrhea the first time.) He developed diarrhea again within a few hours of eating the treat. Again, this cleared up again after a day or so of just giving him rice/boiled chicken and water.	10	Months	Other Canine/dog	Dog	65	Pound
EON-94085	6/25/2012 15:00	Kingdom Pets Chicken Jerky	I usually give the dog and evening treat of Kingdom Pets Chicken Jerky every evening. I opened a new package on 6/20/2012 and gave the dog 1 1/2 chicken jerky strips about 8:00 p.m. she had diarrhea during the night. The next night (6/21/2012) not realizing it might be the Chicken Jerky I gave her another 1 1/2 strips and she again had diarrhea during the night and 7 times during the day they all had bowel movements were very loose with mucous and blood in them. I called a Vet who advised me to keep her without food for 24 hours and introduce her food again on 6/23/2010. On 6/24/2012 her stool was very soft but formed without noticeable blood. As I am very strict about what is given to my dog to eat and the only new thing in her diet was the Kingdom Pets Chicken Jerky I feel it was caused by the Chicken Jerky. My dog does not swim in any lakes, pools or ponds and not does she visit any dog parks.	11		Retriever - Labrador	Dog	60	
EON-94083	6/25/2012 13:09	Nature' Own Dog Chews Bully Stick Bites	I found a metal hook imbedded in a Bully Stick Bite. EON-94071	6/23/2012 21:54	Canyon Creek Ranch B r a n d CHICKEN TENDERS	My dog has been a fan of chicken jerky treats forever but this time something happened. I had never heard of a recall and did think to search out recalls until she got so sick this week. But I thought I was losing her, the ER doctor never called me back and her doctor was already closed. I will still take her to ER if she doesnt keep improving or gets worse suddenly and I spoke to her doctors office today. They had no opening for today and will refer me to ER if we need to go but I have been doing the right procedures with her and also scheduled her for Monday morning with them for a Check-up. When I scheduled I had't read the recall info on the internet yet and will inform them by bringing the bag with me on Moday. Now here is what is happening with my family baby girl (b) (6) (b) (6) has not been herself for many days now, not certain if I should take her to the Vet. Started having "accidents" on the floors and then began losing some control. This in the last 24 hours, she had developed, Bloody watery bowel movements with some apparant cramping issues, Vomiting white foam, extreme thirst but the inability to keep the water down making the foam, no appetite for several days, pain and inability to sleep with some pacing unable to get comfortable. I tried last night to feed her boiled chicken with/without rice her favorite, she avoided it completely. As the weather is very nice here I sat outside with her several times last night "cool concrete" until 4 a.m. with cold compresses as she was also hot. Finally she ate about 1 tbs of boiled chicken and has been resting off and on since then. I was again able to feed her the same amount of white steamed rice and twice as much chicken at approximately noon today. She has been resting, her water consumption has decreased and we are still waiting to see on her bowel habit.	5.5	Years	Terrier - Yorkshire	Dog	5	Pound

EON-94065	6/22/2012 17:00	Waggin' Train Wholesome Big Blast Chicken Jerky Wrapped Pork Skin Twists with Chicken Liver Center , Pup-Peroni Lean Beef Flavor	<p>My name is (b) (6), my wife's name is (b) (6), our dog was (b) (6);</p> <p>May 10th we purchased Waggin Train raw hide chew wrapped in Chicken from BJ and gave our dog (b) (6) (Shorty Jack Russel-small) and (b) (6) (Mix breed Medium size dog). (b) (6) chewed them and loved spending the evening keeping himself entertained and would eat the entire treat, but (b) (6) would mostly just hide them through out the house or outside (thank God). We again purchased a second bag of Waggin Trail raw hide wrapped with chicken around June 2nd. We did notice changes in (b) (6) but reflecting back realize that this was the start of serious and fatal problems. He started to be less active right after these treats started, and we started noticing him whining while laying flat on his belly over the next few weeks as if he wanted something, he stared at us and at time lay flat in front of us which was very different for a Jack Russel. Over the next weeks we also noticed his lack of interest in his meals and increased water intake. We would find him in the Bathroom laying on the rug away from us which was completely different. I didn't understand that he was sick or in pain, just different and very odd. He was less active and appeared to be gaining some weight, I assumed his inactivity was causing him weight gain. We continued waggin train treats during this time span of nearly 4 weeks. Just prior to his ultimate demise I commented how his stomach seemed harder than normal. The weekend of the 4th of June 2012, I decided to get him out for a Search and Rescue training. Certainly that would cheer him up I thought, and didn't realize that the heat might not be helpful to him. I reward him for task completed and gave him another toxic treat, Pup-ronie as rewards, being so commented to me, he tried to do as requested and happy to comply even though he seemed to be struggling. I looked at him and thought, why are you so quiet, why do you seem different and struggling? I was perplexed but still unable to understand what was wrong with my dog. I was soon to find out how this slow poison was killing my dog.</p> <p>Internal organ break-down for (b) (6) on Friday, (b) (6) which took his life. Our vet cannot tell us truly what happened, On the (b) (6) of (b) (6) was an emergency visit due to (b) (6) bloating causing extreme pain in the stomach,swelling in the chest and abdomen, medicine and monitor was advised due to the xray and sent home. (b) (6) a return to the Vet, he was surgically opened through the abdomen but still with no conclusion of the problem. Nothing major in the stomach according to the vet. We took (b) (6) home the next day, Saturday (b) (6). (b) (6) was not (b) (6), but we assumed he was down due to being cut opened and sore. By Sunday night, (b) (6) (b) (6) was really struggling with intense pain, discomfort, bloating, and lack of sleep with pacing. We brought him back on Monday morning, (b) (6), where they monitored and examined</p>	4	Years	Terrier - Jack Russell	Dog	17	Pound
---------------------------	-----------------	--	--	---	-------	------------------------	-----	----	-------

him more. The vet opened him a second time and removed his Spleen and part of his ruptured Pancreas. (We have the clinical work-up on (b) (6) if needed.) The vet kept (b) (6) that Monday through Friday with continued decline and extreme pain and finally bleeding from the rectum. We visited (b) (6) twice each and every day to help lift his spirits and see him for our own spirits during his stay. Friday, (b) (6) (b) (6) took another turn for the worse. The Vet told us he was failing, belly swollen, in a lot of pain (they had removed his IV due to too much fluid retention the day prior: also pain meds through IV) and wanted to open (b) (6) up again. They found 1000ml of fluid in his belly and more Pancreas failure. While opened up he started to bleed out with extreme inflammation. We were told they could stop this and put him back together, but the diagnosis was not good for survival; more pain and suffering for our little boy! So the very traumatic decision was made to let our (b) (6) pass. (b) (6) is presently held in a freezer at a crematory waiting for direction. Just typing this letter causes me such pain an anguish it is indescribable. We poisoned our pet with the help of the government. How does anyone live with themselves after watching a slow painful death of a family member. (b) (6) trusted us to take care of him and we failed and he looked to us to save him and stop the pain. The emotional stress for our (b) (6) and ourselves is to great to express on paper. Not only the void in our lives, we now realize that all our efforts, expense of the surgeries, pain we put (b) (6) through, made no difference to save his life from poisoning. Now we deal with the guilt of not recognizing his symptoms, being uneducated on the fact that China made treats kill animals, and not knowing how to save him. My wife cries every day still with this guilt and visions of him looking to us to save him. He licked her face just before his final surgery and tried to get closer to her as to say, Its ok Mom, I still love you. WE should have taken him home right then and let him be home to die with us. But the desperation to save him took over and couldn't help want another chance to save his life.

My wife and I are devastated and angry that these products continue on the market. What does it take to save precious animals. My wife and I are asking for help. Our other pets in our house are asking for help and protection. Pet lovers around the country and the world are asking for help. We have placed our beloved (b) (6) on ice to see if we can find someone, some entity that would be willing to do medical research on him to find out what he truly died from. Are you able to help us in our search and our research? We ask that you inform us either way so that we can possible direct our attention further towards your agency or on to another agency that can help us and our (b) (6).

I thank you in advance for your time in reading this and your help.

			<p>I thank you in advance for your time in reading this and your help,</p> <p>(b) (6)</p>						
EON-94040	6/22/2012 13:18	Canidae All Life Stage Formula	<p>Purchased dog 2/3/12 from reputable breeder. Slowly switched dog over to Canidae Life Stages. He had eaten three, 10 lb bags over 3 months and was on his forth when he started with extremely mucousy stools, then diarrhea. After 2 days I called the Vet, they suggested boiled rice and hamburg for 3 days then slowly reintroduce food again. Gave bland diet for about 7 days, dog was better started introducing regular food again over the next week. On the seventh day when he was totally off bland diet he started with mucousy stools again, followed by diarrhea and vomiting. Took to vet on 6/13/12 they gave him a 7 day prescription for Metronidazole during which time he was on the bland diet again. Started to reintroduce regular food again 6/21/12 in the morning. In the afternoon I found the recall notice online and stopped the food. Luckily this time he left most of the dry food behind after being spoiled on rice & hamburg for a month.</p>	1	Years	Mixed (Dog)	Dog	12.5	Pound

EON-94037	6/22/2012 13:15	NUTRO MAX CAT CHICKEN FLAVOR	<p>I was the owner of four cats: (b) (6) approx. 10-11 yrs (b) (6) approx. 10 yrs, in 2009; (b) (6) approx. 14 yrs as of (b) (6). (b) (6) 15 -16 yrs. All three cats were feed Nutro Max Cat dry, or Nutro Natural Choice indoor cat food dry; their entire life.</p> <p>In 2009 both (b) (6) and (b) (6) needed to be put down due to liver failure/cancer within 1 month of each other.</p> <p>Yesterday, (b) (6) needed put down also due to enlarged liver/and multible cancer sites; including stomach, near heart, lungs.</p> <p>We have public water supply, not a well; and live in the (b) (6) region.</p> <p>I questioned the Vet about the odds of 3 cats all living in the same household coming down with enlarged livers/liver failure, and cancer.</p> <p>When I checked the web I was shocked at the number of complaints/recalls this company has had with their products; including the number of pets developing cancer after being feed only this companys products.</p> <p>The oldest cat, "(b) (6)" eats mostly canned food and is still alive; whereas the other 3 consumed the dry food. Please investigate this companys products. This many people cannot be having the same issues without a common cause !</p>	14	Years	American Shorthair	Cat	19	Pound

EON-93971	6/21/2012 22:33	American Kennel Club Jerky *Made with Real Chicken*	<p>The owner stated that 1 week prior to being seen again at the previous veterinarian ((b) (6)) he had eaten two bird heads from the backyard. No abnormalities such as vomiting/diarrhea had been noted. The owner had given the chicken jerky treats from the American Kennel Club sometime between eating the bird heads and being seen by the veterinarian for the second time. The owner had also changed (b) (6)'s food several times over the month that she'd had him. Early one morning (b) (6) had vomited and then vomited a few more times. The owner became concerned and brought him to the (b) (6) where he was estimated to be 10-12% dehydrated, T 101.2F, non-painful abdomen, continued to vomit in the exam room. Parvo test was negative. He was started on IV fluids and antibiotics. Since he was needing further round the clock monitoring he was referred to his current location at (b) (6).</p> <p>Since (b) (6) has been present at the clinic he has had a series of labwork. Initially the only abnormality found in both a CBC and chemistry was a moderate to severe non-regenerative anemia. A Pt/Aptt test was performed to rule out the possibility of rat bait poisoning. Pt was normal Aptt was mildly prolonged at 119.9 sec (75-105 sec). After the blood draw for the tests (b) (6) started to seizure. These were controlled with phenobarb IV. A urinalysis was ran to rule out ethylene glycole poisoning. Urine was negative for calcium oxalate monohydrate crystals. We were not given the OK to run leptospirosis titres. A barium study was performed to rule out the possibility for a foreign body from the history. There was a suspicious area in the barium pattern that we felt an exploratory needed after he had a blood transfusion since he was so anemic. No foreign bodies or other abnormalities were noted during the exploratory besides intestinal ileus. After the exploratory (b) (6) started to perk up over the next several days on antibiotics, anti-emetics and prokinetics. No vomiting was seen and he was keeping food down. On the 4th day after surgery he started to decline again. Bloodwork was re-run and both BUN and Creatinine levels were significantly elevated BUN >180 (7-25) Creatinine 4.9 (0.3-1.4). Since the newly diagnosed renal failure (b) (6) has been regurgitating so another barium study was ran to rule out megesophaqus and none was found. An ACTH stim test was performed today and we are awaiting results. (b) (6) has also started to seizure which had not been a problem since initial presentation to our clinic.</p>	13	Weeks	Pit Bull	Dog	12.4	Pound
EON-93970	6/21/2012 22:18	Kirkland Signature Super Premium Maintenance Cat Chicken & Rice Formula	Cat has soft stool, sometimes even liquid for 1-2 weeks.	15	Months	Unknown	Cat	13	Pound

EON-93968	6/21/2012 20:33	Merrick before B.G. grain	<p>I purchased a large bag of Merrick chicken BBG cat food last week at (b) (6), where I usually buy my cat food. The minute I opened the bag and scooped out a serving, a large cockroach jumped on my hand. I threw it off on the floor and my cats immediately killed it.</p> <p>Twice since then I have had roaches get on me or I have seen them in the bag of cat food. Now, last night, I looked in the bag and there were three huge roaches sitting on top of the cat food. I KEEP THE BAG SEALED AT ALL TIMES EXCEPT WHEN I AM SCOOPING FOOD OUT OF IT INTO A BOWL.</p> <p>I have six cats and I am not at all happy about feeding them roach-infested food. I am on a very limited budget and cannot afford to go buy another bag of cat food after paying the high price for Merrick BBG. I am extremely unhappy with your company.</p> <p>I went to (b) (6) today and told the clerk there about this situation. While he was very empathetic and said he wondered if it came from the factory that way or was their storage, he did not make any offer to replace the food or compensate me in any way. I have been forced to throw this food out and buy a completely different brand.</p> <p>As stated, I am extremely unhappy about this situation and am reporting it to the FDA. There may be people who think cockroaches are okay, but they are huge carriers of germs and bacteria, of staph and strep, and many other serious and possibly life-threatening diseases.</p>						
EON-93966	6/21/2012 19:18	Chicken Soup for the Dog Lovers Soul- Adult dog food dry	<p>Became sick , would not eat or drink water. Would not take medication from vet via treat, went on for 10 days, Vet needed to give IV antibiotics. Treated with oral antibiotics for 2 weeks after. \$500 cost. Vet couldn't pinpoint what it was, something with liver or kidney was the guess. Asked if something new was introduced into his diet. Nothing had been. Dog lost 10 lbs. Something odd from this developed, he now has rust colored spots on his back where none had been. Mitronizal was administered.</p>	7	Years	Terrier - Tibetan	Dog	28	Pound

EON-93920	6/20/2012 17:30	Nature's Variety Instinct Raw - Chicken Formula - 12 patties, Nutro Natural Choice Large Breed Senior	My 11 1/2 year old lab mix has been eating Nutro Large Breed and Large Breed Senior for nearly his entire life. My dog has always been an extremely active, energetic, healthy boy. We never encountered any problems with his health or food until November, 2011. My dog's problems began suddenly after beginning a new bag of Nutro Large Breed Senior. (The dog food looked different than it had previously.) The initial and most obvious problems were muscle wasting along with runny nose, reverse sneezing, coughing and gagging. For several weeks, he seemed lethargic, depressed and didn't want to eat. His problems were not identified by my veterinarian, so we continued with the Nutro and added Nature's Variety Raw Chicken Patties. Since continuing this diet his muscle wasting has progressed at an alarming rate, his other problems include: runny nose, continued reverse sneezing, increased coughing/gagging (as if his throat is irritated), increased thirst, excessive and constant panting, constant lip smacking (like he's trying to get a bad taste out of his mouth), groaning when he lays down, development of several small moles and warts on his body, development and growth of about a dozen large fatty lipomas, development of a sebaceous cyst and overall lethargy. He also has regular bouts of vomiting a yellow bile along with loose and runny stools. Blood tests indicate that his liver enzymes are elevated and that he has extremely high cholesterol (normal range is 112-328 and his is 643. He has seen 4 veterinarians over the past 7 months, yet none of them can seem to diagnose his problems. I have recently taken him off the Nutro and the Nature's Variety and have introduced natural and organic home-cooked food mixed with a high-quality no grain kibble. I can only hope that it's not too late for his condition to improve as me and my team of vets work to purge these toxins from his body. I believe the ingredients used in both Nutro and Nature's Variety are full of poison and toxins and need to be closely examined by the FDA. Please look at Consumeraffairs.com and search for Nutro. There are over a thousand complaints about Nutro's negative impact to our dog's health and well-being. Un-safe ingredients are being used in dog food. These reported illnesses are more than a coincidence. Please take action now!!!	11.5	Years	Retriever - Labrador	Dog	72	Pound
EON-93903	6/20/2012 15:09	Nutro Natural Choice Senior Adult Dog Food	I just got a new bag of Nutro Natural Choice Senior Dry Dog Food about a month ago which is when (b) (6) started not wanting to eat it. So, I would mix some canned food or cooked meat in it to get her to eat it. Then about a week ago she stopped eating it all together. She was panting alot & acting lethargic. I thought it may be the heat & took her to get her hair shaved, but it didn't help her panting at all. I also noticed she wasn't going to the bathroom everyday like she used to do and she was getting diarrhea alot. I then took her to the vet last week & they did a blood test & found that she was anemic. They gave her a prescription for antibiotic & one for the diarrhea. She wouldn't eat anything at this point. I even cooked chicken & rice (which she loves), but she wouldn't even eat that. Then over the weekend she got very weak and just slept. Monday morning she could hardly walk at all, so my daughter & I took her back to the vet where she died on the floor. I really think it was the dog food, because she was fine up until a month ago. I also have heard other people complaining about that brand of food & found many other similar stories on the www.consumeraffairs.com website. Please take this dog food off the market!! I do not want anyone else to go through what we went through!! PLEASE HELP!!	11	Years	Collie - Border	Dog	40	Pound
EON-93890	6/20/2012 14:30	Waggin' Train, Milo's Kitchen , Canyon Creek Ranch	Dog treats made in China need to be recalled! How can they still be getting sold in stores (without so much as a warning on the packaging) if they are the reason so many dogs have gotten sick or died? It is time that lives become more important than profit!						

EON-93854	6/20/2012 12:12	Kirkland Brand Adult Vegetable and rice	(b) (6) started vomiting and having diarrhea on 06/14/2012. We fed him boiled rice until his symptoms improved. (b) (6) started having diarrhea on 06/17/2012 and since we started feeding (b) (6) his regular meals again his symptoms returned. Both dogs have continued to have diarrhea since that time. We have stopped giving them this product as of 06/19/2012.	4	Years	Dachshund - Miniature	Dog	13	Pound
EON-93853	6/20/2012 11:57	Kirkland Adult Chicken & Vegetable formula	Our 10 year old (b) (6) started having diarrhea and vomiting on 06/14/2012. Thinking he had an upset stomach we fed him boiled rice. Once his stool seemed to improve and the vomiting stopped we resumed feeding him his regular meal on 06/16/2012. Sunday his symptoms returned and have continued. We finally decided to stop feeding them the Kirkland food last night to see if it would help. I then was informed of the recall and am certain the Kirkland food is the cause.	10	Years	Dachshund - Miniature	Dog	15	Pound
EON-93843	6/20/2012 8:42	Kingdom Pets Chicken Jerky Treats	I have been feeding my dog the Jerky treats one a day as a treat, he became very sick, would not eat, very non responsive. Took him to the vet and he had a very high liver count (normal .9 his was 4.5). Was admitted for 2 days, ran IV's, and antibiotics. He is now recovering. The only thing we can link it to is the treats as he has been eating the same food, Innova for Soniors for the last 5 years. There has been no other change in his diet or routine. I stopped feeding him the treats the same day he became ill and the vet was even amazed at how fast he is recovering.	12	Years	Mixed (Dog)	Dog	40	Pound

EON-93816	6/19/2012 14:03	Taste of The Wild Pacific Stream Canine with Smoked Salmon	I purchased a new bag of Taste of The Wild Dry Food on May 22nd at (b) (6) in (b) (6) I left on vacation for over a week and was told my dog urinated in the house and seemed tired. He has not had an accident in the house since he was a puppy and he is 7 years old. I found this odd and thought he must not be taking care of properly. Today is June 19, 2012 and he is still consuming the same bag of dog food. He has been gagging for a few weeks and extra tired. The past few days he has been throwing up and diarrhea and tired, no energy. Yesterday morning he refused to eat his food, which is completely unlike him since he eats all of his food every time. Because the food is never left in a bowl, I'm not used to picking it up. My friends dog ate some of the food and has been up all night and is still having diareah and is lathargic. My dog is completely lathargic and throwing up still as well. I decided to do some research this morning because I see the connection to my dogs food and getting sick and see that there was a recall. Although my bag of food only has 1 of the 2 numbers stated in the recall, I know this food is making these dogs sick. I need to know what is being done about this and am scared for the recovery and health of my dog. Thank you, (b) (6)			Retriever - Labrador	Dog		
EON-93799	6/18/2012 22:42	canyon creek ranch chicken jerky	She vomited within 1 hour of eating the Canyon Creek Ranch Chicken Jerky treats on 2 occasions (within 1 weeks time).	4	Years	Terrier - Yorkshire	Dog	10	Pound

EON-93798	6/18/2012 22:39	Milo's Kitchen Chicken Jerky Treats	I had been giving Chuck Wagon chicken jerky strips to the dog but switched to Milo's Kitchen chicken jerky treats because the Chuck Wagon treats went brittle and hard so quickly. In November 2011 he began drinking excessive amounts of water and having diarrhea. In one week he lost a third of his body weight. My vet gave him antibiotics for 3 weeks. I stopped the treats. He gained back some of his weight but started losing again and received another 5 days of antibiotics. He never completely got well or went back to normal stools. He died in February after beginning to lose weight again. The vet did blood work and thought it was kidneys or gut problems, but after reading about the Milo's Kitchen treats which I was purchasing at Wal Mart in (b) (6), I feel that is what killed him. He was a very healthy animal up to that point. My vet did a mini atopsy and knows it was not heart worms or gut obstruction. The idea that a monetary value can't be placed on dogs to sue the company that marketed this product is wrong. It is not right for these products to harm animals. The FDA should do their job and make a full disclosure of the facts and what was in these products, who made them and what fine or punishment is the company receiving. My dog was trained to be alert to any problem I would have. He was a security system and a companion.	8	Years	Mixed (Dog)	Dog	16	Pound
EON-93793	6/18/2012 20:54	Dogswell Happy Hips Chicken Breast with Glucosamine and Chondroitin	Fed our 3 dogs 2 treats each per day for the last 2 days and all 3 dogs developed bloody diarrhea. EON-93750	6/16/2012 18:54	Pedigree Dog Food	<p>new bag of pedigree emptied into a container so no lot number is available. (b) (6) started having diarrhea for 3 days some with small amount of blood. Taken to vet with stool sample but only tested for Ova and parasites and stool was negative. Special food, and 2 antibiotics later he was better. (b) (6) then strated with diarrhea same thing for 2 days then vet was agreeable to put her on the same regimen and all symptoms improved. Then male caretaker in teh house started with diarrhea and now female in teh home also has it. Being a nurse I started thinking more deeply about this bc it seemed concerning so I did research and found multiple complaints from the last few months with similar symptoms of illness with dogs eating pedigree dog food. Some of the smaller dogs and puppies were reported as having a fatal end to their illness. I calle dthe vet but it was too late to have the stool tested for salmonella as it was 2 weeks ago. Upon looking for another food to change the dogs to - science diet, iams etc...I came to find very similar complaints on the "consumer reports" website for the same time frame as the complaints from the pedigree food. Allof this is happening atthe same time as the Diamond company is continuing to add more and more dog food brands and lot numbers onto their recall. DO WE KNOW IF THIS IS NOT RELATED TO A COMMON INGREDIENT THAT ALL DOG FOODS ARE BEING MANUFACTURED WITH THAT GOES BEYOND THE DIAMOND COMPANY AND IS MORE WIDESPREAD THEN WE ARE CURRENTLY AWARE? Please get to the bottom of this. Thank you, (b) (6)</p>	12	Years	Retriever - Golden	Dog	109	Pound
EON-93746	6/15/2012 21:03	Waggin Train Chicken Jerky Treats	<p>We have taken our dog on walks in hot weather before without any problem. On 6/12/2012, however, we went for a walk on a relatively cool day and the dog suffered heat exhaustion. At 8:00 at night she began convulsing continuously and we rushed her to the emergency vet. While we could not explain why the heat bothered her on that day and not on the hotter days, blood work showed toxicity that also could not be explained. Perhaps the toxins weakened her system. We incurred \$462 in emergency vet bill for that one night of treatment. If the other two dogs were to have bloodwork done, we would surely see the same level of toxicity because all three are given the treats. I am thankful that we only give these to our dogs about once every three days. I would hope the FDA would be able to force a recall on this product. We bought our product at Sam's Club and they have initiated a recall on the product, thank goodness. I wish I had looked this up on the Internet earllier; I gave them another of the Waggin Train chicken jerky treats today so I've been giving my loving, trusting pets a treat that is harmful to them. We consumers need the protection of the FDA.</p>	6	Years	Shepherd Dog - Australian	Dog	50	Pound

EON-93743	6/15/2012 16:54	Simply Nourish Adult Dog Food Chicken and Brown Rice, Holistic Health Extension For a Healthy Life: Natural Dog Treats	<p>(b) (6) is an 8 year old female spayed Australian Shepherd who presented to the (b) (6) (b) (6) for a possible urinary tract infection. (b) (6) has been drinking excessive amounts of water lately, which her owner said began when he changed dog foods. He had previously been feeding (b) (6) a dry dog food made by Canidae. He changed her diet to "Simply Nourish" Adult Dog Food - Chicken & Brown Rice (Lot # 354A12221Y). (b) (6) had two urinary accidents in the house and vomited on 6/6/12. Ever since changing foods, (b) (6)'s urinary habits have changed. When (b) (6) goes outside, she will urinate 3 times in 5 minutes. The first time she urinates a large amount, and then each subsequent time she urinates small amounts. (b) (6) has been doing well otherwise. She has had urinary tract infections before, which were treated and cleared with Cephalexin (b) (6)'s owner has also noticed her excessively grooming her vulvar area. (b) (6) is up to date on vaccines and is on heartworm and flea and tick preventative.</p> <p>Physical Exam on 6/7/2012: Weight: 25.1 kg, Temperature: 102.3 F (axillary), Heart Rate: 132 bpm, Respiratory Rate: 36, CRT < 2 sec, Mucuous membranes: pink, moist, normal hydration, Bright, alert, and responsive Cardiovascular: no murmurs or arrhythmias ausculted Respiratory: normal bronchovesicular sounds in all lung fields Abdomen: tense on palpation, nonpainful Neurologic: normal mentation, sluggish PLRs, complete neuro exam not performed Urogenital: redness and inflammation around the vulva, the vulva is recessed Integumentary: 2cmx2cm mass on left side of abdomen (previously dx lipoma), moveable</p> <p>Urinalysis: SG: 1.005 pH: 7.0 Glucose: 2+</p> <p>Urine Culture: negative</p> <p>Peri-Vulvar Cytology: unremarkable</p>	8	Years	Shepherd Dog - Australian	Dog	26.4	Kilogram

EON-93520	6/14/2012 13:57	Waggin' Train Jerky Tenders	<p>My dog, (b) (6) has been eating Waggin' Train Jerky Tenders for years. I buy them from Sam's Club. About a month ago, (b) (6) wasn't acting like her usual self. She was lethargic, had no interest in food, started drinking a lot more water, and she had some diarrhea. After about 2 weeks with no improvement, my son took her to the vet. The vet noticed that her belly was tight and he checked her stool for parasites. His discovery was that she had a bacterial overgrowth in her stool because of some sort of animal protein not breaking down. When my son told the vet what our dog eats, he mentioned the jerky tenders and the vet said to stop feeding them to (b) (6) immediately. (b) (6) was put on antibiotics and, although she's much better, she still doesn't eat like she used to and is not eating enough. By process of elimination, it was obviously the jerky tenders making her ill. The good news (if you can call it that) is that I believe that I may have enough "proof", if you will, for the FDA to do much more testing. I have four bags of the Waggin' Train Jerky Tenders that have been bought over the past 6 months (approximately) during different trips to Sam's Club. Three of the bags have been opened and the fourth one is still sealed. The bag that is sealed has the same lot number as the opened bag which contained the contaminated treats that I believe made my dog sick. The other two bags still have a few smaller pieces in them. I have a habit of saving the almost empty bags with the smaller pieces of jerky in case I see a stray animal or come up with an idea on how to use the smaller pieces so they don't go to waste. Here is what I have that I can provide to the FDA or anyone who would be interested in doing more research: Four bags of the Waggin' Train Jerky Tenders bought at different intervals at Sam's Club. Two of them have the same lot number - one is sealed and the other is not, the other two bags have different lot numbers and still have some jerky pieces in them. I also have the paperwork from the vet visit where he notes that some sort of animal protein was not getting broken down in (b) (6)s system. Please contact me if you want to pursue. Thank you, (b) (6) (b) (6) or (b) (6)</p>	14	Years	Terrier (unspecified)	Dog	30	Pound
EON-93510	6/14/2012 11:24	Waggin' Train Jerky Tenders	<p>I bought Waggin' Train Jerky Treats in March, 2012 and gave my dog, (b) (6), 2 pieces to eat. She became ill approximately 3 days afterwards. (b) (6) began staggering and having trouble walking. She was unable to stand and she refused to eat. She died a week later.</p>						
EON-93496	6/14/2012 2:54	pedigree	<p>afetr the food was consumed the dog was dehydrating a lot and needed medical attention to recover.</p>						

EON-93492	6/13/2012 21:24	Diamond Naturals Large Breed Lamb and Rice Formula	<p>I bought a bag of Diamond Naturals Lamb and Rice Puppy food and when I opened it, it smelled a little funny and I just thought they changed the formula. First my dog was throwing up yellow phlegm a couple times (morning and night) when she was eating the the Diamond Naturals Lamb and Rice and then she would throw up some of the food (morning and afternoon).</p> <p>A week later as I was bathing my dog and scrubbing her belly she started whimpering and then when I took her out of the bath tub, she peed immediately. So I took her outside to see if she had to go anymore and she peed bloody urine and I called the vet immediately. I took her to the vet after I talked to them with a sample of her bloody urine and asked the vet what could have caused this. The veterinarian said that she has an irritated bladder from bacteria that either from something outside (environmental) or that it could have been caused by the food she's been eating. Also the veterinarian said it would be more likely that was the food if it is contaminated since it can travel from the GI to the bladder to irritate it or cause an infection.</p> <p>The vet gave me antibiotics and I switched her over to Fromm Pork and Applesauce dog food. I contacted Diamond about both of these incidents and questioned the weird smell with the dog food and they informed me that nothing was wrong, but they started recalling other formulas. I still have the bag of food and stopped feeding my dog the food immediately after the second incident.</p>	2	Years	American Pit Bull Terrier	Dog	43	Pound

EON-93395	6/12/2012 21:09	Kirkland Signature Super Premium Cat Food	(b) (6) was observed first throwing up, then would not eat at all, lost weight, became lethargic. skin and inside her mouth turned very yellow. Couldn't figure out what was wrong, but thought she would get over it. Then got call from Cosco and realized what had happened. Took her to vet where she stayed 4 days, then he sent her home. I had hopes she would recover, but by (b) (6) she was so near death I knew she wouldn't make it. My husband took her back to the vet on (b) (6) and had her put to sleep.	8	Years	Domestic Mediumhair	Cat	15	Pound
EON-93392	6/12/2012 19:39	waggin train big blast chicken jerky wrapped pork skin twists with chicken liver center and waggin train chicken stix chicken & rawhide snack	Gave my daughters 2 poodles, and my lasa poo, a chicken jerky treat. (b) (6) started acting funny after she ate hers and she stole my dogs. She gave birth to 7 puppies which 3 have died and one will not make it through today. (b) (6) also has been pooping every where and not acting right. (and she never did that in the past). She has been nursing the puppies. My dog vomitted after she ate a small one. I thought these treats were pulled off the store shelves, and am upset that these dogs are suffering because they have not been forced to pull the product. A web site says that 500 dogs have died, and now there is 4 more added so far. What do we need to do to get these pulled off the shelves? I feel horrible that my daughter is loosing her puppies and possible the mother because I gave her a treat.	2	Years	Poodle - Miniature	Dog	8	Pound
EON-93344	6/12/2012 12:18	Natural Balance Sweet Potato and Venison	After the dog ate his dogfood within a few hours he comitted once. Assumed he ate too fast. Later on he started to act strange, withdrawing himself from the family. Because the owner (me) was on vacation his change was attributed to me being away. Then he began to refusing to eat. He was later treated at the vet. 2 blood tests were done which determined his white blood cells were high. He is also suffering from a high temp.	10	Years	Retriever - Golden	Dog	80	Pound

EON-93275	6/12/2012 9:54	Friskies Grillers Blend	I have been feeding these cats the same food for years but since purchasing the 16lb bag of food that i currently have, 3 of the cats have died. There is no indication of any trauma to the bodies and after doing a little research online about previous recalls for this item last year I am convinced that there may be some sort of contagion in the food. I do not have lot #'s as I empty my food into a container and threw out the bag.		3	Years	Unknown	Cat		6	Pound
EON-93226	6/12/2012 3:18	Premium HY.TOP quality	I bought this milk before one week ago and it expired before the expiration date! and I keep in the fridge and I drank from it many times! It's really an issue for me to drank something expired !								
EON-93225	6/12/2012 0:48	Waggin Train Wholesome Big Blast Chicken Jerky Wrapped Pork skin Twist with Chicken Liver Centers Chicken fillet wrapped Treats	Thursday June 7th, 2012 we purchased a package of Waggin Train BIG BLAST Dog Treats for our two dogs. We gave each dog a Treat (Chicken Jerky Wrapped Pork Skin Twist with Chicken Liver Center). The Younger Male dog took the Treat away from the older Female dog and began to chew on both of them. Friday Morning I noticed the male dogs Stool was beginning to get very loose. Friday The male dog drank a lot of water and urinated quite often, but I thought it was from the amount of water he drank He had also developed Gas. Saturday Morning His Stool was now like water and had a very bad smell. His appetite had decreased and he was acting like he didn't feel good, When I check his temp, he wasn't running a high Temp. Saturday night he wouldn't eat his supper and wasn't playful at all. Me and my wife had remembered that we had had a problem with Chicken Jerky with the female dog before so I removed both Chew sticks and tossed them in the trash. Sunday Morning he woke me up vomiting. This continued every 30 minutes for the next 6 hours, He couldn't control his body functions now and was urinating on himself and bed, plus was having to defecate a lot, He had became very weak and refused to eat at all, I was having to force feed him water and any food I made him eat he vomited back up. I took him outside to see if he would eat some grass, He ate a little grass but mostly just laid around. I contacted a friend that has a pet rescue company and she told me about the illnesses related to Chicken Jerky and a web site to check. That's when I found out the Brand Waggin Train was one of the three on the report and that the treats we gave our dogs was from this company. I quickly threw the remaining Treats and package in the Trash. Monday Our male dog was feeling a lot better by Monday Night he was 100% better His Stool had returned to a solid state and he ate his supper and chewed up my shoe!!!		7	Months	Beagle	Dog		20	Pound

EON-93197	6/11/2012 15:54	Kingdom Pets Chicken Jerky	<p>(b) (6) was an 8-year-old mixed breed dog, weighing approximately 23 pounds, and in excellent health. He ran approximately 20 miles a week with me, and received excellent veterinary care his entire life, including dental treatments, regular checkups, blood work, etc.</p> <p>On December 11, 2011, I purchased from Costco the Kingdom Pets Chicken Jerky, and fed him a strip as a treat a few times a week. (b) (6) was never given more than 1-3 strips of chicken jerky in one WEEK, which is much less than the feeding recommendation on the bag of 2 per DAY for pets 11-25 pounds.</p> <p>The weekend of (b) (6), Tucker began to act lethargic, and on (b) (6), he stopped eating. I immediately took him to his regular veterinarian ("vet") at (b) (6) on the same day (b) (6). The vet ran various tests and evaluations, including blood work and an ultrasound. Over the next 2 days, (b) (6), he became worse, and still wouldn't eat and began vomiting, so I took him back to the vet each day. On (b) (6), the (b) (6) vet determined he needed a specialist to evaluate him and required 24-hour care in a hospital. He was sent to (b) (6) where he was admitted to 24-hour care in their ICU. He had tests, evaluations and treatment attempting to save his life. However, he succumbed to renal failure and died on (b) (6).</p> <p>I had not introduced anything different into (b) (6) diet in years besides the chicken jerky treats. Then the warnings about the chicken jerky from China came out a few months later, I investigated and found out that the Kingdom Pets that I had purchased at Costco was indeed from China. I then contacted the treating vets from his illness and death. The vets all agree that it is of their reasonable medical opinion that (b) (6) renal failure and subsequent death were the result of the Kingdom Pets Chicken Jerky.</p>	8	Years	Mixed (Dog)	Dog	23	Pound

EON-93117	6/11/2012 12:27	Enhance Hunter's Edge Basics 24-18	<p>More than 30 of our adult Australian Shepherds became ill, with vomiting and diarrhea and fever, after feeding them a newly purchased batch of nine 42 pound bags of Ainsworth Enhance Hunter's Edge Basics 24-18. We noticed that this newest dog food was extremely different in color - a dark "black" color. This dog food is Lot # DL3 with a "Best If Used By" July 27, 13. One of these dog food bags has "nothing" printed on the "Best If Used By". Three of our sickest dogs were taken a Vet. The Vet prescribed, for all of our Australian Shepherds, the Metronidazole and the Endosorb. (b) (6) and (b) (6) with the (b) (6) have taken samples of this dog food. Also, we sent samples to (b) (6) in (b) (6) for their testing. (b) (6) has refused to give us any testing results, having stated by email, that there is nothing wrong with their dog food.</p>	2	Years	Shepherd Dog - Australian	Dog	50	Pound

EON-93116	6/11/2012 11:48	World s Best Cat Litter	I changed to worlds best cat litter on/around march 24, 2012. (b) (6) started showing signs of nasal congestion,sneezing and showing signs of respiratory problems so I immediately took him to the veterinarian whom I work for. The vet prescribed antibiotics - Clavamox and antihistamines - Chlorpheneramine to treat him for the upper respiratory congestion. If he did not get any better, the veterianian said she would do further testing. (b) (6),s breathing and wheezing signs did not get any better and the veterinarian extended his antibiotics and changed his antihistamine to a compounded liquid form to ensure he was getting it fully. (b) (6) got worse and his breathing had become very labored. My husband had complained about the smell of this new litter I purchased but since we liked everything else about it, we had put up with the odd smell. I scheduled an appointment at the veterianian for (b) (6) on Sunday June 10 because he was worsening. The night prior I was reading a book about dogs senses of seeing, smelling and knowing and a light went off that maybe the smell of the litter was affecting (b) (6) . I immediately dumped the worlds best cat litter, washed the litter box, and replaced the litter with traditional litter.IMMEDIATELY (b) (6)s breathing difficulties disappeared. By the end of the evening we did not hear one sound of wheezing or breathing difficulty. It was as if nothing had every happened. World,s best cat litter is corn based with other additives and oils in it. Something in this product had an adverse effect on my cat that cost me approximately \$200 in veterinarian bills but more importantly could have resulted in the deteriorating health of my beloved pet. I truly believe this product needs to be evaluated by your agency before other pets are harmed.	8.5	Years	Maine Coon	Cat	19.4	Pound

EON-93064	6/10/2012 10:39	Beefeaters BBQ's	On Monday evening, (b) (6), (b) (6) was active and playful. He had a chicken fillet from the Beefeaters BBQs package prior to going to sleep. The next morning, (b) (6), he was a bit slow and refused to eat his food. We took him to (b) (6) at 7:00pm because he was drinking excessively, vomiting, standing with his head down and tail tucked in, refusing all food, and inactive. Extensive blood work was done, showing slightly elevated liver counts, and extremely low thyroid levels. An x-ray of his body was also done, showing some intestinal inflammation but nothing else remarkable. We were sent home with instructions to monitor him and call if he didn't improve. The next evening, (b) (6) we returned and (b) (6) was examined by (b) (6). Pancreatic blood work was done, showing nothing remarkable. He was given some contrast to monitor his GI tract with x-rays the following morning, which seemed to be moving okay. On Friday morning, (b) (6) we were told at 8am that he had eaten a bit of food, urinated and defecated, and was improving slightly. However, a call a few hours later from (b) (6) reported that there was now neurological impact, with (b) (6) being unable to stand, tilting his head to the left, unable to put his left paw down because of severe pain in his left fore shoulder. He also developed an ulcer in his left eye. Different antibiotics were given. Several hours later, he had worsened to where he was in respiratory distress, having trouble breathing. After consulting with the vet about the extreme pain and suffering (b) (6) was in and the outlook was so bad, we decided to have (b) (6) euthanized.	9	Years	Terrier - Cairn	Dog	25	Pound
EON-93063	6/10/2012 0:24	Milo's Kitchen home-style dog treats - chicken jerky	First we noticed him scratching and itching heavily, he's never had skin problems before. Then his skin looked red and raw, not sure if it counts as a rash or it was self inflicted. Again, we've never had a problem like this before. Today he threw up a great deal, had diarrhea, ate little or nothing but drank a great deal of water, and is slow and lethargic and not like himself at all. We narrowed it down to these treats, we just recently decided to try them and only started giving them to him this past week, and when we gave one last one to him today, he threw it back up and seemed worse. That's why we're convinced it these treats.	3	Years	Retriever - Golden	Dog	60	Pound

EON-93054	6/8/2012 17:18	Waggin' Train Wholesome Chicken Jerky Tenders	After eating Waggin' Train chicken jerky tenders, my dog became very ill. He seemed to have extreme stomach pain and yelped in pain when he was touched in his stomach area. After about three days, he seemed to recover. I did not, at the time, connect his eating of the jerky tenders to his illness until a few weeks later when I fed him the jerky tenders and he reacted in the same way. I have also noted that he has developed incontinence, drinks excessive amounts of water, and needs to urinate frequently.	14	Years	Dachshund - Miniature	Dog	20	Pound	
EON-92982	6/7/2012 22:54	Wellness Dog Food	<p>We had been feeding (b) (6) Wellness and we bought a new bag at Tomlinson's (b) (6) (b) (6) on May 28th. (b) (6) ate a little and then started refusing to eat. This lasted 4 days. Then she started eating the new dog food because she was super hungry and that is when the awful diarrhea started. It smells absolutely vile and she has never been sick like this in 5 years. At first we thought it might just be an accident but she hasn't been able to hold her feces for the last 24 hours. If she doesn't get let out immediately she goes to the bathroom in the house and it is vile stuff. We just figured out that is was the food and took her off the new bag of Wellness.</p> <p>I also started to feel sick and I don't know if it's related. I have a mild fever and abdominal sickness.</p>	5	Years	Mixed (Dog)	Dog	50	Pound	
EON-92981	6/7/2012 19:54	waggintrain chicken jerky treats	<p>My puppy became very ill and ended up at the Veterinarians office, after eating chicken jerky treats by Waggintrain , Made in CHINA. I thought he was going to die! Vomiting and diarrhea, he had to get an antibiotic shot and one to stop the vomiting. It cost me out of pocket \$105.00 . He also had to take antibiotics for the next 5 days twice daily.</p> <p>I even wrote the company, filing a complaint and a claim to which they would not pay. They said until their product is recalled by the F.D.A. they will not pay!!!</p>							

EON-92980	6/7/2012 18:27	Purina Fancy Feast Classic	One of my cats became very ill with acute renal failure, aka kidney disease. She had a blood test on 3/37/2012 which showed her kidney values being normal. She had another blood test on 4/15/2012 which showed the kidney problems. She started eating very little on 3/30. My vet said that the quickness of the onset of the kidney problems indicate poisoning. Through process of elimination, backed up by dowsing (aka using a pendulum to check veracity), I determined that the poisoning came from one of the Purina Fancy Feast classic fish flavored cat foods.						
EON-92979	6/7/2012 18:12	Nutro Ultra Large Breed Adult	Approximately 30 minutes after eating Nutro Ultra Large Breed Adult dog food, my dog started panting and lost all of his energy. He layed on the floor for approximately one hour, had trouble standing, but made his way to the back door, went outside and vomitted some of what he had just eaten for dinner. He layed outside and 30 minutes later he vomitted some more. He stayed outside for approximately 2 hours without moving. He came in when my husband came home and drank a lot of water. He went to his pillow and layed down. Approximately 15 minutes later, he vomitted the rest of his dinner and the water. Everyone went to sleep, approximately 5:00 AM his panting woke us up. He drank a lot of water, moved about 2 feet and dropped to the floor. He stayed there for a few minutes, walked toward the back door and vomitted all the water and mucas. Eventually walked to his favorite spot and dropped again. He layed there while everyone was getting ready for school and work. A little while later he vomitted again (bile) and really started panting. We rushed him to the vet which took approx. 20 minutes. When they examined him, he had no heartbeat. The vet gave him meds and cpr to no avail. He was acting depressed for approx. 2 weeks prior.	7	Years	Retriever - Golden	Dog	80	Pound
EON-92978	6/7/2012 17:39	EverPet real chicken Chicken Poppers	The last two weeks (b) (6) has been listless and has been vomiting on and off. I remarked to my husband how unusual this was and I couldn't think of a reason why. This morning I clicked on the "Animal Rescue Site" and it had a warning about chicken treats from China. I realized for the last couple of weeks I had been giving Bella EverPet Brand real chicken Chicken Poppers. They were indeed made in China.	8	Years	Terrier (unspecified)	Dog	20	Pound

In the last week se has become less active, sleeps alot, and is eating and drinking less. Her breath gotten a terrible odor. She was seen by our vet today, found to be slightly dehydrated. Blood tests were done with no apparent problem showing up. He prescribed an antibiotic in case she has inflammation in her digestive tract. He did state that the breath odor could indicate a kidney problem. At this time she is still lethargic.	5	Years	Mixed (Dog)	Dog	12	Pound

EON-92889	6/6/2012 23:24	Purina Beneful	She was given 1 cup of dry Purina Beneful this morning. My older lab ate some of her food. So between the 2 dogs, they shared 1 cup of food. When I got home from work, 1 of the 2 dogs had had a bowel movement on our carpet. Neither of the dogs EVER have accidents like that in the house so I knew something was wrong. When they had a bowel movement outside that evening, both dogs had softer stools. I placed another cup of that food in (b) (6) bowl this evening. Again, she and the older lab split the 1 cup of food, so I don't know who ate more. As the evening went on, both dogs ended up with diarrhea. The 1 year old lab, (b) (6), has had diarrhea worse than the older lab. Both dogs are a little lethargic. I am discontinuing the food.	1	Years	Retriever - Labrador	Dog	75	Pound
EON-92888	6/6/2012 23:12	Purina Beneful	My older lab ate some of the Beneful that I put in my younger lab's bowl. When I came home from work today, 1 of the 2 dogs had had a bowel movement on the floor in the house. Neither of the dogs EVER make a mess in the house. 1 cup of food was eaten this morning between the 2 dogs. I put 1 cup of food in the younger lab's bowl this evening and both dogs ate some of it. I noticed this evening that both dogs have had several bowel movements, each of which were softer stools. Both dogs seem to be passing more gas and just lying around more than usual. As the evening has went on, both dogs have developed very thin diarrhea.	10	Years	Retriever - Labrador	Dog	100	Pound
EON-92882	6/6/2012 19:54	Wellness Brand Small Breed Supermix Adult	Approx. 2 1/2 months ago my dog became very agitated, anxious, and wanting to go outside to eat grass.. then throwing up.. a couple of days later we found a large amount of black stool.. we took him to the vet.. the doctor took a culture and it was primarily blood.. the doctor gave him an antibiotic, anti-diarrhea medication as well as famotidine. He thought it may be an ulcer.. the syptoms cleared up over several days but i was feeding him white rice and boiled chicken breast. I went to the pet store and purchased another bag of Wellness food and there was a sign that the food had been recalled and they had removed the recalled food. The associate assured me that the food I purchased was not on the recall list so I purchased it. A couple of days later the syptoms were back. I still had some of the medication from the last episode so gave him the medicine and also gave him a liquid form of the anti-diarreah medicine. I've changed his food to Natures Recipe No Grain/ Easy to Digest formula and he seems better on this food but he continues to have intermittent bouts of diarrhea and vomiting	3	Years	Poodle - Miniature	Dog	11	Pound

EON-92881	6/6/2012 19:54	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dog Treats	<p>Based on his size, I fed my pet less than the recommended treat serving of "Waggin' Train" chicken dog treats over a 3 week period, about every other day. My dog began drinking more water than usual and throwing up vomit mixed with tinges of blood. He only eats a good brand of dry dog food and one other natural treat besides the jerky. Since he was near the end of the food bag and had been eating the other treats for a while and not getting sick, I suspected the jerky. After I stopped giving him the jerky he stopped throwing up and has drank less water.</p> <p>I reported the incident to "Waggin'Train, LLC, the manufacturer in So. Carolina and they noted my complaint and sent me a refund. Now I see nothing but complaints about these treats, which are made in China per the label. Many dogs have died or become very, very sick, so I feel fortunate to have discovered the source of my dogs illness fairly quickly.</p> <p>The "Waggin' Train" Jerky Tenders lot number is B1CA5498A, the expiration is 06 17 13, and the package size is 24 oz, purchased at Target.</p> <p>Waggin' Train, LLC Anderson, South Carolina 29623 866-283-2923 info@waggintrainbrand.com</p>	7	Years	Mixed (Dog)	Dog	10	Pound
EON-92816	6/6/2012 15:24	Petshoppe chicken jerky premium chicken dog treats	<p>I purchased my first dog treats, Petshoppe Chicken Jerky Treats, from Walgreens on Saturday May 19, 2012. My dog ate them that night and within a short time she started vomiting and having diarrhea until Monday. On Sunday, her vets office was closed so I was taking her in a Monday. On Monday her vomiting and diarrhea stopped but would not eat or play just stayed in her bed. I saw an article from my vet on Tuesday about Chicken Jerky Treats being recalled and making dogs sick. I took (b) (6) in on Wednesday morning. Her vet (b) (6) ran some tests and came to the conclusion it was the treats that made her sick.</p>	10	Years	Chihuahua	Dog	12	Pound
EON-92814	6/6/2012 15:18	Kaytee Fiesta Macaw Sunburst Macaw Ecotrin parrot and macaw	<p>On several purchases from Petco and Petsmart in (b) (6) (Kaytee Macaw, Sunburst Macaw, and Ecotrin), The fodd was moldy (nuts and seed). My bird ingested it and has become extremely ill and lost a lot of weight. She has been on medication and under veterinary care. Every time she'd start to recover and I bought new bag of product, she ingested moldy food again. I check the dates on the food and when I get it home, I immediately store it in sealed bags in the freezer. I change out my bird's food dishes 3 times a day. I have other birds that eat completely different products and there is no problem with them. I have contacted the companies themselves and they are in denial. I have talekd with the stores, I have contacted Pet Smart corporate office. I was told by an employee at Pet Smart in April, that they "recycle" the bird food.</p>	14	Years		Parrot	2	Pound

EON-92794	6/6/2012 13:42	Natural Balance Bison	<p>I had purchased some Natural Balance dog food the week prior to the release of the recall on the Bison dog food from Natural Balance. Petco receipt will show this. The dog was having some health issues with fluid so the dog was having regular visits with the vet. She and my other Shar Pei both stopped eating and started avoiding their dog dishes once i opened this bag of dog food. (b) (6) started to have some severe symptoms such as explosive diahrea, she seemed to have pains in her stomach, she was running fevers, etc so, I called Natural Balance and explained that the dog already had health issues and i was concerned since she was sick and my other dogs started avoiding their food. The only food they seemed to like and had been on for a long time.</p> <p>I explained to (b) (6) r (the vet tech, customer service manager) the situation and she said that she would fed ex be a return label and wanted me to send this out to her asap. At that time, she requested my vet records which i told her that she could have access to once i got the results of the tests. I explained during this conversation that this dog was extremely ill and that i needed the results asap because we may have to put the dog to sleep if we do not know the results and which way to go for treatment. (b) (6) sent me coupons in the mail for more food.</p> <p>I waited and we kept trying to treat the puppy with different antibiotics but we finally ended up putting her to sleep because she was so sick. During this time we are still waiting for the results from the sample sent to Natural Balance however, we decided that since they were being so slow at this, the vet said that we could send the food out to a universtiy and have it tested, which we did because even though we put the puppy down, i still have two dogs that were on the same food and some of the food is still at my house.</p> <p>On Friday, June 1 (original contact with Natural Balance was May 7), i called Natural Balance to find out the results because i still do not have the results and (b) (6) told me that she never sent the dog food out for testing because she did not have the vet records. I told her in the original conversation about the immediate need for the dog food results because i was trying to save my puppy but she said that she did not send this out or contact me because i gave her the wrong phone number twice. I was very clear when i communicated with this person of the immediate need for these results and here i am on June 6 and still no tests have been started. Some of the food is still at my house and i am irate. Jennifer told me that other peoples samples were tested so why was my sample singled out. Discrimination? She told me many times in the conervation that she would like to review the vet records because she is a vet tech. Yes, I did say vet tech and not Vet. Is she allowed by law to</p>	18	Months	Shar Pei	Dog	30	Pound

			<p>review the records and then try to counsel me on this?</p> <p>This is the most irresponsible company that i have ever heard of and i want someone to call me from the fda to discuss the lack of urgency or even results with this company.</p> <p>Please call me at (b) (6).</p> <p>I do not have the results from the test i sent to the university (which i paid for out of my pocket). (b) (6) said she would like to have the results once they come back but by her own admission this company has not tested this product. Sounds like someone does not want to know because there may be a problem.</p> <p>Please, please call me so that i can further explain the lack of urgency of this company and all the excuses that (b) (6) came up with to not have called me or tested the dog food.</p>						
EON-92725	6/6/2012 2:03	Canyon Creek Ranch Brand Yams	(b) (6) was given some yam treats and a few hours later he was gravely ill. He went outside and vomited up the yams, partially intact. He became lethargic and refused food and water. I took him to an emergency vet the next morning. They performed xrays, ultrasound, and lab tests for poisoning. They did find a spot on his liver and he had a fever, they suspected he had cancer in his liver and prognosis was hermangiosarcoma and 3 months to live. He was given antibiotics and was better in two days. I followed up another verterinarian who performed laproscopic surgery to check for cancer or liver abnormality. He was found to have a healthy liver and no abnormalities. He refused to eat the treats afterwards. He has not been sick since then, that was two months ago. He does not appear to have cancer. I took him to my primary vet and he said the first emergency vet probably misdiagnosed him.	15	Years	Terrier (unspecified)	Dog	30	Pound

EON-92573	6/4/2012 15:03	Chicken Soup for the Dog Lover's Soul Senior	(b) (6) began to cough/gag while eating Diamond Pet Foods Chicken Soup for the Dog Lover's Soul Senior Dog dry food. Soon thereafter, she began to vomit and eventually regurgitate. The food didn't even make it into her stomach. She lost weight. She had weighed around 68+ lbs. and was very active prior to this, going for daily walks and rigorous games of fetch. Eventually she couldn't even drink water because she couldn't tilt her head downward. I had to hold the dish up to her. She found it difficult to breathe and had to keep her head straight on and a little tilted up. I could feel the hardened mass in her throat/lymph node area that I saw in the x-rays when I had taken her to the vet. At the vet, the option of surgery was up to \$1000, which I didn't have. I opted for several injections and medications instead to the tune of nearly \$200. By the following day, (b) (6) was in such distress that I chose to euthanize her rather than see her die painfully. Chicken Soup for the Dog Lover's Soul was the food I fed her exclusively since she was a pup.	10	Years	Collie - Smooth-haired	Dog	55	Pound
EON-92571	6/4/2012 14:54	Dogs Well Happy Hips	I purchased Dogs Well Happy Hips Chicken Jerky Made In China (which were returned back to the store, Agway (b) (6) and within 24 hours my dog was violently ill with diahhrea and throwing up. It was the only new product given to her within this time frame. She is walked on a leash to take care of her business and is inside while I am at work. I am very intune with what she eats and have no doubts that this product made her sick.	3	Years	Poodle - Standard	Dog	55	Pound
EON-92550	6/4/2012 13:12	Wellness CORE Grain-free Beef Venison & Lamb Formula	On Saturday May 26 fed my dog a few tables spoons of Wellness Core Grain free and within 2-3 hours severe watery diharee. Tried to take care of it at home for a few days with a rice/cottage cheese diet...dog became worse, vomitted and continued to have diharee. Went to the vet on Friday June 1....vets results: intestinal infection and high fever 104.7 treated with 2 injections to stop diharee and fever and at home with antibiotics to treat the unknown "food" related bacteria.	3	Years	Maltese	Dog	12	Pound

EON-92534	6/4/2012 11:24	Waggin Train Wholesome Chicken Jerky Tenders	May 3 I gave my three westies small pieces of waggin train chicken jerky treats and my (b) (6) had vomiting and diarrhea with bloody stool the next day. I took him to the vet and he received two prescriptions. My other two westies had more mild symptoms. I did not connect this event to the treats, until the second time it happened two weeks later. Veterinary intervention with medications again, brought the symptoms under control with (b) (6). The other two dogs experienced mild symptoms and I gave them some of the same medication, which brought it under control again, however, (b) (6) stool wasn't fully normal until 2 weeks later. My vet asked if I had given them any "new" treats. I answered to the negative as I didn't think of these as new since I'd had the bag in the kitchen cabinet for about a month before feeding them out of it. So my vet was unaware I was feeding chicken jerky treats. When I asked my groomer if she'd heard about any illness going around, she showed me a report from ABC news about chicken jerky treats made in China. I went home and read the article further, and found the treats I had been unknowingly feeding my dogs were the #1 culprit in dog sickness and death from chicken jerky treats. I ask the FDA to please have these products removed from the shelves. When China produced tainted baby food and childrens toys, those products were recalled. Far more pets have been affected and died from these tainted product issues and our pets products deserve no less than the same recalls.	5	Years	Terrier - West Highland White	Dog	20	Pound

EON-92487	6/3/2012 22:27	Waggin' Train Wholesome Chicken Jerky Tenders	After giving Waggin' Train chicken jerky, within 24 hours both dogs had diarrhea. (b) (6) (75 lbs) had vomiting, decreased appetite, profuse diarrhea, increased urination, profuse water consumption, lethargy, no appetite. I withheld food for 24 hours and stopped giving the treats and encouraged consumption of water. Vet gave empiric treatment with an antibiotic and took a stool sample. I have contacted him and reported use of this product and will follow up on Monday to see if bloodwork is recommended.	7	Years	Retriever - Labrador	Dog	75	Pound

EON-92486	6/3/2012 22:24	Pet Shoppe Duck Jerky premium duck dog treats	He was bitten by another dog in the neighborhood on his chest. we took him to vet and had it drained and put on pain, antibiotics. We drained the wound for 2 weeks and it healed well. a few weeks later, he started to noticeably lose weight. At the time of the bite, he was 11 lb (died at 9lb), which was a little light. On a Monday, he started to have the diarrhea, vomiting and urinating 4-5 times/ a day, which was unusual. By Wed, he stopped eating all together (caesars wet food), other treats, small bites of american cheese. by Thursday, he wouldn't even move, I had to carry him everywhere. took him to the vet on Friday afternoon (circumstances did not allow me to take him in on Thurs). He was given a sub Q. Blood, stool samples were taken. by 2 pm on Sat, he was euthanized. The blood work is attached. he was given about 5-7 small pieces of the jerky, he travels in the car alot with me so I was giving them to him. The vet could not pin point exactly what he died from, but not the bite. She asked if he got into any trash, rich, non dog food, poison anything. We could not think of anything. We decided to do some research on the internet, and came across a previously report about chicken jerky. We are not 100% sure what he died from.	7	Years	Terrier - Jack Russell	Dog	9	Pound
EON-92485	6/3/2012 20:39	Kingdom Pets Chicken Jerky	I gave my dog, (b) (6), the chicken jerky and within 8 hours he was lethargic, bloody diarrhea, vomiting. Took him to the hospital and it was immediately admitted to the ICU and was critical. I was told if he had not come he would have died by the following day. He was in ICU for over 24 hours with iv fluid and antibiotics, xrays and tests done to find out what was wrong. Only thing he consumed was the treat and they found nothing else that could have caused it. Over \$3,000 and recommendation to not give anymore treats he was released and given gentle stomach diet for 10 days and is now recovered.	1	Years	Bulldog - French	Dog	25	Pound
EON-92484	6/3/2012 10:27	Waggin' Train Wholesome Chicken Jerky Tenders	My 7 year old Alusky got sick on a Monday and died on Friday with what the vet said was an auto-immune disease. His cell count was completely off and he spent his last week of life at the animal hospital receiving IV's all day for hydration & antibiotics. After all the articles I've read I truly believe that Waggin' Train Wholesome Chicken Jerky Tenders by Nestle Purina were the cause of my dog's death. EON-92365	5/31/2012 12:45	Kirkland Adult Chicken formula and Kirkland Puppy food	<p>In April, 2012 an 8 week male German Shorthaired Pointer puppy became very ill. He developed fever, lethargy, vomiting, diarrhea, and reluctance to eat or drink. He was taken to (b) (6) for examination. His Parvo SNAP test was negative. He was given IV fluids and started on a course of antibiotics. He perked up and was discharged the following day. He returned home where he continued to have diarrhea, vomiting, and lethargy. The following day after discharge I took him back to the vet for an exam he now acted as though he was in pain. The vet diagnosed him Intussusception. He required surgery to repair the injured bowel.</p> <p>One week or so after the ill puppy was treated my older male (b) (6) developed similar symptoms and required hospitalization for fluid replacement. I treated (b) (6) after discharge with a sulfa based antibiotic. My female (b) (6) also developed the same symptoms however I was able to start a sulfa antibiotic and prevented her from being hospitalized.</p> <p>I am writing because we feed Kirkland Adult Chicken formula and Kirkland Puppy formula dry dog food. I know (b) (6) is not listed in the recall but I am concerned as these dogs developed all the symptoms of salmonella infection. My vet did not test for this infection in these dogs.</p>		Years	Pointing Dog - German Short-haired	Dog		
EON-92337	5/31/2012 10:30	Premium Edge Healthy Weight II Weight Control Formula	(b) (6) has always eaten Premium Edge food. For dinner on Wednesday May 23 he received a new bag of Premium Edge Healthy Weight II food, ordered from Amazon.com. That night he vomited the food multiple times throughout the night and early morning. He continued to vomit over the next few days and developed severe diarrhea also. We initially attributed it to the new flavor of food (he was previously on the Chicken formula) and the very high heat/humidity we had over the weekend. On Wednesday the 30th I did research on this problem and saw the information on the recall of Diamond brands. We checked the production code and there is a 2 in the 9th spot and an X in the 11th. The best before date is March 18, 2013-all fitting the recalled bags. My dog is severely dehydrated and is going to the vet today. We assume it is salmonella.	1	Years	Pit Bull	Dog	70	Pound
EON-92295	5/31/2012 3:00	Simply Nourish Chicken and Pasta Stew	My 4 yr old shar-pei/pug mix was given Simply Nourish Chicken and Pasta canned dog food I purchased at Petsmart. He ate the food for three days. Within 24 hours he had uncontrollable diarrhea, lethargy, and cried in pain for 12 hours until his vet could get me paid meds. I also fed this same food to my 9 yr old purebred shar-pei who also started having uncontrollable diarrhea and vomiting with 103 degree fever within 48 hours of starting to eat this food. The symptoms between them were identical and the only change was this food. They both have been seen by my vet and are taking antibiotics. I took a half can of uneaten food to the vet and they said it was suspicious situation with the two sick dogs but they couldn't test the food at their office and recommended me to file this report.	4	Years	Shar Pei	Dog	25	Pound
EON-92294	5/30/2012 23:45	Kirkland Dog food	extreme fatigue, diarrhea, and vomiting. The diarrhea was uncontrollable. It ruined several rugs of ours. They also showed signs of upper respiratory distress and heavy panting. The symptoms lasted over 3 days. On the second day we went to the veterinarian who administered fluids and gave us a prescription.	4	Years	Shepherd Dog - Australian	Dog	50	Pound

EON-92293	5/30/2012 22:45	Master Paws Medium Biscuits	<p>On April 21, 2012 we purchased a 40 pound bag of diamond dog food from the (b) (6) store at (b) (6) in (b) (6). We also purchased two bags of Medium Beef Basted Biscuits. It is a 4 pound bag. Inside the bag of biscuits, was what looked like a mouse nest or a rat nest. It was approximately 20 or more red yarn all intertwined in a ball inside the completely sealed bag. It looked like a mouse or a rat could have made it. There was no holes or nothing in the bag. My boyfriend, (b) (6) had already fed the dog a few of these biscuits. I have the bag that they had come in. We took the other bag back. I contacted the store and talked to (b) (6), the manager and told him what happened and he wanted to see the yarn nest so the next day, I put it in a ziploc bag and dropped it off to him in the store and he said he would take care of it. The name on the bag is Master Paws and is packaged at (b) (6) in (b) (6). About a week later, (b) (6), our siberian started gulping water more than usual. I also noticed a week or two later that he was looking sick. He completely stopped eating. I did notify (b) (6) the assistant manager of the store that our dog is sick and I hope he doesnt die. He said he hopes so too. Our dog died on (b) (6). We did take him to two vets and they said he had liver damage and they gave me pills to treat that. We had to feed our dog with a syringe for the last three or more weeks and we are sickened. I feel his death was caused by either the diamond dog food or these biscuits and I am sickened.</p>						
EON-92281	5/30/2012 16:00	Waggin' Train Jerky Tenders , Waggin' Train Yam Good	<p>This has been going on since Oct 2011. There has been no realization that these incidents could be related so not reported until now. My dog has been eating these jerky treats for 6 months. She has had numerous episodes of diarrhea, lethargy, anal gland problems from the diarrhea and the most recent projectile vomiting. I had suspected her dog treats were the cause before but just because she is sensitive. She has been on and off numerous antibiotics for this problem that always improves her and then when the antibiotic is stopped, she returned to poor health, loose stools and gagging.</p> <p>This memorial day weekend on she got 2 yam treats and a jerky treat. By monday she had diarrhea all over the house and projective vomited across the living room floor in front of me with out even getting up from her bed. (She is obsessively housebroken, so for her to do anything in the house is a huge sign) She was still hungry but could not hold anything down. It looked to a lay person, like the stomach flu. I had seen all this numerous times before except for the projectile vomiting. That was a worse symptom. I again called my vet who stated that I could pick up another prescription for antioibotic because she must have gotten into something again that upset her stomach. I told the vet I had been watching her like a hawk and I didnt understand why this kept happening.</p> <p>Then I watched the news. When the specific treats I give my beagle were mentioned I was horrified. She did improve in her history while on antibiotic but also when she was "sick" I always stopped all treats and gave her bland food so I realized there has always been a correlation, Always. Obviously I will NEVER give her the treats again and hope that I have not done permanent damage to my sweet (b) (6) She starts the antibiotic tomorrow when I am sure she can hold down the medicine.</p>	10	Years	Beagle	Dog	29	Pound

EON-92275	5/30/2012 15:15	WAGGIN TRAIN JERKY TENDERS	<p>I bought Waggin train Chicken Jerky treats in July 2011. After giving her one I noticed she was acting strangely, I wasn't sure what it was, it was a prayer position type of stance. At first I thought she was being cute until after 4 more days and 2 more treats..(SO 3 TREATS TOTAL IN ONE WEEK PERIOD.) She looked uncomfortable trying to pee every 2 seconds, then she moved he bowels and it was very stringy and a lot of blood came out. I thought at first maybe the treats weren't digesting and cutting up her intestines. I stopped giving the WAGGIN TRAIN TREATS to her and returned them to Hannaford supermarket and told them what happened. She was seeming to feel better the next few days as I fed her organic home made diet and watched her closely. It wasn't till months later when I saw on the news they were causing renal failure and death in some dogs. I was very upset and contacted Waggin Train. Where they denied anything wrong with their products. Since then I see and hear many reports of dogs dying. Which confirmed my original suspicions that those Toxic treats was to blame for my Dogs suffering. I am filing the complaint and pleading with you to take these things off the shelves. I was recovering from cancer treatments and If i had lost my best friend to a dog treat I would have been devastated. Now I see so many beloved pet owners losing their pets, some complainating eating the treats themselves so as maybe it the suffering will stop... PLEASE PLEASE SAVE OUT PETS..</p> <p>THERE ARE FAR TOO MANY UNWANTED DOGS SUFFERING AND DYING. WHY SHOULD ANOTHER HEALTHY LOVED PET DIE AT THE HANDS OF THEIR LOVING OWNERS..</p>	5	Years	Other Canine/dog	Dog	35	Pound

EON-92192	5/30/2012 10:45	Chicken Tenders	<p>In December of 2011 ((b) (6)). My dog suddenly ill. Around midnight he began vomiting blood and having bloody stools. He was taken to the emegency vet clinic the same day. The vet informed me his chance for survival was not likely given his vital signs. He underwent two plasma transfusions along with other treatments. In the course of a week, he stablized and was fully recovered with in a month. After numerous and exhasive tests - the vet concluded that the most likely cuase of illness was related to something that was ingested as a part of the pet's diet. Their were no toxins / harmful viruses detected. One change that we had made in his diet a couple of months before the illness was adding Chicken Jerky Treats manufactured by Canyon Creek Ranch. I was not aware this pet food was packaged in China or any of the other issues that have been reported from similar products until recently.</p>	1	Years	Terrier - Irish Soft-coated Wheaten	Dog	37	Pound
EON-92182	5/30/2012 10:30	Milos Kitchen dog treats	<p>Bought Milo's Kitchen dog treats on the weekend for my dog and now she isn't eating and seems to have stomach upset. I then was sent an email from a friend about problems with Milos Kitchen (made in China). I read email and it said that there have been problems first reported in 2007. What gives, why isn't there a recall on these products.</p>						

EON-92173	5/29/2012 23:45	Waggin' Train Wholesome Chicken Tenders	had an episode of vomiting, excessive drooling and lethargy in early April, 2012. I took him to the vet and he had blood and urine tested and was put on a course of antibiotics. He improved after a few days. Then again about 10 days ago, he had the same symptoms, but seemed much worse. He would not eat or drink, and began to stagger as he walked. I happened to look on the internet at work, saw a headline about dog treats from China harming and killing dogs and printed it out to check the brand we had at home that I had been giving him occasionally for the past 2 months. Sure enough, we had that brand. I took him to the emergency vet right away that evening, and the vet ran blood and urine tests and found that his white blood count and enzymes were elevated. He felt that the dog chicken jerky treats had been the cause.	7	Years	Pointing Dog - German Wire-haired	Dog	90	Pound
EON-92172	5/29/2012 22:00	Purina Puppy Chow Complete and Balanced Nutrition, American Kennel Club Smoked and Basted Porkhide Retriever Rolls	<p>My dog (Boston Terrier/Pit Bull Mix) has been a regular consumer of rawhide treats and purina puppy chow- i have been giving her the AKC treats and purina puppy chow for a matter of about 4 months. During the last couple of months, I noticed her health began to deteriorate, just acting like she didn't feel good. She lost control of her bladder a couple of times. Then this past weekend, she became very ill; vomiting and becoming disoriented, complete loss of bladder control, not being able to walk. When we took her to the vet, she said she was in kidney failure. We lost our beloved pet this past (b) (6) ((b) (6)). She was so far gone, we had to have her euthanized.</p> <p>With the news about the treats that were made in china, I wanted to make sure her food/treats was not a culprit. I have her food that she has been eating as well as one of the bones that she had left. This pet was a member of our family and her death has been devastating. She was a vibrant and a healthy dog up to a couple of months ago. We just don't understand why she became so sick at such a young age.</p> <p>Name of products: AKC Kennel Club Basted Porkhide Retriever Rolls Item#AKCPR0019 upc 8 10633 01603 9 Purina Puppy Chow Complete & Balanced for Growing Puppies 19.6 lb bag Lot #20751079 0028L11 Sept 2013 UPC 17800 14408</p>	2	Years	Mixed (Dog)	Dog	35	Pound

EON-92119	5/27/2012 11:00	Fancy Feast Ocean Whitefish and Tuna Feast Classic	<p>As soon as we fed the Fancy Feast Ocesan whitefish and tuna feast Classic we noticed sudden ill effects. (best by sept 2013 1 256 116 0L216521 38)</p> <p>The cats began vomiting, lost their appetite, two of the cats vomitted yellow bile for 3 days. All the cats lost their energy, quit playing and slept and slept. Their urine smelled horrible. Not the normal odor, but a strong compostyy-type odor. If one cat used the litter box, the smell consumed the entire room and needed changing.</p> <p>Then the fur began falling out like tumble weeds around our home. (b) (6) and (b) (6) lost 80% of their fur. They went from gorgeous winter coats to hairy bathing suits. They began licking around where a tummy button would be....all the fur was licked off their stomach as the rest of their coat, including patches on their faces fell out like chemo-poisoning. They had bald spots and their skin showed through the little remaining fur.</p> <p>We began giving them homeopathic treatment for food poisoning and the vomiting stopped. Finally after 2 months their fur is slowly growing back.</p> <p>I am a pet columnist and aware that something is VERY wrong with pet food. If I can help get the word out to the general public in any way ... just ask.</p>	9	Years	Persian	Cat	5	Pound
EON-92118	5/27/2012 9:00	Waggin Train wholesome chicken jerky tenders	I buy all natural dog food for my dog and thought these were the same health standard, and had been buying these for a while. My dog gotten into the cabinet while I was outside and ate several, which I will usually only give him one at a time, two or three times a day. Several hours later, he experienced severe (foamy) diarrhea, uncontrollable vomiting for several days. I didn't think he would make it. After several days of a diet strictly of boiled whole chicken and rice he seemed to come around, but has not completely come back to where he was, his overall health has declined significantly in the last month since this occurred.	13	Years	Mixed (Dog)	Dog	75	Pound
EON-92117	5/27/2012 3:00	Canyon Creek Ranch Brand Natural Chicken Tenders	I bought my dog the Canyon Creek Ranch chicken treats for Christmas because they were on sale and figured I'd try something new for him. Shortly after giving them to him he because having a lot of issues with diarrhea. We gave him a bland diet, eliminated treats. Once we started giving him the treats again he had diarrhea again. They were the only new thing we were giving him. He's had tons of treats before and eats a ton of food and has never had any stomach issues. I know the chicken treats were the ones making him sick. I know it was not because of anything specific with my dog but because there is something wrong with the treats.

EON-92110	5/26/2012 11:00	Premium Edge	My dog was vomiting and stopped eating so I took him to the vet. He ended up having intestinal surgery after an X-Ray made it appear he had a large blockage and may have gotten into something. During surgery the vets found that he just had a "toxic mass" in his intestines and that his intestines had stopped their peristaltic action. It appears that he had a viral or bacterial infection that caused his intestines to stop working. He has been eating Premium Edge Dog Food pretty much exclusively. I did not keep the prior bag of dog food but the current one has a use by date that fits the description of the recalled food. The code does not match exactly. There is a 2 in the 10th position and an X in the 11th position. This could have been coincidental, I just thought someone should know in case other people are reporting such problems with their dog in connection with this recall.		6	Years	Retriever - Labrador	Dog		92	Pound
EON-92109	5/26/2012 5:00	Pet Center Inc. Chicken Nibbles	we noticed our dog was vomiting a few times a month but could not identify any food triggers that may be causing the incidents. Since we had heard about the problems with chicken jerky from China people were reporting, we were monitoring our dog's reaction to Pet Center Inc's chicken nibbles we had gotten her a few months back. We got the 2 1/2 pound jar and giving it to the dog on an irregular basis (not daily). Last week, our dog upon eating a chicken nibble ran for the door needing to vomit. Part of us still suspected something else since she had been fed chicken nibbles for the last few months. However two days in a row this week she had the same reaction. Immediately after eating a chicken nibble, she ran outside to vomit twice. That solidified our suspicion that something about the chicken nibble was causing the vomiting. Besides the vomiting, the other symptoms have been excessive drinking and lethargy. Since she is a long haired dog, we thought the drinking and lethargy were tied to the warming weather, however are taking her to the vet since those symptoms developed in conjunction with the vomiting.		5	Years	Samoyed	Dog		72	Pound

EON-92108	5/26/2012 3:00	waggin train jerky tenders chicken dog treats	i normally give (b) (6) dog jerky as a treat for him, well this last batch i noticed him acting different laying on the floor not wanting to do anything, he started eating less and drinking more i even tried to give him a pc of jerky and he didnt even want it and he never turned down some jerky next thing i notice he was throwing up for two days , just liquid . i also notice he smelt like poop so i gave him a bath and he didnt act like he normaly does, i dried him off and he still smelled we took him to the vet and he started having seizures and was having them at home but i couldnt tell. they did blood work , urine and exrays they said his kidneys and liver were failing and enlarged and there was nothing we could do. i brought him home he kept having seizures and was throwing up his bouls and we had him put down all of this within 2days. (b) (6) was a great dog and very healthy loved to play and take walks . he passed so sudden we had no warning . he was to young and did not deserve this, i miss him dearly and took this really hard i ended up taking 2 days off from work because i was having a break down. something needs to be done there are multiple reports out there with the same syptoms. EON-92107	5/25/2012 22:45	Royal Canin Allergy Formula - Green Pea and Duck	The problem is twofold. First problem: The cans are coming in with dents in the lower portion just under the paper surrounding the cans and I do not want to buy cans with dents. Dents can allow for microscopic holes that allow bacteria and mod to grow. My cat has inflammatory bowel disease and is doing well on this food but she is on Budesonide, a steroid for the gastrointestinal system and I do not want to take a chance on dented cans. The metal used for the cans is very very soft and dents too easily. This has been an ongoing problem with Royal Canin perscription Duck Formula Cat Food for many years. It is currently getting worse. This week I opened two cases and gently inspected the cans and could not find a single can to buy without a dent. I am driving all over (b) (6), (b) (6) and having difficulty finding undented cans to buy. Second problem: Some of the undented cans are showing white stuff on the top or sides or bottom of the cans. It looks like something is growing inside the cans. I sent a picture from one can to Royal Canin and spoke to them about it and gave them the coded information on the cans. I wish your agency would regulate the strength of the metal used for the canned food for pets. People who are unaware might not notice the dents on the sides of the cans under the paper, and they might not notice the white stuff in the cans if there is very little. The white stuff has occurred for the last month or two. I notified corporate Petsmart today and Royal Canin last week. Note: I did not know what date to put for date started:						
EON-92106	5/25/2012 22:15	Skoki Dog Food	Dog had severe diarrhea from this dog food. Thinking it was from the change in food, continued to feed, symptoms proceeded to get worse. EON-92073	5/25/2012 13:15	Taste of the Wild Canyon River Feline Formula	<p>I purchased a small bag of Taste of the Wild feline on Friday, May 4 from (b) (6), (b) (6).</p> <p>I noticed that all of the Taste of the Wild food had been removed from the shelves. when I asked where and why, I was told by the male clerk that there had been a fire at the factory. I then asked if there was a comparable food as my cat has a grain allergy- I was told then that the Taste of the Wild cat food was okay and they produced a bag. On Saturday afternoon, May 5, I noticed my cat suffering from severe diarrhea. On Sunday, May 6, his appetite began to decrease. By Wednesday, May 9, his appetite was almost nothing. On Thursday, May 10, he was no longer drinking and had ceased to eat completely and had become lethargic. I took him to my veterinarian that evening, May 10. (b) (6). I was told that normally, salmonella does not affect small animals but because my cat suffers from chronic respiratory issues, his immune system was already compromised and he was unable to fight off the salmonella. He was given a shot of steroid to help with the breathing issues that had become overwhelming from the stress and then placed on a run of antibiotics (azithromycin) where he seemed to gain strength for a couple of days.</p> <p>He has since passed away, (b) (6)</p> <p>As you well know from a variety of medical and psychological articles, pets have become part of the family. And for a single, childless 54-year old like myself, the relationship goes even deeper. I have worked with animals for over twenty years and have seen many pass away in that time, but to watch your own waste away is truly unbearable. Especially when it could have been prevented by removal of the tainted food.</p> <p>I spoke with the Taste of the Wild Company, who checked the product code on the bag of food then directed me to return the food to the pet store. They also informed me that it was both canine and feline foods that had been recalled, not just canine. When I came back in to exchange the food on the evening of the 10th, with my cat in the car, the female clerk not only argued the validity of my claim but became a bit belligerent with me then took the food.</p> <p>This situation continues to be unbearable and continues to play out on the pet store and pet food company's end like a keystone-cops movie, with each person that calls me claiming to knowing even less than the last.</p> <p>I am desperate to find assistant in investigating these people but no attorney will handle an animal case. Please help investigate these people.....</p>	2	Years	Domestic (unspecified)	Cat	12	Pound

EON-92069	5/25/2012 12:15	Milo's Kitchen home-style dog treats chicken jerky	<p>Our 4-year-old French Bulldog, (b) (6) was given one Milo's Chicken Jerky treat on November 17, 2011. That evening, she began having diarrhea, which continued on and off during the night. I washed her and made sure she had sufficient water and offered her food (which she refused) during the night. I last checked on her at 7:00 AM on (b) (6) and she was sleeping but alert and looked at me when I came into the room. At 8:00 AM (when out vet's office opened) I went into the room where she was sleeping and she had passed away. The only difference in her day-to-day diet was the one Milo's Chicken Jerky treat that she had on Thursday, November 18, 2011. This treat caused her illness and sudden death.</p>	4	Years	Bulldog - French	Dog	14	Pound
EON-92049	5/25/2012 10:45	Canyon Creek Ranch Brand: Natural Chicken Tenders	<p>(b) (6) ingested the Canyon Creek Ranch treats daily. I know that he ingested them for atleast 6 months. During his routine check up, the vet found that his liver levels were off the charts. The vet believed that he had ingested something and had a bacteria for which they gave him antibiotics. Upon his follow up vists, he levels had not gotten any better. They sent us to get an ultra sound which was basically inconclusive. We were referred to a specialist at this point. This all happened around March 10, 2011 between that time and 4/10/11, (b) (6) became more lethargic at home. He was not eating very well, or at all, he lost close to 2 lbs.</p> <p>The specialist found that he was sicker than we knew, and he had to be put on fluids immediatly. The date of admission to the specialist was 4/10/11. He never came home. From 4/10-4/20/11 he was was a patient at the vet. He was on constant fluids. We did an exploratory liver surgery, as they were unable to pinpoint the problem. When they performed the surgery they realized that his liver was too far deteriorated for them to do anything. Their hopes were that it would begin to repair itself. It didn't. He became jaundice, and was not eating or drinking. We were basically keeping him going through the fluids. Our last ditch effort to save him was a blood transusion, it was unsucessful. On (b) (6), we made the decision that we could no longer put him through these life saving measures. We knew he would be unable to come home unless his levels imporoved, and they just weren't getting any better. We also used up all of our resources and more (we spent around \$8,000.00 trying to save him).</p> <p>So, he spend the last week and a half of his life in a strange place, undergoing a very invasive surgery, a blood transfusion, and being on a constant IV for fluids.</p> <p>Again, the Canyon Creek treats were his favorite, he ate atleast 1-2 daily. Please please please investigate to see if this was the cause, if there is any chance that this could happen to another dog and another family, it should be worth it.</p>	2	Years	Dachshund - Miniature	Dog	15	Pound

EON-92027	5/25/2012 3:30	Waggin Train Brand Chik'n biscuit	(b) (6) loved her treats, and had 1-2 a day. The treats were the Waggin Train chicken biscuits. She ate them for 6-8 months. (b) (6) developed kidney failure and died within a week of onset. In hindsight, she had developed an extreme thirst, and may have been suffering from kidney failure for a few months prior to the extreme symptoms and death. She had no other health issues and was a fun spunky little love who was one of my children. These treats should not be sold. I think the other dogs in the family weren't affected due to their body weight. They are all larger dogs 60 lbs and up. I believe these treats are a death sentence to small and tiny breeds. It's heartbreaking.	12	Years	Chihuahua	Dog	7	Pound
EON-92026	5/25/2012 3:00	Milo's Kitchen home-style dog treats chicken jerky	(b) (6) exhibited lethargy, increased thirst, loose stools, vomiting, and lack of appetite after we gave her Milo's Kitchen Home style Treats. After seeing a news report on these dog treats we ceased giving her these treats and purchased a brand we had given her previously. The difference in behavior was remarkable. After only one day her appetite is improving and her energy level is greatly increased.	3	Years	Terrier - Yorkshire	Dog	7	Pound
EON-92025	5/25/2012 3:00	Waggin' Train Wholesome Chicken Jerky Tenders	I have been giving one of my two dog these treats every weekend. For the last two weeks she had been having loose watery stool for three day after The treats have been giving. I relized it was the treats doing this when I gave my male one of the chicken Jerky sticks and he had the same reaction. I normaly give him a natrual raw hide instead as he will chew on that longer.	7	Years	Dachshund - Miniature	Dog	9	Pound
EON-92024	5/24/2012 23:45	Milo's Kitchen Chicken Jerky Treats all natural	My parents were dog-sitting (b) (6) for the weekend and bought her Milo's Kitchen Chicken Jerky treats. When she returned home, she was violently ill...up most of the night vomiting, what appeared to be blood. She recovered in a day and I figured she ate something, but wasn't sure what. Two weeks passed and she was fine. But then she again went to my parents house for two days...and they gave her more of the same chicken jerky treats. She again came home and was sick...this time vomiting and with diarrhea. Then today my babysitter informed me that her 3-year-old Pomeranian died this week after eating Milo's Kitchen chicken jerky treats and choking on her own vomit. I double checked with my parents and they had been giving our dog, (b) (6), the same treats when she visited their home.	2	Years	Poodle - Miniature	Dog	12	Pound

EON-92014	5/24/2012 22:45	Taste of Wild	<p>I purchased a total of 3 bags of Taste of Wild dry cat food. First bag was purchased 3/31/12, the 2nd bag 4/21/12, the 3rd bag 4/30. I switched brands of food due to the cost of Hills Science Diet. I have 6 cats, (b) (6) ate the science diet. I finished their old food first then started the new food to all my cats at the same time. (b) (6) became ill approx 2-4 weeks after the change in food, and into the 2nd bag of food. I noticed the change in his condition at the end fo the first bag about 2 weeks later. My first thought wasn't the food since it had been 2 weeks later. I have never had an animal become deathly ill from changing their food. I monitored his behavior and condition until I notice his wt loss. Then I knew something drastic was wrong. He was around 12 pounds and now he is at 8 pounds.</p> <p>He became lethargic, decreased drinking, frequent vomiting and watery diarrhea.</p> <p>His first vet visit was 4/20/12 in which he an overall exam, very tender abdomen, wt loss of approx 3-4 pounds. He received an antibiotic injection and pain meds. I brought him home with no improvement.</p> <p>He returned to vet on 5/9 due to his condition continued to worsen. I was still feeding him the contaminated food unknowingly! He had a 2night stay with IV fluid, fecal culture, closely monitored condition.</p> <p>I stopped the food during that hospitalization when I found out about the recall thru a family member. I confirmed the product code with Diamond company. After I inquired about a refund, I was given instructions on how to find the refund page online. I was then transferred to the Diamond Vet but had to leave a message. I rec'd a call the next day (saturday) but was unaware of the call...when I called back no answer. I have called several times with no answer.</p> <p>I will be calling Diamond back in the am on 5/25 to discuss reimbursement to my vet.</p> <p>My conerns are my very much loved pet is NOT recovering and is slipping away. (b) (6) returns to the vet 5/26.</p> <p>I am very upset, frustrated that it is not posted on their main web page either!!!...Taste of Wild phone # didn't work or ring....tried numerous times.</p> <p>I feel the FDA has a responsibilty to the animal population to have more strict regulations regarding the process of manufacturing pet food.</p> <p>I love my animals very much and if I loose my (b) (6) due to the negligence of this company I will pursue this further legally.</p> <p>I had a healthy pet that now is suffering. Still loosing wt, vomits and very feeble when once he was playful and agile.</p> <p>please contact me if you need this bag of food that has been confirmed to be POTENTIALLY contaminated. I have taken pictures of the bag and (b) (6). They are the reason (b) (6) is DYING!!! and</p>	16	Years	Domestic (unspecified)	Cat	8	Pound

			<p>I'm VERY upset!!! those words don't truly describe how I feel towards this company!!! They WILL pay the vet bills but I want my "snuggle" kitty back in the healthy condition he was in prior to him eating Salmonella!!!!</p> <p>I was unaware I could attach files or I would have scanned the Vet progress notes and the statements to my PC then to this report...If I can attach these on 5/29 I will be very willing to do so. I need to scan them at my place of work...unable to do so at home. Please notify me via email if I can send these documents on 5/29.</p> <p>Thank you</p>						
EON-92013	5/24/2012 22:45	Waggin Train Chicken Jerky Treats	<p>He became lethargic one day and not being himself, I took him to his vet. She was not able to find exactly his problem except that it was an abdominal problem. She gave him something to ease his stomach pain and if he was not better the next day, we were to run blood test. That night he was laying in the kitchen with me. He went to raise up and gave a horrible yelp and fell over dead. A friend of mine was also giving her pet the same treats and her dog died exactly the same way.</p>	13	Years	Shih Tzu	Dog	20	Pound
EON-92005	5/24/2012 22:15	Waggin' Train Chicken Jerky Treats	<p>Suddenly one evening, (b) (6) began to vomit frequently, drink water excessively, shake, appear lethargic, and appear in significant abdominal distress. We took him to the emergency veterinarian, who ran a series of tests. The tests showed significant dehydration, elevated kidney values, and abnormal appearance (b) (6) stayed overnight at the emergency vet (the local VRCC at a cost of over \$1000). The next day we took (b) (6) to his regular veterinarian, where it was suggested he stay for the day. After 24 hours of administering fluids and monitoring, he was declared well enough to go home.</p> <p>No immediate cause of illness could be found, so the vet suggested we consider dietary possibilities. We had previously been giving (b) (6) Waggin Train' Train Chicken Jerky treats purchased from a local Walgreen's store. We didn't even think of this at the time, so eventually as (b) (6) appeared better we began giving these treats again. The symptoms immediately returned, at which time we stopped giving the treats. We then pursued more research in conjunction with our vet and found that other dogs had taken ill with the exact same symptoms after having ingested these treats.</p>	2	Years	Chihuahua	Dog	9	Ounce

EON-92004	5/24/2012 21:45	Waggin' Tails Rawhide Chicken and Duck	In March of this year, (b) (6) woke up in the middle of the night every night for several nights and ran downstairs to vomit. She almost never vomits so we were mildly concerned but thought maybe she ate something she should not have. A week later she started to urinate all over, on our bed, on our couch, and on the floor. She never has had accidents except when she was a puppy. At the same time she was drinking constantly. She could not get enough to drink. We automatically assumed UTI and called the vet. We took in a urine sample and it came back negative. The vet wanted to do bloodwork to rule out renal failure or parasites or liver damage, etc. At the same time a friend told us about these Waggin' Tail treats and that they have been causing a lot of problems in dogs including his and his brother's dog. Since that is what we have been giving (b) (6) we stopped them right away. Now we are trying to determine how much kidney damage (b) (6) may have. She is still drinking all the time and is having many accidents in the house. We would like to know what caused this because prior to this she was very healthy.	6	Years	Retriever - Labrador	Dog	72	Pound

I have given this brand and flavor of cat treat to my cat for years with no problem. On Tuesday she began vomiting and having diarrhea. She continued being sick throughout the week, mostly at night, and seemed to recover during the day. It wasn't until Friday that I realized the treats were the only new food I'd given her, the rest of her food was from the same package I've been feeding her from for the last several weeks, and that I'd been giving her the treats at night because she would eat them. I stopped giving her the treats then, and she continued vomiting and experiencing diarrhea for a few days, but it tapered off. On Saturday May 19th I brought her to the vet and he confirmed she had no other reason to be sick. On Tuesday May 23rd I brought her back to the vet and she was given fluids, she was very dehydrated and down to 8.4 lbs, from 9.6 lbs. After she was given the fluids she began to eat again.		17 Years	American Shorthair	Cat	9	Pound
EON-91929	5/24/2012 3:15	Milo's Kitchen Home-style Dog Chicken Jerky Treats	shortly after starting to give these treats (b) (6) slowed down his food consumption, then slowed down his activity level sleeping more. the anorexia got a little worse as did the lethargy. he started to drink less water. then he started to have difficulty walking on linoleum floor here at home, like the floor was slippery, (b) (6) looked like bambi on the ice. about 2 weeks ago he started to cower at loud voices, sounds and the sudden sounds.		6 Years	Mixed (Dog)	Dog	55	Pound

EON-91928	5/24/2012 3:00	Pet 'n Shape Chik 'n Skewers Dog Treats	Three different times in a two week period, (b) (6) vomited, involuntarily urinated on the floor and markedly increased her water consumption. Each of these three times was preceded several hours by her ingestion of a Pet 'n Shape Chik 'n Skewer.	3	Years	Terrier - West Highland White	Dog	21	Pound
EON-91927	5/24/2012 3:00	Waggin train chicken jerky treats	Last (b) (6) (b) (6) my dog (b) (6) died of kidney failure, i had been feeding him waggin train dog treats for most his life. I believe due to the recent media attention that the dog treats made by nestle-purina were responsible. (b) (6) was always a very active and healthy dog he never in his whole life had any illnesses except for the kidney failure which killed him (very horribly i might add) I stopped giving him the treats as soon as the vet told me that he had kidney problems, but it was too late. Now my other younger pet (b) (6) has kidney problems because i gave him the same treats for many years.	12	Years	Chow Chow	Dog	55	Pound
EON-91926	5/23/2012 23:45	T BONZ	She has really bad diarrhea. Really bad. Had to keep her in our bathroom because she had a lot of accidents in her kennel. We have a friend that is a vet tech, but she didn't actually look at her. She told us to have her fast for 24 hours and then give her chicken and rice plain, so we did that and she seems to be getting better. This only started after we started giving her these treats specifically. Our pug (fat) didn't have a bad reaction to it because she has an iron stomach and eats anything. (b) (6) stomach is a little more sensitive and I think the treats made her sick.	3	Years	Pinscher - Miniature	Dog	10	Pound

EON-91924	5/23/2012 23:45	Wagon Train Jerky Tenders - Chicken Dog Treats	(b) (6) had recently been given chicken jerky treats by Waggin Train. (b) (6) then experienced extreme diarrhea and vomiting for 36+ hours. We took (b) (6) to the vet where they ran tests and determined that he had a bacteria infection in his GI tract and suggested we no longer give him the treats. He is currently on a variety of medicines to help with his stomach issues -- we are now in day 3 and he is still have very loose stools. I cannot believe that so many dog owners have had the same/very similar experiences with these treats and there isn't a warning or a recall!	6	Years	Dobermann	Dog	77	Pound

EON-91923	5/23/2012 23:15	Waggin Train Chicken Jerky	<p>(b) (6) was my dog, and he became by parents dog when I went to college. He was always a very happy and healthy dog. My parents purchased Waggin Train chicken jerky, as well as a few other chicken related treats of theirs such as the chicken biscuits and yam and chicken treats. (b) (6) absolutely loved the chicken jerky and would get 1-2 pieces daily for almost his entire life. We never had any reason to believe that these treats were unsafe, quite the contrary, because they were real chicken it seemed like they were very healthy and were better than many other treats on the market. Around Sept 2011 (b) (6) was scheduled for a dental and his vet found some abnormal results in his pre-surgery blood work. At first it seemed that he was anemic, a condition that he had never had before this date. His vet put him on some medicine, hopeful that would correct the problem. Upon more blood work, it was found out that the medicine was not having any effect on this issue and more tests were done. Then it was seen that his kidney function was starting to decline. He was put on purina vet diet NF, a food that is made specifically for dogs with kidney trouble. This food made no difference and he began to go downhill rapidly. In the span of a few months he went from a happy healthy dog that loved everyone and loved being outside to a dog that had no strength or energy and hardly ate or drank and barely left his crate. The vet said that the only treatment option left was to leave him at the vet and keep him on constant fluid and dialysis and hope that his kidney function started to increase, but that is very expensive, and very stressful on the dog, and there was no guarantee that he would even be strong enough to survive that much less that it would actually work.</p> <p>My parents elected to keep trying the very expensive speciality food and hope for some improvement and some indication as to what was causing these issues. I live 4.5 hours from my parents and work full time at a dog boarding kennel. Because of the nature of this job, I am not able to travel much, and I work every holiday so I rarely get to see my parents or my beloved (b) (6). (b) (6) was the first holiday I had off in the 4 years I have worked there. So I was so excited to get to go home and see my family and my dog who I hadn't seen in almost a year and spend some quality time there, even if it was only for barely 2 days. Instead of having a happy wonderful relaxing holiday with my family, I spent my time literally laying inside of his crate with him cuddling up with him because he was so weak. He could barely wag his tail anymore and no matter what I did he wouldn't eat anything and would barely drink. He was euthanized on (b) (6). I will never be able to go through another (b) (6) without feeling this pain. And I am reminded of this every day at work while i am surrounded by other people's healthy dogs and wishing that (b) (6) was still with us. After I went to college, he pretty much became my dads therapy dog. My dad has been very sick almost my entire life, and (b) (6) was his companion. He was a great dog would guard my dad, and lay with him when he wasn't feeling good, and always stayed with him while my mother was at work.</p>	5	Years	Mountain Cur	Dog	27	Pound
---------------------------	-----------------	----------------------------	---	---	-------	--------------	-----	----	-------

			<p>He is absolutely irreplaceable. If we had any warning of how unsafe these treats were, we NEVER would have given them to him. It is a decision myself and my parents have regretted every day since this happened. I want the people who are responsible for this to be brought to justice. No one else's innocent dog should get sick or die from this negligence on their part. If this affected humans directly, it would have been pulled off the shelves at the first sign of a problem, but just because it affects dogs doesn't mean its ok and can be ignored. I spread the word daily to every customer I come in contact with that these treats are harmful and I hope that every person whose pet has become sick or died because of this is able to get closure by the comp</p>					
EON-91922	5/23/2012 22:45	Dogswell - Happy Hips Chicken Breast with Glucosamine & Chondroitin	<p>(b) (6) is an extraordinarily healthy 6.5 year old fox terrier/cattle dog/scrappy McRascal mix. I started to give her "Dogswell's Happy Hips" with Glucosamine & Chondroitin about 2 - 2.5 weeks ago. Witin about 2 days (or thereabouts) I noticed she started to have terrible diarreaaha...I did my usual treaments for this - soupy rice and Purina's FortiFlora - she seemed to be doing a bit better, but the diarreaaha never fully cleared up and and she also has started having terrible, smelly gas...something very unusal for her...I was forwarded a report about chicken treat products from China and immediatly pulled out the baq of her chicken treats..they are distributed by Authur Dogswell, LLC. (b) (6), but Made in China...I will be notifying this distributor and will be happy to send in the remaining bag of treats for study. I obviously will no longer give her these treats, and I will be monitoring her carefully over the course of the next few days to see if the problems clear up. I certainly hope so.</p>	6	Mixed (Dog)	Dog	48	Pound

EON-91920	5/23/2012 21:15	Waggin Train PBJ	I bought Waggin Train treats and gave my dog 2 on sunday night. Monday (I left at 9 am and I could hear her stomach making digestive noises) when I came home from work at around 5pm the house looked like a murder scene, she had pooped all over the house and our bed (b) (6) has never once pooped in our house) there was a lot of blood, so much we had to get rid of our sheets, mattress cover, and throw. (b) (6) had not eaten all day and when I got home I took her food from her so she couldnt eat. I took her to the vet the next morning. I could not leave her because they were concerned she was contagious. They ran some tests and gave her a bag of fluids the vet tested for something introgas related (I dont know the technical term). Her tests came up negative, the doctor was confused and gave her atibiotics and some kind of dewormer (even though she came up neg for worms) ther was no definite diagnosis. Since, (b) (6) has still been lethargic and is only able to eat plain Chicken and Rice, she also still has black mucus like bloody stool. I am certian that the new treat Waggin Train we gave her on Sunday was the cause of this. I have notified the company, our vet and all of my family and friends with dogs, to keep this from happening to anyone else. I just hope she gets better soon and doesnt have any long term effects from this incident. But I am so thankful I didnt lose her like so many others have. ALSO I THREW THE REMAING TREATS AWAY SO THAT NO ONE ELSE IN THE HOUSE GAVE ANY TO HER. I DID SAVE THE BAG THOUGH.	6	Years	Hound (unspecified)	Dog	57	Pound
EON-91919	5/23/2012 21:00	Waggin Train Country Style Drumettes (Tasty Dental Bone) made in China	We had been giving (b) (6) the treats on and off for the past 1yr and half. He had to go to the vet. a few times, also ER for vomiting. The vets. could never find pinpoint anything specific, so they always just gave him nausea medication. The last time he got sick we took him to the vet and dropped him off because vet. wanted to run more test since he had been getting sick more frequently. Vet. ran lab and said his glucose was elevated, hgb was a little low, and there were 2 other test related to his kidneys but they showed slight elevation but the vet. could not pinpoint. The vet. also found a very faint heart murmur, which had not been heard before. Vet also did a CT and they saw fluid but unsure of cause, also was running a temp. They gave him shot of nausea med., lasix to remove fluid and a shot of antibiotics. The next day very lethargic, wouldnt do much at all. Took back to the Vet. Vet. said he should not be like this from the meds we were giving him. 2 days later his system shut completely down and we had to put our little baby down. he was a healthy little 4 yr. old chihuahua and we will miss him. Please someone do something about this product...	4	Years	Chihuahua	Dog	6	Pound
EON-91918	5/23/2012 20:45	WholeCare Pet	Gave (b) (6) a Chicken Jerky strip on a Sunday, on Monday thru Wednesday she would not eat, and was lethargic, also drinking excessive amounts of water. She was taken to the veterinarian on Friday, all symptoms have passed except the excessive drinking of water. Nine days after given the treat, now her water consumption is normal.	12	Years	Retriever - Labrador	Dog	69	Pound

EON-91917	5/23/2012 18:45	Nature's Recipe New Oven Baked Chewy Treats Chicken Recipe with Sweet Potatos & Apples	Within 12 hours of feeding Gear Nature's Recipe Oven Baked Chewy Chicken Recipe Treats he began to vomit. He continued to vomit for the next 24 hours. A total of 13 times. Large in volume for his small 5 lb. size. He was very lethargic also. I stopped giving him the treats when the vomiting began because that was the only new food or treat that he had consumed. 24 hours later the vomiting subsided and his energy level slowly returned to normal for him. Don't know if this is related to the chicken jerky scare but the treats I mentioned are made from Del Monte. 5.5 oz. zip lock bag, expiration date 09/22/2012 Lot # 1266 1K 7 B 13:36. I know that I have never seen my dog ever vomit that many times or that amount of volume in a 24 hour period since I acquired him as a puppy the year prior. The most times in one day was twice and maybe a 1/3 cup (excuse me for the graphic) in volume. He has had all his vaccinations and is extremely healthy.	1	Years	Other Canine/dog	Dog	5	Pound

EON-91912	5/23/2012 17:15	Waggin' Train Wholesome Chicken Jerky Tenders- Chicken Dog Treats	On Thursday May 17, 2012 I purchased Waggin' Train Chicken Jerky Tenders from a Tractor Supply located in (b) (6). My labrador retriever may have received 4-5 of these treats and by Saturday she was lethargic, not eating and not going to the bathroom. As of Tuesday May 22, 2012 she still had not eaten hardly any food, not even her favorite dog bones. I just happened to notice on my MSN homepage on the internet a news headline that said "Nearly 1,000 dogs now sick from jerky treats" I clicked on the article and noticed the cause of the investigation was the exact same product I had fed my own dog just days prior. I immediately called my vet and made an emergency appointment. When we arrived at the vet's office the doctor did a full exam, took blood, took her temperature (103 deg.), and gave us some medication to start her on (Amoxicillin and FortiFlora). The vet also gave us some canned food to hopefully get her appetite going. The entire visit cost over \$212. He promised to call us later last night with the lab results. When we got the message from the vet we were completely shocked. He told us she had been "poisoned" by whatever she had eaten. Her labwork showed extensive liver damage and this is very serious. He encouraged us to call the office first thing this morning to discuss her next steps. When I spoke with his office this morning they asked that I stop in and pick up another herbal medication (\$30) to give to her in addition to the medications we had started her on last night. She is still not eating normally and not accepting any of her favorite foods. We have been told to call the vet and give a daily report on her condition and we will have to return to that office in 5-7 days for more labwork. I did contact the Tractor Supply store where the treats had been purchased and spoke twice with the store manager, (b) (6) about this situation and he made no mention of pulling this product from the shelves but appreciated me letting him know. Our dog is like a child to us. We waited many years before purchasing just the right dog. She has become a part of our family and we are all very upset at this situation. We would appreciate a response soon. Thank you.	1	Years	Retriever - Labrador	Dog	85	Pound
EON-91911	5/23/2012 17:15	Meijer Main Choice for Dogs	Our vet suggested that we attempt to distract (b) (6) from licking her paws by getting her a Kong toy and filling it with treats. We purchased said toy as well as Meijer brand Chicken and Sweet Potato jerky treats that we would put inside of the Kong. This appeared to keep her from licking her feet. After about a week of treatment, (b) (6) refused to eat and would not take her medication in the Pill Pocket. She drank little water, ate NO food and had NO energy for play or even going the bathroom. She would attempt to eat grass when outside, indicating she was experiencing nausea. During this time, we tried to feed her canned dog food (which she wouldn't eat), dry dog food, her medication. She wouldn't eat at all. We had stopped filling her Kong with the treats and giving her anything but a little banana and a little peanut butter. Over the course of a week, her appetite began to return. We are STILL not giving her chicken jerky treats and have since changed her food to Innova vPRIME Grain Free Chicken & Turkey Formula. She is eating better and her energy level is returning.	9	Years	Retriever - Golden	Dog	90	Pound
EON-91910	5/23/2012 17:00	Happy Hips...Chicken flavored jerky treats	She became lethargic, vomiting and diarrhea. Until my husband saw a story online about the chinese jerky treats. I let the store and my vet know and they are all aware of it. The FDA needs to recall all the Chinese jerky treats! EON-91909	5/23/2012 17:00	Waggin Train Chicken Jerky	After she ate the treats she became lethargic and could barely walk. She also started vomiting. It was 3-4 days before she was back to herself again.	8	Years	Poodle - Toy	Dog	15	Pound

EON-91906	5/23/2012 16:45	Waggin' Train Wholesome Chichen Jerky Tenders	After consuming about 3 treats over the course of an evening, my dog started pacing which meant he had to go out (we live in an apartment). This was around 1:30 am after his last walk of the evening (around midnight). I had to take him out many times during the night (a little after 3 am, at 4:20 am, again at 5:15 am and then at 7:30 am). At first it was a loose bowel movement, then it was a thick loose bowel-colored fluid, the next two times was liquid and the last time, he kept assuming the position, but only dribbles came out.	12	Years	Shepherd Dog - Australian	Dog	50	Pound
EON-91905	5/23/2012 16:45	Costco Kindom Chicken Jerky Treats from China	Dog was given numerous pieces of the jerky by caregiver while owner was away on vacation for several days in a row. Dog was refusing to eat anything except the treats. We did not know at the time that these treats were toxic and that the FDA had actually issued an alert even back then. Dog went into kidney failure and died 6/22/08 before we could even get her to the vet. One other dog became sick but recovered after \$1,000 bill at an emergency vet clinic.	2	Years	Shepherd Dog - Australian	Dog	25	Pound
EON-91903	5/23/2012 16:15	wagging trail chicken jerky treats	I have a beagle/cocker mix and began feeding him the chicken treats on 5/5/12. His first diarrhea movement seemed normal to me. By day 2, the diarrhea was out of control, the dog would barely eat anything at all and when he did; he would pass it right out in about 5 - 10 minutes. He moved his bowls so often that his anal area was a pinky-red color and it hurt him. The stool was watery and now it went from a brown (im not too worried) colour, to this black, look like bile or when the vet clears the anal sac. The dog was always nostalgic, it broke my heart. By day 4 I decided to take him to the vet on Saturday and on the Wednesday night I decided to stop giving him the treats because it had occurred to me that this was the only thing he was eating from since sat/sun when the runs started. I would now limit his intake to the boiled chicken & rice the vet suggested (for gastro issues). By the Friday night the dog had some life back in him and the stool had a mixed consistency. It was at that point that my heart began to beat again. My hear bleeds for anyone who was lost a pet this form of irresponsibleness but something must be done. Not because they have four leg & are not human should their cries or the cries of their owners fall on deaf ears. He is not 100% but the stool is becoming back solid again I didn't report anything as yet due to the fact that this episode just happened last week and my dad day the issue talked about on channel 2 news yesterday, so I began doing research this morning. My next stop after this will be to send a strongly worded letter to the manufacturer	4	Years	Beagle	Dog	35	Pound
EON-91901	5/23/2012 15:45	Miilo's chicken jerky	After eating Miilo's chicken jerky treats earlier this year, my Bichon Frise got terribly sick and I thought he was going to die. When I took him to the vet, they put him on anti-biotics, probiotics, and various other things to help him get well. He became sick after eating Miilo's chicken jerky. After he finally recovered and I paid the vet bill, and stopped giving him the treats, he was much better. I wrote to Fred Meyers (Kroger) about the problem and told them that I had seen an article on line about the dog treats and that the FDA was getting reports of dogs getting sick and even dying. They did nothing about removing the product from their store. I wrote them and even sent them the articles warning about the treats. You would think that they wouldn't want to risk a law suit by carrying this specific treat.						

EON-91900	5/23/2012 15:45	Wagon Train Jerky Tenders chicken Dog treats	I went to Costco and purchased Waggin Train brand chicken jerky strip treats for my French Bulldog Lola for the first time. I fed them to her over a series of weeks, at times feeding her one -two per day because she loved them. She developed gas but Frenchies are known to have that problem. She was also constipated with an occasional bout of diarrhea. On the evening of May 3 she threw up after a car ride which has happened before (she gets car sick). On Friday morning, May 4, she began throwing up bright yellow bile. I brought her to the vet who gave her subcutaneous fluids and brought her home that afternoon. By Friday evening she was throwing up non-stop over the course of the night. I returned to the vet whereafter she was placed on an IV and her bloodwork was taken. The vet sent her home with me that evening as they has no overnight facility. The IV was left in her arm in case of emergency, where I was directed to go to the 24 hour emergency room. Once I got her home, she began throwing up and having diarrhea at the same time. I rushed to the ER where she remained for 4 more nights. She was diagnosed with Pancreatitis. According to the vet, they don't know what causes this but it could be due to anything from fatty food to stress to poison. My vet bill cost approximately \$8,000 for the acute, 24 hour medical care she required in the ER. Today I read that the FDA has been warning pet owners about this product!	2	Years	Bulldog - French	Dog	21	Pound
EON-91899	5/23/2012 15:45	Kingdom Pets Chicken Jerky	He started vomiting and had diarrhea shortly after consuming a piece of Kingdom Pets Chicken Jerky bought at Costco in (b) (6). Whenever he ate it, those symptoms returned, and he eventually refused to eat it though he used to love this product (it used to be made in the U.S., as I recall). Since I stopped giving him the product, he's been doing fine.	14	Years	Mixed (Dog)	Dog	13	Pound
EON-91890	5/23/2012 15:15	Unknown - package thrown out in October 2010	From 6 months of age, these dogs were given Waggin Train Chicken Strips purchased at Costco. We also fed them to our 12 year old springer. The puppies started having severe bouts of diahrea and vomiting which I originally attributed to puppy behavior of eating foreign objects, grass, etc. We started monitoring their behavior and found that they were not eating anything other than their dog kibble (Taste of the Wild) and the aforementioned chicken strips. After reading about the adverse reactions and problems associated with chicken strips manufactured in China, I checked my product and immediately stopped feeding them to my dogs. Almost immediately they stopped exhibiting the symptoms. (b) (6) also had had what appeared to be urinary tract infections which also resolved. I have checked every pet food store in my area including Costco, Petco, PetSmart, Pet Supplies and the Feed Barn. Every single package of chicken strips in all of the stores was manufactured in China. I have spoken with the store managers questioning why they do not offer a single product manufactured in the USA. It is a deplorable situation and it is time that people make the effort to speak up and speak out making it clear that it is unacceptable to us and we will not purchase such products. Surely they can be safely manufactured in the United States. As a consumer, I am demanding higher standards. Apparently they are not interested in hearing this directly but I can assure you that they are interested in the bottom line and losing \$\$\$\$. I am very vocal about this issue and have spread the word with friends and family. My veterinarian concurs. Another issue is the fact that American produced dog foods outsource ingredients from China too. Deplorable since they do not adhere to acceptable standards. Americans beware - China is oblivious to our standards and the FDA is too overtaxed and overburdened to deal with the imported product lines. If ever legislation was needed to protect our pets it is now.	2	Years	Spaniel - Springer English	Dog	60	Pound

EON-91888	5/23/2012 15:15	Milo's Kitchen Home-style dog treats	I have fed (b) (6) the Milo's Kitchen home-style chicken strips. after an hour she would start vomiting. I thought it was she was just inhaling them too fast, but she would vomit a few times then shake and go lay down.	2	Years	Terrier - Boston	Dog	20	Pound

EON-91874	5/23/2012 14:45	Canyon Creek Ranch Brand Natural Chicken Tenders, Waggin' Train Wholesome Chicken Jerky Tenders, Canyon Creek Ranch Brand Banana and Chicken Wraps	<p>Over a period of time, (b) (6) our Boxer was given the following chicken jerky treats: Canyon Creek Ranch Brand - Natural Chicken Tenders; Canyon Creek Ranch Brand - Banana and Chicken Wraps; Waggin Train Brand - Wholesome Chicken Jerky Tenders. (b) (6) was in perfect health. From day one, we have fed (b) (6) a great diet including chicken, rice, eggs, beef, etc., and everything was great until we noticed three weeks ago (b) (6) wasnt acting himself. He would sleep all day, not want to go on a walk (which is seriously odd with (b) (6) he loves walks), he wouldnt even eat his food. We would put his food down, and he would smell it, then run over to me and hide like he was afraid. The vet said put him on a bland food diet.</p> <p>After a week, we gave (b) (6) only chicken and rice, also a few chicken jerky treats from the above brands. (b) (6) began to have both solid and loose stools, with blood in it, as well as very dark brown/black looking colors in it as well. Blood was definitely present in his stool, along with the very dark colored mass. (b) (6) also vomited 11 or 12 times over the week. He would go outside, eat grass for 15-20 minutes at a time. He wouldnt eat food, only grass and the chicken jerky treats.</p> <p>Back to the vet, they said (b) (6) seems to have stomach irritation, stay on the bland food diet, and also gave him antibiotics.</p> <p>We discontinued all treats, especially anything from China. Its too early to tell, but I wanted to report the same issue that I have read has been occurring in hundreds of pets across the country. As of now, (b) (6) hasnt gotten any better.</p>	1	Years	Boxer (German Boxer)	Dog	60	Pound

EON-91871	5/23/2012 14:00	BIG BLAST PORK SKIN TWIST WITH CHICKEN LIVER CENTER - Made by Waggin' Train	(b) (6) started to mope around on Saturday, (b) (6) I thought she was just not feeling well. She didn't eat anything that day. One Sunday, she was, again, not herself. Sunday night I noticed blood in her urine. I called the vet first thing on Monday morning. Took her in and he told me that she was very sick, that he would have to take some blood and have it tested, and he would call me first thing Tuesday morning. Tuesday morning, (b) (6) was really bad. She couldn't walk and the vet called to tell me take her for a blood transfusion in (b) (6) We got there but she passed away before anything could be done.							
EON-91870	5/23/2012 14:00	Waggin Trails	After a few months of giving (b) (6) 1 treat every few days, he began losing weight. the vet couldn't find anything wrong and a few weeks later, he passed away. He had been fed Hills Science Diet dry food for all of his life and was in great health prior to giving him the Waggin Trails chicken jerky treats.	12	Years	Terrier - Yorkshire	Dog	8	Pound	
EON-91869	5/23/2012 13:45	Milo's Kitchen home-style dog treats Chicken Jerky	Pt add Milo's Kitchen Chicken Jerky as a snack/treat over the course of 3-4 days then developed diarrhea	7	Months	Mixed (Dog)	Dog	45	Pound	
EON-91868	5/23/2012 13:15	Smoked Porkhide twists wrapped in chicken jerky	Days preceding the event, (b) (6) was energetic, had a healthy appetite and solid bowel movements. Was given AKC smoked porkhide twists wrapped in chicken jerky treats and has since fallen ill. His symptoms include listlessness, diarrhea, and increased water intake.	3	Years	Shih Tzu	Dog	12	Pound	
EON-91865	5/23/2012 12:45	Waggin Train Chicken Jerky Tenders	When given a treat, the dog develops bloody diarrhea that lasts 2-3 days.	5	Years	Mixed (Dog)	Dog	40	Pound	
EON-91863	5/23/2012 12:45	Wellness Dog Lg Breed Adult 30 pound bag	I fed my dog two meals (one in the am) (one in the pm) the large breed wellness adult 30 lb bag dog food. he throw up around 11 pm that night, and after that had the runs all over my house. the next morning I started him on hamburger and rice. he continued with the runs all that day and night. the next morning I call my vet. He gave him a shot of antibiotics and with two prescriptions to take home for him. I was told by the (b) (6) where I had bought the dog food that there was a recall on this dog food. I called Wellness dog food to report my dog getting sick. they stated to me that my dog could have eatten something in my yard that it wasn't there dog food that made my dog sick. I just want to include that my husband is the one that feeds the dogs. yes I have two dogs, my bull dog ate a small amount of the food and for a time he had loose stools but seemed ok, today diarrhea is pouring out of him, he too has to go to the vets. also my husband got sick for two days after feeding the dog. he didn't wash his hands after handling the food. I just wanted to report the way Diamond dog food is handling the reports of sick dogs. thank-you (b) (6)

EON-91820	5/23/2012 10:00	Milo's Kitchen chicken jerky treats	After giving our dog, (b) (6) (Border collie) a treat for the night on Saturday evening (May 19th), during the night she became violently ill, lost all control of her bowels and vomited in her pen. Normally we would hear her whine if she needed anything during the night but she was too ill to even whine. The next day, every time she would go outside to urinate, she had the runs. We gave her a baby aspirin and that seemed to help. The culprit was Milo's Kitchen chicken jerky treat.						
EON-91812	5/23/2012 9:45	Milo's Kitchen Chicken Jerky	Over the past 6 months our 13 month old Great Dane has lost about 20 lbs, lost his appetite, will not eat and his behavior has become very lax. Approximately 5 days ago I received a call from my neighbor saying that my dog was unresponsive in his crate, would not get up or lift his head, felt hot and was not responding. I arrived home from work and found that he had 104.7 fever, discharge from his eyes and nose, labored breathing. When I was able to get him to stand he urinated a very dark brown colored urine, almost blood colored and had extreme diarrhea. I brought him to the vet and when they ran blood work his white and red cell counts were off the charts. They were unable to spin the color out of his urine and thought perhaps he was having kidney failure or showing signs of immune deficiency (which is nowhere in his blood lines). I left with no answers and antibiotics. The following day he was worse with still a very high fever. I took him to his regular vet and he was put on fluids, given steroids, shots of antibiotic and more medicine to take home, along with Hills Prescription dog food, which was over \$50.00 for the case. Now \$1000.00 in vet bills and we still can not properly diagnose him. I have to bring him to a specialist next week for further testing. The treats I give to him are Milos Kitchen Chicken Jerky and when I came across the recall information I was stunned. I called the Petco I purchased them from to make them aware as well as Del Monte, but have heard nothing back.	14	Months	Great Dane	Dog	120	Pound

EON-91811	5/23/2012 9:45	Milo Kitchen Treats	(b) (6) suddenly started throwing up, quit drinking his water and became increasingly uncomfortable. Lost five pounds quickly. Wanted to sleep all the time. The Vet could not explain cause or disease. In a matter of days a healthy outgoing dog became very ill. He was so ill he was put down. No apparent reason. No toxins within his reach or exotic yard growth. Our other, beagle, (b) (6) displayed the same symptoms 11 months earlier and also had to be put down. 2 dogs within 11 months is questionable. My other two beagles lived in the same environment for almost 18 years. The common factor with my two last dogs was they both ate Milo Kitchen Treats. My first two did not.	10	Years	Beagle	Dog	38	Pound
EON-91797	5/23/2012 3:00	Priority Total Pet Care Chicken Breast Jerky	She became very ill, vomiting; diarrhea for two days after consuming chicken treats.	6	Years	Sheepdog - Shetland	Dog	30	Pound
EON-91796	5/23/2012 3:00	Banana & Chicken Wraps Canyon Creek Ranch Brand	every so often I noticed the dog would experience a loss of control over his hind quarters with his left or right hind leg being contracted up into his body as if he had a cramp. No sound of any kind would be heard but the dog would shiver as he normally would when he would suffer from some minor maliady. Within about 5 minutes or less of comforting the animal he would start to act normally. His leg would relax so that he could stand easily. Then business as usual until the next incident. I never associated the treats with this until I red the article. He would only get those treats if he pooped, usually that was twice daily. The ones I used had chicken wrapped around a slice of banana. I have a third of a bag left if you want them to test.	9	Years	Terrier - Rat	Dog	9	Pound
EON-91795	5/23/2012 3:00	Mellow Mut Chicken Breast , Veggie Life Vitality Chicken w/ Sweet Potato, Veggie Happy Hips Chicken & Banana	I had purchased the Mellow Mut Chicken Breast, the Veggie Life Chicken with Sweet Potato, and the Happy Hips Chicken with Banana all for Dogswell for my Border Collie. She is 16 years old so I was looking for treats that had added vitamins,etc. in them. I started giving them to her and 3 days later she began vomiting uncontrollably. I took her to her vet. He had to give her a shot of cerenia and fluids through an IV. We are still waiting until tomorrow to see how she is going to be. At her age, I am terrified that we are going to lose her.						
EON-91794	5/23/2012 3:00	Waggin Train Brand Freshies	We gave him half a Waggin Train Chicken Freshie, and about 24 hours later he was lethargic, withdrawn, and appeared very dehydrated.	9	Years	Mixed (Dog)	Dog	45	Pound
EON-91793	5/22/2012 22:15	Waggen Train Chicken Jerky	after taking Chicken Jerky treats The dog became sick showing signs of kidney and heart congestive heart failure. X-rays and blood test could not find anything. We had to finally put him down due to excessive water around the heart. We stopped giving our other dog the treats and is doing fine despite being diabetic.	9		Unknown	Dog	40	Pound
EON-91792	5/22/2012 21:45	pedigree Breath buster tasty treats to freshen breath	I gave my dog a, pedigree breath butster dog treat. That night he woke up with explosive diarrhea and vomiting. I took him to the vet later that day due to the symptoms not stopping and they administered medication to cure the diarrhea which is uncontrollable at this point. They are not sure what is wrong with him and have administered blood and stool tests and still are not sure what is wrong with him. His stool is bloody and his health is diminishing. I am almost certain it was the dog treats since he is on a strict diet due to his breed. The treats are not expired.	1	Years	Bulldog	Dog	45	Pound

EON-91788	5/22/2012 20:45	Milo's Kitchen home-style dog treats Chicken Meatballs	<p>For a 14-year-old Yorkie, (b) (6) has been basically healthy other than requiring 1 pill a day for hypothyroidism. She eats, drinks, plays, walks, runs and sleeps like a healthy, normal housepet. That is, until 5/14/12 when my husband had to take her to her vet because for several days she had been having diarrhea, not eating, barely drinking, and vomiting. She became so weak that the night before taking her to the vet that I had to carry her outside to use the bathroom because she would barely walk, much less climb down the one step to get outside. My husband called me shortly after seeing the vet on 5/14/12 to tell me that she needed to stay there all day so they could give her IV fluids, antibiotics, an enema, etc. She was a VERY sick little dog, but thanks to her caring vet, she survived the trauma of that day and we were able to bring her home to continue antibiotics twice a day for the next 8 days. She lost a pound from being sick, which is quite alot for an 7.5 pound dog, and it took several days before we noticed her beginning to feel better.</p> <p>Today I read the report on MSN about dogs getting sick from treats, and it dawned on my husband and I that the only change in (b) (6) eating habits had been the Milo's Kitchen Chicken Meatballs I had bought for and began feeding her approximately the week before her day at the vet's office. She loved them at first, but since becoming sick she refuses to eat them! We have at least half of the bag left in the cabinet. Her trip to the vet's office that day cost us \$218.48, but it's not about the money; I would have paid 10 times that amount to help her get better. My real motivation for reporting this is because I am deeply concerned that these little meatballs are what made (b) (6) sick, and if so, I feel it is my obligation to do something so no other dog owner has to watch their beloved pet become so ill that you fear they may not get better.</p>	14	Years	Terrier - Yorkshire	Dog	6	Pound
EON-91787	5/22/2012 20:45	Waggin Train Chicken treats	After giving my dog Waggin Train treats, our dog became ill and had four days of diarrhea. She could barely eat. We changed her diet for a week, when she was better, we gave her the treats again, and it happened again. We threw the treats out.	15	Years	Mixed (Dog)	Dog	20	Pound
EON-91786	5/22/2012 20:00	waggin train country crunch	Gave him treats from a bag of wagon trail country crunch over a 2 week period. Slowly noticed a weaker, lethargic dog. Recently noticed his diareah, vomit and today he is just lazy and sick looking taking him to VET wednesday. Totally messed up. I spluged on this bag because I had some extra cash. NOT CHEAP bag of treats and this happens??? I love my dog. That company should be sued.	10	Years	Crossbred Canine/dog	Dog	65	Pound

EON-91785	5/22/2012 20:00	Diamond Pet Foods Chicken and Rice Formula for Adult dogs	Our dog (20 months old and 45 pounds) recently died (b) (6) after having consumed dog food made by Diamond (our bag is among those that were recently recalled, but we found out about the recall the day following our pet's death). Autopsy and toxicology results as to cause were inconclusive. They could not determine if the cause was the salmonella toxins or the drug Cerenia (made by Pfizer) given to treat the nausea. Our Vet suggested we have the dog food tested to confirm that it was the source of the toxins that killed our pet (b) (6). Is this testing something the CDC would be interested in doing? Is this something you can do? Would there be a cost to us to do this and if so, how much? Is this something you can help to investigate, or is this an FDA issue? Our beloved pet was extremely healthy just prior to being sick for a day, only to die 30 hours after receiving treatment. Something seems terribly wrong with what transpired and we don't feel that it should be ignored. Thankyou, (b) (6)	20	Months	Mixed (Dog)	Dog	45	Pound
EON-91784	5/22/2012 19:45	Kingdom Pets Chicken Jerky	She ate Kingdom Pets Chicken Jerky made in China. She had two per day for about 6 months. In that time she went from vibrant, healthy and active to severe kidney failure. I had to have her put down.	14	Years	Mixed (Dog)	Dog	85	Pound
EON-91781	5/22/2012 19:15	Canyon Creek Ranch Brand Natural Chicken Tenders	After giving (b) (6) two pieces of the Canyon Creek Ranch treats, he proceeded to have diarrhea (over the course of 5 hours) and was vomiting.	5	Months	Dobermann	Dog	60	Pound
EON-91779	5/22/2012 19:00	Milo chicken jerky and chicken strips	Gave Milo's Chicken Jerky treats for the first time along with some new Milk Bone granola Biscuits. After my dog chewed the biscuits I noticed they could have some sharp and jagged pieces. So when my dog developed bloody diarrhea I blamed the biscuits. I took her to the vet and she was given some meds. And put on a bland diet. About a month later she seemed better and I gave her the jerky treats again not knowing about the problem with the treats from China. Again she got sick with bloody diarrhea. It was the same time that I heard about the warning and looked to see that the treats were made in China. Both times she had the treats she developed bloody diarrhea.	15	Years	Terrier (unspecified)	Dog	41	Pound
EON-91778	5/22/2012 19:00	Waggin' Train Wholesome chicken jerky tenders low fat	My dog has a very healthy appetite. About a week ago he started picking at his food and not finishing it. Then he stopped eating it completely. He also has become very thirsty. He will drink an entire bowl of water non stop until it is gone. The only change in his diet is that we started giving him the Waggin Train dog treats (chicken jerky) a week ago when we purchased them at Costco. We have never used this product before. I saw an article today regarding sick dogs and realized it was the same product I was giving my dog. We have only given him one or two treats a day since we purchased them, so we still have a full bag. I will keep the treats in case anyone wants to test them.	7	Years	Spaniel (unspecified)	Dog	25	Pound

EON-91777	5/22/2012 19:00	Wagon Train Chicken Jerky	I am not sure that the product itself is the cause, but I looked on the internet because the change was so drastic after just a few days of giving her 1 treat/day. She is distended and in visible and audible pain. I checked her belly with my hand and slight pressure caused her to yelp and retreat. She was also vomiting a clear yellow liquid last night. If her condition is not significantly improved by this evening I will take her in. I don't know that it was this product, but it appears similar to what caused a recall in 2011. Also, after checking the bag this morning, there is a very foul smell associated with these treats, it may just be the nature of the product but it seems excessive.	4	Years	Chihuahua	Dog	8	Pound
EON-91776	5/22/2012 18:45	Kingdom Pets Premium Dog Treats Chicken & Sweet Potato Jerky Twists 48-Ounce Bag	My dog started (fairly suddenly) drinking 90-260 oz of water per day and having accidents in the house. My regular vet tested her for a UTI (negative) and blood work showed liver dysfunction (elevated liver enzymes; esp ALP). She had an abdominal ultrasound which came back normal. I was referred to an internal medicine vet to explore other differential diagnoses (Cushings, diabetes, etc). After consulting with 3 different vets and ruling things out clinically, contaminated (?) chicken jerky treats topped the list of possible causes of my dog's sudden onset PUPD.	7	Years	Boxer (German Boxer)	Dog	49	Pound
EON-91775	5/22/2012 18:45	Waggin Train	Started feeding my first dog (b) (6) chicken treats (Waggin Train brand) around the year 2000. In 2005 one Sunday morning she was unable to rise so I took her to emergency vet care. She was diagnosed with a growth on her spleen. After surgery it was confirmed as cancer and she died two months later on (b) (6). Three months later I adopted another Rothweiler named (b) (6). I had to put her down on (b) (6). She was also diagnosed with a growth on her spleen and we had an autopsy and it was also confirmed to be cancerous. Both dogs were given chicken treats primarily for good behavior. Kinda strange both died from cancer of the spleen. I have adopted another dog, but you can be sure he will never taste a chicken treat from Waggin or Milo's. You need to do something beyond which you usually do like sweeping this problem under a rug because it is a pet food. Believe me compared to a politician either Democrat or Republican I woul rather own a dog. I expect to see a follow up on these treats. Thank You	8	Years	Rottweiler	Dog	120	Pound
EON-91774	5/22/2012 18:15	Milo's Chicken jerky meatballs	Vomiting, diarrhea, lethargic, not eating. Drinking large quantities of water.	30	Months	Poodle (unspecified)	Dog	20	Pound

EON-91772	5/22/2012 18:00	Canyon Creek Ranch Brand Natural Chicken Tenders	Within 8 hours of consuming the Canyon Creek Ranch Chicken Jerky dog treats, my dog began having slight digestional upset. By the next morning he started having diarrhea. Within hours the diarrhea was so severe it was only in liquid form, I had to put him outside because he unable to hold it in and make it outside. He also had some vomiting and a general malaise and was very lethargic. He was consuming large amounts of water as well. Today is day 3 and he is recovering but is not yet 100%.	6	Years	Shepherd Dog - German	Dog	100	Pound
EON-91770	5/22/2012 18:00	Waggin Train Chicken Jerky	After giving my dog Waggin Train chicken jerky he came down with a bad case of diarrhea and was sick for a few days. After he got better I gave him more of the treat (not know about the problem) and he became sick again. I read this morning that there is now a problem with this product.	3	Years	Boxer (German Boxer)	Dog	65	Pound
EON-91769	5/22/2012 17:46	Milo's Kitchen home-style dog treats Chicken Jerky	This dog has had two instances of becoming sick with vomiting and diarrhea after eating chicken jerky treats. In December, i spent \$450 at the vet for vomiting and diarrhea - the vet could not identify a source of the sickness. At that time, I threw away a bag of Canyon Creek Chicken Jerky treats which I had bought at Petsmart because I read about several pets being sickened from this. I purchased Milo's Kitchen chicken jerky treats since feeding him this, he has had several instances of vomiting and diarrhea. Last week he again became sick with the same symptoms, so, in an effort to isolate what was causing the problem, I stopped giving him these treats. Since I stopped feeding him these treats, his symptoms of illness have stopped. I read about the possible connection with these treats today. As a consumer, I would encourage you to investigate the potential problem with these products.	1	Years	Mixed (Dog)	Dog	18	Pound
EON-91768	5/22/2012 17:45	Kingdom Pets All natural Chicken Jerky	Dog has been vomiting and yelping in pain. Took in to the vet and they ran variety of test and blood test. She is having problems with her Kidney and Liver. Her condition is still unstable and we are monitoring her and have to take her back to vet for a ultrasound.	6	Years	Boxer (German Boxer)	Dog	85	Pound
EON-91767	5/22/2012 17:45	Waggin' Train Chicken Jerky Treats	I started buying Waggin Train Jerky treats about one year ago when our local Walgreen's had them on sale. In November, my oldest schnauzer became violently ill. We took her to her vet who told us that she had liver failure, possibly cancer and would not live much longer. I was determine to find out why a perfectly healthy dog suddenly became sick. I thought someone might have poisoned her but she is a household pet. I took her to a specialist who performed an abdominal ultrasound, blood work, etc. He determined that her liver function was terrible, gave her a shot and antibiotics, put her on a high energy prescription dog food to help her improve her liver function. We removed all treats from the house because she was being monitored closely and she soon showed a vast improvement. One month later, her lab work was almost back to normal. During that time I read about the treats and wondered if they made her sick. I can't come up with any other explanation. I also don't know why my other dog wasn't deathly ill. Maybe it's possible that she is a bit larger and younger so I guess they didn't harm her as much. I just know they both seem much healthier now that I have switched to a treat that is produced in the U.S and is of natural substance. I hope that my story helps you to figure out what is causing the animal deaths. Most people cherish their dogs and are heartbroken when something is wrong. I spent about \$1500.00 on my dog to get her well but I don't regret it. I do regret giving her those treats that might have made her sick.	8	Years	Schnauzer - Miniature	Dog	21	Pound

EON-91766	5/22/2012 17:45	Milo's Kitchen Chicken Jerky	My pet had diarrhea and overall sluggishness. He ate the treats for about 1.5 weeks before I realized it was the treats that caused the problems.	2	Years	Mixed (Dog)	Dog	29	Pound

EON-91759	5/22/2012 16:46	Milo's Kitchen Homestyle Dog Treats Chicken Jerky	My dog has been sick on and off for about a year, vomiting diahrrea and just plain lethargic. I put two and two together and realized these things started to occur after she was given the Milo's brand chicken Jerky treats. Earlier reports said that the treats from China were causing sickness in dogs. However the Milo's brand did not have made in China on the bags so I continued to by them thinking they were ok and wouldn't cause any ill effects. I figured her high liver lipids were due to something else. She has been to the vet for meds, and seems to be doing better she does not get the treats anymore. I hope she will continue to improve	14		Shih Tzu	Dog	18	
EON-91757	5/22/2012 16:46	Canyon creek ranch brand natural chicken tenders	Canyon river chicken jerky treats: 1) crystals found in urine 2) blood found in urine 3) puss on tip of penis 4) frequent urination 5) vet bill totally about \$1000 5) had to be on two courses of antibiotics (1 month on antibiotics)	1	Years	Mixed (Dog)	Dog	47	Pound

EON-91756	5/22/2012 16:46	Waggin' Train Chicken Breast jerky strips and chicken strip/yam combos.	<p>I had been feeding my dog two of the Waggin' Train chicken jerky strips per day (or, occasionally, the chicken strip/yam treats), as rewards or treats, for the past few years. Within that time, my dog had been experiencing occasional episodes of lethargy, urinary urgency and incontinence, with bloody urine, and the episodes were always treated by the vet as urinary tract infections, with a round of antibiotics. She was found, in November of 2011, to have developed bladder stones, one of which was blocking her urethra, making it impossible for her to urinate. She had surgery on November 30th, 2011, to remove the stones, and then was on antibiotics for 10 days, post-op, for a bladder infection. After she finished the antibiotics, she CONTINUED to have problems with lethargy, urinary urgency, frequency, and incontinence with bloody urine for over TWO MONTHS post-op, which the surgeon said was not normal. He had us take her back in to see him, for a repeat ultrasound and urinalysis, in February of 2012, to check for more stones, and it showed "inflammation" in the bladder, but no stones, and no infection per the urinalysis at that time. However, he decided to prescribe an anti-inflammatory med, and another round of antibiotics, "in case we're missing a lingering infection that just isn't showing up on our test." He also recommended that I switch her to special type of dog food (I was already feeding her ζWellness,ζ which is a quality dog food).</p> <p>I came home from the vet's office that same day, and happened to see the article on the internet, on the Waggin' Train chicken jerky treats, (it was the first time I had read about this). I became worried that the treats might have been having something to do with her problems, so I completely stopped giving them to her. I NEVER started her on the antibiotic, NOR on the anti-inflammatory med that the vet had prescribed, and I also had not yet bought the new dog food that the vet had recommended, because I had to work for the next three nights, and didn't make it to the pet store. In other words, NOTHING changed EXCEPT the withdrawal of the jerky treats from her diet. In JUST THREE DAYS, her symptoms of lethargy and urinary urgency, frequency, and hematuria, were GONE, and she was running around the house, doing her "Bichon buzz." To this day, almost 3 months after I stopped giving her the Waggin' Train treats, she has had NO more difficulty or adverse symptoms. I have to believe that the treats had something to do with her problem, so I returned the remainder of the treats to the store from where I'd purchased them.</p>	10	Years	Bichon Frise	Dog	23	Pound
EON-91755	5/22/2012 16:45	Milo's Kitchen Chicken Jerky Treats	<p>After a few days of giving (b) (6) treats, she started feeling sick. I could tell because she became very inactive and would just lay around. Before she would be all excited when I would get home from work dancing and jumping all around until I would take her for her walk. After about the third day she had no energy and would just lay around. When I took her for a walk, we would walk from the front door to the street and she would lay down like she was just too tired to move. The only thing I had done differently was give her those treats so I looked them up on the internet. When I read that they were making dogs sick but not recalling the product, I threw the bag of treats in the trash. I was not going to take any chances with my dog. After a couple of days she got back to normal and I have not give them to her since. I wish they would remove them from the stores. She loved those treats but its just not worth risking her life for them.</p>	4	Years	Shih Tzu	Dog	12	Pound

EON-91754	5/22/2012 16:45	Waggin' Train Jerky Tenders	Dog has had loss of appetite and has thrown up bile on several different days. I have been concerned and then came across an article today about the jerky treats from China. I just happened to buy jerky treats for the first time a few weeks ago and had recently given her some. I went to check the brand, and sure enough, it was the Waggin' Train Jerky Tenders made in China.	3	Years	Spitz - American Eskimo Dog	Dog	18	Pound
EON-91753	5/22/2012 16:45	Waggin Train Jerky	I was giving my dogs Waggin Train Jerky Treats and he would throw up sometimes after eating the treats. I thought maybe it was because the treats were so dry. He seem to love them so much. About 6 months ago I stopped giving them to him and he does not throw up any more. Wish I could be more help and solve why. I now do not buy any treats made in China. DO NOT TRUST THEM. He maybe just a dog to some, but to me he is my best buddy.	4	Years	Retriever - Labrador	Dog	85	Pound
EON-91752	5/22/2012 16:45	Purina chicken jerky for dog's	I am a pet owner, specifically dog's. I have read that at least 1,000.0 complaints have been made over the chicken jerky for dog's. If you had 50 complaints like ths over a human being that would have been enough to do a recal on the product. I do not even understand why the pet products are made in china in the first place, never the less this is out of control. I am very concerned & do not want to learn that mpre dog's are dying or getting sick over this huge problem with dog treats. Thank you, Concerned pet owner						
EON-91751	5/22/2012 16:45	Dogswell Happy Hips Chicken Jerky	Our border collie mix was diagnosed with renal failure in the fall of 2011. The only treats she ate were Dogswell Chicken Jerky. She stopped eating and died on (b) (6) at age 12 after several trips to the vet. Nothing we could do toward the end would get her to eat. I had read about chicken jerky recalls earlier in the summer of 2011 but Dogswell claimed to be "safe". Eventually I stopped giving her the treats. Now I am left wondering whether her death was at least partially a result of the treats....heartbreaking.	12	Years	Collie - Border	Dog	54	Pound
EON-91748	5/22/2012 16:15	wagon train chicken jerky	dog was vomiting, having diarrhea repeatedly. i saw article online about wagon train chicken jerky, which he loved. i had just opened a \$25 bag but threw them away since there was no recall. a week later he seemed better so i bought some from milos and the same reaction started again. this happened about 2-3 months ago. glad to say (b) (6) is better, no more jerky! just wanted to confirm what hell other pet owners have gone through is not their imagination. my dog because of his weight probably, was able to survive.	12	Years	Mixed (Dog)	Dog	85	Pound

EON-91747	5/22/2012 16:15	Milo's kitchen Chicken Treats	<p>In the early fall of 2011 (b) (6) (JRT) was diagnosed with a UTI and was given Clavamox. The fevers continued and she lost her appetite. At thanksgiving dinner she walked away from a plate of Turkey - this is not typical behavior. We returned to the vet.</p> <p>1. She was first diagnosed with GB sludge build up and prescribed Batryl, Ursadyl and Flagyl. She had an ultrasound of the liver and an asperite. Both inconclusive as to the cause. Fevers continued, vomiting, decreased appetite.</p> <p>2. Then, approx 2-3 months of several visits to the vet and tests and liver values increasing, and (b) (6) still getting worse, she was diagnosed with chronic hepatitis. She had an asperite of the liver, and no infection (virus or bacteria) was noted. Her liver values kept increasing. She had an aspirate of the liver, which did not ID any bacteria or virus. It did identify Lepto tiders, but she was vaccinated for Lepto 1 year prior. She was given doxycyclene as a precaution.</p> <p>Liver values continued to increase.</p> <p>3. At the end of January 2012, she had an endoscopic liver biopsy because the vet still could not find out the cause of her fevers and lack of appetite, and the results were inconclusive, no infection and no virus found. Her copper levels were normal.</p> <p>4. She then had a neurological event approx. 4 days after surgery, possible hepatic encephalopathy (files of this are too large to send but can fax if necessary)</p> <p>4. Currently, She is recovering, but she almost died from the inflammation of the liver and the fluid in her belly she was experiencing. Now her liver values are currently in the 1000s range.</p> <p>We believe she was poisoned from the Milo's Chicken Treats we gave her, starting in June of 2011. Possible contamination, mycotoxin, etc. We bought several large bags from Cosco. Currently (b) (6) is currently taking a steroid to control the liver inflammation and Denamarin. This was a perfectly healthy dog before she was fed the chicken treats. We have spent over \$10,000 on tests that have come back with no conclusion as to what is actually irritating her liver. I have all lab results, blood tests, and vet notes from when this started to the present, but the system limits the number of attachments. I can send all records at anytime. (b) (6) has never had liver or health problems prior to eating Milo's chicken treats, which we believe were poisoned. (b) (6) has been through so much, and almost died. Please call me / email me for more lab reports, hospital visits, blood, clotting, ammonia, copper and bile acids tests.</p>	10	Years	Terrier - Jack Russell	Dog	13	
EON-91742	5/22/2012 16:00	Waggin Train Jerky Tenders	A few hours after eating Waggin Train Chicken Jerky Treats (b) (6) had uncontrollable vomiting which was yellow and foamy. I took her to the vet right away & the vet thought it was "something she had eaten." He gave her an injection and prescribed Charcoal Kaopectate. After that the vomiting subsided.	11	Years	Retriever - Labrador	Dog	100	Pound

EON-91739	5/22/2012 16:00	Diamond Lamb & Rice Adult	Pregnant welsh pembroke corgi female (1 of 3) - all developed watery, voluminous, smelly diarrhea 5-6 weeks pregnant. Treated with Albon and Safeguard (3 days) thinking it was Girardia. Slow to respond to treatment - diarrhea cleared up within 1 week on 2 dogs, 3rd dog slower to clear up. Upon whelping all 3 litters had issues. This female had 7 live born weak and small puppies - all died within 6 days. Two puppies taken to (b) (6) in (b) (6) for testing - tested positive for group g strep - ruled pneumonia deaths post mortem. In total 17 puppies lost from combination of mummified puppies, still born puppies and small, weak live-born puppies which died at birth or within the first 5-6 days. All three females had been consuming Chicken Soup for the Dog Lovers Soul throughout their pregnancy plus Bil Jac frozen dog food. One partial bag of Diamond Lamb & Rice was fed - discontinued due to palatability issues - diarrhea occurred contemporaneously with feeding the Lamb & Rice food. All products purchased in (b) (6). Two other dogs in home apparently unaffected e.g. no diarrhea - both consumed the same food. One of the 2 unaffected dogs delivered a normal litter of puppies now 4 weeks old. All dogs have been tested negative for CHV1 and Brucella in the last 3 weeks. I have marked "unknown" on outcome pending stool sample testing for salmonella - all dogs are being tested for strep as well. Possibly no connection to Diamond pet food recall however I have noticed the recall has expanded over time and now includes food manufactured at the Missouri facility. My vet and the (b) (6) pathologist doubt a salmonella connection however they are both at a loss to explain the diarrhea episode and unsure of the impact on pregnancy outcome.	4	Years	Corgi - Welsh Pembroke	Dog	30	Pound

EON-91679	5/22/2012 14:45	Milo's Kitchen Chicken Jerky Treats	On April 30, 2012, I went to Walmart and bought some Milo's Chicken Jerky treats for my dogs. I'd been hearing about the Waggon Tail's treats and won't buy them. I gave my dog several treats that night and a few more the next day. He had a max of 6-8 treats. He began to have diarrhea almost right away but I didn't realize it. I had to go out of town for the day and my neighbor was letting my dogs out. She came over and texted me that one of the animals was sick. She had cleaned up some vomit and lots of diarrhea. When I came home there was two further diarrhea stools and some vomit. He continued to have diarrhea during the night while I slept, at least two further stools. He would not eat any of his food that night. He did drink some water. I took him to the vet. I immediately told them about the jerky treats and had found out that all jerky treats from China were in question. They started him on IV fluids, giving him 2 1/2 liters of fluids. He wouldn't eat for them either. He was there all day. Once I brought him home he continued to have diarrhea and refuse to eat. I called the next day to report this. They started him on flagyl. After several doses the diarrhea subsided and he started to eat. He was sick with the diarrhea for four days total. I spent around \$400. I used (b) (6) (b) (6) in (b) (6). Phone (b) (6) to verify. I will ask for a copy of his invoice if needed.	4	Years	Saint Bernard Dog	Dog	155	Pound

EON-91676	5/22/2012 14:45	Milo's Kitchen Homemade Meatballs	In October 2010 I took over care for my grandmother's dog when she moved to an assisted living facility. (b) (6) has always been particular about what he will eat so we weren't surprised as we would go through stages of him being extremely picky. He also had anal gland issues from time to time (this issue did not develop until he was 14) so we sometimes attributed his lack of appetite to these bouts with anal gland issues. Often he only showed an interest in human foods. Considering his age, our veterinarian agreed it would be okay for (b) (6) to eat human foods such as rice, sandwich meats, cheese, and bread. In addition I tried Milo's Homemade Meatballs and (b) (6) loved them. He never passed up a meatball and he would do anything for one. I tried not to overfeed him these, limiting him to usually no more than 5 a day. I felt they were a good product and he was actually eating dog food so it must be a good thing. Periodic appetite problems began to occur more frequently and our vet felt his symptoms were indicative of Kidney issues. Blood tests showed (b) (6) kidneys were okay. On (b) (6) I woke up to find (b) (6) quivering and extremely weak. He would not eat or drink at all. He could not stand on his own. Overnight his condition drastically changed. Given his age and his obvious discomfort, my mom and I felt we had to put him to sleep. I didn't feel this was reversible. Shortly after his passing I started seeing the complaints about chicken jerky treats and I can't help but make the correlation with the Milo's Homemade Meatball Chicken Jerky treats we gave him so many of. I question if his sudden turn was Kidney failure.		Years	Poodle - Toy	Dog	24	Pound

EON-91666	5/22/2012 13:46	Milo's Kitchen Home style dog treats Beef Jerky	I gave Milo's Kitchen Beef Jerky (bag states made in USA) to my Mini Schnauzer and Australian Terrier, my Schnauzer had no reaction, but my Terrier was walking around the room for hours, this happened twice and then he could not urinate for a whole day and then urinated on the floor a very large amount and then that happened again he urinated on the floor the next morning a large amount, he is very well trained and would normally not ever urinate in the house, this just happened last night and today 5/22/12 not sure if he is OK yet, luckily I only gave them very small amounts of the treat and it was broken into less than half inch pieces (numbers on bottom of bag are 20462f 20482f 5 01:03) I will throw the treats out and save the bag, I just happened to see the report on MSN and a I am very upset that I bought this treat and gave it to my pets	7	Years	Terrier - Australian	Dog	18	Pound
EON-91665	5/22/2012 13:45	Milo's Chicken Jerky	He developed changes to his health after eating Milo's Chicken Jerky treats. Increased water consumption and inability to hold it in until I returned from work. Lethargy and malaise.	9	Years	Spaniel - Cocker American	Dog	50	Pound
EON-91664	5/22/2012 13:45	Olde Roy Chicken Jerky Treats	I gave my pet Olde Roy chicken jerky treats and shortly afterwards was sick to his stomach, had diarreah and was lethargic for 2-3 days following. I waited 2-3 weeks before giving him another of the same treat and noticed similar symptoms right away. I have not given him any since and he's doing fine.	6		Retriever - Golden	Dog	90	

EON-91663	5/22/2012 13:45	Wagon Train Chicken Jerky Treats from China	Out of nowhere my dog got sick. At first the vet looked for abdominal obstructions, and finding none prescribed nausea meds, but the next two days my dog didn't improve and when we went back to the vet, blood work revealed EXTREME kidney failure. We tried to do all we could for her, but she was slowly dying and suffering and I ultimately made the decision to say goodbye to put her out of her misery. There was seemingly no explanation for the sudden on-set of kidney failure -- until I read with dismay that the jerky treats I was feeding both my dogs were sickening and killing other dogs -- particularly smaller breeds like mine. I don't care what the GOP says, we need the FDA to step up and step in to end this! She was a Pom/Schipperke mix.	7	Years	Schipperke	Dog	18	Pound
EON-91662	5/22/2012 13:45	Wagg'n tails	(b) (6) experienced kidney failure and died two months after initial vet visit. He was treated at two veterinary hospitals and was prescribed various medications. Charts are available. He was given chicken treats in the belief that it would be easily digestible. Our other dogs were not fed this treat regularly like (b) (6) was.	3	Years	Boxer (German Boxer)	Dog	70	Pound
EON-91658	5/22/2012 13:15	Waggin tails chicken jerky treats	After giving (b) (6) Waggin tails chicken jerky treats he developed diarrhea.	10	Years	Shar Pei	Dog	45	Pound
EON-91657	5/22/2012 13:15	Waggin Tails chicken jerky	after eating the Waggin Tail jerky treats the dog would become ill and would vomit - this went on for 2 days before I stopped giving him the treats. Since this treat is not being used anymore, the dog has been fine	2	Years	Retriever - Labrador	Dog	55	Pound
EON-91656	5/22/2012 13:15	Wagon Train Chicken Jerky Treats	After several months of giving our dog Waggin Trail jerky treats she became very ill. The vet diagnosed her as diabetic at that point, but insulin never completely solved the problem. There was still issues with excessive water and urination, also occasional vomiting and changes to muscle and bones. After reading many articles on the issues that have come up due to these treats we believe she may actually have Fanconi syndrome, based on the symptoms. We have quit feeding her the treats as of now, but the problems still persist. Based on her age and condition we do not want to put her thru the multitude of tests required to verify Fanconi, but would still like for others to know of the problems with these treats.	9	Years	Terrier - Cairn	Dog	16	Pound
EON-91654	5/22/2012 13:00	Milo's Chicken treats	Dog became comatose-taken to vet. Blood test showed extremely high hemoglobin and dehydration. IV started and he stayed at vet office for 2 1/2 days until blood test back to normal. He had eaten Milo's chicken treats prior to this, and vet suggested that may be the problem.	3	Years	Unknown	Dog	45	Pound
EON-91653	5/22/2012 13:00	Waggin Train Chicken Jerky Treats	Waggin Train chicken jerky treats were given to my dog for about 2 weeks. I noticed that (b) (6) got lethargic and sensitive to touching his abdomen. He then began to have horrible diarrhea and vomiting. We took all food and treats away except water and ice. I started adding dry Gravy Train first then added Alpo canned food back to his diet. I happened to read an article on the internet about the chicken jerky treats causing issues in dogs. We then threw away all of them. His diarrhea and vomiting cleared after 3 days.	18	Months	Pit Bull	Dog	40	Pound

EON-91652	5/22/2012 13:00	Waggin-Train Meat Blast Duck Jerky Wrapped Pork Skin Twists with Chicken Liver Centers	On (b) (6) I gave my two Lab-Mix dogs a Waggin-Train meat blast, duck wrapped pork skin twist, with chicken liver center. That very night, (b) (6) began to vomit. I felt really bad because I never gave them those kinds of treats, but wanted to give them something special for Christmas. Over the next three weeks, he got sicker and sicker. Our vet thought it might be a blockage from the rawhide, so she did xray's and an MRI. There was no sign of blockage. She did blood tests and hospitalized him several times. He was given IV's, and all kinds of medications. She was unable to find the cause of his illness. We had to force feed him most of the time, and even so, he lost 15 pounds in 3 weeks. Thanks to prednisone, he had one good week with us before he crashed. On (b) (6), I finally had to take him to be euthanized. He was almost nine years old, and we'd had him since he was a puppy. It was the worst thing I've ever had to do. Today I saw the article about Waggin-Train. I just cried, knowing that I killed him by giving him that rawhide.	9	Years	Other Canine/dog	Dog	70	Pound
EON-91649	5/22/2012 12:46	Dingo Wag'n Wraps with Chicken in the middle	I purchased a 3 pack Dingo Wag'n Wraps Chicken and rawhide Chews on April, 5, 2012. I purchased these from the local Walmart in Grafton WV. I gave (b) (6) one of the chews on April 6, 2012. Com the next day Saturday (b) (6) (b) (6) could not get up as it was like no movement in Hips. She was acting very sick. I tried to feed her along with making her drink water. Then the following day on (b) (6), She woke me up crying and moaning with pain. Her eyes were extremely glassy. (b) (6) has always been a very high spirited Dog. I rushed her a Vet in Bridgeport WV which was going to meet me for emergency Treatment. Well He informed me that she was Septic? He did blood work along with all the checks including xrays. He then medicated her and said it was questionable if she would survive??? Well he said he had to leave and he would check back on her a little later and then call me. He called about 3 hours later and told me she had passed. Not good. The vet bill was almost \$400 and he said that he was puzzled by what killeed her.	7	Years	Shepherd Dog - German	Dog	98	Pound

EON-91647	5/22/2012 12:45	Waggin Train Chicken Jerky Treats	Dog became very ill with kidney failure. Had to take him to emergency vet clinic. After 4 days in ICU, took him home and had to do subcutaneous fluids 2 times a day with several other medications. Within 19 days, he was dead. He was my best friend and the most healthy dog I've ever owned. Second dog, (b) (6) became ill 5 days later and died within 4 days of syptoms. She was a perfectly healthy 5 year old Boston Terrier Mix. She was the biological daughter of (b) (6). Have two other dogs that were not given these treats. They are fine.	12	Years	Terrier - Boston	Dog	22	Pound
EON-91646	5/22/2012 12:45	Waggin Chicken Jerky treats	there was plastic infused within one of the chicken jerky strips.						
EON-91645	5/22/2012 12:45	Waggin Train Chicken Jerky Tenders Dog Treats	One strip daily of Waggin Train chicken jerky strips. After several weeks, became lethargic, vomiting, kidneys shut down. Veterinarian diagnosed some form of poisoning. Kept at veterinarian clinic for a week with IVs, other efforts to save. Finally passed away from kidney failure. Two days later veterinarian notified us of problem with Waggin Train chicken and strongly suggested this product was the cause of poisoning, sickness and death.	13	Years	Dachshund - Standard Smooth-haired	Dog	20	Pound
EON-91644	5/22/2012 12:45	waggon trail ckicken jerky	My dog was 7 years old, completely healthy. He had about 3 treats per day and was suddenly dead in my livingroom floor with no prior signs of sickness.						

EON-91643	5/22/2012 12:45	Waggin Trail (Train??)	I want to correct my dog breed (I couldn't find it in your list He is a Peek A Poo, not pekinese.) He became very ill after eating Waggin Train treats. I had to rush him to the doctor. He is recovering. I mentioned to the Publix Suprmarket that I thought the treats they were selling from China were contaminated but they said they had not heard anything about it		Years	Pekingese	Dog		
EON-91634	5/22/2012 12:12	Waggin' Train Chicken Jerky Treats	I gave both my dogs Waggin' Train chicken jerky treats. Both became ill with diarrhea, but recovered in a few days. I had bought two packages at Kroger. I returned the unopened package to Kroger and they gave me a refund for it, after much argument. I still have the treats from the opened package, although they are not in the original package. The date of the event was late November or early December, 2011.	3	Years	Beagle	Dog	25	Pound
EON-91632	5/22/2012 12:12	Waggin' Train Western Grill Assorted Dog Treats & Chews Waggin' Train Chicken Jerky Tenders Dog Treats	I started buying my dog the wagon tail treats back in October or November. I was buying them from walmart. In December my dog started losing bladder control which is something she never did. I woke up one morning to find her bed all soaked. She would be walking and she would start to urinate as she was walking! Concerned she had a kidney or bladder infection I took her to the vet on 12/21/2011. She was also having some discharge so the vet thought that maybe she had a uterus infection and gave her medication for that. Someone told me about month later that they had heard not to buy dog treats from China because they make your dog sick, but they didnt know how. So I quit buying them for her. Thankfully she had been on medication during that time, which was \$150. Since I quit feeding her the treats she has not had anymore urinating problems. Now I just read an article about the treats that I was feeding her and how they affect the kidneys and it seems like it is no coincidence that she had the problems she did as I was feeding her those treats. I am so thankfull someone told me to quit feeding her those treats even though I didn't know why at the time. Now I see that if I had not stopped I probably would have lost my dog!	12		Shepherd Dog - German	Dog		
EON-91631	5/22/2012 12:11	Waggin Train Chicken Jerky Treats	Friends came to visit and brought (b) (6) a Waggin Train chicken jerky treat. She had eaten them before, but this particular time she was lethargic within hours. She developed horrible diahrrea and vomiting in the middle of the night. She continued with the symptoms the entire next day. We took her to the vet within 2 days because her symptoms had not improved. The vet put her on special food and medication to correct the symptoms.	2	Years	Pit Bull	Dog	55	Pound
EON-91629	5/22/2012 12:11	Waggin'Train Jerky Tenders	After eating Waggin Train Chicken Jerky treats for several months, our dog became seriously ill. She was drinking excessively and was listless. We took her to the vet for several tests and when they couldn't diagnose an illness had us take her to an internal medicine specialist. After several more tests and medicines, costing more than \$2000, they were still unable to find a cause, but her liver did not seem to be functioning normally. When we ran out of treats she seemed to improve after a month or so and now that we have been giving her them again, she is drinking excessively again and is listless.	8	Years	Mixed (Dog)	Dog	58	Pound
EON-91628	5/22/2012 12:11	Milo Chicken Jerky Treats	(b) (6) experienced lethargy, loss of appetite. After I read article describing how chicken jerky treats were making some dogs sick I immediately threw them away. Within a week (b) (6) was much more active and his appetite picked up. I believe that the treats were making him sick. We used to give him 2 or 3 a day.	3		Crossbred Canine/dog	Dog	15

EON-91617	5/22/2012 11:30	I don't recall	In early, 2010 I purchased a bag of chicken jerky as a new type of treat for my dog. I continued to give him these treats on a regular basis. By April, he was tired and listless and rapidly losing weight. Our vet said that he was suffering from kidney failure. By May I had to have him euthanized as he was no longer able to stand and was in great pain.	11	Years	Shiba Inu	Dog	28	Pound
EON-91616	5/22/2012 11:30	Waggin Train Wholesome Chicken Jerky Tenders	After giving our dog the Waggin Train jerky treats, his symptoms started with diarrhea, which got progressively worse, then vomiting, then refusing to eat. He spent two nights in the hospital, which he had previously never had to be under vet care other than for wellness visits. Shortly after he came home, we saw the article on the jerky treats, and realized we had been giving them to him. I have kept them in case any testing needed to be done on the treats or his condition got worse.	8	Years	Foxhound - American	Dog	84	Pound
EON-91604	5/22/2012 11:00	Canyon Creek Ranch Chicken Jerky Treats	She inexplicably started having digestive issues. She would have constant diarrhea that lasted for a couple weeks. Additionally, her stool had a opaque slime that coated it. We called the veterinarian to make an appointment for her to be seen. The vet made a suggestion of feeding her steamed rice and boiled chicken for a few days along with giving her gatorade. Within a day, her bowel movements returned to normal. As soon as we allowed her to have the chicken jerky treats, her diarrhea returned. We decided that the jerky treats were the only new food in (b) (6) diet, so we stopped giving them to her. The issue disappeared.	1	Years	Spaniel - King Charles Cavalier	Dog	15	Pound
EON-91603	5/22/2012 11:00	Waggin Train Chicken Jerky Tenders	Waggin' Train Chicken Jerky Treats purchased in April, usually 1-2 pieces given several times per week as treats caused dog to vomit and have severe diarrhea. It took a couple weeks to pinpoint the cause as he also gets other treats, but by elimination we figured it out.	7	Years	Retriever - Labrador	Dog	68	Pound
EON-91588	5/22/2012 10:45	Chicken jerky treats	We had purchased some chicken jerky treats at our local Big Lots. Our dog had diarrhea, dehydration, etc. He was initially diagnosed with pancreatitis and then had to be hospitalized with kidney failure. Our vet notified us of the link with the chicken jerky treats and we provided her with the bag of treats we had given to (b) (6). We have spent over \$3,000 on his illness and recovery and would like to see that reimbursed by the manufacturer of the treats.	12	Years	Terrier - Cairn	Dog	20	Pound

EON-91545	5/21/2012 23:45	Waggin Train Jerky Tenders	My dog started becoming lethargic after she started consuming Wggin Train Chicken Jerky. She started to drag her foot. She became incontinent and was throwing up. She was also drinking excessively.	9		Boxer (German Boxer)	Dog	60	Pound
EON-91542	5/21/2012 21:15	Good'n'Fun Triple flavor wings, Beefeaters chicken fillets	According to owner by phone May 9 2012, (b) (6) was doing very well with his aggression problem until 4 days ago when his behavior worsened and it was clear he didn't feel well May 8, so the owner took (b) (6) to his regular vet. Blood work was done and increased BUN(36) and creatinine (2.3) was noted. UA normal. I asked the owner what treats she was using and she had been giving chicken jerky treats. I had the owner stop the treats and keep the remainder. Date problem started is an estimate based on conversation with owner. Date of recovery is also an estimate, phone conversation May 21, 2012 the owner said he was back to his old self and had been for several days.	8	Years	Terrier - Jack Russell	Dog	20	Pound

EON-91540	5/21/2012 20:45	Dick Van Patten's Natural Balance Venison & Green Pea Limited Ingredient Diet (LID)	I noticed the food texture was different from previous times I purchased the product. The food was usually firm but this time there was free fluid in the can and the food texture was very loose.	4	Years	Domestic Shorthair	Cat	15	Pound
EON-91538	5/21/2012 18:15	Taste of the Wild pacific Salmon	Owner was feeding Taste of the Wild Pacific Salmon dry food-lot numbers were on recall list. Started with bloody, tarry stool 2-3 days after last meal of ToW. Also, history of getting into the garbage 5 days prior to presentation and owner changed food abruptly (upon learning of recall). Dog was BAR on presentation (Weimeraner normal baseline behavior). fecal sample negative (Antech diagnostics), started on Metronidazole. Followup: slightly soft stool still today but otherwise normal.	4	Years	Weimaraner	Dog	62	Pound
EON-91488	5/21/2012 12:45	Kingdom Pets Chicken Jerky	<p>On Sunday, May 20, 2012, I purchased a .48 oz bag of Kingdom Pets Chicken Jerky (UPC 8471300020, Item code 169728, Lot #AKKPCKO3B356) for dogs at Costco located at (b) (6). (b) (6) When I arrived home, I opened the bag and pulled out 3 pieces, for each of my dogs. I noticed blue plastic sticking out of the end of one piece. I did not give them to my dogs, but checked on the website for any recalls. I did not find any, but did learn that China is putting plastic in animal chicken jerky, which this product is made in China. I also learned that this material can cause illness and even death of an animal.</p> <p>I contacted Costco this morning to advise them of the problem. I also contacted the distributor Globalinx Pet, LLC, Newport Beach, CA, 888-565-7387 and left a message advising them of this issue. I ask that you investigate this issue and trust that you will place a recall for this product. Also, as a former Safety and Environmental Manager at a plastics manufacturing company in (b) (6), can you explain to me (or direct me to the appropriate department) as to how manufacturers in the US are held to the strictest standards and imports from China are not?</p>						
EON-91448	5/21/2012 9:45	Purina One Brand Beyond Cat food adult cat Chicken & Whole Oat Meal Recipe	I bought my normal brand of cat food. Within a day of starting that bag, she had slight diarrhea. Over the past 4 days, the diarrhea has gotten worse (completely rummy now), she has more frequent urinations but they are shorter than normal. The first few days she was throwing up a white liquid and yesterday she started throwing up her food. She has been more vocal the past few days than ever as well. It also seems she is unsure about if she needs to go, she she has started hesitating before getting in the litter box. Her appetite has been lessening and she didn't eat dinner at all. I have a regular scheduled vet appointment tomorrow that I will bring this up with her too	12	Years	Domestic Mediumhair	Cat	14	Pound

EON-91446	5/21/2012 5:45	Kirkland Signature Super Premium Pet Diets	several months ago, i notice my dog was starting to deteriorate. He would lay around, drink alot, go to the bathroom alot, and finally he got to the point where he was so lethargic I took him to the vet. The vet to many tests on (b) (6), including an xray and blood tests. She said that he was going through renal failure and that his kidneys were failing. I was given a host of medications for him and was sent home. The vet said that his problem with terminal and that we should prepare ourselves. Several times we thought we were going to lose (b) (6). He is still with us, but still very sick and very tired. He hardly eats anymore and has lost alot of weight. I know, without a doubt, that this dog food is the problem, now after reading stories on the internet. He has been healthy since I had him, even the vet found his condition un-explainable.	9	Years	Terrier - Yorkshire	Dog	10	Pound

EON-91443	5/20/2012 19:45	Kirkland Signature Super Premium Adult Dog Chicken Rice & Vegetable	We have had our dog for almost 2 years. She was healthy and full of life. We have only fed her Kirkland Premium Dog food since we had her. About 2-3 weeks ago we purchased a new bag of dog food from Costco. About a week ago we saw something that was odd, when we would take her out to the back yard she would just sit and stare around. (she never did this before, she would always play and run around) Then Wednesday evening she started to appear that she couldn't walk very well. We kept an eye on her that night. First thing Thursday morning we noticed she could barely walk. We immediately took her to our vet. They said she was very sick and wanted to keep her all day to get fluids in her and run tests. We picked her up at the end of the day and she was the same. Same thing happened Friday morning, not doing well so we took her to the vet for more testing and fluids/medication. They watched her all day and still did not get better. We took her home Friday night and with the medication we looked for an improvement. At about 3am Saturday morning I went to be with her. She was out of her bed laying on the floor. At this point her head and legs appeared to be locking straight and I could tell by her eyes that she could not see me or see anything. I stayed with her for about an hour and then she started to have severe seizures. As soon as the seizures started, we immediately took her to the (b) (6). The seizures had done so much damage that by the time we arrived at the hospital she was almost gone. They immediately gave her anti-seizure medicine and examined her. They said the damage was ir-reversable, she had major swelling on her brain, and unresponsive. She then had to be put to sleep. Previous to this she was a VERY HEALTHY dog with no issues. Our family is devastated and we are concerned that the dog food was the cause of her death.	4	Years	Mixed (Dog)	Dog	20	Pound

EON-91441	5/20/2012 18:00	Chicken Soup for the Dog Lover's Soul Adult Dog Formula	<p>7 May 2012 - Our usually hyper and active dog started displaying symptoms of lethargy, anorexia, vomiting, dehydration and diarrhea. We took her to the vet within 12 hours of symptoms starting; vet took x-rays to check for blockage or other stomach problems, nothing was found. She was given an SQ liquids injection under the skin to attempt to hydrate her and prescribed both pain killers (tramadol) and anti-nausea (cerenia) medications. Vet suggested that we put her on a very bland diet of boiled chicken and rice and to bring her back if within 72 hours she wasn't getting better or was getting worse. Within the first 2 days she started drinking water again and eating very little.</p> <p>11 May - We were scheduled to leave town and a friend stayed at the house to watch her and was given all of the notes and medication.</p> <p>12 May- she had to take her back to the hospital after she again stopped eating and began vomiting and diarrhea again. Vet again administered the SQ liquids treatment for dehydration and prescribed an anti-biotic and anti-diarrhea (metronidazole) medication as well as the anti-nausea (cerenia). She was on this regimen for 5 days at 2 times per day.</p> <p>20 May - She appears to be much better; is now drinking water, eating dry food and playful again. The stools seem to be regular and the vomiting has ceased, however she is still not as energized as usual. With all hopes she will be back to normal soon.</p> <p>As I was checking my emails today after being away, I noticed an email from petfooddirect.com about dog food recalls. Upon opening I noticed that our brand, Chicken Soup for the Dog Lover's</p>	7	Years	Pit Bull	Dog	43	Pound
---------------------------	-----------------	---	--	---	-------	----------	-----	----	-------

			<p>Soul, was on it. So I opened the page and checked her bag; the bag code doesn't match, but the expiration date falls in the range. I purchased this bag of food at a local pet store on 30 April 2012 and opened it and started feeding it to her around the 5th of May. I called the company to report this incident and they assured me that I did not have a contaminated bag. I asked if there was any way to test it to make sure so that no other pets are endangered. They basically blew me off. I have obviously discontinued feeding her this food, but I have kept the bag. If this is due to contaminated food, I will obviously want vet bills reimbursed, but my first concern at this point is to have the food checked and taken off of the shelves, if necessary.</p> <p>Here is the following information for the report and food:</p> <p>Brand: Chicken Soup for the Dog Lover's Soul Bag Code: CSD0102C1NL Best Before Date: 31/Jan/2013 UPC: 0 7419860575 0 Distributed by: Diamond Pet Foods</p> <p>Call took place on 20 May 2012 at approximately 1300 hours and I was given a Case Code of 23471.</p> <p>I have also left a message with the store from whom I bought the food, Dogs R Us SLC, UT.</p> <p>If this is the cause of her sickness and we can prevent this from happening to 1 family, this will be worth it. Please feel free to contact me with any questions or concerns at all. I prefer email, but I can also be reached via phone at (b) (6)</p> <p>Thank you for your time and help and have a wonderful day.</p> <p>(b) (6)</p>						
EON-91438	5/20/2012 16:00	Canidae All Life Stages	Upon opening a new bag of Canidae All Stages which was the dog's regular food, she began to have loose stools which over a few days transpired to diarrhea. She then began to vomit the food too along with becoming mopyy and just laying around. Once learning about the recall, we returned the bag to the distributor. The symptoms immediately resided when she was taken off the recall bag.			Greater Swiss Mountain Dog	Dog		

EON-91437	5/20/2012 15:45	4 Health High Performance	<p>I tried to report this weeks ago, but my computer went down and I lost everything I wrote out to you guys. You can check this by my history on my computer. Since that happened, I noticed this food has been recalled, but the information given to the public is limited as to the affects of what this food is doing! My dog started 4 Health in Feb. 2012 this year. It was maybe a week or two after eating the food, he started to bleed from his penile area! He became very weak and would not run as he did before. I took him to the best and they put him on 2000mg of cephalexin per day. The bleeding subsided a bit, but it wasn't a week or two before it came back again. BUT this time he started bleeding even worse and was more lethargic! Putting 2 + 2 together, I decided to take him off of the food. The vet could not seem to help me or understand what was happening to him. So, I did some research and learned that apple cider vinegar may help, so that is what I gave him. The bleeding stopped after attempting this!!!! SO, I decided that maybe it wasn't the food since my other dogs had not reacted yet. I started giving him the 4 Health ONCE AGAIN and SURE ENOUGH he started bleeding again!!!!!! Of course, he is completely off it now, but to make a longer story short, my other two dogs did become sick as well with the same type of bladder infection and very weak! I'm so worried about my oldest dog. My oldest dog hasn't been the same. I'm so concerned that this food has done something to him! I just had FULL BLOOD WORK UP DONE ON HIM in Feb. Every organ was tested and he was in EXCELLENT health! Now, he is not the same dog. My dogs are very high energy and I exercise them in a great way! They can run for hours at a time, but since feeding them this dog food, they do not have the energy! Especially my oldest dog. You should let consumers know THIS DOES AFFECT THE DOG!!! My son also has a chronic illness and ended up in the hospital after helping me feed the dogs. The doctors never said it was the dog food but I never told them it may be a concern because I didn't know! I still have this dog food and I would like it tested. Of course I'm not using it, but I want to know what is wrong with my dog. He is like a child to me and my best friend. More so than anything I would also like to know what is going on with my son! Since he has a condition like chrones disease, I feel that a lot is being looked over! Please make people aware! Tell them to watch their dogs for bladder infections and just over all not being the same after eating this food! I'm still dealing with the sickness in my house hold! My dog will actually walk around right now, but still can not run long or do the things he used to do. I hope he will recover. If something happens to him, I will not be able to handle it emotionally. Any advice will be greatly appreciated!!</p>			Shepherd Dog - German	Dog	96	
EON-91436	5/20/2012 15:00	Waggin' Train Wholesome chicken Jerky Tenders	<p>I was out of the treats and everything was normal with (b) (6), then on Saturday I purchased the Waggin' Train 22oz "Natural Chicken Fillets" and she ate 2 chicken fillets and all Saturday night she had diarrhea ALL night long with blood mixed into the poop.</p>	7	Months	Retriever - Labrador	Dog	50	Pound
EON-91431	5/20/2012 3:01	Diamond brand naturals small breed adult chicken and rice dog food	<p>I gave my dog diamond brand naturals small breed adult chicken and rice dog food. It was the 18LB bag. She ate normally the first day, the next day she started to have diarrhea and threw up the food. The next 3 days she did not eat the food and continued to have diarrhea. The 3rd day I took her to the vet and she had a high temp and was giving a shot for vomiting and medicine for diarrhea. she will not eat the food, I even tried to mix wet food with it, that she loves and she would not touch it! I myself have not been feeling well and have had diarrhea for the past few days.</p>	1	Years	Chihuahua	Dog	8	Pound

EON-91422	5/19/2012 15:45	Pedigree Adult Compete Nutrition	<p>The dogs affected has had diarrhea for approximately 1 week straight. We have had trouble figuring out what the problem was because nothing had changed in his diet or activities. Today, when I fed the dogs breakfast, I found a ball of the food held together by mold. The ball is approximately 3 inches in diameter. I immediately removed the food from their bowls and went to the store. The bag of Pedigree in question has been closed up and we've replaced it with an equivalent bag of Iams. I can only hope that their health improves.</p> <p>A photo of the ball of mold can be seen at: http://i40.photobucket.com/albums/e243/mustangjonny84/pedigreemoldball.jpg</p> <p>On the previous page, I noted that I have not informed the manufacturer nor the store where I purchased the bag. They are next on my list to contact. This bag of dog food was purchased on 5/7/12. To think that this product could still be on the shelves is concerning.</p>	12	Years	Rottweiler	Dog	80	Pound
EON-91420	5/19/2012 13:45	Natural Balance Limited Ingredients Sweet Potato and Bison dry dog food	(b) (6) became ill after eating a new 15 lb. bag of Natural Balance Sweet Potato and Venison dog food. She ran a fever, threw up once that I know of, and became VERY lethargic. I took her to the vet, who did blood work and xrays but did not seem to find out exactly why she was feeling so poorly. The vet prescribed an antibiotic. (b) (6) seemed to be feeling a tad bit better May 3, but died in the early morning hours of (b) (6).	11	Years	Unknown	Dog	68	Pound
EON-91416	5/18/2012 20:15	Waggin' Train Wholesome Chicken Jerky Tenders	<p>My sister-in-law had bought the treats at SAMs club on May 5th, she had given (b) (6) a treat a few days. On (b) (6) she gave him 2 treats, he ate one (I was not home at the time she gave them to him.) after eating one she said he went inside his dog house and started acting as though he was having a seizure and he began to vomit and also diarrhea/bloody. I came home and went to give him his food, and I noticed him sitting on top of his dog house, looking like death...it was horrible. I went to check him, and I saw a treat. I grabbed the treat and asked my sister-in-law if she was giving this to him? Because I had seen the warnings the week before about these treats. I had no idea she had bought these and feeding them to him. (b) (6) was dying. He was dead before we could get him to a vet. He was ice cold/inside his mouth was like ice. I knew I was losing my baby boy.</p> <p>I cannot believe these treats are still on the store shelves. Had these been pulled my dog would still be here. I also did research and I saw the packets in the product the deoxidizers are poisonous/contain iron I did take a picture of the packet stuck to a magnet. I wonder if this is what is making the dogs die/sick Iron Toxicity? Or is it the Irradation being done?</p>	3	Years	Spaniel - King Charles Cavalier	Dog	18	Pound
EON-91415	5/18/2012 19:45	The Blue Buffalo Co Blue Life Protection Formula with LifeSource bits. Natural chicken and brown rice recipe. Puppy.	<p>We began switching our puppy to Blue Buffalo Chicken and Brown Rice Puppy Formula and noticed he wasn't sleeping through the night, began whining and a loose stool. As the days went on, over 10 days it got much worse. We eventually had to take him to the vet due to lethargy and dehydration. He wouldn't eat in the morning so we made an appt. with the vet. She changed his food, put him on some meds for possible salmonella poisoning and fluid administration. Our bill totaled \$248.14. He was fine until we switched him over to Blue Buffalo. We've only heard good things about this food until after we came home from the vet and looked online. We were surprised to see several (probably 100) other pet owners with similar problems with this same food.</p>	10	Weeks	American Pit Bull Terrier	Dog	16	Pound

EON-91412	5/18/2012 18:15	Gourmet Sweet Potato & Chicken Wraps , Milo"s Kitchen Home Style Dog Treats, Mini Dingo Chip Mix	This dog was presented to me because of being lethargic, depressed appetite, and frequent urination. exam was essentially normal. Abnormalities found with lab work were; elevated WBC count (17500) due to neutrophils (12,430) and eosinophils (850). high blood creatinine (2.0 mg/dl), high urine blood content (++) , high urine protein (++) , high urine leukocytes (++) . The urine specific gravity was 10.40 and urine PH was 8. On urine culture staph aureus was isolated.	2	Years	Shih Tzu	Dog	31	Pound
EON-91405	5/18/2012 15:45	Purina Fit & Trim	(b) (6) is a Spayed Labrador, 9.5 yrs old house dog, and eats 1 cup of dry Purina Fit & Trim in the morning, and one at early evening. About two weeks ago I opened the latest bag and her eating habits quickly changed. She began to turn away from the food and would only eat after a day and a half and then approximately 8 to 10hrs after eating that cup of food she would throw it up 90% undigested. I wasn't too concerned at first because I felt she may have a cold of some kind. On the night of the 05/16/12 she became very ill, she had not eaten since that morning (Extreme Salivating very heavy, large pools- had noticed Salivating beginning the night of 05-15-12 but it was light) also bloody diarrhea and we had to rush her to the Animal ER here in Mobile Alabama, she was just laying there. Blood Work showed a Probable E-Coli Bacteria. Realizing that the symptoms began at the time of opening this last bag of dog food I felt compelled to submit this report because this bag of food may somehow be contaminated in some way.	9	Years	Other Canine/dog	Dog	79	Pound
EON-91367	5/18/2012 13:15	Friskies' Tasty Treasures with Turkey and Cheese in Gravy	After eating Friskies Tasty Treasures Turkey and Cheese in gravy he experienced vomiting, bloating and pain. I opened a second can and found white slime and black mold on the food. This was not present in the first can, but seems to indicate the case of food if not the whole lot is contaminated.	20	Months	American Shorthair	Cat	6	Pound
EON-91335	5/18/2012 6:30	Wagon Train Dog Treats & Milo's Kitchen Treats	Started vomiting profusely, some diarrhea, lethargic. Took him to the vet and they done blood work and gave him an IV due to dehydration. His blood work showed he had severe pancreatitis. The vet stated he had never seen numbers so high! He was a very sick dog. The vet inserted a port so I could give him an IV daily for a week with some medication in it and he improved after several days. He ate lots of doggie treats, all chicken products, made by Wagon Train and Milo's prior to his illness. We no longer give him these. I felt his illness had something to do with his treats but could not be totally sure. But he now eats what he did before but no treats and he is doing great.	3	Years	Other Canine/dog	Dog	8	Pound

EON-91334	5/18/2012 3:45	Taste of the Wild High Praire Canine Formula with Roasted Bison & Roasted Venison	I have 4 dogs who ate Taste of the Wild bison formula manufactured by Diamond, and had diarrhea to varying degrees. One of my dogs has been to the vet multiple times, including emergency treatment, beginning on 2/8/2012, for severe bloody diarrhea, severe gas and bloating, dehydration, and vomiting. I contacted Taste of the Wild on 3/8/2012, to ask if there had been any recipe changes or ingredient supply changes to their bison formula food. I was informed by them on 3/8/2012 that one of their vets would contact me. It was not until Taste of the Wild issued a recall on May 4, that I realized that this food was manufactured by Diamond and likely to be the reason for my dog's illness. On May 6, I contacted TOTW again, this time to ask if their bison formula had been manufactured at the South Carolina Diamond plant. On May 8, I received a reply from a TOTW vet, informing me how I could receive a refund for the food and inviting me to submit vet bills for their consideration. I called my pet store and verified that they did indeed sell the recalled food. I feel strongly that TOTW has acted very irresponsibly, by not answering my questions in a timely manner even though they knew when I asked the question that the food had been manufactured at the SC Diamond plant and that they are continuing to act irresponsibly by telling the public that they are only recalling TOTW as a precaution and that no dogs have gotten sick from the food. I reported illness in my 4 dogs to them on March 6! I want the FDA to count my dogs as sick from this food and to do all in their power to punish Diamond and Taste of the Wild with fines for their filthy plant as determined by the FDA inspection in April, and for failing to notify the public in a timely manner and for failing to respond to me when I specifically asked if there was a known problem with the food. I want Taste of the Wild to pay my vet bills which I will submit to them. In addition, I wish someone would make it illegal for a company name (Taste of the Wild) to sell pet food that is manufactured by a different company (Diamond) without making that information readily available and easily accessible by the public. I did my research and was unable to find anything on the internet to indicate that TOTW and Diamond were tied together until the recall was issued. I have vet bills available if you need them and I am in the process of collecting medical records of 4 -5 separate vet visits over the course of 2 months for the same dog all because Diamond would not indicate that there was a problem with their food.	6	Years	Other Canine/dog	Dog	34	Ounce
EON-91333	5/18/2012 3:30	Taste of the Wild Wetlands Canine Formula with Roasted Fowl A Grain Free Diet	Acute liver failure. I HAD GIVEN HER THE DOG FOOD BUT SHE WOULDN'T EAT MORE THAN A BITE OR TWO. On the 15th she ate a bowl. On the morning of the 17th she couldn't walk and I rushed her to the vet where she was diagnosed with acute liver failure. This is a 15 month old pure bred Keeshond. The breed is not listed so I had to select unknown to get the form to process.	15	Months	Unknown	Dog	30	Pound

EON-91332	5/18/2012 3:00	4Health Optimal Nutrition For Optimal Health (Puppy Formula)	I have a 9 month old great dane named (b) (6). She was recently spayed and I decided to changer her food to a type that would be more healthier for her. I switched her food to 4health puppy formula 18lb bag. On May the 16th she started throwing up, very bad diarrhea where it had blood in it. I have had her since she was 12 weeks old and she has used the bathroom in her kennel once or twice. For her to use the bathroom twice in one night and throwing up I knew something was wrong. I called her vet at (b) (6) in (b) (6), and took her in that day. The vet informed me that (b) (6) has intestinal parasites, and intestinal bacteria. She was sent home with 3 different types for expensive medication. When I returned home that afternoon I decided to do some research. This is where I found out that the 4 health dog food had a Salmonella recall. Above the words "Production Code," it has the date March 27, 2013. I have read that if it has any date prior to April 7,2013 it has a recall on it. Also, it has the number (MLP0304C21xME). I have read that if the 9th or 10th number is a 3 or a 2, and the 10th or 11th is an (x) then it has a recall on it. My bag of dog food had both of these components, and I am VERY concerned!!! I have heard about people calling and they not paying their vet bill or refunding them, and I DO NOT WANT THIS TO BE THE CASE WITH ME PLEASE!!! Great Danes have a short life expand and I love my dog dearly, and I do not want something like this to hurt her anymore than it already has. I believe that 4health should pay for my dogs vet bill, because it has everything to do with this food. I will do anything so no other dog has to get sick!! If you could get back to me about this issue that would be great. Thank you for your time in this matter!!						
EON-91331	5/17/2012 23:00	canyon creek ranch	I got a healthy puppy and started training her using exclusively canyon creek treats. All of a sudden she has immense Diarhea and vomitting. She was no longer excited and happy..... I blamed her dog food or the fact that she may have gotten into something. I quarentined her but kept giving her the treats..... It wasnt till I gave her a bland diet that everythign went away... Once I reintroduced the treats her symptoms came back. I have spent close to \$500 on test and medications trying to figure out why a 7 month old puppy got so ill.	7	Months	Great Dane	Dog	80	Pound
EON-91330	5/17/2012 22:45	Waggin Train Wholesome Chicken Jerky Treats	My pet at Waggin Trail chicken jerky treats and developed vomiting, bloody diarrhea, lethargy, would not eat or drink. She is presently in the hospital (admitted 5/17/2012). Vet confirmed diagnosis with concurrent use of treats. I don't understand why these have not been taken off the market. There have been many complaints made against these. I did not know this until today.	3	Years	Shih Tzu	Dog	13	Pound

EON-91329	5/17/2012 21:45	Wellness Small Breed Super 5 Mix Adult Health (dry)	<p>We have been using Wellness Super 5 Small Breed Adult dry and wet food for 2 years with no problem. Last Friday my dog developed severe diarrhea. I took her to the vet the next morning and she was kept over the weekend on iv due to dehydration. She was released on Monday with antibiotics, antacid, special food and a \$600 bill. The vet stated that this was definitely caused by something she ate but she was vague/nonspecific when I asked about salmonella from dog food.</p> <p>I posted my experience on Wellness' facebook page and within an hour 2 other people using the same food as me reported the same problems. I just looked for that post and can't find it now, so I am not sure if Wellness removed it. My sellby dates fall within the range of the recall.</p> <p>I am feeding her the food the vet sent home and will be switching her to a non-Diamond product after. Had I known that any of the Wellness products were made at Diamond, we would have never used it to begin with.</p>	2	Years	Mixed (Dog)	Dog	10	Pound
EON-91288	5/17/2012 13:45	Kirkland's Signature Nature's Domain Salmon Meal & Sweet Potato Formula for dogs	<p>Our dog, (b) (6), ate Nature's Domain Salmon & Sweet Potatoe Dog Food for over a year. She exhibited no health issues prior to December 2012. Starting then she would throw up almost daily. She became disinterested in eating her food, but would manage to eat one meal each day due to hunger. Her stomach would make loud 'gurgling' noises daily. Her stool was often loose. She also lost between 4-5 lbs of body weight over the course of three months. We tested her for several diseases, possible problems, and worms with no luck. With our veterinarian's help we did everything we could to try and identify the problem with no luck. We immediately stopped feeding (b) (6) the Diamond produced dog food when learned of the recall on May 9, 2012. Within two days of eating boiled chicken and cooked rice (b) (6) had more energy. She also didn't throw up and ate regularly. Her stomach has not made any noises since either. We also believe she is starting to gain some weight back now. Although our batch of food is not included in the recall we are certain it was contaminated and was causing the problem.</p>	4	Years	Cattle Dog (unspecified)	Dog	29	Pound

EON-91258	5/16/2012 23:00	Taste of the Wild by Diamond	took my dog to vet' had an accident of wetting his bed. (b) (6) first thought it was an infection and put him on antibiotics. Took him back two weeks later. They ran blood tests, x-rays and tested the urine for consotration and reported that he had kidney damage, put him on another two week course of antibiotic and prescription dog food for kidney problems. we were to bring him back May 29. I asked about the Diamond pet food recall as I feed all my dogs Taste of the wild , made by Diamond. She said it was just one of their foods and not that one. I took him home and followed the instructions. At first he held his own but then lost his appetite and was vomiting. WE took him back in. He is now at the vet center on ivs and credical care. By this time May 16,2012 lhad heard of the recalof all Diamond doq food including Taste of the Wild, which I have bought from (b) (6) located in (b) (6). I called them on the 15th of May to tell them what was going on with my Dog. Asked them about lot Numbers from Dec, 2011 thru april of 2012. they did'nt know also told me they buy from a distributer who buys wholesale and he gave them no info exsept the the food they just got in also told me they were Company people and we made at people being upset at Diamond. they were very uncaring even though I reminded that I am ill wiith Lupus and my 4 and 2 year old grangchilren have been with our dog. Very uninformed people. I have reported this to the Veternain. there is no way that these people will call their distriptom or give me his number. Infact they hung up on me. We have done businee with this company for 20 years. At this point to have spent\$1100. on vet bills and don't know if the dog will live to see tomorrow.	5		Rottweiler	Dog	79	
EON-91257	5/16/2012 22:45	Taste of the Wild Sierra Mountain Canine Formula with Roasted Lamb	I have been feeding Taste of the Wild for the lifetime of each of my pets. About a month ago they became finicky and ate their dogfood but were not eating it as well as usual. I noticed that a couple of my dachshunds appeared to be losing weight. Then one of them began throwing up and had loss of appetite. The next day he had loose stools and obviously wasn't feeling well. Then I heard about the food recall and checked the bag to find their food was affected. I called the company from the vet's office to inquire about what I needed to do as the vet felt my dog needed to stay overnight, get fluids and then he was placed on an antibiotic and bland diet. He recovered quickly.	1		Dachshund - Miniature	Dog	10	

EON-91256	5/16/2012 21:45	Waggin Train Duck Fillets	<p>5/5 (b) (6) gave her dog two duck fillet treats before leaving for work at approx. 9 am. When she returned home around 7 pm (b) (6) was unresponsive and cold on the floor in a small puddle of mucus and saliva. Lock jaw, black eyes, labored breathing, the dog was in process of defecating himself when the owner arrived.</p> <p>(b) (6) gave him small amounts of water by dripping them into his mouth and held him. He vomited more than 12 times. He gradually became more responsive. He wouldn't eat or drink anything. He eventually after several hours of watching him and talking to him passed a bloody stool of mucus and blood.</p> <p>5/6 Took animal to veterinary clinic where he was given medication and an IV of fluids. Because of financial incapability we were forced to take him home and nurse him there. The nurse said he was in the process of liver failure or so it seemed.</p> <p>5/6-5/9 bloody stool. liquid diet of Gatorade diluted and water and ice. And a diet if baby food beef and chicken rice and cottage cheese. Gradually he began to have more normal stools.</p> <p>5/11 he passed his first blood free solid bowl movement.</p> <p>(b) (6) is a victim of Domestic Violence and her dog is her best friend. She had to take off time from work and the vet bill and he still needs to go back to the vet and we cannot afford to pay for that.</p>	10	Years	Dachshund - Miniature	Dog	24	Pound
EON-91194	5/16/2012 11:45	Waggin Train - Jerky Tenders	<p>Received blood and urine report back. Detected high levels of Creatine and Nitrogen levels in the urine. Urine is extremely yellow (which is good), but indicates dehydration or potential other issues. We just found out about this, but we have been using Waggon Train Chicken Jerky treats for years and it appears that they could be part of the cause of his condition. We have removed these from his diet while at the same time we have introduced more water as well as a food with less protein content.</p>	4	Years	Terrier - Yorkshire	Dog	6	Pound
EON-91130	5/16/2012 4:15	Waggin' Train Jerky Tenders	<p>I have been purchasing this brand of chicken jerky from Costco for years and feed my dog small pieces throughout the day as a treat (totaling approximately 3/4 of a strip per day). He has recently been diagnosed with liver failure upon taking him to an emergency vet hospital which was very shocking to the doctors since he is not very old in age. 1 month prior to his diagnosis he would vomit the chicken jerky shortly after eating it. The doctors have given him days or weeks to live.</p>	6	Years	Terrier - Silky	Dog	12	Pound
EON-91129	5/16/2012 3:00	diamond brand lamb and rice dry dog food	<p>Our labrador was constantly vomitting and acting unusually fatigued. We took him to the vet where they performed a blood test and found that he has excessive white blood cells and that if his sickness continues he will be given antibiotics. Subsequently the following day we recieved a letter informing us that the exact food brand of the exact manufactureing dates of the food that he has been eating has been recalled due to salmonella. A further check online showed that his symptoms are consistent with that of salmonella and we are returning to the vet tomorrow. Surprisingly the reports of the recall are claiming that no dogs have been infected. We are quite worried and are anxious to know if he will be ok.</p>	7	Years	Retriever - Labrador	Dog	110	Pound

EON-91128	5/16/2012 3:00	Waggin Train Chicken Strips	(b) (6) was a very healthy dog. She got the Chicken strips and a while later got very sick but seemed to come out of it. She wouldn't eat so we switched to canned dog food. She kept getting weaker and eventually her kidneys failed. The vet bills war almost a thousand dollars.	13	Years	Terrier - Jack Russell	Dog	14	Pound

EON-91125	5/15/2012 17:15	Natural Balance Venison and Sweet Potato	<p>I was feeding a bag of Natural Balance Venison & Sweet Potato. I had the impression that they weren't tolerating it as well as usual. Bought two new bags (use the 28 lb size) & began feeding one of those bags. They seemed to do better with the new bag. About half-way through the bag, I heard about the recall & checked the BB dates. The one that I hadn't finished was in the recall. The two new bags were not. (I believe 3/23/13 was the BB date on the new ones; can check.) I decided to finish using the open bag, since it wasn't in the voluntary recall list. Last Monday, I opened the new bag. That night, the 10 year old had a major reaction. The area around his anus was irritated and he developed something like a large hot spot between his back legs and under his tail. He is now bald for a wide area around his anus. He had a peculiar odor that has occurred another 2 (possibly 3) times when he had a reaction to a dog food. I thought it was an allergic type reaction, but the other dog began asking to go outside frequently and she was straining to poop with runny stool. I also had a reaction that day that I thought was from eating leftover takeout for lunch, then later realized that it may have been from the same problem. It resolved within a couple of days. My dogs are fed mainly a home-prepared diet, with Nat. Balance 1 - 3 times per week and Milkbones daily. I took them off the kibble and Milkbones, and the problem resolved over the next 2-4 days, except for the balding. The redness between the toes for the older one also resolved.</p> <p>I would like to submit a sample for testing.</p> <p>*My name is disclosed for the purposes of FDA communications. Details of the incident are not to be published with my name.</p>	10	Years	Newfoundland	Dog	145	Pound
EON-91124	5/15/2012 17:15	Kirkland Signature Nature's Domain Salmon Meal & Sweet Potato Formula for Dogs	<p>About a week ago, our poodle started vomitting all over the house. We figured it was due to eating grass or something our boys fed him. This continued for a day or two. He became lethargic and didn't want to do much other than rest. After a few days, his energy came back with some hacking but little vomitting. Yesterday, since resuming his eating the vomit has come back.</p> <p>I had heard about the recall and checked the list - only Diamond Food products were listed and those were sold outside of our state (Illinois). Today, we find out that Kirkland products from Costco are on the list. Our dog had been eating the Kirkland Signature Nature's Domain Salmon Meal & Sweet Potato Formula for Dogs. Bingo.</p>	12	Years	Poodle - Miniature	Dog	25	Pound

EON-91059	5/14/2012 23:45	Milo's Kitchen Home-Style Dog Treats Chicken Jerky	After being fed Milo's Kitchen Chicken Jerky consistently and excessively for over six months, two of our three dogs began showing symptoms of illness and possible kidney failure including vomiting, loss of appetite, excessive urination, and excessive water drinking. The one dog out of three not affected by the chicken jerky was being given Ursodiol to clear out liver and gal bladder as part of a post-Chemotherapy treatment. Given that he was not affected by the chicken jerky and the other two dogs were, it could be assumed that the Ursodiol may have prevented the symptoms. (b) (6) (the aforementioned dog has shown the worst symptoms of the chicken jerky consumption).	7	Years	Hound - Italian	Dog	14	Pound
EON-91057	5/14/2012 20:45	Rich in Omega 3 & 6 Wild Alaskan Salmon Treats Layered with Cod & Sweet Potatoes	I purchased Wild Alaskan Salmon Treats from Costco approximately 2 weeks ago. I gave (b) (6) the treats on two different occasions. She didn't like them, so I didn't give her more. I also gave the other dog (b) (6) the treats one time. She didn't like them and didn't all of what I gave her. I noticed a few days later that (b) (6) wasn't eating. She was drinking alot of water, and I noticed urine accidents in the house. After several days of her not eating I took her to the animal hospital. This was last Monday, May 7th. Multiple tests were done, after one came back negative another was done. This went on until Friday when I took her back. She was seen by a new doctor. She asked if I had given her anything different to eat. I told her about the dog treats. She had be check right away to see if they were made in China. They were. We pulled up all of the information regarding symptoms related to dogs getting sick with foods from China. She has all of the symptoms. She immediately started her on daily IV treatments to flush her kidneys. She will probably need another 2 weeks of this treatment. As of now all of the tests coming back confirm it was the dog treats.	7	Years	Pekingese	Dog	10	Pound
EON-91053	5/14/2012 16:15	Taste of the Wild dry Pacific stream canine with smoked salmon 30#.	(b) (6) developed diarrhea/inappetance overnight. Owner received recall email from Amazon.com today for Taste of the Wild dry Pacific stream canine kibble (w/ smoked salmon #30). Owner has been feeding this food for the last 4-6 weeks.	2	Years	Bichon Frise	Dog	14	Pound
EON-91043	5/14/2012 15:45	Kirkland Lamb and Rice Dog Food. Kirkland Cat Maintenance Food	Dog stopped eating early April. (Weight was documented in routine vet appointment.) Vet did blood tests and xrays after dog lost 10 pounds in 2 weeks. Symptoms were not eating, vomiting when tried to eat, and diarrhea. No obvious problems were found in vet tests, but vet did not test for salmonella. Dog died (b) (6) Before the dog got sick, our cat had to have emergency vet care for similar symptoms. With extensive treatment, the cat survived. The dog did not. Both ate recalled Diamond Pet food. (Kirkland brand.) The day after the dog died we heard about the pet food recall. Symptoms for both pets are consistent with Salmonella.	5	Years	Retriever - Golden	Dog	74	Pound

Loose stool continued for 1 week. 5-2-2012 Stopped feeding Diamond food due to recall. 5-3-2012 Diarrhea and vomiting overnight. Salmonella test submitted. 5-7-2012 Salmonella test negative, however negative results can be from antibiotic therapy. 5-14-2012 talked to owner, diarrhea/vomiting resolved.	15	Weeks	Dobermann	Dog	26	Pound
EON-91016	5/14/2012 9:15	Taste of the wild Pacific Stream formula with smoked salmon a grain free diet	I purchased a bag that expired April 17, 2013, because it was after April 7 2013 which was the recall, so it was supposed to be safe. As soon as she got her first bowl from the bag she immediately started itching, biting her feet, loose stools and my other beagle got a bad upset stomach and she has been on the food for 9 months with no issues. They have not changed any ingredients and I made sure on the back the ingredients are the same but something is in this food I think that is not supposed to be. I know when my Beagle reacts to food, and it was the first bowl of the new bag that started this. I think the food needs to be checked for mis leading labels because for her to be fine on this food for 9 months with not 1 issue and all of a sudden I get a new bag and her food allergies are back makes me think something is in the food that isnt supposed to be. I have only given her this food, nothing else and I make sure she does not get into anything. I trained her as a puppy when I learned of her severe allergies not to ever pick up anything from the ground and I watch her very closely. She is reacting to the taste of the wild formula and I do not know why. I need to know if this is false labeling because she is having a major reaction to this food all of a sudden, and my other beagle that is prone to upset stomach who I also feed the same formula is having issues. Something is not right.	2		Beagle	Dog	28	

EON-91015	5/14/2012 9:15	Waggin' Train Wholesome Chicken Jerky Tenders	<p>On or about August of 2009 I notice my male was scratching horribly. He scratched all the hair and most of the skin off his neck and the top of his head by Oct. Which was when he was first seen by my vet. Soon after My female who is 6 months younger started with the same signs. The itching and scratching became uncontrollable. My vet was treating them with steriods to help calm the reaction. By Feb of 2010 I had to take my female to an allergist who did extensive testing for allergies. She came back postive on some, but none that were very conclusive. on May 10th of last year, my female had a litter of puppies. I kept one male out of the litter, and dontcha know it at approximately 8 moinhths of age, he started with the itching and scratching as his mom and my male. The scratching and itching has continued to date, We have been able to finally control it enough to get hair back on them with some scaring . I started working with my holistic vet, and still I could get no releif for these dogs for the itching. I had no pests on them, I use NO chemicals in my house to clean, it is all done with steam and vinegar and water. On April 5th, 2012I was researching online for dog foods, and reading information on them, and came across the issues that the chicken jerky treats have been causing. And I thought that this was the only thing that has remained consistent over the past 3 or so years. I had changed thier diet to the raw diet, approximately 3 yrs ago, because of the skin issues ,with no additives. The only treats they have gotten has been the jerky treats, because I figured how can you go wrong with just "dried chicken" . I immediately stopped the treats, and unfortunately threw them out, but kept the bag. I noticed within weeks the puppy had reduced the itching drastically, and my older males skin was great improved, no weeping feet and elbows, no flaming red skin and he wasnt hot to the touch . And he was playing again , My female has reduced her itching drastically as well. I contacted both my Reg. Vet and my Holistic Vet and told them what was going on and they both agreed that it was the treats. I made an appt with my reg. Vet to see my male, and he was thrilled to see the changes in him and has recorded them as being major improvements.</p>	4	Years	Poodle - Standard	Dog	58	Pound
EON-91010	5/14/2012 3:00	Natural Balance Sweet Potato and Fish	<p>Extreme vomiting followed by lethargy, weakness and refusal to eat/drink. I fed her by hand a few bits of food while she lay in her bed and came down violently ill within 12 hours of that event.</p>	14	Years	Chow Chow	Dog	34	Pound

EON-91009	5/14/2012 3:00	Green Pea & Duck Formula Complete and Balanced for All Breeds From Kittens to Adults Dick Van Patten's Natural Balance Limited Ingredient Diets, Taste of the Wild High Prairie Canine Formula with Roasted Bison & Roasted Venison	Our dog normally eats TOTW dog food and sometimes sneaks a bit of Natural Balance cat food. She also eats various whole food scraps in small portions. Around 4/25/12, our dog eliminated a glob of mucus about the size of a tangerine. She had diarrhea, vomited and stopped eating by 4/26/12. She also seemed physically uncomfortable. On 4/27/12, the vet prescribed a 10 day regimen of 750mg of Flagyl and a 3 day bland diet. She resumed her normal dog food diet, with no people and cat food, after the initial 3 days of treatment. After 3 days of Flagyl, she seemed recovered and we continued the med as prescribed for the remaining 7 days. 2 days after the Flagyl was completed (5/9) she started to show symptoms of GI distress again. Upon seeing our dog exhibit beginning signs of GI distress (vomiting), we immediately removed both cat and dog foods from reach. We changed food brands immediately and she quickly recovered without vet involvement. There are a number of reasons our dog could have become ill, however in light of the recent TOTW and Natural Balance recalls I decided to report her illness. My area isn't included in the Salmonella recall, nor are the food lot numbers on the bags we currently have in the house. There was one TOTW food bag that we were unable to check as we threw it out before hearing of the recall. She finished the food in the unknown bag on 4/23/12 and then was given the new bag that I reported in product info section.	5	Years	Mixed (Dog)	Dog	55	Pound
EON-91008	5/13/2012 16:45	purina one vibrant maturity 7+ senior formula	Dog was in great health, stopped eating and was lethargic but could still walk normal, taken to vet on Sat 5/5, thought was a mild infection and given antibiotic, worse on Sun 5/6 and again taken to vet , given another shot as would not take antibiotic thru food, blood tests really not showing anything but possible liver problem, worsened condition Sun and taken to animal hospital, condition went to critical and taken to another advanced care (b)(6) --dog was euthanized on tues ^{(b)(6)} as was in distress and infection was in brain. I did not attribute this to his food as he was not vomiting, etc and thought he had stopped eating due to illness but now I know there is definitely something wrong with the food as my other dog, who will eat anything will not eat it and of course I will not give it to him now that I think something is wrong with it. Both dogs have eaten this brand for years and loved it, the one that is still alive would jump on the bag and try to feed himself but not with this bag. I just don't want any other dog to get sick and feel that whatever is in this batch is especially harmful to smaller, older dogs as other dog is bigger and may not have eaten as much. I have uneaten food and bag	10	Years	Terrier (unspecified)	Dog	25	Pound
EON-91007	5/13/2012 15:15	Pet Food For the Dog Lovers Soul a product of Diamond	My two Boston Terriers were eating a brand of dog food manufactured by Diamond. They both developed diarrhea. The younger one, who is one year, old required medical attention due to vomiting, painful cramping exhibited by gurgling stomach, shaking, and loss of appetite and weight. Both dogs had developed diarrhea. Veterinary costs were \$285. for exam, blood work and medication for stomach upset. Fortunately, my vet suggested a change of diet which resulted in rapid improvement.	1	Years	Terrier - Boston	Dog	12	Pound

EON-90881	5/11/2012 3:00	Kirkland Signature Adult Chicken Rice and Vegetables	(b) (6) lost her appetite and became mildly lethargic, starting about (b) (6). She became increasingly lethargic and finicky over the next few days. When I took her to the vet he couldn't find the problem. I began feeding her special canned food from the vet, which she accepted twice. Shortly thereafter she stopped eating anything at all, but continued to drink small amounts of water for a couple more days. She began to contract her abdomen away from my touch as if it were extremely tender, then lost interest in all interactions with anyone. She looked very gaunt and her gait became wobbly. She began to growl if anyone approached her and hid herself under the deck, and refused water. She died on (b) (6). On May 4 (or 5) I was notified by Costco that I had purchased a dog food that was being recalled for possible salmonella contamination. I believe that this dog food caused (b) (6) illness and death. Two younger dogs who were also eating it were not affected.	11	Years	Mixed (Dog)	Dog	50	Pound
EON-90880	5/10/2012 22:45	Diamond Natural Senior Large Breed Dog Food Chicken and Rice	April 9th there was a 3 hour window from when the last person saw (b) (6) and WE the owners came home about 6pm. She had uncontrollable diarrhea all over the house from one end to the other. We have never had this happend to her. She just exploded all over. We called and talked to our vet the next morning after we cleaned the house and the dog. We gave her a mild diet of boiled hamburger and white rice and no dog food for the next three days and then had to take her to the vet. We never thought to have the stool samples tested Monday we just wanted to clean the house at that point. April 13th 2012 she was given Simplicef 200MG for a baterial infection and she also had a bladder infection. (b) (6) was given Canine FortFlora 1 box for a 30 day supply. Over time she seemed to get better with the diarrhea but she still seemed a bit lethargic at times. May 10 2012 we heard about dog food recall and I happened to look it up online and to my surprise Diamond Pet food was on the list and thats her food. I dont have the bag we fill a large tupperware and toss the bag. April 10 2012 I called my vet and let her know that casy is presently eating that food. We removed the Diamond food and purchased a new brand of dog food. We also stopped at the Vet and picked up another 14 day supply of Simplicef for a possible salmonella. I do have the store receipts for the dog food and \$243.30 in vet bills.	10		Retriever - Labrador	Dog	70	Pound

EON-90874	5/10/2012 20:45	Taste of the Wild Pacific Stream Canine Formula	<p>I feed my dog Taste of the Wild dog food and learned about the recall on Monday. On Wednesday my mom called to tell me that she took (b) (6) (her cat) to the veterinarian because he threw up 5 times before 2pm. She told the vet something was wrong and he almost sent them home. Upon running test they discovered he was in acute renal failure and the vet believed it was something he had ate. My mom told me about everything and I asked my mother what he had ate out of his normal diet. She informed me that (b) (6) had recently taken a liking to our Yorkies pet food. I asked her what she was feeding him (not knowing it was Taste of the Wild!). I knew about the recall and immediately told her about the recall and had her check the bag. Sure enough it had a 2X and an expiration date of March 2013. I don't know if salmonellosis causes renal kidney failure, however, the only change in our cats diet was the dog food he was sneaking behind our backs. Our veterinarian suggested we report this in case these recalled dog food bags became linked to renal failure. If requested we can supply a sample of food.</p>			American Bobtail	Cat		
EON-90871	5/10/2012 17:45	Chicken Soup for the Pet Lovers Soul	<p>In April of 2011 we decided to switch our kibble type dog food from Science Diet to Chicken Soup for the Pet Lovers Soul. We purchased it from a local food outlet by the name of (b) (6) in (b) (6) (b) (6). We purchased 4 bags altogether from them up to August 25, 2011. Subsequently, about 5 or 6 days later a growth appeared close to her tail. It was surgically removed on September 9 of 2011. About 4 weeks later we bought of the same kind of dog food from a different vendor. We noticed the kibble size was about two times the size of the food previously bought at (b) (6). We made the assumption that the manufacturer had changed the size of the kibble. A wrong assumption. Having the old bag purchased from the vendor, it had a best if used by date of either June or July 2011. We still were not concerned at that time even though it was slightly out of date. A few months later, a neighbor told us that he had bought some of the same dog food in the puppy formula from the same vendor. He had purchased the food in November of 2011 with a best if used by date of December 2010. We have the bag and the check in payment. His dog would not eat the food. Soon after, I got on the internet only to find out about preservatives, both natural and synthetic. I was surprised. These bags of dog food had been exposed to high degrees of heat in a barn in for 2 years-well over the use by date. Additionally, our neighbor had bought horse feed from the same vendor in April 2012 that was dated as having been manufactured in January of 2011. Reading up on dog food longevity, heat and time will cause dog food to go rancid and will go rancid faster when exposed to time heat and synthetic preservatives. Further studies indicate rancid dog food can and does cause cancer. Our dog died of cancer involving the lymph nodes. The vendor had told us that they were no longer going to order the Chicken Soup. We now assume that it was not selling, but they continued to sell it until it was all sold with no regard to the condition of the food. We feel that negligence is an issue here.</p>	5	Years	Boxer (German Boxer)	Dog	47	Pound

EON-90866	5/10/2012 16:15	Waggin Train Apple & Chicken Wraps	Purchased Waggin Trail, LLC Apple & Chicken Wraps. Gave our Dogs 1 piece per day before work by the end of the weekend I noticed (b) (6) was not himself. Lethargic, Labored breathing and recently, peeing blood. Took him to vet, The vet noticed right off that he was anemic, gums white, temp at 103.8. Drew blood to confirm anemic but also noticed that Creatine and Tbil was also off the charts. Daily blood test and he's not getting better but he's not worse. The only difference was these treats, the foods the same, their normal treats, Beggin Strips never did this. This is the only change. These Waggin Train treats are made with Chicken breast in China and the lot number is: G1CA3503A.	5	Years	Terrier (unspecified)	Dog	23	Pound

EON-90826	5/10/2012 13:45	Ol'Roy Snack Sticks	<p>I gave my pet a treat at 10:00pm last Thurs. May 3rd, before bed , at 11:00 pm we were getting ready for bed and she was playing and suddenly she fell over and one side of her body would not hold her up. She was trying to walk and falling, I picked her up and held her , not knowing what to do I gave her a baby aspirin and in the morning call the Vet and to her in, she had blood work and a check up but by then what ever had happened was wearing off , vet put her on an antibiotic, last night at 10:00pm, I gave her another treat before bed, within the hour she was running frantically around the house and when I picked her up her eyes were swollen and bright pink, her muzzle was swollen and pink, her ears were red in side and she had whelps on her belly and legs, I called the vet and she called back and told me to give her an antihistamine which I did immediately and again at 2:00am. she finally settled down about 2:30 am and when we woke up the swelling had gone down and she was acting normal.</p> <p>I do not want this to happen to any other pets or pet owners. IT was terrible</p>	4	Years	Terrier - Yorkshire	Dog	9	Pound
EON-90790	5/10/2012 13:00	4 Health	<p>My dog has been very clingy the last few weeks and not thrilled to eat her food. I am the primary caretaker in our home for the dog (handle feeding, grooming-includes brushing her teeth). I developed severe stomach issues on 4/30/12 with constant vomiting and diareaha and went to the ER on 5/1/12 for treatment. The ER said they could not determine why I was so ill but no one else in family was affected. They were not able to do a culture because they gave me medication as soon as I arrived to stop the "issues". When I left they susggested checking any food in the home to try to determine a possible cause. Again, no one else was ill and we had all eaten the same things. It was only a few days later that I saw a report on the pet food recall for samonila and read that it was affecting more owners than pets and the symptoms were the same as I had dealt with. We feed our dog 4 Health and had made our last pruchase at the begining of April. We buy a large bag and empty it into a sealed storage contianer to keep it fresh-so I do not have the bag information. I threw away the food we had left and cleaned the container and food bowls before purchasing a new brand of food. My dog is eating the new food in a more typical manner and she is not showing the "clingy" behavior she had been before I became sick. I am still (a week later) having some issues with just not having much appetite and not being able to eat very much without feeling a little ill, but it is much better than it was. Since I have seen the food in question at my local store as recently as Friday, 5/4/12, I wanted to make someone aware of the issue in case anyone else has similar issues in our area. I purchased our bag of 4 Health at Tractor Supply in (b) (6) I did keep a small sample of the dog food in a ziploc bag at home in case I could find anyone to test it for samonila.</p>	6	Years	Brittany	Dog	43	Pound

EON-90709	5/9/2012 21:45	4Health	Our dogs have been eating "4Health" dog food brand for many months. Our first dog (b) (6), started having diarrhea on 5-5-12. This quickly progressed and became bloody and mucous-y. She refused to eat and was very ill. This continued until 5-7-12 when we took her to Bangor Veterinary Hospital to be examined. They could only tell us to change her diet and gave us medication to soothe her belly. Her illness continued. On 5-9-12. our second dog, (b) (6), started having similar symptoms. Again, the vet could find nothing like parasites to explain it and told us to follow the same treatment we were doing for our first dog. To date, both dogs are still ill. (b) (6) is stable and possibly on the road to recovery, but (b) (6) is still ill and lethargic with diarrhea. We are concerned that our third dog may come down with this. The only explanation we can come up with is that our dogs have contracted salmonella from their "4Health" dog food, which was recently recalled.	4	Years	Mixed (Dog)	Dog	20	Pound

EON-90703	5/9/2012 17:45	Taste of the wild	We started feeding her Taste of the wild Starting about September, By November she was very ill and had to be hospitalized in intensive care for 5 days. By January we had to put her down, she was so weak and had begun vomiting up blood.	6	Years	Siberian Husky	Dog	70	Pound
EON-90702	5/9/2012 17:45	Smokehouse Chicken Breast Strips	Fed the newly purchased chicken treat to (b) (6) (a Golden Retriever) ... shortly thereafter he had diarrhea, then vomitting, then lethargy ... I took him to the vet before 24 hrs. had passed. She gave me a print-out about the FDA warning on chicken treats from China because she believed that was the source of the problem since it was the only thing in his diet that had changed. The vet bill (with cytology, examination, and two meds) came to \$158.21 ... a rather expensive dog treat, don't you think? By the way ... how can you NOT have Golden Retriever on your pull-down list of dogs?!?	3	Years	Other Canine/dog	Dog	100	Pound
EON-90701	5/9/2012 17:15	MILO'S KITCHEN CHICKEN JERKY TREATS, WAGON TRAIN CHICKEN JERKY TREATS	(b) (6) my 6 year old Shar-pei started having symptoms in January. I found this out when I took her for a dental. The vet noticed she was urinating frequently, did a blood test and found her BUN - CREATNINE levels were elevated. He put her on antibiotics thinking it was an infection. She was eating normally but drinking excessive water. In March she was pregnant and started to throw up her food after she ate. I took her to the vet before her puppies were born and the blood test again showed high BUN-CREATNINE levels. The vet thought the throwing up was due to the puppies being under her ribs. She only had 2 puppies. She delivered the puppies on Monday (b) (6) On (b) (6) the 1st puppy died. The kidneys had begun to shut down and turned her milk toxic. That night she started to breathe heavy and every time she drank water or ate food she would throw up. I took her to the vet the next day and she gave her a shot for nausea and IV for dehydration. By Wednesday she was much worse. I took her to the vet and was told her kidneys were not working. We had no choice but to put her to sleep. She ate the Wagon Train Jerky treats every day and loved them. I used to purchase them at Sam's club. During February I tried 2 bags of "Milo's kitchen" Jerky treats which I bought at Wal-Mart. (b) (6) was a very healthy dog with a good appetite even at the end she was still eating. I was not aware of the Jerky treat problems until my friend told me about it after (b) (6) death. She had no health issues prior to this and was a very strong dog. It broke my heart that this has happened. I will no longer feed my dogs any treats from China and I think they should be taken off the shelves.	6	Years	Shar Pei	Dog	45	Pound
EON-90700	5/9/2012 16:00	Science diet 35# Adult	A store where I work in (b) (6), I believe had 3 bags of science diet dog food that was broken into by mice, instead of discarding these bags, they were taped up and put back on the sales floor at a discounted price. Two of them had sold already. I am concerned that this is a true event. I cannot confirm who the source is for fear of losing my job and theirs. My E-mail address if (b) (6) for further contact. I noticed the three taped up bags on the floor an the 5th but did not confirm what had transpired until the 8th. As I said I am not the person who is in the loop on this, I only heard about this from 2 other sources who would be in the know and am simply concerned about this.						

EON-90693	5/9/2012 15:45	PCI Duck Quakers	Increase thirst and urination. Glucosuria but no hyperglycemia. Resolved when she stopped feeding duck treats.	4	Years	Maltese	Dog	6	Pound
EON-90643	5/9/2012 14:15	4Health	Dog became ill with runny, mucous-y, black, very smelly diarrhea. His appetite decreased as did his energy level. He was seen by a vet on March 31 and given bland diet and oral medication. He improved and appeared to be over the diarrhea by April 15th.	12	Years	Siberian Husky	Dog	78	Pound
EON-90616	5/9/2012 11:45	Milo's Kitchen Chicken Jerky	On March 10, 2012 I purchased Milo's Chicken Jerky for my dog. By March 28, 2012, he had diarrhea with blood in his stool, vomiting, was not eating, and very lethargic. He was admitted to my veterinarian for 2 days, put on a prescription dog food, given antibiotics and permitted to return home. At that time his illness was not connected to the Chicken Jerky. On April 30, 2012, I purchased the same treats. On May 1, I noticed the same symptoms reoccurring. He was straining to move his bowels although it was diarrhea, tired and wouldn't eat. On May 2, 2012, I saw an 11 p.m. newscast with the FDA "caution" of the Chicken Jerky. I immediately stopped giving the treats, and contacted my vet on May 3. He was seen by my vet on May 5. My vet prescribed laxatives to "clean out" his system and was again put on a strict diet.	6	Years	Beagle	Dog	46	Pound
EON-90614	5/9/2012 11:30	Kirkland's Signature Chicken and Rice	She ate dog food from Kirkland and got diarrhea and blood in her diarrhea. The vet could not figure out what was wrong with her and told me to try some medications before doing further tests. After a week I found out that Kirkland recalled their food and was contaminated. When I spoke to the vet they told me that her symptoms were those that are common with Salmonella poisoning. I have tried contacting the hotline for Kirkland's dog food recall and in order to speak with someone about my dog's vet bill they would have to put me through to their vets and that if I left a message they would get back to me. I still have not heard anything and have filed with the hotline about the food so I can be reimbursed. They acted as if they did not care that my dog got sick and told me no dogs have had a reaction to it.	1	Years	Mixed (Dog)	Dog	45	Pound
EON-90612	5/9/2012 11:30	Waggin Train Chicken Jerky Treats	I started giving my dog Waggin' Trail Chicken Jerky treats because they were supposed to be healthier. Within 2 weeks of eating she became very lethargic. I took her to the vet, they ran some blood tests and I was told her liver enzymes were elevated. We started her on meds and she seemed to be doing better. Several days later she was lethargic again and I took her back to the vet. While at the vet she was very weak and they wanted to keep her and run some more tests. I left to go home and within 10 mins of leaving I received a call from the vet telling me that she had suffered a massive heart attack and she was gone. Up until this point she was a healthy dog that had not had anything wrong. Now I don't have my sweet baby anymore and Nestle is still selling this poison to other people who will also lose their babies. Please put a stop to this	7	Years	Mixed (Dog)	Dog	65	Pound

EON-90327	5/7/2012 23:15	Kirkland Signature Super Premium Adult Dog -- Chicken Rice & Vegetable Formula	<p>I wanted to get in touch with the FDA as my 4 year old American Bulldog became sick shortly after we opened our new bag of Kirkland adult dry food with chicken, rice and vegetables. The symptoms started showing the first week in April which was shortly after the bag was opened. It started with blood in his diarrhea, then a week of uncontrolled urinating and one bout with vomit. The vet diagnosed him with a UTI based on bacteria in the urine and prescribed cephalexin, which our dog refused to take, so he changed the prescription to cefpodoxime proxetil.</p> <p>Two days after we started on the antibiotics, he stopped eating altogether and became extremely lethargic. We took him back to the vet and the doctor performed a complete blood test. The blood test came back with signs of kidney issues and higher than normal calcium levels and a slightly decreased WBC. He put him on fluids for four full days and did a battery of tests for cancer, Addison's disease, Lepto, performed an ultrasound on his abdominal area and XRay on his chest and abdomen. At this point, our dog was down 8 LBS (from 84-76). After three days of testing and fluids, the doctor could not find the cause, so he started him on a cycle of Doxycycline.</p> <p>The evening of day 3, our dog had a handful of Science Diet wet cat food. The doctor re-ran the blood work and his calcium level had dropped to 12.4. He believed the Doxy was working and let us bring him home. Over the next two days the dog had a few treats, but regressed again to not eating, shivering and lethargy. This past Tuesday (May 1, 2012) we brought him back in for more fluid. He had dropped 12 LBS in 2 weeks (from 84 to 72). The doctor ran more blood work and determined he was getting better (his WBC went up, RBC stayed in the normal range and Phosphorus were slightly elevated, but still sat in the normal range). The results gave the impression that his kidneys were getting better. He gave him a steroid shot hoping that would stimulate his appetite and sent him home (the shot we were told would be in his system for 1-3 days).</p> <p>Later that night our dog started eating again. He picked at some treats we placed in his food bowl, mixed in with the Kirkland brand food. We started making him hamburgers and meatballs, which he was devouring. From May 2, 2012 through May 5, 2012 our dog had shown significant improvement and was becoming more of himself which included eating and more energetic.</p> <p>Our dog was eating from May 1, 2012 through May 6, 2012. On May 4, 2012 we had started mixing the hamburgers and meatballs with the Kirkland brand dog food that he had previously been eating prior to being sick not realizing that it had been recalled. We had received the call very late May 4, 2012 telling us about the recall from Costco. On May 6, 2012 our dog stopped eating all together again and became extremely lethargic, weak, drinking a lot, frequent urination, and he is displaying symptoms of stiffness. I can tell that his stomach is upset as there is gurgling in his stomach and he is constantly adjusting himself by getting up and repositioning himself. EON-90325	5/7/2012 22:00	DIAMOND NATURALS SMALL BREED CHICKEN AND RICE ADULT, DIAMOND NATURALS ADULT CHICKEN AND RICE DRY FOOD	<p>On 5/6/12, I called the diamond pet food recall contact phone number with questions and to verify if the bags of food I had were affected by the recall. twice during this conversation I asked "have there been any identified cases of actual salmonella infection"? Both times I was told no, and once the rep told me only that some dogs had been reported as having certain general symptoms such as vomiting. I was told that of 6 million bags that were checked for salmonella, only 4 tested positive for the potentially infectious salmonella bacterium. By the way, the rep to whom I was speaking actually put me on hold during our conversation to double check facts she said with "her supervisor" and the rep came back and repeated the same info including the lie that no actual infections had been reported. I was told that the 2 bags of food I had WERE affected by the recall and was instructed to wash my hands carefully after handling any of this food or any part of the food bag, and was given instructions on the safest way to dispose of the recalled food, since I ordered it online and cannot return it to a specific store. I was told to be sure to carefully enclose the recalled bags of food in black plastic garbage bags and to make sure the bag was carefully closed, "so that no animals can get to it". This was the point where I, for the second time, asked my question about whether there have been any actual infections identified. Again I was told no. I actually said, when cautioned to wash my hands, "I know you must be very cautious in giving consumers these instructions, but I think you said there haven't been any actual reported salmonella infections" (please note that I am quoting myself and my rep to the best of my recollection...the words may not be exact, but the content most definitely is...this took place just yesterday). Again I was twice told that NO actual salmonella infections have been identified. Today on the television news I learned that in fact over month ago, it was known that FOURTEEN PEOPLE had become infected with a rare strain of salmonella, and what they had in common was that they had handled Diamond brand dog foods and fed this to their dogs. Meaning that before the first recall was ever made, it WAS KNOWN that humans had been found to be infected with salmonella. Clearly I was outright lied to by a representative who even knew that I had in my possession two bags of dog food that are part of the recall, meaning that she knew there is some risk to me of salmonella infection. Cautioning me to wash my hands is a good start, but I should have been told the truth. In fact, I want to know why all this time was allowed to pass from the identification of the salmonella infections in humans possibly related to diamond pet foods, and the REPORTING TO THE CONSUMER of the actual infections that caused this recall to happen in the first place. When the first recall was made, only one flavor of diamond naturals was recalled, namely Diamond naturals Lamb and rice meal dry food. I didn't have this turkey variety, but had two other flavors of Diamond naturals...if I had had all the facts at that time. I would have been more cautious and not continued to feed the dog foods that later went on to</p>									
---------------------------	----------------	--	--	--	--	--	--	--	--	--	--	--

			become part of this recall. I should have been given the option to make my own decision based on ALL of the facts. All that was said at the time of the initial recall was that it was a voluntary recall based on findings of some quality control problem in the routine checking of the quality of bags of food. It turns out this was simply NOT the reason for the recall. it was not based on routine checking...the potential problem was most definitely known to Diamond at that time. When a number of people in different states were diagnosed with salmonella, it was investigated and found they all had fed Diamond dog food to their dogs; this info led to the first recall and to diamond's investigations which led to the recall						
EON-90321	5/7/2012 19:45	Taste of the Wild Pacific Stream Canine Formula with Smoked Salmon	Pet was first fed this product on 5/3/12 days and started having diarrhea on 5/5/12 from which she has not yet recovered. Pet was switched to a diet of rice and cooked ground meat at the recommendation of her vet on 5/6/12. Pet was prescribed Kerafate on 5/6/12. Pet had vet exam on 5/7/12 and was prescribed 250mg Flagyl per day in addition to the Kerafate and will start Provable supplement on 5/8/12.	7	Years	Bulldog - French	Dog	22	Pound
EON-90320	5/7/2012 19:45	Taste of the Wild Pacific Stream Canine Formula with Smoked Salmon	Pet vomited multiple times on 5/1/12 and then developed diarrhea which has continued for almost one week. I stopped feeding the Taste of the Wild kibble to this pet on 5/2/12 and put her on a diet of cooked ground beef and rice to try to treat the diarrhea. I reintroduced the kibble on 5/4/12. I was informed of the voluntary recall because of possible salmonella contamination on 5/6/12 and removed the kibble from her diet again and had a phone consultation with her veterinarian. Pet has been prescribed Kerafate as of 5/6/12 to treat the diarrhea. Pet vomited again on 5/7/12 and received subcutaneous fluids as well as prescription for 250mg per day dose of Flagyl, Cerenia 1.0 ML injectable and will begin Provable supplement on 5/8/12. Pet is now eating a mixture of rice and cooked ground bison with no kibble.	7	Years	Bulldog - French	Dog	21	Pound
EON-90319	5/7/2012 19:45	Taste of the Wild	I bought and fed Taste of the Wild to my dog early March 2012. I always buy this food in kibble and cans. Fed him, traveled to my breeders (he travels fine) and he started throwing up bloody mucus, bloody diarrhea. Put him back in car to travel home and he continued to throw up and have diarrhea. It was so bad, I called to find a pet emergency vet (on weekend) and went there. They treated him for dehydration and ran all sorts of test. Cost me over 400.00 and scared us all. I've talked to the store where I purchased and they said they would be glad to tell the company that I always buy the same food. I also have receipts from the vet and would like compensation from the company. My dog shows and is a successful breeding dog. He is still recovering from the lost weight and sensitive stomach that it seems the food caused!!	4	Years	Terrier - Kerry Blue	Dog	27	Pound

EON-90307	5/7/2012 17:45	Nutro Natural Choice Large breed Adult	I switched my dogs food to the Nutro All Natural dry dog food and within a week my dogs began to vomit daily and I had to take one of them to the vet where he was diagnosed with accute pancreatitis which was a direct result of the food because I took the other one off the Nutro and she stopped vomitting and once my other dog got out of the 2 day vet treatment (1000.00 later) he was put on a different dog food and he's been fine. I then started looking this problem up on the internet and apparently many dogs have gotten sick with the same symptoms and diagnosis as my dog some to the point of death.	2	Years	Boxer (German Boxer)	Dog	50	Pound
EON-90303	5/7/2012 17:15	Taste of the Wild Pacific Stream Salmon	Purchased longstanding food, Taste of the Wild Pacific Stream, mfg: Diamond, at (b) (6), (b) (6) 4/28/12. Fed 5/1/12 & dog vomited within 2 hours. Followed by runny stool & diarrhea in crate overnight. 5/2/12 Dog is quiet during the day, gags and brings up foamy bile yellow. After feeding, dog is writhing, and quickly vomiting. Dog later has urgency & diarrhea. Dog is drinking unusual amounts of water & is panting. 5/3/12-Stopped feeding Taste of the Wild. Dog lethargic, forceful bloody watery diarrhea, gagging with foamy yellow vomit. Must be coaxed to stand & drink water. 5/4/12-Dog seen by vet, stool sample positive for bacteria. Temperature is not elevated significantly. Dog is placed on antibiotic & probiotic Fortiflora on plain rice with small portions boiled chicken if tolerable. 5/6/12-Dog is improving, with better movement but straining & squirting liquid stool. Eats tablespoons of rice. 5/7/12-On antibiotic, seeing improvement. Dog still has loose stool and is still gagging intermittently. Drinking normally. Brief periods of activity, but then quiet again. Interested in eating rice with shredded boiled chicken, but proceeds by pausing & gagging. Dog is not vomiting. Urine appears very light to clear. This dog was in excellent health, no issues, no medications. Dog is not outdoors unsupervised and had no vaccinations recently. The outdoor area is a private yard and does not employ landscapers. There have been no chemicals, treatments, fertilizers etc. The only treat in the diet was Buddy Bisquit & no problems are reported with those. Dog has lost weight, as of 5/4/12 dog was down by 4 lbs. Antibiotic continuing & dog will be seen 5/8/12 at vet.	8	Years	Portuguese Water Dog	Dog	47	Pound
EON-90302	5/7/2012 17:15	Taste of the Wild Pacific Stream Canine Formula	Purchased longstanding food, Taste of the Wild Pacific Stream, mfg: Diamond, at (b) (6), (b) (6). 4/28/12. Fed 5/1/12 & dog gagging/writhing within 2 hours. Vomited meal within another 3 hours. Followed by runny stool & urgency to go. 5/2/12 after feeding, dog is again writhing, later vomiting. Dog has urgent/forceful diarrhea with visible red blood traces & is drinking unusual amounts of water. Dog is whining and curled in a ball, panting. 5/3/12-Dog lethargic, repeated bloody diarrhea, intermittent writhing with foam yellow vomit. Stopped feeding product. 5/4/12-Dog seen by vet, stool sample positive for bacteria. Dog is placed on antibiotic & probiotic Fortiflora on plain rice with small portions boiled chicken if tolerable. 5/5/12- Dog is improving, energy is returning, no vomiting and slow runny stool. 5/7/12-Third day of antibiotic, dog is recovered. Able to eat a different dry kibble with some plain rice. Stool formed and no vomit. Continuing antibiotic. (b) (6) was in excellent health, no issues, no medications. Dog is not outdoors unsupervised & has not been recently vaccinated. The property is fenced, and there are no landscape contractors used. There were no chemicals, fertilizers etc. There was no boarding, grooming or daycare used. The only treat in the diet was Buddy Bisquit & no problems are reported with those. Have fed this food for years, so there was no change of diet.	3	Years	Portuguese Water Dog	Dog	52	Pound

EON-90258	5/7/2012 15:15	Chicken Soup For The Puppy Lover's Soul Large Breed Puppy Formula	(b) (6) had vomiting and diarrhea for a couple of days. I took her off of her dog food and she began to get better. I put her back on her food and she began to get sick again with the vomiting and diarrhea.	7	Months	Siberian Husky	Dog	50	Pound
EON-90247	5/7/2012 15:00	Kirkland Lamb and rice	dogs were throwing up and had diarrhea. (b) (6) was also throwing up blood.	5	Years	Terrier - Scottish	Dog	30	Pound
EON-90236	5/7/2012 14:45	4Health Adult Chicken and Rice	I purchased 4 bags of 4 health dry chicken & rice dog food from tractor supply on April 6 or 7, 2012. 1 bag was for a friend, 1 bag was for my sons lab and 2 bags for my 5 labs. Emptied 1 bag for them to use and I left on April 9 for a dog show. My husband said (b) (6) did not want to eat on of those days and threw up. When I was at the show we received email regarding diamonds recalls. At the time 4 health was not on it however later it was recalled. Arrived home and on 4/15/12 took all my labs off it. I had 1 bag not opened and a bin 3/4 full. I put them on pro plan. Told my son and friend to do the same. On (b) (6) (b) (6) started throwing up and it continued till Sunday, (b) (6) when I took her to the Emergency Room. She was dehydrated, severe intestinal and gastro pain, bloated, throwing up bloody/brownish stuff and then had diarrhea. Was in severe pain, would not eat and did not drink. Very lifeless. Was put on IV fluids and meds galore and kept there till Monday at 7 AM when I had to transport her to regular vet. Regular vet reported her protein level extremely low, white counts low, not even trying to eat soft foods. We were allowed to take her home that evening to see if we could get her to eat. No luck, she was in such pain during the night, panting, totally out of it. Made her comfortable and took her back to vets on Tuesday AM. Now she is enemic, kidneys showing she is jaundice, protein really low and other medical problems. Vet kept her till 7 pm and there was nothing to help her so we had to put her down. Now I have 2 other labs not wanting to eat off and on. Not sure if dog food related or if due to closeness of (b) (6). Spoke with my vet today when I realized I still had unopened bag and yes it has numbers on it that are recalled. He definitely feels this could all be related to (b) (6) quick sickness and how fast it happened. Please let me know what you can do. I do have dog food if it needs to be tested. I would have from 3 different bags. Thanks for any help. I would love if Diamond would have to repay me for all my medical expenses. Very unexpected and our hearts are broken. I have excellent quality labs as I am a Lab breeder and show my labs in confirmation and obedience. Very pedigree sensitive. I have since switched to Pro-Plan again. I also have 4 health treats and will be returning them to the store.	9	Days	Retriever - Labrador	Dog	87	Pound
EON-90186	5/7/2012 13:45	Taste of the wild Pacific stream canine formula with smoked salmon	After eating food from the most recent bag of Taste of the wild, Pacific stream salmon, my standard poodle became sick, (vomiting, lethargic, refuses to eat, listless)	11	Years	Poodle - Standard	Dog		

EON-90185	5/7/2012 13:45	Taste of The Wild High Prairie - Roasted Bison & Venison	<p>I purchased a bag of the Taste of the Wild dry dog food that is now being recalled. In late April, unaware of the problem this product had, a family member opened the aforementioned dog food and fed it to my dog. On April 26, said family member started to suffer from nausea, fever, and diarrhea. She was sick for about a week.</p> <p>When I learned of the recall, I cut out the product code as instructed by the manufacturer in order to report the purchase. After cutting the back of the bag open, I noticed significant mold growth (picture on file). In talking to the family member that became ill, she mentioned she had noticed a green growth on the dog food when she was feeding it to the dog but she didn't associate it with mold at the time, thinking that was how the food would look.</p> <p>Looking back, I was almost certain that the family member had come down with salmonella as reported in the recall. I'm deeply disturbed by this event and I hope the FDA would look further into this matter and make sure the manufacturer take drastic action to address this severe issue.</p>	7	Years	Mixed (Dog)	Dog	60	Pound
EON-90138	5/7/2012 11:15	Blue Wilderness Duck Recipie	<p>Brief Description of Incident (Attach additional pages if needed):I bought a new bag on Fri 4-27-2012. Opened the bag and fed them on Sun 4-29-2012. Very soon after eating they started getting ill. (b) (6) starting vomiting blood and I rushed her to the vet on Mon 4-30-2012. She had 2 injections and 3 prescriptions. I am attaching the bill for reimbursement. (b) (6) and (b) (6) started vomiting Tue 5-1-2012. On Wed 5-2-2012 (b) (6) had to have Benadryl because his face was extremely swollen due to an extreme reaction. The attached picture clearly shows the nasal swelling but you cannot really see how swollen his whole muzzle and lips were from this angle, but these are sighthounds that have naturally very narrow muzzles and NOT a Roman-nosed breed.</p> <p>All 3 dogs are very healthy, indoor dogs with no change in food or environment. All 3 dogs have been eating Blue Wilderness Duck for months. All 3 dogs are current on shots, heartworm and flea treatment. None of the 3 dogs get treats, bones, tablescraps etc. We have not recently put down insecticide, weed-killer, fertilizer and the indoors has not recently been treated for anything or painted. The cabinets are child-proofed. All of the most logical things that would make a pet ill are not factors; the only common thing is the new bag of food.</p> <p>All 3 dogs are show dogs working towards their championships and I now cannot take them to the upcoming shows in (b) (6) as they still are not eating normally and I do not want to stress them so soon after this incident. Being a rare breed (Silken Windhound) only accepted in 3 venues that rarely come to (b) (6), this will cost them points towards their championships.</p> <p>Additonally, I am notifying the FDA to they can also track this situation so no other dogs get ill from this lot of food.</p>	7	Years	Hound (unspecified)	Dog	29	Pound

EON-90112	5/6/2012 14:45	Wellness Chicken & Herring Formula Grain Free	I fed my cat half of a 5.5 oz can of Wellness Chicken & Herring Formula at dinner time. She spent most of the night throwing up and spent the entire next day lethargic and wouldn't eat. Not a normal reaction...she has eaten this product previously with no issues. The day after that she started to return back to her normal self but was very slow at eating again. She drank a ton of water.	14		Domestic Longhair	Cat	9	Pound
EON-90111	5/6/2012 13:45	Shep CHICKEN chips SELECT Premium Dog Snack	I had noticed occasional bouts of diarrhea, and had discontinued all treats and was adding them back one at a time. One day after eating Aldi's "Shep" brand Chicken Chips select premium dog snacks, (b) (6) threw up and had bloody diarrhea. She seems in good health other than that.	3	Years	Shepherd Dog - Australian	Dog	30	Pound

EON-90110	5/6/2012 12:45	Nutro Natural Choice Large Breed Adult food	I have been feeding ^{(b) (6)} Nutro Dog Food since I rescued him last year. He has never had any human food with the exception of peanut butter on special occasions. I purchased a new bag of their Nutro Natural Choice Large Breed Adult food, on 05/03/2012 The best buy date was listed as 02/06/2013 with a number of 206C1LEB0111:04. On the evening of 05/04/2012 I fed him one cup of the food. The morning of 05/05/2012 I had noticed that he had loose and light tan colored stool and didn't thing too much about it. I had some errands to run and a dinner engagement. When I returned home, ^{(b) (6)} had severe vomiting and diarrhea. He additionally vomited a few more times outside. When he came back inside, he drank three bowls of water. I gave him some Pepto and half a cup of cottage cheese. He did not have an elevated temp and was very inactive. This morning he is back to his normal puppy. I have a fenced in yard, there no environmental differences (ie. no fertilizer or pesticides inside or outside the home), there was no change in his feeding schedule or his diet outside of this new bag of dog food, he has free choice water, is up with all vaccinations and seen by the veterinarian for his routine check ups. This perhaps may just be some coincidence, however, if there is an issue with the dog food, I just wanted to make sure that it is reported so prevent further illnesses, severe illness or loss of pet.	1		Mixed (Dog)	Dog	80	
EON-90109	5/6/2012 5:00	Purina Beneful Healthy Fiesta dry dog food	got a brand new bag of beneful dry healthy fiesta dog food, gave it to my dog wednesday may3, vomitting started during night, and later in the morning, he didn't eat for another day, then ate a little on sat. may 5, an started vomiting it all up again during the night, and am still up tending to him now	7	Years	Terrier - Yorkshire	Dog	10	Pound
EON-90108	5/6/2012 3:00	Premium Edge Adult Lamb and Rice	Vomiting and diarrhea. I purchased Premium Edge Adult Lamb and Rice on 5/2/12 and fed it to my dog on 5/3/12. He woke me up several times on the night of 5/3 and morning of 5/4 and began vomiting brown foamy liquid that smelled like fecal matter while also having extremely watery diarrhea. He was also vomiting the week prior. I myself have also had symptoms of vomiting and diarrhea that occured on 4/1/12, which may also be linked to the dog food. I am also currently experiencing symptoms, myself.	1	Years	Retriever - Golden	Dog	78	Pound

EON-90106	5/5/2012 19:15	Taste of the Wild Pacific Stream Canine Formula with Smoked Salmon	The illness stared with pickiness and very low appetite when she was always a voracious eater. She stopped eating, develope3d a high fever, vomiting, diarrhea, seemed to be in pain like there was stomach cramping or belly aches. Over the course of three weeks we saw 5 vets and two specialists and all were baffled. No one had a diagnosis and I was told to just wait it out and hope it was a virus. We supported her through it and finally she made it through. I have paid about \$2000 in vet bills due to this and lost two days of work.	10	Years	Spitz - German Pomeranian	Dog	11	Pound
EON-90104	5/5/2012 15:00	Diamond Pet Foods	Have been feeding Diamond naturals food to this dog since being recued and recommended by Vet. Dog started having diarhea shortly after purchase of new bag of the same brand of food. Checked internet and found recall and our lot number matched the list. Called mfg and confirmed recall of our product lot number.	1	Years	Hound (unspecified)	Dog	57	Pound

EON-90103	5/5/2012 14:15	Taste of the Wild High Prairie Canine Formula with Roasted Bison & Roasted Venison	On the morning of 4/12, (b) (6) had softer than normal stools, the same happened that evening. The next morning her stool was runny, and upon returning home that afternoon, she had had severe liquid diarrhea during the day which was starting to contain some red blood, and was beginning to vomit. She was taken to the emergency hospital where numerous tests were run. She was running a fever of around 104, dehydrated and it was discovered her spleen was enlarged. Pancreatitis and obstruction were ruled out, and a tentative cause of 'hemorrhagic gastroenteritis' was given due to lack of other definitive cause. At the Dr's recommendation she was admitted for overnight stay and fluids. We picked her up the following night and continued at-home care with limited diet and multiple medications (metronidazole, amoxicillin, pepcid, sucralfate). On her recheck on 4/18, the soft stool was not resolving, so the metronidazole was extended and Tylan added, as well as goats yogurt for probiotic. A fecal was run for parasites/giardia (negative). Her stool began to firm up more around 5/25, but intermittent nausea persisted, and she was vomiting at the rate of approx. 3-4x/week. At around this time news of recall due to salmonella in foods by the same manufacturer (but not our brand) came out. We voiced suspicions, but were told not to worry at this time. On 4/25 we began to add a new food brand with the intention of switching brands, and on 5/4, when news of our brand being under recall, we switched completely.	2	Years	Mixed (Dog)	Dog	35	Pound
EON-90102	5/5/2012 13:15	Taste of the Wild - High Prairie Canine Formula	(b) (6) became sick after eating her food and began to vomit the next morning. She had a fever, diarrhea, and would not eat for a week. She would barely move and would not interact with the family. She quit wagging her tail, refused to move unless absolutely necessary, and would not eat boiled chicken. After two trips to the vet and medication, she has slowly begun to recover. We cooked and hand fed her for 3 weeks to keep her alive. She is now recovering. Her food source was a bag of Taste of the Wild food that has been recalled.	7	Years	Retriever - Golden	Dog	68	Pound

EON-90101	5/5/2012 11:30	Chicken Soup for the Dog Lover's Soul (Adult)	<p>First dog my house got sick on January 31st, 2012 following a leg amputation that she was recovering great from. She had a loss of appetite, lethargic, uncontrollable diarrhea that was pure blood. We took her to the vet and they put her on Metronidazole and i/d food.</p> <p>Second dog to get sick was on Feb 23rd, 2012 and she had a loss of appetite, lethargic, dehydrated, couldn't hold food or water down (constant vomiting), uncontrollable liquid diarrhea that was pure blood. Dog was given fluids, fecal exam was performed, giardia snap test was performed, Cerenia injection was given, a Chem 17 with Electrolytes and CBC was taken. Blood work showed no underlying disease so Metronidazole, Tramadol, and i/d food were prescribed.</p> <p>From the 2nd incident on we dosed Panacur to all 9 dogs in my house just in case they were passing around a parasite that was causing the illness and that was going undetected in the fecal exams performed.</p> <p>Over the next couple of weeks are dogs still kept getting diarrhea; if they got diarrhea we put them on Metrinidazole and i/d food right away to prevent the progression of the illness. This seemed to help prevent emergency vet visits as the dogs made a quicker turn around. We treated 3 of our dogs in this way.</p> <p>Lastly on April 1st a small breed dog in my house became extremely ill and had to be hospitalized for 24 hours. His symptoms were pointing to a blockage however x-rays and ultrasound revealed nothing and after 24 hours of fluid treatment and a bland diet he was able to come home. While at home he still had diarrhea but that resolved over a couple of days.</p> <p>Because the vets could not figure out was going on we switched dog food brand just in case it was their food making them ill. We were feeding Chicken Soup for the Dog Lover's Soul (adult) up until this point. We switched them off of this brand on April 5th, 2012. For an entire month now we have seen no diarrhea or stomach upset from any of the 9 dogs in my house that were struggling for the previous 3 months. I now just read that Diamond Pet Food has had some issues with Salmonella and I am concerned that my dogs and my family were exposed considering that they are the manufacturer of Chicken Soup for the Dog Lover's Soul. No humans in my house got ill but as you have read my dogs were very ill on and off for 3 months. I can't say for sure it was the pet food but just felt it was important to pass this information along to the appropriate people. It made me suspicious that for the month they have been off of that food they are all healthy now.</p>			Mixed (Dog)	Dog

EON-90100	5/5/2012 10:00	Waggin Train Jerky Tenders	Both my dog and my mothers dog were experiencing uncontrollable diarrhea.The problems started about two weeks ago after buying Waggin Train Jerky Tenders from our local Sams Club. Both dogs are inside dogs in a controlled environment but reside at different homes. This behavior is without a doubt linked to the Waggin Train treats we bought at Sams. The fact that both dogs started having the same issues at the same time is a strong sign the treats are to blame. Once we stopped giving them the treats the diarrhea stopped. Something needs to be done to stop the treats from coming to market. We are both concerned dog owners that just want the best for our dogs. The fact the FDA has not recalled these treats already is a reminder the food chain is to large for the FDA to police and we consumers must fend for ourselves. Please do something about this issue before you loose all credibility.	5	Years	Boxer (German Boxer)	Dog	100	Pound
EON-90099	5/5/2012 9:15	Taste of the Wild High Prairie Canine Formula	Our Great Dane, (b) (6), is usually very healthy. She has mild allergies and can grain foods can upset her stomach. This is why we chose a grain-free dog food. We have been feeding her Taste of the Wild for over a year and she has had zero issues until two weeks ago. Two weeks ago she began showing sighs of not feeling well. She had an abnormal discharge from her vaginal area and has vomited. She is also more tired. Both of our food bags are on the recall list.	2	Years	Great Dane	Dog	110	Pound
EON-90098	5/5/2012 8:30	Taste of the Wild High Prairie Canine Formula	Our Great Dane (b) (6) has always been a very healthy dog. He has never been sick or had an adverse reaction to any food. The week of 30th we noticed that he began to have moderate to severe diarrhea. He was very tired and seemed to be thirsty all the time. We checked our food bags and both of the bags of Taste of the Wild we have are part of the Diamond recall.	4	Years	Great Dane	Dog	135	Pound
EON-90093	5/4/2012 19:00	Chicken Soup for the Pet Lovers Soul Dog Food	After feeding him out of a new bag of Chicken Soup for the Pet Lovers Soul dog food for a few days (we have been feeding this dog food for about 4 months), he got very watery diarrhea. I pulled all food for 24 hours and started back with a bland diet and he was fine after.	13	Years	Shepherd (unspecified)	Dog	35	Pound
EON-90092	5/4/2012 19:00	WAGGIN TRain jerky tenders	(b) (6) WAS DOING FINE UNTIL ABOUT 5 YEARS WHEN THE VET SAID HIS KIDNEY LEVELS WERE ELEVATED. HE WAS STARTED ON AZODYL DOSAGE 2AM AND ONE PM. ALSO DOG FOOD CHANGED TO SCIENCE DIET K/D . MY VETERINARIAN IS (b) (6) (b) (6). PHONE (b) (6) (b) (6) HE WAS GETTING WAGGIN TRAIN CHICKEN JERKY TENDERS AS TREATS ALL THIS TIME. WE JUST WERE MADE AWARE OF THE PROBLEM WITH THESE TREATS WHICH ARE MADE IN CHINA AND THAT THERE HAS BEEN PROBLEMS REPORTED CONCERNING THEM. AS OF 5/4/12 WE ARE DISCONTINUING THESE TREATS BUT WE WANT TO REPORT THAT (b) (6) PROBLEMS COULD HAVE BEEN CAUSED BY THE TREATS	13	Years	Terrier - Bull - Staffordshire	Dog	65	Pound

EON-90090	5/4/2012 18:00	Waggin Train Jerky treat	in 2010, she was diagnosed with kidney failure in a routine wellnes check. At the time, I wondered if there was a cause. There is no history of renal disease in her line. One change had been the introduction of Waggin Train jerky treats to her diet. Her initial symptom was a seizure. Vet check indicated advancing renal failure. She was treated by specialist. Progressively got worse and had to be put down in Feb 2012. May not have been caused by the jerky treats, but I thought it a possibility at the time.	9	Years	Sheepdog - Shetland	Dog	28	
EON-90087	5/4/2012 15:15	Nature's Domain Salmon Meal and Sweet Potato for Dogs	After feeding the Nature's Domain, my dog (b) (6) started to vomit and lose her appetite. She continually vomited and had loose stools and would not eat the Nature's Domain after the second or third day.	14	Years	Jindo	Dog	28	Pound
EON-89863	5/3/2012 15:45	Canyon Creek Ranch Brand Duck Wrapped Big Blast Pork Skin with Liver Center Treats	(b) (6) ingested one Canyon Creek Ranch Brand Duck Wrapped Big Blast Pork Skin with Liver Center treat around 3pm on May 2, 2012. About 10 minutes later she began whining and pacing around. She had diarrhea multiple times in the house, then laid on the floor and smelled very gassy. She started pacing again about 90 minutes later and had diarrhea and urinated outside. She continued to have diarrhea approximately every 2 - 2 1/2 hours overnight and vomited twice. In the morning she was lethargic and she has not had an appetite since eating the treat.	2	Years	Retriever - Labrador	Dog	50	Pound
EON-89808	5/3/2012 13:00	Kingdom Pets Chicken Jerky	I bought two bags from Costco((b) (6)) of that chicken jerky strips made by "KINGDOM PETS" from Newport Beach, Ca. My dogs had runs and vomited within an hour an half , 3 dogs, 90 lbs. ,60 lbs. and 15 lbs dog. Definitely something wrong with that food. I have called Costco and informed their store manager (b) (6) , he said he will talk to their buyers. Someone should do something before it goes to bad. I have been feeding my dogs this chicken for 4 days and could not tell what was wrong. Just found this article by accident this morning. Something like this needs little more publicity. Thank you !						
EON-89807	5/3/2012 12:45	Waggin Train Jerky Tenders	(b) (6) presented for a routine spay on 3-8-2012. Pre-anesthetic bloodwork showed BUN 39 (7-29) and ALT 258 (8-75) both quite elevated, so surgery was delayed. She presented for recheck bloodwork on 5-2-12 and BUN was 72 and ALT was 570. Further discussion with the owner revealed that this dog was eating chicken jerky treats (Waggin Train brand) daily. (b) (6) is drinking and urinating more often per owner. We recommended immediately discontinuing these treats as there has been FDA warnings about them.	6	Months	Shih Tzu	Dog	10	Pound

EON-89725	5/3/2012 9:00	DYNAMIC PET FOOD HAM BONE	BOUGHT HAM BONE FROM DOLLAR GENERAL STORE LABELED MADE BY DYNAMIC PET FOOD PRODUCT #049521510018-105 ON (b) (6). GAVE IT TO MY 6 YEAR OLD AMERICAN BULLDOG. VERY HEALTHY DOG. GAVE HIM THE BONE MINUTES AFTER RETURNING HOME. HE WENT TO BACKYARD AND STARTED CHEWING ON BONE. HOUR OR SO LATER HE WAS VOMITING ALOT IN THE BACKYARD AND PIECES OF THE BONE WAS IN VOMIT. PUT HIM IN GARAGE AND HE WAS VERY LETHARGIC AND HE LAID ON HIS DOG BED. HOURS LATER CHECKED ON HIM AND HE HAD VOMITED ALL OVER BED AND IN GARAGE AND ALSO URINATED ON HIS BED LIKE HIS BOWELS WERE MESSED UP (HE NEVER USES BATHROOM WHERE HE SLEEPS) SO CLEANED IT UP AND TRIED TO HAVE HIM DRINK WATER. THEN THE NEXT MORNING HE WENT TO LET HIM OUT AND HE WOULD NOT MOVE. HE WAS FOAMING FROM THE MOUTH, HE HAD VOMITED ALL OVER GARAGE AGAIN AND URINATED ALL OVER HISSELF AND BLOOD WAS COMING FROM HIS MOUTH. PIECES OF THE BONE WAS IN THE VOMIT AGAIN AND HE STARTED HAVING A SEIZURE. CALLED VET HOSPITAL AND THEY SAID TO WRAP HIM UP AND BRING HIM ASAP. TOOK HIM TO VET HOSPITAL IN CHESAPEAKE VIRGINIA AND HE STARTED SEIZING AGAIN WHILE AT HOSPITAL, THEY PUT HIM ON IV, GAVE HIM FLUIDS TO GET HIM STABLE TO DO BLOOD WORK. HIS GLUCOSE HAD DROPPED TO A DEADLY NUMBER AND THE DOCTOR ASKED WHAT DIFFERENT DID HE EAT AND THE ACTIVITIES THAT LED UP TO HIM BEING SICK. I TOLD HER THE STORY ABOUT THE BONE AND SHE STATED IT COULD BE BONE. COME TO FIND OUT THE NEXT DAY HE WAS DEADLY ILL, PANCREATITIS AND THE BONE COULD HAVE SOMETHING TO DO WITH HIS QUICK ILLNESS. WE HAD TO PUT HIM TO SLEEP ON (b) (6). WENT ONLINE TO READ ABOUT THE BONE AND MANY, MANY PEOPLE HAVE HAD THE SAME ISSUE WITH THIS BONE AND SOME PETS EVEN DIED FROM IT.						
EON-89720	5/3/2012 8:15	Petlac	<p>I am an owner of a few chinchillas. Two of them became mothers recently, one with a 3 months old son and the other with a 10 days old boy. They live in different cages and have different parents, i.e. different environment and different genes. I bought a can of Petlac, a milk replacement product which claims to be suitable FOR ALL ANIMALS, to feed these two chinchilla babies this February. I fed them just twice for the first day. Nevertheless, what I got was contradictory to expectation. The day after feeding them, I found one of them (the 3-months old baby) dead, with his intestine dropped outside his body (which implies a diarrhea, as said by the vet). Then I discovered that my little baby also got the same problem, so I went to the vet and had his intestine put back. Yet it was too late. He only made it to the next night.</p> <p>When I was searching for more information on Petlac, I came across data regarding complaints filed with FDA against PetAg's products. I hence started thinking if PetAg's milk replacement product is the reason for my chinchilla babies' death.</p>	14	Days		Other Rodents	50	Gram
EON-89716	5/3/2012 3:00	Kirkland Super Premium Mature Dog - Chicken Rice and Egg formula	Dog became sick after eating Kirkland Super Premium Mature Dog - Chicken, Rice, and Egg formula. Dog experienced vomiting for several days and loss of appetite. A visit to the vet did not identify any specific illnesses by several medications were prescribed. As the dog's condition worsened - a 2nd vet visit resulted in an IV and additional medications. Dogs condition began to improve at this point and began eating again (different food).	11	Years	Terrier (unspecified)	Dog	40	Pound

EON-89700	5/2/2012 19:15	Diamond Puppy Food	<p>Thankfully, I do not have a personal canine issue to report. I am writing regarding the recent news about Diamond Puppy Food recall that could cause salmonella. My dog has recently stopped eating Diamond Puppy and is now eating Diamond Naturals Adult food. I am very concerned that there is ANY recall on Diamond of any type. I understand that manufacturing has been shut down at the SC plant. Is the plant being investigated by FDA? What safeguards are in place? Is the adult food being processed by the same machinery?</p> <p>I spent a great deal of time/research deciding on which food to feed my Australian shepherd. I purchased top rated food which was more expensive & resulted in negative effects. At this time, my dog appears to be thriving on Diamond Naturals. Of course, I am quite concerned.</p> <p>Please advise. If there is a history of problems with Diamond food, I wish to be informed.</p>						
EON-89699	5/2/2012 19:15	Canyon creek ranch Yam Good chicken filet wrapped yams	<p>Fed (b) (6), a 16 week old Spanish Water dog, 1 Yam Good Canyon creek ranch chicken filet wrapped yam treat to dog on April 15th without incident. Fed a second treat on April 18th and approximately 24 hours later, dog vomitted twice, experienced decreased appetite; decreased activity; diarrhea without blood; and increased urination.</p> <p>Took (b) (6) to the vet on April 19th. Given subcutaneous fluids and bowel rest with nothing to eat or drink x 16 hours. Started Hills gastrointestinal ID canned dog food along with hamburger rice x 2 days with resolution of lethargy after 1 day, vomiting after 1 day, diarrhea after 3 days. Fed another treat. Approximately 15 hours later (b) (6) experienced recurrence of diarrhea. Again bland diet of hamburger rice and gastrointestinal health canned dog food x 3 days with resolution of diarrhea. Again fed 1 treat. Again recurrence of diarrhea with resolution after 1.5 day. (b) (6) symptomatically recovered but have not had blood work done to test for kidney problems.</p>	16	Weeks	Other Canine/dog	Dog	16	Pound
EON-89604	5/2/2012 3:00	WAGGIN TRAIN CHICKEN	<p>The first two dogs were about 15 years old. So, when they had kidney failure I associated it with their age. Then about a month ago, our 5 year old had kidney failure and died. About a week after his death, I was informed that WAGGIN TRAIN CHICKEN TREATS causes kidney failure. Each of our dogs were given about 1 or 2 of them a day for every day that we had them as a treat. I sincerely believe that these treats caused their deaths.</p>	5	Years	Spitz (unspecified)	Dog	16	Pound
EON-89603	5/2/2012 3:00	Waggin Train Chickn Bisquits	<p>Gave my two dogs Waggin Train Chickn Bisquits treats starting Saturday April 28th. By Sunday night, (b) (6) had diarrhea and vomiting. I also noticed that she was urinating frequently. It continued, and I took her to the vets on Tuesday morning (May1). They said she has all the symptoms of Salmonella poisoning. They sent stool samples out to the lab. She is currently on medication to stop the diarrhea.</p>	2	Years	Retriever - Labrador	Dog	101	Pound
